To plead that in ranging herself alongside a nation whose tariff against all other countries is still nearly twice as high as ours, Canada would be taking a step towards free trade is as logical as to affirm that Great Britain would have carried out the principle of free trade if she had formed a zollverein with the United States and kept up her duties against the remainder of the world. To claim that we seek enlarged freedom of trade and to reduce the cost of living and then to deny the application of our own theory except in a Siamese-twin compact with a single country, is self-stultification indeed. We must be bound by our own logic, and we cannot get away from the fact that free trade with one country in any article to the exclusion of other countries is discrimination. Nor can any reasonable person deny that Germany is right in reminding the United States, as she has done, that the admission of free pulp and paper from Canada is a violation of the American agreement with that empire. If the United States breaks faith with Germany as well as with Norway, in this case, it is not the best augury for us.

In conclusion let us face the graver question: Is not the greed of gain, as exemplified in the recent aggressions of the United States upon Spain—using the word aggression in the commercial as well as the military sense—a peril to the republic as well as to Canada? No one can read how the glut of wealth led to the corruption and ultimate ruin of Rome and not think of these dangers to ourselves.

Yours etc.,
E. B. BIGGAR.

Toronto, Sept. 5th, 1911.

* * *

RAILROAD AND COMPANY EARNINGS.

Railroad earnings for week ended August 31st:—

	1910.	1911.	Increase or decrease.
C. P. R.	$2,965,000	$3,329,000	+ $364,000
G. T. R.	1,408,594	1,442,953	+ 34,359
C. N. R.	354,700	460,900	+ 106,200
T. & N. O.	44,831	62,016	+ 17,185
Halifax Electric Ry.	7,130	8,532	+ 1,401

Rairoad earnings for August:—

	1910	1911.	Increase or decrease.
C. P. R.	$8,926,000	$10,073,000	+ $1,147,000
G. T. R.	3,885,049	4,502,674	+ 617,625
C. N. R.	1,093,000	1,420,650	+ 327,650
T. & N. O.	126,418	173,203	+ 46,784
Halifax Elec. Ry.	22,780	25,592	+ 2,810

Earnings of the International Transit Company for the twelve months ending June 30 last have been published, and show increases over the preceding year. Gross earnings have increased 33 per cent., and operating expenses only 16 per cent, with the result that the net earnings now total $36,966, being over two and a half times bond interest. The figures are as follows:—

Gross earnings	$112,588
Operating expenses	75,622
Net earnings	$36,966

The total outstanding issue of 5 per cent. bonds is $280,000, secured by first mortgage on the street railway system, steamboats, real estate, rolling stock, etc., in the City of Sault Ste. Marie, Ont. The bonds fall due serially, $20,000 each July 1st to 1925, and the repayment of these sums is guaranteed by the Lake Superior Power Company, the principal subsidiary of the Lake Superior Corporation and owner of the Helen Mine, the source of the iron ore used by the steel mills of the corporation.

AMERICAN RAILROAD RESULTS.

Average Dividend of Seven and a Half Per Cent.—Some Big Figures.

The preliminary abstract of United States Railway Statistics for the year ended 30th June, 1910, has just been issued by the Inter-State Commerce Commission, and contains much interesting information, from which The Monetary Times has abstracted the following particulars. At the close of the year there was a total single track mileage of 240,400, an increase of 3,600 over that at the end of 1908-9. There was an increase exceeding 100 miles in Arizona, California, Florida, Georgia, Minnesota, Mississippi, Nevada, Oklahoma, Oregon, Texas, Washington and West Virginia. During the year companies owning 8,600 miles of line were reorganized, merged or consolidated.

Par Value of Capital Outstanding.

At the end of the year the par value of the amount of capital outstanding according to the returns of companies was $18,417,132,200. Of this amount, $14,338,575,900 was outstanding in the hands of the public. Of the total capital outstanding, there existed as stock, $8,113,667,400, of which $6,710,168,500 was common and $1,408,488,900 was preferred; the remaining part, $10,303,474,900, represented funded debt, consisting of mortgage bonds, $7,408,183,500; collateral trust bonds, $1,153,499,800; plain bonds, debentures and notes, $933,966,700; income bonds, $290,951,300; miscellaneous funded obligations, $163,532,000, and equipment trust obligations, $353,341,600. Of the total capital stock outstanding, $2,701,078,900 or 33.29 per cent., paid no dividends. The amount of dividends declared during the year (by both operating and lesser companies) was $405,771,400, being equivalent to 7.50 per cent. on dividend-paying stock. No interest was paid on $790,499,300, or 7.94 per cent. of the total amount of funded debt (other than equipment trust obligations) outstanding.

Revenue and Expenditure.

The operating revenue (average mileage operated 237,000 miles) was $2,750,667,400, and operating expenses were $1,822,630,400. The corresponding returns for 1909 (average mileage operated 233,000 miles) were: Operating revenue, $2,418,677,500; operating expenses, $1,599,443,400. The following fiugres present a statement of the operating revenue for 1909-10 in detail:—

Freight revenue	$1,925,553,036
Passenger revenue	628,992,473
Mail revenue	48,913,888
Express revenue	67,190,922
Excess baggage revenue and milk revenue (on passenger trains)	14,733,680
Parlor and chair car revenue and other passenger train revenue	4,412,973
Switching revenue	26,367,214
Special service train revenue and miscellaneous transportation revenue	8,858,215
Total revenue from operations other than transportation	23,778,637
Joint facilities revenue—Dr.	572,875
Joint facilities revenue—Cr.	2,439,272
Total operating revenue	$2,750,667,435

The operating revenue stated above averaged $11,607 per mile of line.

Operating expenses, as assigned to the five general classes were:—

Maintenance of way and structures	$ 368,507,102
Maintenance of equipment	413,109,929
Traffic expenses	55,912,620
Transportation expenses	916,614,826
General expenses	68,485,956
Total operating expenses	$1,822,630,433

The foregoing operating expenses averaged $7,691 per mile of line.

The aggregate of dividends declared during the year, $405,665,363, includes those declared out of current income and those declared from surplus, both by the operating roads and by the leased roads. The aggregate amount of dividends declared includes about $112,000,000, and the aggregate amount of interest accrued, about $28,000,000, payable by various companies to other steam railway companies reporting holdings of their securities.

Passenger and Freight Traffic.

The number of passengers carried was 971,683,199, and the corresponding number for the year ended 30th June, 1909, was 891,472,425, the increase being 80,210,774. The number of passengers carried one mile, as compiled for 1910, was 32,338,496,329. The corresponding return for 1909 was 3,229,173,740 less. The number of passengers carried one mile per mile of road was 138,250. The number of tons of freight shown as carried (including freight received from connections) was 1,849,900,101, while the corresponding figure for the previous year was 1,556,559,741, the increase being 293,340,360 tons. The number of tons carried one mile was 255,016,910,451. The total ton mileage as reported for the year ended 30th June, 1909, was 218,802,986,929, giving an increase in 1910 of 36,213,923,522. The increase in the number of tons carried one mile in 1909 over 1908 was 421,432,127. The number of tons carried one mile per mile of road for the year 1910 was 1,085,745. The average receipts per passenger per mile were 1.938 cent; the average receipts per ton mile, 0.753 cent. The passenger service train revenue per train mile was $1 30.396c.; the freight revenue per train mile was $2 86.218c. The average operating revenues per train mile were $2 24.628c. The average operating expenses per train mile were $1 48.865c. The ratio of operation expenses to operating revenues was 66.29 per cent.

◆

WORLD'S PRODUCTION OF PIG IRON.

Messrs. James Watson & Company, of Glasgow, Middlesborough, Liverpool, and Swansea, have issued the following figures showing the world's production of pig iron in 1910:—

	1910—Tons.
United States	27,298,545
Germany	14,793,325
Great Britain	10,216,745
France	4,032,459
Russia (estimated)	2,956,000
Austria and Hungary	1,990,684
Belgium	1,803,500
Sweden	604,300
Spain	425,000
Canada	740,210
Italy	343,600
Japan (estimated)	162,000
India	35,933
China	120,000
Mexico	45,000
New South Wales	40,487
Total	65,607,788

The total for 1910 shows an increase of 5,242,008 tons as compared with 1909, and an increase of 17,433,000 tons as compared with 1908.

◆

ONTARIO MUNICIPAL ASSOCIATION.

The distribution of the profits of municipally-owned utilities was discussed at the recent meeting of the Ontario Municipal Association held in Toronto. That a public utility should remain a commercial venture and be managed in a way that would assure profits of at least five per cent., was the opinion of Ald. Richter of London. He favored the establishment of a sinking fund that would be increased until large enough to replace the public works when necessary. All the residents benefited from the utilities and it was only fair that they should all contribute to a sinking fund for renewals, instead of the taxpayers alone. He was opposed by Mr. Charles Gordon of Owen Sound, where all utilities are publicly owned. Mr. Gordon believed that the benefits should be for all the people, and the rates reduced as low as possible. Mayor Guest of St. Thomas also wanted water and gas sold at cost, but these opinions did not meet with the full concurrence of the meeting.

Mr. A. K. Bunnell, the city treasurer of Brantford, proposed the establishment by the provincial government of a portfolio on municipal affairs. This department should have the adjusting of rates and municipal auditing and other regulations under its control.

The following officers were elected:—President, Controller F. S. Spence of Toronto; vice-presidents, first, Mayor Beattie of London; second, Mayor Fred Guest of St. Thomas; third, Mr. W. A. Clark, clerk of York County; fourth, Mr. W. Law, county clerk of Huron; fifth, Mr. W. H. Schmalz, mayor of Berlin; executive committee, the mayors of Toronto, Hamilton, and Owen Sound, City Solicitor Doherty of St. Thomas, City Solicitor Johnson of Toronto, Clerk Kent of Hamilton, Reeve S. F. Glass of London Township, City Treasurer Bunnell of Brantford, Alderman Richter of London, Mr. E. A. Hugell, secretary of the rural section, and Ald. Stroud of London.

GENERAL ACCIDENT COMPANY'S AFFAIRS

At United States Branch Are Being Settled—Mr. F. Norie-Miller Gives an Assuring Interview.

Matters in connection with the affairs of the General Accident Fire and Life Assurance Corporation in its Philadelphia office are gradually being settled. As stated in The Monetary Times last week, Mr. Franklin J. Moore has been dismissed as manager of the American branch, together with certain subordinate officials. This was the first result of a report by the New York State Insurance Department on an examination of the company's American business.

Mr. John A. Kelly of the New York firm of Kelly & Fuller, and Claude Norie-Miller have been appointed joint general managers of the United States branch. Included among the officials at the head office in Philadelphia are Mr. F. Norie-Miller, the general manager; Mr. James Simpson, solicitor from the home office, and Mr. J. J. Watson, assistant secretary.

The Rt. Hon. Earl of Dunmore, chairman of the Board of Directors of the company at the home office at Perth, is also among the officials at the Philadelphia office engaged in making an investigation of its affairs.

With Equity and Justice.

"The General Accident," said Mr. F. Norie-Miller, the general manager of the company, in an interview, "can be relied upon to deal with all phases of this matter with equity and justice. The high standing which the company enjoys abroad and in other foreign lands has been founded on its determination to do that which is right and fair, and it intends to do the right thing here, although we do not feel we should make a complete surrender of all our rights in meeting the recommendations that have been made to us.

"The cancellation of the contract of our former manager, Franklin J. Moore, was in full accord with the terms of our agreement with him, and came as a logical result of circumstances covering a long period of time, disclosing that the United States branch under his management had not been conducted to our satisfaction.

Until Further Advised.

"There has, so far, been no definite action taken by the company upon the recommendations of the Insurance Commissioners in regard to Mr. and Mrs. Boyer, nor will there be until we are further advised by the commissioners that such recommendations are the statutory act of each commissioner acting for each individual State. Officials of the company have in the investigation found nothing to justify Mr. Boyer's being penalized to the extent recommended by the commissioners. Such abuses as have crept into the claim settlement methods and which are not unusual or unlikely with a business still in its evolutionary state, will be corrected.

"We are not unmindful of the fact, however, that criticism after a most exhaustive investigation has focused itself on comparatively few claims out of over 100,000 claim settlements, and considering the character of the insurance, and the fact that companies in turn are constantly harassed by many unfair claimants who seek to take advantage of the company, the showing disclosed here is not so glaring as would at first thought appear.

"But whatever the conditions are it can be depended on that the company will sift the facts to the bottom and apply the remedy effectually. Its patrons may rely upon being treated fairly in America, just as its clients are in every other part of the world, where the name of the "General" ranks high as the synonym of liberal and generous treatment of its assured."

Mr. Claude Norie-Miller, joint general manager, is the son of general manager F. Norie-Miller, and was manager of the Canadian branch of the General Accident Corporation, the headquarters of which are at Toronto. He was born in Scotland twenty-nine years ago, and completed his education at Glenalmond College near Perth. He started his business experience in Philadelphia with the head office of the company in the United States, where he remained a year, and was later transferred to the Paris office, devoting the next year and a half to the agencies of the company in France and Continental Europe.

He was appointed joint manager of the General Accident Corporation in Canada in 1906, and early in 1910 was made sole manager, Mr. W. G. Falconer, his associate having been appointed manager of the Melbourne branch.

Of the New Man.

Mr. John A. Kelly, the new joint general manager of the United States branch, is a member of the New York firm of Kelly & Fuller, and a widely known fire underwriter throughout the United States. He was born near Manchester, England, in 1861, and commenced his insurance career with the Northern Assurance Company in 1882 as special agent for the states of New Jersey and Pennsylvania, and later for the states of Ohio, Indiana, Kentucky, Tennessee and West Virginia. A few years later he resigned to accept a similar position with the Queen, in which capacity he continued until 1891, when he joined the force of the Scottish Union and National, representing it as special agent in the states of Ohio, Indiana, Kentucky and Tennessee.

In 1893 he was called to Hartford, and appointed general agent of the company, and in 1900 was appointed superintendent of agents. In 1902 he removed to New York and was appointed manager of the Fire Association. Two years later he became associated with Samuel P. Blagden, organizing the firm of Blagden, Kelly & Co., and later Blagden, Kelly & Fuller, the firm being dissolved by the death of Mr. Blagden in 1907, and was thereafter continued under the name of Kelly & Fuller, representing the Fire Association, the Boston, and a number of other companies. Mr. Kelly is president of the Franklin Insurance Company of Washington, D.C., a director of the Old Colony of Boston, the Michigan Commercial of Lansing, the Potomac of Washington, and the Western Reserve of Cleveland.

Notes of the Suit.

In the meantime, the suit of Mr. J. C. Steinbach against Messrs. W. H. Hotchkiss, Superintendent of Insurance of New York State, L. S. Senior, his examiner, and Franklin J. Moore, former manager of the General Accident, charging conspiracy wrongly to deprive him of his position, is attracting attention. Mr. Steinbach was dismissed by the company as a result of the insurance commissioner's report. Mr. W. W. Smithers, the counsel in the case, has been instructed to inquire whether Steinbach cannot also recover damages against the Convention of Insurance Commissioners on the ground that they constitute a legal partnership and engage in an unlawful act contrary to the Federal law in demanding Steinbach's dismissal, as an employe, the case being somewhat parallel to that of the Danbury Hatters' Union case, in which the Union was held in heavy damages.

FRANKLIN J. MOORE,

Who has been dismissed as United States manager of the General Accident Assurance Company, by the home office officials, following a report of the New York State Insurance Department on the company's American affairs. Mr. Moore claims that the report praises rather than blames him. His salary was $20,000 a year with about $4,000 commissions.

Mr. Steinbach, prior to filing his suit, sent the following telegram to Superintendent Hotchkiss: "I have been today dismissed from my employment by General Manager of General Accident Company. I am a cripple without fingers on one hand, suffered accidentally and unable to take a pick and shovel, have a wife and children. I am told that this is done by your demand. Is a born American citizen to suffer thus for no fault of his own and without a hearing on any charge? I appeal to you as a fellow man to recall your demand on the company."

What the Lawyer Says.

Mr. Alexander Simpson, Jr., another lawyer, has been retained to join with Mr. Smithers in pressing the suit, inasmuch as the latter will have to become a witness. Speaking of this case, Mr. Smithers says:—

"The laws of Pennsylvania give ample redress in cases of this kind, and the laws of New York are drastic also. Ordinarily, I would not discuss a client's case, but in this the wrong is so flagrant and has been so long in culmination that I feel I can discuss it freely. It is such a flagrant invasion of the rights of a man as an American citizen that I am happy to go into it. When a man is discharged from his position without cause by the pressure of outsiders, when not a thing has been found against him by his employer, then it is time something should be done."

IMPORTANT DEVELOPMENTS IN LIFE INSURANCE ARENA

Control of Home Life Passes to Union Life—New York Syndicate Wishes to Purchase the Federal Life

Some interesting changes are being effected in Toronto life insurance spheres. These include a transfer of control of the Home Life Association of Canada to the Union Life Assurance Company, the concentration of control of the Federal life of Hamilton with Messrs. Cawthra Mulock & Company, and a search by a New York syndicate for a Canadian life insurance company. There have been innumerable rumors as to the possible insurance amalgamations, but to the present the above facts gathered by The Monetary Times seem to supply the foundation for those stories.

At a recent meeting of the Home Life Association of Canada, Hon. J. R. Stratton, president, and Messrs. Karn, Rolph and Burns resigned. Their positions were filled by Messrs. H. Pollman Evans, of the Union Life, who will become the new president of the Home Life; W. H. Carrie, H. Symons, K.C., and Dr. G. E. Millichamp. The two last named gentlemen will act as vice-presidents, while Mr. J. K. McCutcheon will continue as managing director, and Mr. A. J. Walker as secretary. For the present it is said that the Home Life will be conducted as a separate company as heretofore, though what chance there is for an amalgamation remains for the time being as a matter of conjecture.

To Secure the Stock.

The old directorate of the Home Life was as follows: Hon. J. R. Stratton, president; Messrs. J. S. King and J. L. Hughes, vice-presidents; D. W. Karn, Woodstock; J. K. McCutcheon, J. J. Warren, J. W. Lyon, Guelph; C. Turnbull, Galt; and D. D. Broadfoot, Regina. There were advisory directors in various Western cities.

At the end of December, 1910, the company's authorized and subscribed capital was $1,000,000, of which $219,200 was paid up. According to the last annual statement, the total insurance in force was $5,872,690. The net reinsurance reserve was $1,047,564. There were death claims awaiting completion, $4,500. The assets included bonds and debentures $286,620; first mortgages on real estate, $497,815; loans and liens on policies, $169,798; real estate, $158,893; and cash, $82,489. The cash premiums received totalled $210,686.

It has been stated for some time that quiet efforts were being made to secure the stock of the Home Life. The change of control is apparently the result.

Union Life Figures.

The Union Life had on December 31st, 1910, authorized capital of $2,000,000, of which $628,500 had been paid up. The company issued £205,761 in $100 shares in the London market in July, 1910. In addition to Messrs. Evans, Millichamp, and Symons, the following are directors of the Union Life:—Messrs. F. G. Hughes, Galt; C. J. Harvey, Jersey City, N.J.; Lt.-Col. G. E. Allan-Jones, Quebec; and W. H. Carrie. The Union Life has also an advisory board for the Maritime Provinces. The total sums insured on December 31st, 1910, were $18,134,801. The surplus to policyholders was $493,178. The head office and branch expenses amounted to $545,596, and payments to policyholders, $107,923. The net premium income, less insurance, was $530,417. The assets included municipal debentures, stock and bonds, $140,870; first mortgages on real estate, $262,039; loans on securities, $340,129; loans on policies, $40,188; cash, $174,975.

The list of shareholders as at December 31st, 1910, has not yet been issued in blue book form by the Department of Insurance at Ottawa, and one is, therefore, compelled to examine the list as at the end of 1909. The shareholders at that date with subscribed stock of $10,000 and over were as follows: T. W. Body, Windsor, $20,000; J. Cowan, Portage la Prairie, $22,700; W. S. Ellis, Kingston, $10,000; Jacob Hose estate, Rat Portage, $10,000; J. Maynard, Victoria, $10,000; J. K. McCutcheon, in trust, $23,200; J. K. McCutcheon, $5,800; and J. K. McCutcheon, $55,600; (at the end of 1910 there was nothing paid up at that amount); J. H. Spencer, Medicine Hat, $10,000; Hon. J. R. Stratton, $5,000; Hon. J. R. Stratton, in trust, $81,200.

Names of Shareholders.

At the same date the shareholders of the Union Life were as follows: W. H. Carrie, Toronto, $2,500; H. Pollman Evans, Toronto, $2,500; C. J. Harvey, New York, $2,500; F. G. Hughes, Galt, $2,500; G. E. Allan-Jones, Quebec, $2,500; G. E. Millichamp, Toronto, $2,500; H. Symons, Toronto, $2,500; and the National Agency Co., Ltd., Toronto, $982,500.

It was in February, 1911, that The Monetary Times gave details of the change of control of the Federal Life Insurance Company by the purchase of a considerable quantity of stock by Toronto financial interests.

Of the old directors all save three retired. Those who did not offer themselves for re-election were: Hon. J. M. Gibson, Hon. Geo. E. Foster; Lieut.-Col. W. Kerns, Burlington; Rev. J. G. Scott, Ingersoll; Mr. E. A. Russ, M.A., Woodstock; Rev. Dr. J. Wakefield, Toronto.

Change in Federal Life.

The directors chosen were:—Mr. David Dexter, president and manager; Dr. M. H. Aikins, Burnhamthorpe; first vice-president; Mr. T. C. Haslett, K.C., Hamilton, a representative of the policyholders, second vice-president; and Messrs. D. A. Dunlap, Toronto; J. B. Holden, Toronto; J. I. Grover; C. Wurtele, Toronto; R. G. O. Thomson, Toronto; and W. G. Watson, Toronto, representing the stockholders. Messrs. F. G. Howell, F. F. Dalley, J. Lennox, and T. C. Haslett, K.C., representing the policyholders. Dr. M. H. Aikins succeeds Lieutenant-Colonel Kerns. Mr. C. Wurtele is associated with Messrs. Cawthra Mulock & Company, and Mr. R. G. O. Thomson is with the Guardian Trust Company, which is controlled by Messrs. Cawthra Mulock. It is generally understood that Messrs Cawthra Mulock & Company have control of the Federal Life.

The Federal, with its head office at Hamilton, had at the end of last year authorized and subscribed capital of $1,000,000, of which $130,000 had been paid. There was then a reserve fund of $3,656,001, and death losses awaiting proofs of $29,032. The premium and annuity income totalled $767,460. The assets included debentures and bonds $1,601,399; mortgages, $961,552; and loans on policies, bonds, stocks, etc., $703,582.

Bid for the Federal.

At the same date the following had subscribed $10,000 of stock or more:—M. H. Aikins, Burnhamthorpe, $20,000; W. H. Austin estate, Trenton, $10,000; H. W. Aikins, Toronto, $15,000; Mrs. A. D. Aikins, Cleveland, Ohio, $10,000; S. Cummings, Hamilton, $10,500; David Dexter, $68,400; David Dexter, in trust, $295,200; T. C. Haslett, Hamilton, $58,000; W. Kerns, Burlington, $59,200; Rev. S. Might, Smith's Falls, $10,000; T. H. MacPherson estate, Hamilton, $20,000; Mrs. M. J. O. McCutcheon, Toronto, $33,500; Mrs. Z. R. McDonald, Hamilton, $10,000; Rev. J. G. Scott, Ingersoll, $59,000; Mrs. H. A. Sutherland, Toronto, $15,700; Rev. R. Whiting, estate, Kingston, $10,000; A. Wolverton, Hamilton, $54,300; Mrs. I. Willson, Toronto, $14,300; F. C. Willmot, Milton, $10,000.

Since Messrs. Cawthra Mulock obtained the control of the Federal Life Company a former Toronto banker, still resident in that city, approached Messrs. Mulock on behalf of a New York syndicate with the object of securing the Federal. The agent of the syndicate was told to make an offer. That is where the matter stands at present, although the chief owners of the Federal do not seem anxious to sell.

◆

As briefly noted in these columns last week, a London cable message tells of the flotation of the Anglo-French Financial Company of Canada, which was recently incorporated under the laws of the Dominion with a capital of $2,500,000. The new company is said to represent the interests of some of the most successful groups in England. These include the present South Africa groups, notably the Hirsch System, which includes Mr. Otto Beit, the Neumanns and other millionaires; Messrs. Haes & Sons, of the London Stock Exchange, and their associates.

The president of the new company is Mr. Frederick Baker, chairman of the Hirsch group. Mr. Norton Griffiths, member of parliament, is vice-president.

Amongst the other directors of the new company are Mr. Evelyn Cecil, member of parliament; Mr. Almeric Paget, member of parliament, and Harry Brittain, who is known in Canada.

The Anglo-French Financial Company of Canada has appointed Mr. O. O. Howard as its Canadian manager, with offices at Vancouver and Montreal.

NEW BRUNSWICK FIRE INSURANCE ACTS.

Penalties for Agents and Brokers—Enforcing Collection of Taxes—Synopsis of Amendment.

The following is a synopsis of the New Brunswick Fire Insurance Acts, passed last March:—

The attention of insurers is directed to the fact that under a policy issued by a company not holding a license from the Dominion Insurance Department and which has not paid its New Brunswick Provincial tax, or under a policy of any company not signed by a registered agent resident in New Brunswick there will in case of loss, be great difficulty, if, indeed, it will not be quite impossible, to get the loss adjusted or appraised, as the adjuster or appraiser, or any person acting as such, whether he is a regular adjuster or appraiser, or not, would make himself liable to the heavy penalties mentioned below under the head of adjuster and appraiser.

Companies not Holding Provincial License Must Pay Tax.

Companies should note that: 1. The legislation referred to applies to all companies, corporations, associations, firms, partnerships or individual underwriters or associations of underwriters formed upon the plan known as Lloyds.

2. Companies with head offices outside the province not holding a license from the Dominion Insurance Department will in future have to pay double the usual tax, namely, $200, and 2 per cent. on their net premium income in the province.

3. The above mentioned tax in the case of unlicensed companies is collectable from "any agent or broker by or through whom any application was solicited, written, accepted or forwarded, or by or through whom any policy, interim or renewal receipt" of such unlicensed company "was issued, signed, countersigned or delivered or from or against any adjuster or appraiser acting . . . . on behalf of such company." Property protected by standard automatic sprinkler equipment is excepted.

4. The names of all agents with authority to sign or countersign policies for any company must be registered with the Receiver-General. They must be residents of New Brunswick.

5. All policies on New Brunswick business must be signed or countersigned by an agent resident in New Brunswick previously registered by the company as its agent. Insurance on sprinklered property only excepted.

Policies Must be Signed and Countersigned.

6. The penalty for issuing a policy on property in New Brunswick not signed or countersigned by an authorized agent of a company resident in New Brunswick as above is not less than $200 or more than $500.

7. Information can be laid by anyone, and if a penalty is imposed half of it goes to the informer; prosecutions are tried under Part XV. of the Criminal Code; service on an agent is deemed to be service on the company; the policy is deemed to be a contract made in the Province no matter where written; and funds of the convicted company in the hands of any agent are liable to execution for amount of the penalty and costs.

8. The Receiver-General may not accept taxes from or issue permit for the year following a conviction to a company convicted of any violation of the Act and the penalty for writing insurance on New Brunswick property if permit is refused is $500 to $1,000.

9. The section providing that agents shall, if required, make a return of their net premiums for the previous year does not supersede the requirements of Chapter 18 of the Consolidated Statutes that companies shall make returns of the net premiums collected on New Brunswick business. It is not intended that agents shall make returns provided for in the new legislation unless they are asked for them by the Receiver-General.

Penalties for Agents and Brokers.

Agents and brokers should note that: 1. If they are non-residents of the Province they must pay an annual license fee of $100 to the Receiver-General.

2. If they do not they are liable to a fine of $100 and $10 additional for every day they have engaged in insurance business in New Brunswick.

3. If they write business for a company that is not licensed by the Dominion Insurance Department and which has not paid its Provincial tax they are personally liable for the Provincial tax of $200 and 2 per cent. on net premiums.

4. All policies must be signed or countersigned by a resident of New Brunswick registered as an agent by the company issuing the policy.

Adjusters and appraisers should note that:

1. If they adjust or appraise a loss on a policy not signed or countersigned as before mentioned they are liable to a fine of from $100 to $200.

2. If they adjust or appraise a loss for a company that is unlicensed by the Dominion Insurance Department and that has not paid its Provincial tax they make themselves liable to be called on to pay the Provincial tax of the company amounting to $200 and 2 per cent. of the net New Brunswick premiums besides the $100 or $200 penalty mentioned in the last section.

Synopsis of Amendment.

Amendment to Chapter 18, Cons. Stats. 1903.

Sec. 1. Taxes extra-provincial companies, associations of Lloyds, etc., unlicensed by the Dominion Insurance Department $200 and 2 per cent. of net premiums. Sec. 2. Makes agents, adjusters and appraisers of unlicensed companies, etc., liable for unpaid taxes of such companies, etc. Sec. 3. Has to do with banks.

Act taxing certain Fire Insurance Agents. Sec. 1. Taxes agents not resident in New Brunswick $100 per annum. Sec. 2. Provides that tax shall form part of revenue of Province. Sec. 3. Imposes penalty of $100 and $10 a day on non-resident agent who has not paid tax. Sec. 4. Agent paying taxes shall receive certificate and notice of issue of same shall be published in the Royal Gazette. Payment of tax entitles agent to do business for one year only. Sec. 5. Declares proof of person soliciting insurance shall on hearing of information be prima facie evidence of violation of provisions of Act, putting onus of proving payment on accused; production of certificates shall be evidence of payment.

Enforcing Collection of Taxes.

Act for better enforcing collection of taxes under Chap. 18, Cons. Stats., 1903. Sec. 1. Defines "Company" and "Policy." Sec. 2. Declares that acceptance by Receiver-General of taxes authorizes company to transact business in New Brunswick until following 31st May. Sec. 3. Provides that Provincial Secretary may not accept taxes for following year from company convicted of violation of provisions of Act. Sec. 4. Imposes penalty of from $500 to $1,000 on company issuing policy during year after refusal of taxes. Sec. 5. Provides that companies must register names of all agents authorized to sign or countersign their policies; agents must be residents of New Brunswick. Sec 6. Imposes penalty of $200 to $500 on company that issues policy not signed by registered agent. Sec. 7. Requires certain agents to send returns of net premiums to Receiver-General if asked for them. Sec. 8. Makes adjusters and appraisers liable to a fine of $100 to $200 for adjusting or appraising loss on policy not signed by registered resident agent. Sec. 9. Provides that anyone may lay information, that half the fine shall go to the informant and half to the Province, that prosecutions are to be tried under the Summary Convictions Act, that service on an agent shall be deemed to be service on the company, that a policy on New Brunswick business shall be deemed to be a contract made in New Brunswick, and that funds of a convicted company in hands of an agent shall be liable to execution for amount of penalty and costs.

◆

INSURANCE ON FRONTENAC HOTEL.

The loss on the Hotel Frontenac at the Thousand Islands is estimated at 80 per cent. of the general form insurance. The main hotel and contents were totally destroyed. The annex and contents, men's dormitory and yacht club house were badly damaged. The insurance under general form is as follows:—

Nor. Br. & Mer.	$ 8,500	Ins. Underwriters ..	$ 2,500
Northern, London ..	12,000	Pacific of N. Y.	2,500
Continental	7,500	Royal Exchange ...	5,000
Citizens, Mo.	5,000	Hartford	15,000
Connecticut	5,000	Home of N. Y.	15,000
Aetna of Conn.	10,000	Liv. & Lon. & Globe	20,000
Orient of Conn.	7,500	Niagara	5,000
Sun Ins. Office	10,000	Boston Ins. Co.	5,000
German-American ..	1,500	American, Newark..	5,000
National Union	10,000	Fidelity Underwriters	7,500
Hanover	7,500	National, Hartford ..	20,000
Pennsylvania	2,500	Agricultural	5,000
Globe & Rutgers ...	5,000	German-American ..	7,500
Fidelity-Phenix	5,000	People's National ...	2,500
Hamburg-Bremen ..	2,500	Phoenix, Hartford ..	17,500
General of Paris ...	5,000	Philadelphia Und. ..	3,500
Stuyvesant	5,000	Hamilton	1,500
Total			$249,500

Loans on Life Insurance Policies.

(Concluded.)

The year 1910 cannot be said to have been fraught with any financial unrest, for this reason; the ratio of loans to assets may be considered as perfectly normal with nearly all companies. The experience of 1910 proves conclusively that many a company is absolutely precluded from investing its assets representing its reserve in securities of the character initially contemplated by contracts which are predicated upon the predetermined and measureable law of mortality.

The amounts to be loaned from year to year have been absolutely incalculable upon any experience. A multiplicity of causes and circumstances which no one could foresee, have determined the amount which a company has loaned in any given year. These facts have required the companies, which have loaned in large amounts to policyholders, to keep large sums in liquid or negotiable assets, drawing a low rate of interest, whereas, the funds should have been invested in the most profitable as well as the most stable securities obtainable. To the extent that the loan privilege in a policy hinders a company in investing its funds as it ought, to the same degree it impedes a company in performing its primary function, that of insuring lives.

Legal Reserve Shows Large Increase.

So far the loan privilege has, possibly, not "eo ipso" jeopardized any insurance company in carrying out the purpose for which it was organized, but consider; in eight years the ratio of policy loans to assets in our legal reserve companies has increased from 5½ per cent.. to nearly 11½ per cent. What can we expect in the future?

Initially, the contraction of credit manifests itself in the large commercial centres. The banks call their loans and the debtor turns to his insurance policy for relief. Ordinary stringencies in the money market have been local in their effect and the companies have met the demands made upon them by utilizing their income from the country districts, which have not been affected by panics. But with the tremendous growth of our large cities, the proportionate number of policyholders of any one company affected by a financial crisis has grown. In 1890 the inhabitants of cities in the United States, of 25,000 and over, constituted 226 per cent. of the entire population of our country. In 1900 the percentage had increased to 25.9 per cent. and in 1910, to more than 31 per cent. In addition to this vast increase of population in our cities, which have heretofore most keenly felt the effects of panics, we are now confronted with another situation. With the increased facilities of communication, by telegraph and telephone, between the smaller cities and the great money centers, and with the rural free delivery of mail leaving a daily paper at nearly every farm house, a correspondingly accentuated interest is felt in the small cities and in rural districts, in the stability of our financial institutions located in large cities. It is a matter of history that each succeeding panic has become less and less local, and more and more universal and far-reaching in its scope.

Loans on Policies and Panics.

We have observed the impetus given the policy loan practice by the panic of 1907, the effects of which, so far as insurance companies are concerned, were largely confined to the cities. Yet the panic of 1907 was felt more keenly in the smaller cities and villages than any previous panic, excepting of course, those followed by long periods of hard times. We can all recollect how, in 1907, the banks throughout the entire country refused to meet demand obligations, and how savings banks universally took advantage of the ninety days notice, to which they were entitled.

Suppose then, in the future, during some financial crisis, that the integrity of some important life insurance company were called into question. The intelligence heralded through the columns of the daily press, reaches every hamlet in the country. Grant that no days of grace are given the company within which to prepare for the demand for loans and surrender values. The wires are hot in every part of the country and a frightened public is clamoring for whatever it can get. The company must either "sit tight" or go into a breaking market and sell its securities at a loss. A company in this predicament, having the "demand clause" in its outstanding policies, would no doubt choose the former, refuse to fulfil its obligations and simply wait until it could make its loans from a normal income. Following the second course, and disposing of the company's loans, would, undoubtedly, result in the wiping out of its surplus. Every one knows what the result would be, if a dozen of our leading companies were obliged to take this action. Herein lies the danger of containing the so-called "demand clause" in a policy.

Real panics recur in cycles of about fifteen years. With a strong popular demand for a thorough revision of the tariff and with chances a little better than an even break that we will soon have a radical National Administration, it appears safe to predict that a genuine panic, with hard times, is in store for us in the no distant future.

National Convention Condemns Practice.

Knowing the truth of the adage, "In time of peace prepare for war," the National Convention of Insurance Commissioners in 1909 saw fit to condemn the practice of loaning on demand to policyholders in the following terms: "Resolved, That in the judgment of this convention the practice of life insurance companies obligating themselves under contract to make loans to policyholders on demand is unwise, unbusinesslike, and dangerous."

In its action the convention might have proceeded a step further and gone on record with a recommendation for the passage of laws in the various States forbidding the issuance of policies containing a "demand clause," and providing that in all instances the company must provide in its policies that it may avail itself of ninety days notice. No one questions the advisability and necessity for the sixty or ninety days saving clause with which savings banks guard themselves. Experience has shown that banks can only be safely conducted where the cash reserves are equal to those funds of the institution which are subject to call on demand. An insurance company undertaking to loan on demand a sum on every policy outstanding approaching the amount of the reserve on such policy, is not only encroaching on the realm of banking, but is subordinating its true function of protecting families in order to assist speculators and indiscreet citizens, and thus steering its craft upon an uncertain sea. The time has gone by when we would think of asking for the termination of the policy loan practice, but there is no reason why this feature of a policy should be permitted to destroy the purpose of the insurance contract, or why the "tail should wag the dog."

Primary Function of Company is to Pay Death Claims.

When loans are secured by a policyholder for the purpose of paying premiums, no one any longer questions his right or the wisdom of permitting him to do so. Public opinion demands that he be given the privilege. But the placing of a premium upon a man's investment in an insurance policy by loaning him money at a rate of interest lower than he can get in the open market, or furnishing him with cash on demand, thereby tempting him to speculate, is as pernicious as the former is meritorious.

The primary function of an insurance company is to pay death claims. Money loaning is subordinate to this function and should not be permitted to demoralize the business. Insurance men should jealously guard the dignity of their profession and see that the truest and purest purpose of their work be kept inviolate.

An insurance company should derive its strength from its ability to protect families, and should not permit itself, like an evergreen, to be cut off at the root, so that with artificial trimmings and brilliant decorations it may dazzle for a moment, only to be thrown on the scrap heap when the Christmas days are over.

However, the insurance companies are not, in the last analysis, to be blamed for such a state of affairs. In these days of keen competition, with the insurance business as highly commercialized as any, companies are frequently driven by sheer necessity to do those things which the best judgment of its managers would condemn. Without a combination with other companies which might by a court be construed to be illegally in restraint of trade, a company might find itself utterly powerless to resist or rectify the evil.

It is incumbent upon the Commissioners, whom the Legislatures so constantly advise with, relative to insurance legislation, that the dangerous and pernicious practice of loaning money on demand be discontinued, by legislative act. In Minnesota a policyholder can, after his policy has been in force for a period of three years, demand whatever loan value his policy provides for. The policy may stipulate that such loan may be deferred for a period not exceeding six months; but such a clause is not obligatory, and there is no prohibition against the demand clause if desired.

Policies Should Provide Days of Grace.

A protective provision in the loan clause of the policy, to the effect that an insurance company may take thirty, sixty, or ninety days, within which to furnish money to one desiring a loan, does not mean that loans will not be made on demand. The contrary was shown in the panic of 1907,

(Continued on Page 1154.)

MODERN FIRE WASTE

By James Hedley.

(Concluded.)

According to Mr. W. Fitzpatrick, consulting architect, Washington, there are in the United States more than 11,000,000 buildings, whose value is something like $14,500,000,000. Out of this number there are but 4,000 whose authors even claim as at all fire-proof.

According to a recent compilation, two billions' worth of property has gone up in smoke in the United States in the last twenty-one years. The number of fires causing this loss was 369,298—or say, 17,585 every year.

Of this destruction, 73,328 fires, costing $216,179,000, were caused by carelessness. Thus:—

2¼	per cent.	Careless use of matches.
2½	" "	From stoves and stove-pipes.
2	" "	From oil stoves.
1	" "	Candles and gas jets.
1	" "	Ashes, hot coals, fire-places.
4½	" "	Lamp accidents or explosions.
5½	" "	Defective flues and smokestacks.
1	" "	Fireworks.
1	" "	Cigarettes.
20¾	" "	of the whole number attributable to these specified forms of carelessness, $216,000,000 being the amount lost.

Progress is being made in the United States in reducing the fire waste through fire marshal laws. In 1905 the fire marshal system was in operation in thirteen States; four of them New England States, six of them Southern. The testimony from North Carolina is that the law has been very satisfactory in lessening the fire waste and reducing insurance rates. In the State of Maine incendiary fires were reduced from 8.64 per cent. in 1895, steadily year by year, down to 1.10 per cent. in 1904, while fires from unknown causes were in the same period reduced from 33 per cent. of the whole to 30½ per cent.

As long ago as 1895 Mr. Charles W. Whitcombe, fire marshal for Massachusetts, had begun his labors. During 1897 there were 56 arrests and 41 convictions for arson under the Act, and in that year the percentage of incendiary fires in Boston was only 3½, where in former years it had ranged from 18 to 35 in the State at large. In 1897 or 1898 one-third of the total number of incendiary fires were set for the purpose of defrauding insurance companies, 9 per cent. from motives of revenge, 2 per cent. from insanity, 1 per cent. from pyromania.

Fire Marshal Reduces Fire Loss.

The Ohio fire marshal began his work in 1899. Five years thereafter, namely, at the close of 1903, he says: The average annual fire loss of the State is $7,000,000, the result largely of ignorance, carelessness, and incendiarism. Of 999 "unknown" losses 449 should be termed incendiary. The number of such losses occurring in 1901 was 292; next year it was 222; and the next year only 190. The motives of 689 incendiary fires in that State were classified as follows:—

To defraud insurance companies	468
For revenge or malice	110
Mischievous boys	36
Pyromaniacs	29
Intoxicated persons	28
To avoid or secure work	18

The number of fires investigated in 1903 was 1,664. In connection with these there were:—

Persons arrested charged with arson	91
Fled State before arrest	5
Were bound over to grand juries	46
Were indicted	76
Acquitted	12
Convicted	36
Committed to asylums	9
Pending trial at this time	27

To Lessen Fire Waste Duty of the State.

The Fire Bureau of Massachusetts, the business of which is to keep track of fires within her borders, is maintained by the State Government, and makes no levy upon insurance companies, that Commonwealth recognizing that to lessen fire waste is a duty of the State.

It is true that in some other States of the Union, fire insurance companies are compelled to support, in whole or in part, the expense of a State Fire Bureau. But this is not fair, since fire prevention, any more than fire extinction, is not the proper business of underwriters.

To fill all the requirements of a fire marshal adequately needs many and varied qualifications. One of the American marshals says: "He should have the intuition of a detective, experience as lawyer, a judicial mind, ability to weigh evidence, and some knowledge of mechanics and electrical science." "In any case he must be a man of honesty, industry and perseverance."

In the State of Ohio is a Department of Fire Enquiry, the chief officer of which is called the fire marshal. The law requires all chiefs of fire departments, or mayors in towns having no fire chief, or township clerks in rural districts, "to investigate the cause and circumstances of every fire—especially if such fire appears the result of carelessness or design—and make written report to the marshal." The department is in correspondence with 2,099 officials in the State who report fires. These, as has been said, are township clerks, fire chiefs and mayors.

Opinion of a Scottish Fire Expert.

The general manager of the Scottish Union Fire Insurance Company in Edinburgh, Mr. James Allan Cook, in an address before the Insurance Actuarial Society of Glasgow, said in 1906, dealing with fire waste, which is far less serious in Great Britain than in Canada: "The time has come when this subject should be taken up seriously by the national and city authorities. In endeavoring to saddle insurance companies with charges of fire protection, municipalities are fighting the shadow of the trouble, while the trouble itself grows and the community suffers. It is no more the duty of a fire insurance company to pay for fire extinction than for a life insurance company to pay for drainage systems and a marine company to pay for lighthouses."

An important part of the duties of this marshal is that he or his deputies may remove any dilapidated building that is a danger to property around it, or may order the removal of explosives.

If suspicious circumstances attach to any fire, these officials have the power of a court, to take testimony on oath or punish for contempt, or make an arrest. This shows the weight of the Department of Fire Enquiry in the opinion of the State.

Ontario companies, which have suffered from fires of unknown origin, from pyromaniacs, from incendiaries, must often have wished that they had some such machinery as this to set in motion in order to catch and punish these dastardly midnight robbers and public enemies.

Incendiary Fires in Ohio Show Decrease.

It is proper to ask: What good has come to Ohio out of all this machinery? Is the result worth the trouble and the expense? The first answer is that the number of incendiary fires in that State has been reduced one-third. Then the number of convictions for arson has been doubled. The number of fires from unknown causes has been reduced from 1 in 6 to 1 in 16. And the increase in the office income in two years, owing to the rapid increase in the number of insurable buildings in Ohio, made it possible to double the number of detectives, attorneys, and clerks, and to add regular inspectors of buildings

What is being done in Great Britain or on the continent of Europe in the matter of fire inquests may be of interest to ascertain. In Denmark, in Germany, and in France and Russia fire inquests have been common and are found to have the effect of lessening fires.

Inquiry is Proper.

In England they appear disposed to think that enquiry into the origin of fires is a proper and even necessary thing. But they are slow about adopting any scheme to bring it about. It was in 1866 or 1868 that a bill providing for such inquiry was brought into the British House of Commons, but for some reason it was dropped. In 1882 a similar bill was drafted and sent to the Home Department and from there to the Metropolitan Board of Works. But nothing definite came of it.

Next year the Common Council proposed to ask for a Royal Commission on the subject. They wanted such a law, and, upon consulting the fire offices, found they favored such a law, yet after many conferences no definite step was taken. There appears to be a lack of co-operation or prompt action between the parochial and the governmental authorities.

In various European cities great losses by fire are prevented by the laws insisting on the erection of only stone and brick buildings. Russia has an elaborate system of control and local government inspection and insurance. They compel all buildings to be insured. In Germany, building insurance is compulsory; while French law compels insurance against fire, not only for the benefit of the owner, but for his neighbor. In the Department of the Meuse, whenever a fire occurs, the mayor and one or two members of the town council visit the scene of the fire and adjust the losses.

RECENT FIRES.

Monetary Times' Weekly Register of Fire Losses and Insurance.

The following particulars are gathered from first Press reports of conflagrations. Upon these are instituted further inquiries which appear under heading "Additional Information."

Charlottetown, P.E.I.—September 5.—Telephone exchange damaged. Loss about $8,000. Origin unknown.

Flesherton, Ont.—September 4.—Barn of Mr. Frank Genoe, also season's crops destroyed. Loss unknown, Origin, lightning.

Coboconk, Ont.—September 1.—Planing mill of Gull River Lumber Company destroyed. Loss about $4,000. Origin unknown.

Stevensville, Ont.—The Wabash and Grand Trunk Railway depot destroyed. Loss unknown. Origin, sparks from passing engine.

Medicine Hat, Alta.—September 1.—Automobile of Mr. Charles Purnal destroyed. Loss about $2,000. Origin, incendiarism.

Winnipeg, Man.—September 2.—House of Mr. F. Burlington, 575 McDermot Avenue, damaged. Loss about $100. Origin unknown.

New Westminster, B.C.—September 1.—Sawmill of Serpentine Lumber Company destroyed. Loss, about $5,000. Origin unknown.

Regina, Sask.—September 5.—Messrs. McMillan Brothers' livery stable, Lorne Street, destroyed. Loss unknown. Origin, careless with matches.

Woodstock, Ont.—September 1.—Engine room of Woodstock Woodworking Company destroyed. Loss about $6,000. Origin unknown.

Brantford, Ont.—September 1.—Barn and contents owned by Mr. Melvin Smith, Fairfield Plains, destroyed. Loss and origin unknown.

Toronto, Ont.—September 6.—Premises of Toronto Petticoat Company, 170-172 King Street West, destroyed. Loss about $3,500. Origin unknown.

Parry Sound, Ont.—September 1.—Store owned by Messrs. Johnston and Beveridge, James Street South, badly damaged. Loss and origin unknown.

Hespeler, Ont.—September 2.—Barn of Mr. J. McIntosh, Waterloo Township, destroyed, also season's crops. Loss unknown. Origin, lightning.

Edgely, Ont.—September 4.—Brick barn of Mr. James Hoover, lot 25, fifth concession, West York, destroyed, also season's crops. Loss unknown. Origin, lightning.

Nelson, B.C.—September 2.—Hill Mines smelter destroyed. Loss about $750,000. Origin, incendiarism. Nelson Brewery destroyed. Loss estimated at $50,000. Origin, incendiarism.

Chatham, Ont.—September 1.—Residence of Mrs. Edeline, concession 6, destroyed, one child burned to death. Loss unknown. Origin, playing with matches. Slight damage to Messrs. Troumpour & Draper, Fifth Street. Loss, about $400. Origin unknown.

Hamilton, Ont.—September 4.—Residence of Mr. Geo. Gale, 1163 Cannon Street East, destroyed. Loss about $1,000. Origin unknown. September 3.—Residence of Mr. J. B. McClemment, 396 Victoria Avenue North. Loss about $5,000. Origin unknown. Stable, rear of 173 Charlton Avenue, four horses and automobile destroyed. Loss about $3,000. Origin unknown.

Montreal, Que.—September 1.—Shed and restaurant of Mr. Picard, 164 St. Elizabeth de Portugal Street, destroyed. Loss about $10,000. Origin unknown. September 2.—Residence of Mr. Henri Faillot destroyed. Loss unknown. Origin, lamp explosion. September 3.—Home of Mr. Louis O. D'Argencourt, 381 St. Denis Street, damaged. Loss about $1,500. Origin, incendiarism.

London, Ont.—September 4.—Residence of Mr. C. J. Mills, Mount St. Joseph, destroyed. Loss unknown. Origin, supposed rats nibbling phosphorus. Barns with season's crops belonging to Mr. Richard Payne, and threshing outfit owned by Mr. A. McCombe, destroyed. Loss about $2,000. Origin, blower caught fire. Barn of Mr. James Ryder, Roman Line, Biddulph, destroyed. Loss about $1,000. Origin, lightning.

ADDITIONAL FIRE INFORMATION.

Toronto, Ont.—The loss sustained by Messrs. Fox & Company was $71 on stock and $155 on buildings. Insured in following companies:—Royal, $2,000; Western, $1,000; Manitoba, $1,500; also on machinery, $1,000; horses, $100. In addition they have an insurance sinking fund of $3,000 deposited with Dominion Bank.

Chapleau, Que.—Messrs. Panpore & McDonald's loss was $11,000 on stock and $1,500 on buildings. Insured in following companies:—Liverpool, London and Globe, $3,000; Dominion, $3,000; Montreal-Canada, $2,000; Ontario, $1,500; total, $9,500.

LATE NOTES.

The rate of discount of the Bank of England remained unchanged at 3 per cent.

The German Minister of Foreign Affairs says all danger of war between France and Germany is past.

The annual convention of the Dominion Association of Chartered Accountants is being held in Montreal to-day.

Another effort is being made by a syndicate to secure the control of the Lake of the Woods Milling Company.

The British Board of Trade returns for August show a decrease in the value of imports for that month of £1,413,314. The exports for the same period show a decrease of £2,556,183 as compared with the preceding month.

"It is not for me on the present occasion to make any announcement of impending Government policy," said Sir James Whitney at North Bay last night, "but I believe I am justified in predicting that none of you will be dissatisfied with the treatment you are to receive from the Government in respect to Northern Ontario's development."

The first shipment of the season's new crop, 13,000 bushels, was sent out this week on the Canadian Pacific Railway steamer "Athabasca." This grain graded No. 1 and No. 2 Northern, and showed a good sample for the first arrival. It was shipped, as has been usual for several years, for Messrs. James Richardson Sons, Limited, Kingston, to Owen Sound.

There may be a dispute at the next meeting of La Rose directors over the question of dividends. A section of the board are supported by certain shareholders and are likely to insist on an increase in dividend. It is said that they desire La Rose put on a 10 per cent. basis. Mr. McGibbon expressed himself as being still desirous of accumulating a larger surplus.

The Falls of the Iroquois townsite, with diagonal streets, circuses and squares, has been laid out by Mr. John M. Lyle, the Temiskaming and Northern Ontario Railway Commission's architect, and 109 lots are offered for sale by public tender. All bids must be in on Wednesday. The townsite of Iroquois Falls is on the main line of the Temiskaming and Northern Ontario Railway at the junction point with the Porcupine branch of the Government railway. It is six miles from Iroquois Falls on the Abitibi River.

The London Bankers' Magazine says: Unsatisfactory crop reports in the United States have had a disturbing effect upon American railroad securities, and the fall in public securities has been severe. Once more the investor has, temporarily at all events, had to suffer, and our list of representative stocks shows a decline of no less than £73,000,000, the present values being the lowest for some few years past. The exact figures are as follows:—Aggregate value of 387 representative securities on July 21st, 1911, £3,684,731,000; aggregate value of 387 representative securities on August 21st, 1911, £3,611,568,000; decrease, £73,163,000. During the month consols have established the fresh low record of 77 11-16, and, although there has been some recovery since, partly as a result of official support, there is still a further decline to note under the head of British funds.

At the annual meeting of the shareholders of the Chatham, Wallaceburg and Lake Erie Electric Railway, the auditors' report showed that the revenue account for this year showed a balance of $21,170.42, after taking care of all operating charges and providing for bond interest. The gross earnings for the year amount to $103,282.78, of which $52,159.62 is derived from passenger traffic, and $42,315.09 from freight. The remainder is from other sundry sources. The following directors were unanimously elected:—Messrs. U. M. Fell, N. H. Stevens, Chas. Hadley, D. A. Gordon, M.P.; E. F. Kiser, Geo. R. Hill and M. P. Murray. After the shareholders' meeting was concluded a meeting of the directors was held when the following officers were elected for the ensuing year:—President, Messrs. D. A. Gordon; vice-president, U. M. Fell; secretary-treasurer, J. G. Kerr.

GRAIN ELEVATORS AT MONTREAL.

Harbor Commissioners and Grand Trunk Railway Difficulty Explained—Capacity of New Elevator.

Monetary Times Office,
Montreal, Sept. 6th.

Some discussion has been caused in local grain circles concerning the difficulty which arose between the Grand Trunk Railway and the Harbor Commissioners of Montreal over the construction of an elevator which was attempted by the railway. Work was started by the railway on the construction of this elevator last spring, and the Harbor Commissioners by means of an injunction compelled the railway to desist. A considerable outcry was raised amongst the grain men of Montreal, and also of other sections of Canada shipping through this port. It was pointed out that, while the Commissioners were preventing the Grand Trunk from constructing additional elevators, there was a dearth of elevator space in the port. Grain growers were delayed in the harbor owing to the fact that the elevators were incapable of moving the amount of grain brought into the port.

A short time ago a delegation of the Montreal Corn Exchange Association waited upon the Harbor Commissioners, and the explanation of the situation was then obtained. It seems that when the present commissioners took the harbor over some years ago they, with the assistance of the engineers and the shippers in port, outlined a comprehensive harbor improvement scheme which would be carried on consistently through about twelve years until completion. A very considerable number of the changes shown in the plan have already been made, but many others are still to come. Among the latter is the alteration of the shore line in certain sections of the harbor and the addition of wharves. Some of these are taking place on the spot where the Grand Trunk proposed to construct its new elevator. Consequently, when the Grand Trunk made application to the commissioners for the space to erect the elevator, the commissioners stated that they could not permit them to erect it at the point proposed by the railway, but that at the other side of their present elevator they might do so. The Grand Trunk Railway went ahead with its work, and there was nothing left for the commissioners to do but to take legal proceedings to prevent the work being carried out.

Capacity of Elevator is Increased.

Meantime the Harbor Commissioners have been pushing forward the work on their new elevator as rapidly as possible, and at the present time the structure is well advanced. Originally it was intended that the capacity of this elevator would be 1,772,000 bushels In view of the congestion of the grain trade the commissioners concluded to proceed with excavation for a new addition which would add 848,000 bushels to the proposed capacity, making a total of 2,620,000 bushels. The elevator is of concrete, fireproof throughout, and will be equipped with the most modern machinery obtainable. The new elevator is well proportioned, and approaches, as near as an elevator may, to having a pleasing effect upon the eye. It is stated that the commissioners have in view the possibility that a third elevator will be necessary in the port ere a great many years have passed.

Traffic Through the Lachine Canal.

The traffic through the Lachine Canal, through which passes all the merchandise leaving Montreal by water for the West, and most of that arriving in Montreal from the West, showed a considerable increase in August over the corresponding month a year ago. This is shown in the totals of grain and flour as follows:—

	1910.	1911.
Wheat, bushels	2,872,004	3,063,030
Corn, bushels	241,200	216,525
Oats, bushels	51,133	1,215,054
Barley, bushels	79,917	38,595
Flaxseed, bushels	.. ...	45,884
Flour, sacks	29,522	100,043

◆

The annual general meeting of the Wabasso Cotton Company, Limited, was held at Three Rivers on Tuesday. The company reported a successful year. J. N. Greenshields, K.C., F. F. Farmer, Alex. Pringle, W. T. Whitehead, Thos. McDougall, L. G. Craig, and C. R. Whitehead were elected directors. At a subsequent meeting of the directors C. R. Whitehead was elected president; F. F. Farmer, vice-president; W. T. Whitehead, second vice-president; L. G. Craig, treasurer, and S. B. Cayford, secretary.

MONTREAL STREET RAILWAY.

Problem May Soon be Settled—Montreal and Southern Counties Railway.

Monetary Times Office,
Montreal, Sept. 6th.

For a long time the probable terms of the re-organization of the Montreal Street Railway have been discussed. Many contradictory statements have appeared during the past few months. These the management of the Street Railway have ignored, and the public have received absolutely no statement from the only source from which an authoritative statement could be made.

At the opening of the Canadian Light and Power plant a week ago, Mr. E. A. Robert, president of the Montreal Street Railway, made almost the first definite announcement concerning the matter. Even in this Mr. Robert confined himself to the statement that the street railway problem would be settled in thirty days. In local financial circles it was thought for a considerable period that the railway had given up the idea, for the present at least, of amalgamating the Montreal Street Railway with the Canadian Light and Power Company. When control of the Street Railway changed hands a year ago, the understanding was that the two companies were to be brought together.

Proposition Meets with Opposition.

Apparently this proposition met with considerable opposition. The power company had not, up to that time, brought its undertaking to completion, or demonstrated what power could be developed in the Beauharnois Canal. The city at different times during the past six months has made attempts to bring to completion its negotiations with the railway concerning many outstanding matters. The announcement that the entire problem would be settled within thirty days having been made by Mr. Robert at the official opening of the power company leads to the belief in financial circles that in the settlement provision will be made for closer relationships between the Street Railway and the Canadian Light and Power Company.

At the inauguration proceedings referred to, the announcement was also made that electric railway extensions would shortly be made as far as Beauharnois, which would give communication with Montreal. This announcement was interpreted by some as meaning that the Montreal Street Railway would make these connections. This is exceedingly unlikely, the probabilities being that the reference was to the Montreal and Southern Counties Railway. This railway now has its terminal on McGill Street, near the harbor front. It has a close connection with Grand Trunk interests, and operates across Victoria Bridge to St. Lambert and along down the river to Longueuil. Within the past few weeks the line has been extended westward as far as the Country Club of Montreal, about a mile or so from St. Lambert.

Montreal and Southern Counties Railway.

It is known that plans are in existence showing this railway extended twenty-five miles westward to Beauharnois, and there is no doubt that electric railway extension to which Mr Robert referred is the Montreal and Southern Counties Railway. As a close association exists between the Canadian Light and Power and the Montreal Street Railway and many Grand Trunk interests, it would be a very natural outcome if negotiations were started with the Montreal and Southern Counties Railway, and triangular arrangements made whereby the railways would operate in connection with each other, and the power company would supply them with the necessary current.

◆

Following the organization of the International Milling Company of Canada to take over the International Milling Company of Minnesota and the Canadian Cereal and Milling Company, Limited, arrangements have been made to have the fiscal years of the two companies close on the same date, so that the fiscal year of the Canadian Cereal and Milling Company will now close on August 31st instead of July 31st. In order that the quarterly dividend periods may run with the company's fiscal year, the board of directors of the Canadian Cereal and Milling Company have declared a dividend of 2⅓ per cent., being at the rate of 7 per cent. per annum, on the preferred stock of the company for the four months ending August 31st, the same to be payable September 10th to shareholders of record August 31st. Owing to the change in the company's fiscal year, the annual meeting of the Canadian Cereal and Milling Company will be held on the third Wednesday in October instead of the third Wednesday in September.

CANNED CORN FOUND TO BE GOOD.

Although Decided Amount of Acid Sulphite Is Shown—Employment of Saccharin.

During the months of March, April and May the Inland Revenue Department at Ottawa purchased 146 samples of canned corn throughout the Dominion, and all the samples were found to be in an excellent condition of preservation. Except in the far West of Canada, this article is sold pretty generally at ten cents per tin.

The collection embraces forty-six (46) different brands; but this does not imply the same number of manufacturers. Many large dealers have special brands put up for themselves by the regular canners.

There is great uniformity in the weight as well as in the character of the contents of the cans, which naturally leads to the inference that the work of preparing canned corn is carefully and systematically conducted.

No guarantee or statement of weight appears on the labels of any of these samples. The actual weight of the contents varies from about 20 to about 22 ounces, and averages practically 21 ounces, or 1 pound 5 ounces.

The chief points noted are the frequent presence of acid sulphite of lime, doubtless added for bleaching effect, and the use of a non-sugar sweetener (usually saccharin) in many samples. Decided amounts of acid sulphite have been found in 46 samples, and traces in 27 others; so that this bleaching material has certainly been employed in 73 samples, or 50 per cent. of the entire number inspected.

The question of the use of sulphurous acid (the acid present in sulphites) in foods is a very important one. That sulphurous acid is a poison is perfectly well ascertained; but that it acts deleteriously on the human system in the minute quantity present in corn has not been demonstrated. Much of the sulphite introduced as a bleaching agent is oxidized to sulphate, and thus rendered harmless. Free sulphurous acid is further got rid of in the process of cooking the corn, and it is certain that only very minute traces can remain in the article as served at the table.

The question of the employment of saccharin (or a similar article) to give sweetness to the product is another moot point. Germany has forbidden the use of saccharin, but this is evidently a matter of fiscal policy rather than a declaration of the dangerous character of the article. The United States has declared against the use of saccharin in foods, basing its action upon the report of a Board of Consulting Scientific Experts. This decision was to have come into force on July 1st, 1911; but an inhibiting decree was issued on May 23rd, postponing the operation of the decision against saccharin until July 1st, 1912.

Saccharin (or other non-sugar sweetener) is present in 29 samples, now reported; i.e., in 20 per cent. of the collection. Here, also, it is desirable that manufacturers employing saccharin in food products should be required to announce the presence of the article; since, while the evidence available is not such as to justify the condemnation of saccharin, there exists among physicians and other qualified judges a conviction that, in some cases, it is capable of doing harm.

◆

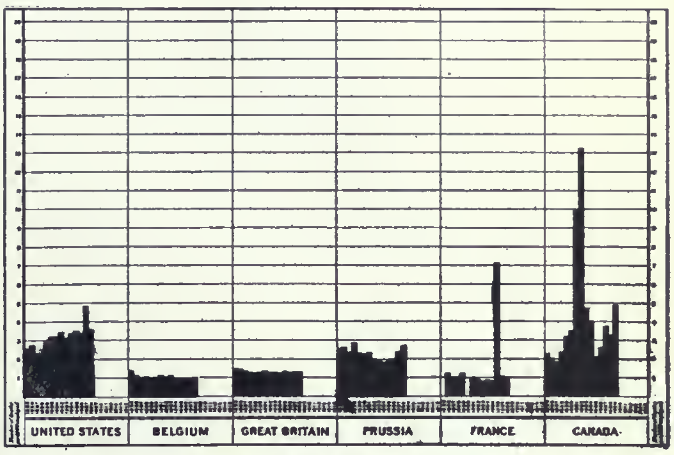
MINE ACCIDENTS.

Explosives Cause a Large Number of Fatalities—Some Comparisons.

The following data and plates were abstracted from the report of the Committee on Conservation:—

This diagram shows that the death rates per 1,000 men employed in the coal mines of Canada and the United States are greater than in any other country in the world for which accurate statistics are available.

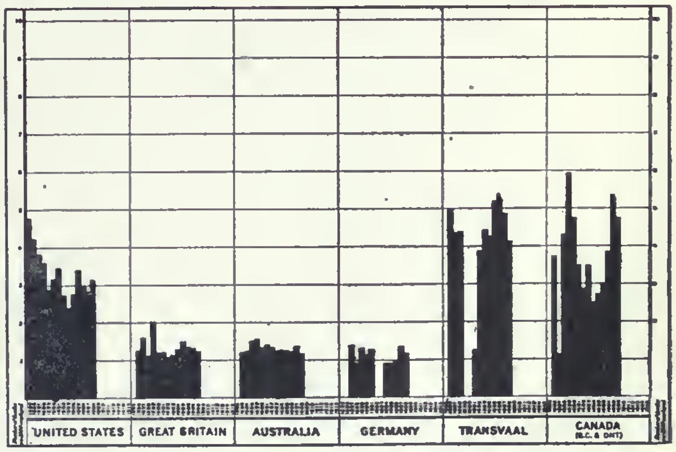
The diagram also shows that fatalities in the United States and Canada are on the increase, while Great Britain, Belgium, Prussia and France show a gradual decrease. We must interpret this in this way: (1) The danger inherent in the work can never be eliminated but could be brought down to a minimum, as indicated by the low, constant death rate in Belgium, Great Britain, and France (excepting the year 1906); (2) Coal mine explosions occur very frequently in Canada and the United States, while they are more infrequent in other countries. The causes for this loss of life are complex and neither the operators nor the miners willingly submit to them. It is not reasonable to expect that the loss of life and property can be entirely done away with; but at the same time, experience has abundantly proven that careful and impartial investigations of such conditions will point the way to remedying of at least some of the abuses. In view of the importance of the subject to the country and the public at large, such studies should be undertaken.



COAL MINE ACCIDENTS.
Number of Men Killed for Each Thousand Employed.

It is generally supposed that a great many more men are killed in coal mines than in metal mines. The following tables show that during 1900-09 the average fatality rate per thousand men employed in the coal mines of Canada was 4.79; and, for the metal mines, 3.82.

The average fatality rate in the United States during the period (1894-1908) was 3.09. This rate was considered so high that, in 1906, the American Mining Congress at Denver, Colorado, appointed a committee to draft a law for the regulation of quarrying and metalliferous mining under the criminal codes of the States, with the hope that the uniform adoption of such a law would tend to reduce the number of accidents. The report of this committee is contained in Bulletin No. 46, of the American Institute of Mining Engineers.



METAL MINE ACCIDENTS.
Number of Men Killed for Each Thousand Employed.

With the exception of the Kimberley diamond mines and the Transvaal, where native and Chinese labour are employed, the fatality rate during 1900-1909, was considerably lower elsewhere than in Canada. It requires no discussion to emphasize the importance of an inquiry into the whole subject of fatal accidents in metal mines of Canada.

An analysis of the statistics respecting metal mining accidents of British Columbia for the last ten years, shows that over twenty-six per cent. of the fatalities were caused by explosives directly or indirectly. Mr. E. T. Corkill, Inspector of Mines for Ontario, states, in the Nineteenth Annual Report of the Bureau of Mines (p. 58), that, "Accidents from explosives are the main source of danger, and were, ultimately the cause of 49 per cent. of the fatalities in 1909." An Act respecting the testing and inspection of explosives has been prepared by the Mines Branch, Department of Mines, and will be presented to Parliament this session.

INDUSTRIAL SECURITIES AND MUNICIPAL BONDS.

The effect upon the municipal bond market of the large issues of industrial securities during the past few years, does not appear to have been a material one.

In the first place, the majority of the larger buyers of municipal debentures do not invest in industrial securities. Secondly, industrial bonds or stocks do not constitute a legal investment by trustees. Thirdly, the private investor, who would naturally absorb a great portion of these industrial issues, has not been a very large factor in the municipal bond market in past years. As a matter of fact, the private investor has shown a growing interest in municipal bonds recently, especially since the development of the Western provinces, and the conservative investor's assurance that debentures of Western municipalities constitute a high-grade security, and, at the same time, yield a very attractive return, consistent with safety. While it is certain, thinks Mr. Moore, that bonds or stocks of substantial industries will attract a certain amount of funds that would otherwise be put into municipal debentures, we do not think that this will be of sufficient magnitude to materially affect the dealings in the latter class of security.

The quietude experienced in the municipal bond business during the last eighteen months or two years is largely attributable to the substantial growth of the prairie provinces, which has been so satisfactorily viewed by institutions and others with funds to loan, combined with the higher yield rate obtainable, that considerable funds have been attracted to mortgage loans in that part of the country which in former years have been put into municipal debentures.

◆

LAURENTIDE PAPER COMPANY, LIMITED, AND MONTREAL COTTONS, LIMITED.

Securities of the Old Companies—Some Interesting Figures.

Monetary Times Office.
Montreal, September 6th.

Two stock distributions have taken place in Montreal recently, one being in connection with the Laurentide Paper Company, and the other with the Montreal Cotton Company. In each case the shareholders receive a bonus of 100 per cent., being a present of one share of new stock for each share standing on the books opposite their names.

The plan followed was to incorporate a new company with a larger capitalization, and to offer two shares of stock in exchange for each share of stock held in the old company. In the case of the Laurentide Paper Company, the name of the company is to be the Laurentide Company, Limited, and the name given to the Montreal Cotton Company is Montreal Cottons, Limited. The following were the securities of the old Laurentide Paper Company, Limited:—

	Authorized.	Issued.
Common		$2,705,600
Cumulative Preference	$3,800,000	894,400
	$3,800,000	$3,600,000
Bonds, 6 per cent.	$1,200,000	$1,200,000
Less Redeemed		252,695
Outstanding		$947,305

Laurentide Company, Limited.

	Authorized.	Issued.
Stock		$7,200,000

Earnings Have Been Increased.

During the year ending June 30th, 1910, the net profits amounted to $516,304, or equal to 14.33 per cent. on the total issued capital of $3,600,000. It is understood that during the past year these earnings have been considerably increased. On the above basis, were the capital doubled the earnings would have amounted to 7.17 per cent. On a basis of earnings in 1909-10, the entire stock now being issued to the Laurentide Company will show earnings of upwards of 7 per cent. In 1907 the common stock of the company could have been purchased as low as 80. In the following year it advanced to 112½; in 1909 the high record was 130; in 1910 the dividend was increased from 7 per cent. to 7½ per cent., and the stock sold up to 170, and by the end of March of this year it reached 212 on the local market. Meantime the preferred stock also had gradually advanced from around par in 1907 to 211½ during the spring of the present year.

The securities carried by the old Montreal Cotton Company were as follows:—

	Authorized.	Issued.
Common Stock	$4,000,000	$3,000,000
Bonds, 5 per cent.	2,000,000	966,943

Montreal Cottons, Limited.

	Authorized.	Issued.
Common Stock	$5,000,000	$3,000,000
Preferred, 7 per cent.	5,000,000	3,000,000

During the past three years the Montreal Cotton Company has been paying 8 per cent. on its preferred stock, this having been increased from 7 per cent. The net profits for 1910 were $295,024, being 8.68 per cent. on the common stock. The surplus carried forward for the year amounted to $20,000, or .68 per cent. on the common stock. Accepting the earnings of 1910 as a basis for the future, the earnings on the stock of the Montreal Cotton Company, would amount to 4.34 per cent. on the entire $6,000,000 issued, or, after paying the 7 per cent. dividend on the $3,000,000 preferred which is to be given as a bonus, there would remain but 1.68 as dividends against the common stock.

Big Surplus is Shown.

The strong feature in connection with the financial statement of the Montreal Cotton Company was the fact that a surplus of rather more than $2,000,000 was shown. This was equal to 66 2-3 per cent. on the capital stock of the company. This surplus has gradually accumulated for some years past. The statement of the earnings of the company during the past five years is as follows:—

	Sales.	Profits.	Earned.	Paid.
1905	$2,615,000	$315,000	10.50%	7%
1907	2,982,000	454,200	15.14%	7%
1908	1,882,000	251,666	8.38%	8%
1909	2,937,140	284,542	8.43%	8%
1910	3,194,220	295,024	8.68%	8%

◆

DEBENTURES AWARDED.

Village of Pangman, Sask.—$4,000 6 per cent. 15-years to Messrs. Nay & James, Regina.

Napanee, Ont.—$4,500 5 per cent. 20-year debentures to Messrs. Wood, Gundy & Company, Toronto.

Small Alberta and Saskatchewan Schools.—$6,000 6 per cent. 10 years to Messrs. Nay & James, Regina.

Mont-Laurier, Que.—$22,000 5 per cent. 40-year debentures to Canada Investment, Limited, Montreal.

Medicine Hat, Alta.—$83,000 5 per cent. 20-year debentures to Messrs. Wood, Gundy & Company, Toronto.

Taber, Alta.—$16,000 5 per cent. 10 and 20-year debentures to Messrs. Wood, Gundy & Company, Toronto.

Wainwright, Alta.—$35,000 5½ per cent., 20 instalments, to Messrs. Ontario Securities Company, Limited, Toronto.

Walkerville, Ont.—$107,186.72 4½ per cent., $28,186.72 in nineteen instalments, and $79,000 in twenty instalments to Messrs. Dominion Securities Corporation, Toronto. The total assessment is $5,072,956, and the existing debenture debt $246,377.41. The general rate is 8 mills.

Wetaskiwin, Alta.—$12,500 5 per cent. 20-years. $6,000 for electric light purposes, and $6,500 for additional fire protection to Messrs. Æmilius Jarvis & Company, Toronto. Wetaskiwin is an important junction point on the Calgary and Edmonton branch of the Canadian Pacific Railway, and is the terminus of the Winnipeg, Saskatoon and Wetaskiwin line of that railway.

CANADIAN WESTINGHOUSE COMPANY, LIMITED.

DIVIDEND NO. 27 AND BONUS.

The regular quarterly dividend of one and one-half per cent. (1½%) has been declared upon the outstanding capital stock of the company, also a bonus of one-half of one per cent. (½ of 1%), both payable October 10th, 1911, to shareholders as of record at the close of business, September 30th, 1911. Transfer books will be re-opened October 10th, 1911, at ten o'clock a.m.

Cheques will be mailed to shareholders.
By order of the Board.
JOHN H. KERR.
Hamilton, Canada, Secretary.
September 7th, 1911.

"Capital Investments in Canada"

By FRED. W. FIELD

A New Volume to be Published This Month by

THE MONETARY TIMES

Price - - $2.50

THREE hundred and seventy-two million pounds sterling have been invested by Great Britain in Canada. American capital has helped the Dominion's industrial development to the extent of nearly $417,143,221, while foreign capital in excess of $139,589,650 has also been invested in the Dominion. Complete details of these borrowings will appear in the above volume, which is about to go to press. In view of the general interest in the subject of investment in Canada and of the Dominion's trade relations, this new book, "Capital Investments in Canada," will prove of great value. It is the first contribution on the subject to the business man's library shelves.

The Book Discusses The

Protection of Capital.
Savings of a Young Country.
Municipal bonusing of industries.
Montreal stock quotations in France.
Payment of Canada's interest charges.
Canadian Banks at home and abroad.
Effect of Immigration on National Finances.
Merits of registered stock *versus* bearer securities.
Investments in Canadian farm, town and city property.
Attention paid to the intrinsic value of Provincial Government securities.
Likes and dislikes of the British, American and foreign investor in Canada.
Capital Liability of Railroads.
Possible dangers to Canadian credit.
Shipbuilding and dry-dock investments.
Dutch interest in Canadian mortgages.
Possibility of a German-Canadian bank.
Relations of purchasers of plant and borrowers.
Practice of selling municipal bonds privately.
Scotch capital in Canada's loan and mortgage companies.
Trade Balances in Canada, Great Britain and the United States.
And a Thousand other Topics of Great Value to all interested in Canadian Investments and Development.

The following are the chapters of the proposed volume—

1. British investments in Canada.
2. American investments in Canada.
3. Foreign investments in Canada.
4. French investments in Canada.
5. German investments in Canada.
6. Other Countries' investments in Canada.
7. Canadian Government borrowings in London.
8. Municipal borrowings in London.
9. The financing of Canadian railroads.
10. Industrial investments in Canada.
11. Investments in Canadian land and lumber.
12. Investments in Canadian mines.
13. Canadian banks, British and foreign capital.
14. Registered stock or bearer securities?
15. Canada's credit abroad.
16. Canadian securities & the British Trustee List.
17. New capital from immigration.
18. The relation of trade to borrowed money.

APPENDICES

1. Canada's share of British capital.
2. Is Canada over-borrowing?
3. Canada and International finance.
4. Editorial comment respecting British, American and foreign capital investments in Canada.
5. List of Canadian flotations in London, January 1905 to April 1911.

THREE INDEXES

The volume is very completely indexed, one index being devoted to personal names, another to companies and institutions, and a third to subjects.

Nearly three hundred companies, Canadian, British and foreign, are referred to, while numerous authorities on the subject of investment are quoted.

Sir Edmund Walker has contributed a prefatory note.

BOND TENDERS INVITED.

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials.

Alvinston, Ont.—On September 11th the ratepayers will vote on a by-law to raise $3,900 for town hall.

Mimico, Ont.—On September 16th, the ratepayers will vote on a by-law to raise $7,500 for a power plant.

Sombra, Ont.—On September 25th, the township council will consider a by-law for $6,000 for drainage purposes.

Prince Albert, Sask.—The ratepayers have passed a by-law for $725,000 to develop power from La Colle Falls.

Strassburg, Sask.—Until September 15th, tenders will be received for $5,000 debentures. Mr. J. W. Lauman, secretary-treasurer.

Ottawa, Ont.—Until September 14th for $85,000 40-year, $346,500 30-year, and $160,500 20-year debentures. C. Hopewell, Mayor.

Village of Hastings, Ont.—Until September 30th, tenders are invited for $6,000 5 per cent. 20-year debentures. Mr. Alex. Wilson, clerk.

Nanaimo, B.C.—Another by-law will be introduced by the city council for $10,000, to guarantee the bonds of the Tramway Company.

Foxwarren S.D. No. 1274, Man.—On September 13th the ratepayers will vote on a by-law to issue $2,500 debentures. T. W. Thompson, Birtle.

Sandwich, Ont.—On September 16th, the following by-laws will be voted on:—$1,300 for bridge purposes, $10,000 for town hall, and $5,000 for extending water mains.

Township of Amaranth, Ont.—Until September 16th, tenders will be received for, $3,500 10-year 5 per cent., debentures. Mr. E. Hamilton, township clerk.

Brandon, Man.—Until September 22nd, for $45,000 5 per cent. 30-year school debentures. J. B. Beveridge, secretary-treasurer. (Official advertisement appears on another page).

Town of Morinville, Alta.—Until September 15th tenders will be received for $15,000 6 per cent. 20-year debentures for local improvements. Mr. Arthur Lambert, secretary-treasurer.

Simcoe, Ont.—On September 15th, the ratepayers will vote on a by-law to grant and to establish a lithograph plant by giving a bonus of $30,000 to the Dominion Canners, Limited.

Calgary R.C. S.D. No. 1, Alta.—Until October 23rd, for $60,000 30-year 4½ per cent. debentures. J. McCaffary, secretary-treasurer. (Official advertisement appears on another page).

Bathurst, N.B.—Until September 30th tenders will be received for the following:—$5,000 5 per cent. 40-years, and $5,500 5 per cent. 40-year school debentures. Mr. B. C. Mullins, secretary-treasurer. (Official advertisement appears on another page.)

Taber, Alta.—The following debentures are for sale:—$7,000 10-year 5 per cent., for sidewalks; $2,000 20-year 5 per cent., street improvements; $3,000 20-year 5 per cent., fire purposes, and $4,000 20-year 5 per cent., hospitals. Mr. Geo. C. Miller, secretary-treasurer.

Montreal, Que.—Until September 18th tenders will be received for £1,438,300 sterling or $7,000,000 currency or francs, 4 per cent. registered stock or coupon bonds to mature November 1st, 1951, for public parks, waterworks and working for construction of schools.

Regina, Sask.—The following by-laws will be voted on at an early date:—$120,000 to pay the city's proportion of the cost of the construction of the Broad street subway; $150,000 to be expended on trunk sewer work, principally the Wascana Valley trunk sewer; $150,000 or $200,000 (amount not yet definitely ascertained), to be expended on paving extensions; to raise a sum of money (not yet ascertained), to be expended for the laying of concrete sidewalks; $400,000, to be expended for the construction of the street railway system; $150,000 to be expended on waterworks extensions.

Saskatoon, Sask.—The following by-laws have been sanctioned by the burgesses of the city:—City stables and storehouse, $25,000; machinery, plant and equipment for the board of works and board of health, $15,000; city's share of constructing a sub-way, $60,000; extensions of the water works system, $73,000; intercepting sewer and sewage disposal plant, $225,000; electric light and power plant, $135,000; water filtration plant and improvement of the sedimentation basin, $75,000; electric light and power system of the city, $75,000; erection of a new power house and purchase of a site, $80,000; house sewer and water connections, $45,000; concrete street crossings, $10,000; improvement of Saskatchewan Drive and Victoria Avenue, $10,000; Nurses' Home and furnishing and equipping the same, $35,000.

St. Peter River S.D., Que.—Until September 12th for $55,000 debentures. O. Deguise, secretary-treasurer, 137 Church Street, Verdun.

For the $100,000 4 per cent. 40-year bonds of Campbellton, N.B., seven bids were received from Montreal, Toronto, St. John and Halifax bond firms. As previously noted, the award was made to Messrs. C. Meredith & Company, Montreal.

BONDS AND OTHER INVESTMENTS.

Quebec Province to Retire Debentures—Defaulting State Bonds.

As shown in detail in The Monetary Times last week, the ordinary receipts of Quebec province at the close of the last fiscal year ended June 30, 1911, were $7,032,744.99, and the ordinary and extraordinary expenditures were $6,424,900.04, leaving a surplus of $607,844.95 of ordinary revenue over both ordinary and extraordinary expenditure.

These statements do not include the receipt and reimbursement of trust funds, or the money advanced to the district of Montreal, for the construction of the new Montreal gaol, and to the district of Montcalm for the construction of a court house, during the year out of the revenue, which is subject to be returned into the exchequer on the flotation of the bonds provided by statute.

Quebec to Retire Debentures.

The net funded debt of the province on June 30, 1911, including increase of capital by conversion, was $24,409,354.54. Included in that sum is the amount of outstanding of the loan of 1882, payable in London and Quebec—$2,487,580. The debentures of this loan are payable on or after July 1, 1912, upon one year's notice being given in advance. They bear 5 per cent. per annum interest. The provincial treasurer has given the required notice that the government will retire these debentures.

The government has at its disposal from the ordinary sources of the revenue resources considerably more than sufficient to enable it to retire this loan without it being necessary to ask authority from the legislature to contract a new loan.

Defaulting State Bonds.

A letter sent to President Taft, signed by the banking firm of Messrs. H. B. Hollis & Company, of New York, advocates establishment of an arbitration board to take up the matter of defaulting State bonds. It is the opinion of the banking firm and its clients that about $60,000,000 of overdue liability, represented by bonds of various States, are unpaid, and that citizens of the United States and Europe should have an accounting and settlement. In this connection, it may be mentioned that a Canadian province has never defaulted in the payment of bond principal or interest.

Some Investment Notes.

The National Real Estate & Investment Company of Canada, with a capital of $2,000,000, is offering $1,000,000 of 6 per cent. cumulative preferred stock, with 50 per cent. bonus common stock.

City Dairy Company subscriptions for the new issue of $75,000, made exclusively to shareholders of the company, are reported to have come in satisfactorily.

The London Stock Exchange has listed $13,500,000 Canada Cement common stock. The preferred stock and bonds were listed some time ago. The exchange has also listed £513,000 Algoma Eastern Railway 5's, £514,700 City of Calgary 4½'s and £117,500 City of Victoria 4's.

Application is now being made to have the 7 per cent. cumulative preferred shares of the Canadian Locomotive Company listed on the Toronto and Montreal Stock Exchange.

Want By-Law Amount Reduced.

The Ingersoll, Ont., council has decided to ask the Waterworks Company for the privilege to reduce the amount in the by-law for the purchase of the plant from $129,000 to $120,000, and in the event of this request not being granted the council wishes to withdraw from the obligation of submitting the by-law to the people.

The total assessment of Guelph, Ont., with increases, is as follows:—Total value of real property, $8,442,305; increase $270,395; business assessment, $703,765; increase $19,863; income assessment, $116,065; increase $49,041.60; total assessment, $9,262,136; increase $339,299.60; total population, 15,107; increase 240. The total assessment for 1904 was $4,109,010; the population 11,931, and the total entries on said assessment roll 3,314. This year's roll has 5,477 entries, an increase of 2,163 since 1904.

City of Ottawa, Ontario.

Debentures for Sale.

Tenders by registered letter only, addressed to "The Chairman Board of Control," and marked "Tender for Debentures," will be received by the City of Ottawa, until 3 p.m. on Thursday, 14th September, 1911, for the purchase of $85,000.00 forty-year debentures, $343,500.00 thirty-years and $160,500.00 twenty years.

They are all a liability of the City at large, and bear four per cent. interest, payable 1st January and 1st July.

Two separate tenders will be received, one for $73,500.00 thirty year debentures, and the other for the remainder of the debentures, $515,500.00.

All tenders must be on the official form.

The tender for the $73,500.00 must be accompanied with a marked cheque for $1,000.00, and the tender for the $515,500.00 with a marked cheque for $5,000.00.

Accrued interest from 1st July, 1911, must be paid in addition to the price tendered.

The $73,500.00 debentures are in $1,000.00 denominations, principal and interest payable in Ottawa.

The remainder of the debentures will be made in Ottawa, New York, or London, at the option of the purchaser, and in denominations to suit.

Delivery of the $73,500.00 can be made at once if required, and of the remainder of the debentures within one month if required.

The highest or any tender not necessarily accepted.

Full particulars, together with further conditions and official forms of tender, can be obtained on application to the City Treasurer, Ottawa.

CHAS. HOPEWELL,
Mayor.

Ottawa, 1st July, 1911.

MONETARY TIMES INDEX.

Copies of the Index to The Monetary Times half-yearly volume, January to June, 1911, may be obtained on application to the head office, 62 Church Street, Toronto.

Calgary Roman Catholic Separate School District No. 1.

Calgary, Canada.

DEBENTURES FOR SALE.

Sealed tenders will be received by the undersigned up to September 22nd, 1911, for the purchase of forty-five thousand ($45,000.00) 5 per cent. school debentures, of the city of Brandon, Manitoba. Date of issue, October 1st next, and repayable in 30 years, interest payable yearly.

The highest or any tender not necessarily accepted.

J. B. BEVERIDGE,
Secretary-Treasurer.

Brandon, Manitoba, September 4th, 1911.

As insurance against the risk of an outbreak of war between certain European powers within the next three months, five per cent. has been paid in London. And for insurance during six months ten per cent. Considerable business is being done at Lloyds in war insurance policies, and the rates show a tendency to stiffen.

During the year ended December 31st, 1910, there were 647 post-office savings banks open in New Zealand, and at these £10,708,938 was deposited, while £9,695,514 was withdrawn—an excess of deposits over withdrawals of £1,013,424. The total cost of management for the year was £28,000, and the interest paid, £424,688. The total amount standing to the credit of all accounts at the end of the year was £14,104,989.

BANK OF MONTREAL'S STOCK ISSUE.

The Bank of Montreal shareholders met this week and ratified the change in by-law increasing the capital from $14,400,000 to $16,000,000. In reply to a question as to how the directors intended to issue the new stock, Sir Edward said that that point would not be settled until after thirty days from to-day's meeting. However, he was of the opinion that the shareholders should be given some benefit, and that it was likely the issue would be made on the basis that for every nine shares held the right would likely be given to subscribe for one new share around possibly, $175.

◆

The report of the Provincial Secretary of Nova Scotia gives the financial statements of the various incorporated towns and municipalities in Nova Scotia. The bonded debts of the municipalities of the province total $906,400 and the assessments $39,723,160.

TAX REFORM LEAGUE.

At the annual convention of the Tax Reform League resolutions were passed urging the government to consider the demand for tax reforms and enact legislation allowing municipalities to reduce taxes on buildings, improvements and business assessments, and increase taxes on land values.

The name of the society has been changed to the Tax Reform League of Eastern Canada. Under the wider scope of the new policy the provinces of Quebec, New Brunswick, Nova Scotia and Prince Edward Island will be included in the membership. It was also decided in future to manage the affairs of the league through an advisory council in place of a number of vice-presidents. The election of officers for the coming year resulted as follows:—Honorary president, Jos. Fels, London, England; president, J. F. Mackay, Toronto; vice-presidents, Wilson M. Southam, Ottawa; H. B. Cowan, Peterboro; Jos. E. Atkinson, Toronto; Julian Sale, Toronto; secretary, A. Farmer; treasurer, D. B. Jacques, Toronto.

COPPER CONDITIONS.

Many copper properties during 1911 have ceased operating from some cause or other. Some of these have shut down owing to the low price of the metal and their inability to make money, while others have been forced to close, due to fume troubles at their smelters or to labor strikes. The largest producer which is shut is Granby, Canada's big contributor to the world's supply of copper. The following table contains the 1910 or normal production of the largest properties which have discontinued operations:—

Mine.	Production.	Date shut down.
First National	10,000,000	July, 1911.
Granby	20,000,000	Aug., 1911.
Imperial	8,000,000	July, 1910.
*Bully Hill	7,000,000	July, 1910.
Butte Balaklava	2,500,000	Sept., 1910.
Shattuck	15,000,000	June, 1911.
Tamarack ½ normal	5,500,000	July, 1911.
Superior and Boston	1,800,000	Aug., 1910.

---

*Made small shipments to First National until that plant closed down.

It will thus be seen that these properties alone, which by no means are all, represent a total production of approximately 70,000,000 pounds per year.

◆

The regular stock certificates for both preferred and common stock of the Belding-Paul-Corticelli, Limited, are now ready for delivery, and holders of the interim receipts may have them exchanged at any of the offices of the Dominion Bond Company.

Arranges Capital for sound Canadian enterprises (Mining, Land, Timber, Industrial). | Correspondence invited. References given. Mortgages, Bonds and Public Loans placed.

Securities
can be purchased or sold most economically and most safely by use of the advertising columns of
The Monetary Times.

7% — AN — ATTRACTIVE OFFERING. 7%

We have exclusive sale of an issue of

Seven per cent. Preference Stock of The Prudential Investment Co., Ltd.,
VANCOUVER, B.C.

This Company at Dec. 31, 1910, had Assets amounting to $1,379,659 and Reserve $250,000. The Paid Up Capital now amounts to $785,000. During the last three years an annual dividend of 12% has been paid on the common stock.

The Directors are representative men in their respective centers. They enjoy the confidence of the public to a large degree.

The Prudential Investment Co. builds more houses than any other firm in Canada. It also has acquired the rights to manufacture, on a royalty basis, the most improved and modern buildings ever invented.

This is an investment GUARANTEEING an annual dividend of SEVEN PER CENT. Don't miss this opportunity. The offering is at par, and the terms easy. Write for further particulars.

"Capital Investments in Canada."

By FRED. W. FIELD.

(A new volume to be published this month)

$2.50 PER COPY.

Three hundred and seventy-two million pounds sterling have been invested by Great Britain in Canada. American capital has helped the Dominion's industrial development to the extent of nearly $417,143,221, while foreign capital in excess of $139,589,650 has also been invested in the Dominion.

A series of articles respecting the investment of British, American and foreign capital in Canada is appearing weekly in The Monetary Times of Canada. In response to many requests, the articles, which are from the pen of Mr. Fred. W. Field, Managing Editor of The Monetary Times, and Imperial Trade Correspondent at Toronto, will be reprinted in book form, at a popular price, together with other articles, early in the autumn.

In view of the general interest in the subject of investment in Canada and of the Dominion's trade relations, this new volume, "Capital Investments in Canada," will prove of great value. It is the first contribution on the subject to the business man's library shelves.

Orders for the publication are now being received at the various offices of The Monetary Times as follows :—

Toronto, Ont.: 62 Church Street.
Montreal, Que.: B. 33 Board of Trade Building.
Winnipeg, Man.: Room 404 Builders Exchange Building.
London, Eng.: Grand Trunk Building, Cockspur Street.

When in London call on The Monetary Times, Grand Trunk Building, Cockspur Street.

Limited.

ABSORPTION OF QUEBEC CENTRAL RAILWAY.

As noted previously in The Monetary Times, the Canadian Pacific Railway has offered to lease the Quebec Central Railway, the directors of which have provisionally accepted the offer. It is proposed to lease the railway and all its assets for a term of 999 years for a rental sufficient to provide for interest and dividends as follows:—

1. Payment of interest on the 4 per cent. debenture stock (preserving all existing rights).

2. Payment of 3½ per cent. per annum on the 3 per cent. debenture stock (which is to be converted into a 50-year debenture stock at the new interest rate). Payment of principal guaranteed by lessee.

3. Payment of 5 per cent. per annum half-yearly on the 7 per cent. income bonds (these bonds being converted into new fifty-year bonds at the new rate of interest), and a 10 per cent. cash bonus being given as compensation to the converting bondholders for reduction of interest. Payment of principal guaranteed by lessee.

4. Payment half yearly of a dividend of 4 per cent. per annum on the shares for the first four years of the lease and a dividend of 5 per cent. per annum thereafter.

The Quebec Central has not enjoyed an exceptionally prosperous career, although during the past few years it has made better progress. The following figures gives the results of operation:—

Year	Gr. Erngs.	Expenses	Ratio %	Net earnings
1902	$ 669,000	$467,000	68.86	$202,000
1906	905,000	610,000	67.45	295,000
1908-9	1,022,000	725,000	70.95	297,000
1909-10 ...	1,106,000	760,000	68.68	346,000
1910-11	1,217,000	821,000	67.44	396,000

Since 1905 the full dividend has been paid on the 7 per cent. income bonds, and last year for the first time a dividend was distributed on the ordinary share capital, the rate being 2 per cent. Further progress was made in the twelve months ended with June 30 last, when the company earned a profit equal to a dividend of 4 per cent. on the shares, with a surplus of about $4,000.

Paid-up Capital	$1,825,000
Assets	4,000,000
Reserve	520.000

MONEY TO LOAN ON IMPROVED CITY AND TOWN PROPERTY

4% allowed on deposits of $1 and upwards

5% allowed on debentures of $100 or over, issued for terms of from 3 to ten years

CAPITAL STOCK 7% INVESTMENT

The Company, having disposed of its Capital Stock some years ago, has, therefore, none for sale, but the stock may be purchased through the Toronto, Winnipeg and Vancouver Stock Exchanges, at prices ranging from $128 to $130 per share.

The last seven half-yearly dividends have been at the rate of **9 per cent. per annum,** so that, at the current prices, the **Investment** will **net 7 per cent.**

The Company will be pleased to furnish prospective purchasers with its Financial Statement or other information bearing on the Company, and, if so desired, the Company will purchase the Stock for the investor through the Stock Exchange, or privately, at the current prices.

Since its inception the Company has enjoyed uninterrupted prosperity, and has taken a very active part in the development of the West. With the rapid growth of Western Canada, the demand for money is so great that the present profitable rates of interest will be maintained for years to come; and with such a desirable field for loaning operations, combined with a progressive management, the price of the Company's Stock should continue to advance, and with the prevailing high dividends, the Stock of this Company will undoubtedly be in great demand by those who desire a safe and profitable investment.

BOARD OF DIRECTORS: W. T. Alexander, Esq., Managing Director The Canada National Fire Insurance Company, President and Manager; E. S. Popham, Esq., M.D., Director Standard Trusts Company, Vice-President; Nicholas Bawlf, Esq., President Bawlf Grain Company, Director Bank of Toronto, Director Standard Trusts Company, Second Vice-President; Sir Gilbert Parker, M.P., London, England; E. Reports furnished. Scrip handled.
J. C. BIGGS & CO.

The city of Nelson, B.C., has an incendiary who for some time past has started a dozen fires, three of which have entailed considerable loss—the Hill Mines smelter with $750,000 loss, the Nelson Brewery $50,000, and a Chinaman's house, stables and outbuildings with loss of $6,000. There is no clue to the incendiary, and a reward of $500 has been offered for his capture.

Commissioner Burbidge, of the Hudson Bay Company in Winnipeg, has denied the report that the company had abandoned for an indefinite time the policy of building extension through the west. To an enquiry he said: "The policy of rapid extensions of buildings throughout the west by the company has not been modified. At Calgary work will be resumed shortly when the amended plans are sent back from Toronto. We will also rush construction at Victoria, Regina, and every other point in the west where we had previously planned these extensions."

At the annual meeting of the Manitoba branch of the Canadian Manufacturers' Association held in Winnipeg recently, Mr. M. F. Christie was elected vice-president for the province of Manitoba in the Dominion Association. Mr. Parkhill, of the Alaska Feather & Down Company was elected chairman of the branch. Mr. W. Martin, of the Manitoba Gypsum Company, vice-chairman of the branch; Mr. W. J. Bulman, secretary of the branch. Messrs. W. J. Bulman and M. F. Christie were elected members of the Industrial Bureau Directorate.

The low pressure of water which was obtained in combatting the fire that broke out on the premises of Mr. Gilbert Plante, 162 St. Elizabeth Street, St. Henri, on the 30th August, was commented upon by Fire Commissioner Latulippe at a recent investigation. The testimony of firemen showed that there was only between eight and nine pounds of pressure instead of the normal pressure of 60 to 65 pounds. Commissioner Latulippe said that means should be taken to improve the water system and that the time to bring this need to the knowledge of the company was not after, but before, more fires occurred.

THE
WATEROUS
ROAD ROLLER

Is built essentially to suit Canadian road-building conditions. With over 100 Rollers in use in every part of the Dominion, the Waterous Roller is daily more firmly establishing its right to the title—

"The Canadian Good Roads Pioneer"

Built in three sizes—10, 12 and 15 ton. Carries a double cylinder, double crank engine, a quick-steaming locomotive type boiler of large capacity, has two speeds for fast and slow work, and all gearing cut from the solid steel. Supplied with all standard engine and boiler fittings.

If there is no Waterous Roller in your vicinity, write for our twenty-page catalogue, No. 301, or better still, visit the Brantford Works and see the Roller being built and tested—a practical demonstration that is its best selling argument.

The Waterous Engine Works Co. Ltd.

MISCELLANEOUS ADVERTISEMENTS

LEGAL NOTICE

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 1st day of August, 1911, incorporating Gerard Brakenridge Strathy and Molyneux Lockhart Gordon, solicitors; John Fraser MacGregor, accountant; Joseph Edward Riley, law clerk; James Boyd Moon and John Richard Corkery, students-at-law, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To buy, sell and deal in iron, steel, bronze, brass and other metals, the ores thereof, and wood and other materials; to carry on, operate and run foundries and works for the manufacture of iron, steel, bronze, brass and other metals; to manufacture, erect, buy and sell iron, steel, bronze, brass and other metal work and materials for buildings, bridges and structures of all kinds; to manufacture, erect, buy and sell machines, implements, tools, safes, vaults, vault fittings, shelving, locks, and articles or products made wholly or partly of said metals; to manufacture and erect, build, construct, and repair, under contract or otherwise, buildings, bridges and structures of all kinds, and for such purposes to carry on a general engineering and contracting business; (b) To purchase, lease, or otherwise acquire, hold, own, sell or otherwise dispose of any and all real estate and personal property; (c) To apply for and maintain, register, lease, acquire, and hold or to sell, lease or otherwise dispose of, and grant licenses in respect of or otherwise turn to account any patents, brevets d'invention, improvements or processes, trade marks, trade names, and the like, grants, licenses, leases, concessions and the like, conferring any exclusive or non-exclusive or limited right to use, or any secret or other information as to inventions and any formulæ and secret processes which may seem calculated to benefit the company; (d) To acquire by purchase, lease, hire, exchange or otherwise any rights or privileges which may be necessary or useful for the carrying on of the business of the company; (e) To lease, sell, improve, manufacture, develop, exchange, turn to account or otherwise dispose of any or all of the property and assets of the company for such consideration as the company deems fit, including shares, debentures or securities of any other company; (f) To acquire, purchase or assume all or any part, including the good-will of the business or undertaking, or the property or assets, privileges, contracts, rights, obligations, and liabilities of any company, person or persons carrying on any business which this company is authorized to carry on, or any business similar thereto or possessing any property suitable for the purposes thereof and to pay for the same, wholly or in part in bonds, debentures or fully paid and non-assessable stock of the company, and to sell, lease or otherwise dispose of the same or any part thereof; (g) To enter into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in or about to carry on any business or transaction which this company is authorized to engage in or carry on, or to amalgamate with any such company; (h) To acquire, purchase and hold the stock or shares of stock in, or debentures or other securities of, and any other corporation carrying on business similar to that which this company is authorized to carry on; (i) To issue paid-up shares, debentures stock, debentures, bonds or other securities of the company in payment or part payment for any property, rights, or easements which may be acquired by, or for any services rendered or agreed to be rendered, or work done or agreed to be done for the company, or in or towards the payment and satisfaction of debts or liabilities owing by the company, or for raising money for any other purpose of the company; (j) To invest the moneys of the company not immediately required in such manner as may from time to time be determined; (k) To distribute among the shareholders of the company in kind any property of the company, and in particular any shares, debentures, or securities in any other companies belonging to the company or which the company may have power to dispose of; (l) To carry on any other business, whether manufacturing or otherwise which may seem to the company capable of being conveniently carried on in connection with its business, or calculated, directly or indirectly, to enhance the value of or render profitable any of the company's property or rights; (m) To lend money to customers and others having dealings with the company, and to guarantee the performance of contracts by any such persons; (n) To draw, make, accept, endorse, discount, execute and issue promissory notes, bills of exchange, warehouse receipts, bills of lading, warrants and other negotiable or transferable instruments; (o) To adopt such means of making known the products of the company as may be expedient; (p) To do all or any of the above things as principals, agents, bailees, contractors, trustees, or otherwise, and either alone or in conjunction with others; (q) To do all such other things as are incidental or conducive to the attainment of the above objects; (r) The powers in each paragraph are to be in nowise limited or restricted by reference to or inference from the terms of any other paragraph. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Snead and Company Iron Works, Limited," with a capital stock of forty thousand dollars divided into 400 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 3rd day of August, 1911.

ONTARIO WILL HAVE BIG APPLE CROP.

Representatives of thirty-six associations of the Co-operative Association of Fruit Growers of Ontario met at the Exhibition grounds, Toronto, this week, and decided on a minimum rate of $3.25 a barrel for No. 1 grade winter apples grown in Ontario, and $2.75 for No. 2's. This price is not established, but is a medium whereby producers connected with the association may fix a rate.

Mr. Elmer Lake, the president, addressed the assemblage of apple growers on some of the obstacles the Ontario producer meets in competing with British Columbia and Nova Scotia producers. He said it was the intention of the association to form a joint stock company of fruit growers, which shall, if possible, in the future, control the industry in this province and dispose of the conflicts that arise time and again between the grower and the dealer. He explained that the crop of Greenings is two weeks earlier this year than last. He said that the prices should be fixed in such a manner that the enormous market of oranges and bananas is taken into consideration, these fruits furnishing some competition with apples.

Mr. Percy W. Hodgetts, director of the Provincial government experimental farm at Jordan, and secretary of the association, predicted that the best crops of apples in Ontario are located east of Toronto, and the second best along the shore of Lake Erie. "I am sure that the crop this year will be a record one," said Mr. Hodgetts. "The general crop this year throughout the province is bigger than for several years. It will show a yield 50 per cent. larger than last year. Despite this fact, I cannot say that it will be an average crop, as last year's yield was exceptionally poor."

◆

In the belief that the fire epidemic in the north end of Montreal is largely due to the workings of an incendiary the commissioners have opened an enquiry into the conditions surrounding some of the numerous conflagrations which have recently occurred.

BRITISH VITALITY.

In the United Kingdom there were in the three months ended June 30 last 285,570 births and 156,703 deaths, showing a natural increase of 128,867 in the population, states the Registrar-General's quarterly return issued recently. The population increase in England and Wales last quarter by excess of births over deaths was 105,793, as against 122,782, 111,987, and 119,161 in the corresponding quarters of 1908, 1909, and 1910 respectively. Marriages showed a decrease. In the first quarter of 1911 the rate was 10 per 1,000 of the population, against an average rate of 11.4 in the preceding ten years.

A comparison of urban and rural mortality is made. In the 77 great towns (population over 50,000) the death rate was 13.8 per 1,000, compared with 14.3, 14.6, and 13.3 in the three preceding years. In the 136 smaller towns the rate of 12.4, compared with 13, 13.3, and 11.9; while in the remainder of England and Wales the rate was 13.1, compared with 13.6, 14, and 12.9. Infantile mortality was 91 per 1,000, being 15 below the previous ten-year average, and equal to that in the corresponding quarter of 1910, which was the lowest rate recorded since the establishment of civil registration. By comparison with foreign cities London shows as follows:—

	Births.	Deaths.
London	25.2	13.2
Brussels	16.7	12.2
Paris	17.7	....
Antwerp	19.8	10.2
New York	26.3	....
St. Petersburg	28.1	22.7
Bukharest	31.3	26.1

TO INVESTORS

Brandon, Manitoba

and surrounding territory presents to **Intending Investors**, large and small, the best possible opportunity at the present time (now) to realize large returns quickly.

Brandon Real Estate has never been boomed as other Western cities have, consequently prices are low comparatively.

With hundreds of thousands of dollars being spent in paving and other civic improvements.

With a million dollars' worth of contracts already let for private enterprises this year, Brandon is sure to forge ahead and increase greatly.

Brandon is the place for the conservative investor.

SIX PER CENT. BONDS

CANADIAN REAL ESTATE BOND CORPORATION
SIX PER CENT BONDS

REAL ESTATE SECURITY

The Canadian Real Estate Bond Corporation offers for sale its ten-year six per cent. bonds. The bonds are offered and issued at par in denominations of $100, $500, and $1,000.
They are a first lien upon all real estate and all other assets of the corporation.
The bonds, as well as all other assets of the corporation, are secured by the absolute ownership in fee of approved real estate in the city of Winnipeg and other Western Canadian cities, or by first mortgage upon such real estate.
The bonds mature in ten years. They have interest coupons attached payable semi-annually.

Send for prospectus and other information.

LOANS ON LIFE INSURANCE POLICIES.

(Continued from Page 1123.)

where during a period of three months, appoximately, $60,000,000 was loaned on demand, although it is estimated that less than 6 per cent. of the policies upon which this vast amount was loaned contained demand clauses. Competition will prevent insurance companies from availing themselves of any safety clause, except in case of necessity, as will also the fact that loans in moderate sums are not disadvantageous to a company. The emergency for which we should provide is that of a panic with an extended period of "hard times."

Are Against the Practice.

It is gratifying that the Association of Life Insurance Presidents, as well as the National Convention of Insurance Commissioners, have gone on record against the practice of companies loaning on demand. It remains for agitation of the question and proper legislation. Companies should not be permitted to issue policies which do not provide for days of grace, within which the company may furnish money to a policyholder desiring a loan; nor should a company be permitted to bind itself by contract to give a certain specified sum as surrender value on a policy, without reserving the right of a reasonable period of time within which to pay such cash surrender value, because if a policyholder is in need of money and cannot get a loan, he will call for that which is more detrimental to both himself and his family, and which is equally harmful to the stability of the company, namely, the surrender value of his policy.

Commissioners should discourage the policyholders from borrowing on their policies, to their own detriment, and against the companies, which are the guardians of many and the trustees of all, in exterminating a vicious practice which must, if it continue to expand, shake the confidence of the public in our insurance institutions and demoralize the insuring public.

Intrinsic Value of Investments

When considering investments one should study closely the intrinsic value. When the intrinsic value is much greater than the price one can be sure of profit. When the intrinsic value is less than the price then speculation may increase the selling value, but there is no assurance.

British Columbia wild lands, which under cultivation will return from $50 to $500 per acre in crops, may now be bought from $10 to $15 per acre, depending on quality and amount of purchase. Some of our clients have coal and timber licenses which are worth considering on the above theory regarding intrinsic value

This company acts solely as agent—buys and sells for customers but has nothing of its own to dispose of.

PERJURY AT ARSON TRIAL.

Heron Carufel told Judge Lanctot at the investigation of Mr. Ovila Lambert, the lessee of the hotel at Peloquin, how he had set fire to the hotel. The cross-examination brought out the fact that Carufel had perjured himself no less than seven times during the recent investigation before Fire Commissioner Richie.

Carufel claimed that he was employed by Lambert to work for him as a bartender. Three weeks before the fire Lambert had showed him two jugs containing oil which were stored in a back room of the hotel. At the time he said that he understood that a man named Roy had been hired to set the place on fire. About eight days before the blaze Carufel claims that Lambert came to him and made some proposition with regard to taking Roy's place. Carufel claims that Lambert told him to empty the two jugs of oil in the bar, throw a match into the pool and run to safety. He claims that he did as he was instructed and the hotel was burned.

◆

LIFE ASSURANCE IN FRANCE.

The new assurances of the sixteen proprietary French life companies secured in 1910, amounted to 565,188,475fr., as compared with 546,760,528fr. in 1909. Twelve of the companies showed increases and four decreases. The one which showed the largest increase in new assurances was Le Phenix, and the new business of La Nationale, which totalled 1,184 policies for 115,053,225fr. (about £4,602,130) exceeded the amount reported by each of the other companies. The new annuities effected with the whole of the companies showed a slight diminution as compared with the results of the previous years. The claims of all kinds paid in 1910 by the combined companies amounted to 54,942,645fr., as compared with 59,157,177fr. in 1909.

POLICIES ISSUED ON ALL APPROVED PLANS

THE BUSINESS IN FORCE . .

of The Great-West Life Assurance Company has in four years been exactly doubled. In August 1907 the Insurance in force totalled $31,500,000. On August 18th — the Nineteenth Anniversary—the Insurance in force was $63,000,000, comprising over 32,000 Policies.

The reason for this rapid growth is found in the Policies themselves—inexpensive, liberal, profitable.

Ask for information.

Buying Investment Securities by Mail

We wish to impress upon you the fact that you can do business with us—and with the utmost satisfaction—no matter where you live and no matter how small or large the amount of funds available for investment. Wherever the mails go we can do business.

The requirements of individual investors differ so widely that it is out of the question preparing a number of cut and dried suggestions that will meet the requirements of all who make inquiries regarding investments. For this reason we ask intending investors to give us an idea of the amount of funds they have available for investment, whether they desire Government bonds or municipal debentures, high grade bonds or stocks. In many cases investors leave this point entirely to our decision. In such cases we are guided by the circumstances of those making the investment. Each inquiry receives careful, personal attention. We take pleasure in answering all inquiries regarding investments.

The Bank of British North America . .

Incorporated by Royal Charter

The Court of Directors hereby give notice that an interim dividend, free of Income Tax, for the half year ended 30th June last, of Thirty Shillings per share, being at the rate of six per cent. per annum, will be paid on the sixth day of October next to the Proprietors of Shares registered in the Dominion of Canada.

The Dividend will be payable at the rate of exchange current on the sixth day of October, 1911, to be fixed by the Managers.

No transfers can be made between the 22nd inst. inclusive and the 5th proximo inclusive, as the books must be closed during that period.

By order of the Court,

A. G. WALLIS, SECRETARY,
No. 5 Gracechurch Street,
London, E.C.

5th September, 1911.

The Weyburn Security Bank

CANADA'S APPALLING FIRE WASTE.

The fire losses in Canada for the first eight months of the current year total $15,381,825, an average of $1,922,728 per month. This is equal to a daily loss of $63,299. In other words, $2,637 worth of property has been burned every hour since the new year dawned, or $44 every minute. This is an appalling fire loss, and little is being done to check such extravagant waste of capital. The losses during 1909 and 1910 are as follow:—

Month.	1909.	1910.
January	$ 1,500,000	$ 1,275,246
February	1,263,005	756,625
March	851,690	1,076,235
April	720,650	1,717,237
May	3,358,276	2,735,535
June	1,360,275	1,500,000
July	1,075,600	6,386,674
August	2,582,915	1,667,270
September	1,615,405	894,125
October	2,208,718	2,195,781
November	935,191	1,943,708
December	1,433,813	1,444,860
Total	$18,905,538	$23,593,315

Adding to these figures the total for the first eight months of 1910, we have a fire loss in thirty-two months of $57,880,678, an average monthly loss of $1,808,771. In addition, there has to be recorded a disastrous list of fire fatalities. Last month in Canada twenty-two people met their death in fires. During the first eight months of the year 250 lives were sacrificed in the same manner. In the thirty-two months since January, 1909, no less than 728 persons lost their lives in fires, a monthly average of almost 23 persons. The following table gives the details:—

Month.	1909.	1910.	1911.
January	16	27	27
February	8	15	12
March	16	20	18
April	18	37	20
May	21	15	28
June	16	52	13
July	4	15	110
August	17	11	22
September	10	10	..
October	26	16	..
November	34	19	..
December	33	19	..
Total	219	256	250

Carelessness has been responsible for the greater part of this loss of life and property. For instance, of the 22 deaths last month, 7 were caused by stove, spirit lamp and coal oil explosions and 3 by clothes catching fire. The presumed causes responsible for fires during August and the number of fires for which they accounted were as follows: Ten, lightning; eight, incendiarism; five, defective wiring; four, bush fires; three, spontaneous combustion; three, careless with cigars and cigarettes; two, forest fires; two, careless with matches; three, oil stoves upset, and one each of the following: Defective gas plate, smoking in bed, defective drying-room, spark from threshing machine, defective auto lamp, rats and matches, asphalt boiling over, sparks from engine, film coming in contact with electric wires, gasoline explosion, hot ashes, sparks from mill, overload of current, grass fires, kerosene explosion, grease boiling over, hot box.

The National Board of Fire Underwriters of the United States, continuing its plan of education on the need of better protection, issued an exhaustive classification of fire losses in 1909, showing why the insurance companies are forced to ask higher rates in America than in Europe, and why rates in America itself necessarily vary. Taking thirty of the largest cities of the United States, the per capita loss in 1909 was shown to vary from $1.36 in St. Louis to $4.55 in Kansas City. Higher per capita loss was shown in some of the smaller centres, like the city of Racine, where it ran to $24.29. The total annual fire loss is estimated at $200,000,000, and fire specialists go so far as to assert that $150,000,000 of this is waste from negligence or lack of precautions. The table of comparisons drawn up by the underwriters from consular returns in 1905, the only recent year in which statistics of the kind were gathered in Europe, showed an average loss of 61 cents per capita for thirty European cities as against $3.10 for 252 American cities. Taking the number of fires to each 1,000 of population here and in Europe, it was found to be 4.05 in the United States against .86 in Europe.

The annual average losses for six nations in Europe were compiled from records of varying years and years grouped, with this result:—

Country.	Annual fire loss.	Loss per capita. Cents.
Austria	$ 7,601,389	29
Denmark	660,924	26
France	11,699,275	30
Germany	27,655,600	49
Italy	4,112,725	12
Switzerland	999,364	30

Or an average loss per capita of 33 cents.

Estimating Canada's population last year at 7,500,000, the fire loss per capita in the Dominion was $3.14, compared with $2.70 in 1909, with an estimated population of 7,000,000.

In Berlin, where the losses amount annually to less than those of one moderately large fire in the United States, the excellent conditions are due to the attention paid to the methods of construction. Building police have authority to compel the use of iron and steel girders, fireproof stairways and roofing, heavy fireproof ceilings and all details that may diminish the risk of conflagration.

Canada cannot claim to be making untrammelled progress until its fire record has been improved considerably.

FARMING AS A HIGH PROFESSION.

The exodus of the rural population to congested centres has created many problems which remain unsolved. According to figures of the Washington census bureau, during the ten years which followed the census of 1900, the population of the United States increased 21 per cent., but the number of farms did not keep pace with the increase in population. From 5,737,372 in 1900 the number grew to 6,340,357, an increase of 602,985, or 10.5 per cent. For the whole United States this is the lowest rate of increase which has been noted since the number of farms was first recorded in 1850. Measured by the number of farms, agriculture exhibits a diminished rate of increase, and in large areas of the country is practically stationary.

The small growth in the number of farms has not been compensated by any growth in the size of farms, the average number of acres in farms having decreased from 146 in 1900 to 138 in 1910. The increase in the total acreage devoted to agriculture was only 35,137,000 acres, or 4.2 per cent. The actual area in farms was 838,592,000 acres in 1900, and 873,729,000 acres in 1910.

Many reasons have been advanced for this position Mr. Rudyard Kipling the other day hinted that the people of the United States had by their own haste and waste dissipated their own resources. That might account for the working of the soil in the United States for the immediate dollar and the consequent trek of the border states to the virgin soil of Canada.

Mr. James J. Hill resents Mr. Kipling's insinuation, and says that the only thing that will guide the people back to the land is empty stomachs.

"The solution of the production of enough food to feed the too numerous people engaged in industrial occupations," he says, "is in a system of experimental farms. There are just three preliminary steps the most expert farmer in the world could take. If he is given 160 acres to cultivate, he can send a sample of his soil to the laboratory of the state agricultural college to be analyzed; he can try out his seeds in a cheap device, proving their fertility before planting, and he can properly prepare his seed-bed. But the farmers don't, and the only way to teach them is by actually making them do it themselves, going on to their farms and guaranteeing them an increased crop if they will do things the way they are told to. A man who has once actually done it never needs to be shown again. It is astonishing how great the variation is in the yield per acre. Twenty bushels of wheat to an acre at ninety cents a bushel gives a profit of $10 an acre, allowing $2.50 for rent and $5.50 for labor, seed and fertilizing. On an eighty-acre farm that would mean $800 profit. Twelve bushels of wheat to an acre on a farm double the size would net a profit of only $400.

"In 1860, practically 50 per cent. of the United States population was on the soil. At present, there is about 30 per cent. The United States can no longer consume their own industrial output. There are 3,000,000 less hogs in the United States than there were ten year ago, and 9,000,000 less cattle, and exports of grain are steadily diminishing."

A modern philosopher once said that brains were as cheap as butter, indicating that too many careers were concentrated in professional spheres. It may be that one day empty stomachs will give the manual labor of the farm a higher status, inducing more young men to follow the profession of farming rather than those callings which require a plug hat and a frock coat as imperative assets.

SPECULATORS AND SUGAR.

There is a Crop Shortage, but Speculation is Making the Most of the Situation.

Price per 100 pounds before June 30th	**$4.60**
Price per 100 pounds this week	**5.85**
Increase in price per 100 pounds	**1.25**
Primary cause	**Actual crop shortage**
Artificial cause	**Speculation**

The price of sugar is rising rapidly, and there is little likelihood of cessation until the consumer eats his sugar according to the price. There is an actual shortage in the crop, and speculators, largely in New York, are squeezing the situation for the biggest profits possible. The price will likely continue to advance until it slackens the consumption of sugar.

Prior to June 30th, granulated sugar in bags was quoted wholesale in Montreal at $4.60 per 100 pounds. Since then, a succession of advances of five and ten cents, chiefly ten, have raised the price to $5.85 per 100 pounds, an increase of 1¼ cents per pound. The price in Toronto is ten cents higher than the Montreal figure. The rise has taken place mainly since the end of July.

Owing to the competition among Canadian refiners the advance in Canada has not kept pace with that in New York. When the Montreal price was $5.80, the United States figure was $6.50.

The earliest relief probably will not come until the West Indian crop is harvested in February or March. The beet crop failed in Germany, and there were other disasters, too. The Cuban crop was poor, the West Indian crop was only fairly good, and in the United States the beet crop was poor. In Austria and the other European countries the beet crop also failed from lack of rain. As a result, speculators have cornered what beet sugar they could get and this has precipitated the present situation.

◆

ONTARIO'S MINERAL OUTPUT

For First Six Months of the Year—Still a Big Increase in Silver.

Returns to the Bureau of Mines show that the output of the metalliferous mines and works of Ontario for the six months ending June 30th, 1911, was as follows:—

	Quantity.	Value.
Gold, ounces	2,276	$ 42,320
Silver, ounces	15,231,969	7,644,200
Copper, tons	4,418	631,827
Nickel, tons	8,418	1,809,759
Iron ore, tons	94,803	239,114
Pig iron, tons	255,303	3,823,593
Cobalt and nickel oxides, pounds	219,584	64,876

Compared with the corresponding period of 1910, the above figures show the following increases:—

	Quantity.	Value.
Gold, ounces	2,275	$ 42,320
Silver, ounces	2,417,142	1,376,670
Iron ore, tons	55,306	126,032
Pig iron, tons	33,585	382,905

And decreases as follows:—

Copper, tons	216	$ 28,670
Nickel, tons	921	196,901
Zinc ore, tons	576	5,000

Gain in Value.

In quantity the shipments from the silver mines amounted to 12,113 tons, of which 7,733 tons were ore and 4,380 tons concentrates. In addition 1,302,699 ounces bullion were sent out. For the first six months of 1910 there was shipped of ore 12,041 tons and 2,763 tons concentrates. There is, therefore, a considerable falling off, so far as shipments are concerned, in actual weight, but a decided gain in value. Taken in connection with the increase in shipments of concentrates, this would indicate that the mines are confining their ore shipments largely to high-grade, and putting the lower qualities through the stamping mills.

Gowganda and Porcupine.

Gowganda sent out 110 tons of ore and two tons concentrates, and South Lorraine 216 tons ore, the whole containing 430,540 ounces of silver.

The yield of gold is still small, production at Porcupine being delayed by the disastrous fires, which destroyed the plants at the Hollinger and Dome mines.

INTERNATIONAL JOINT COMMISSION

Is Now Complete—Messrs. Barnhall and Geoffrion and Sir George Gibbons are the Canadian Members.

The international joint commission, the new body formed to determine disputed questions between the United States and Canada, is now complete, according to a despatch from Washington, where word is being awaited from the Canadian secretary for a meeting. Ambassador Bryce has notified this government of the appointment of the Canadian members, who are Sir George Gibbons, of Toronto; A. P. Barnhall, of St. John's; and Aimee Geoffrion, of Montreal. The American commissioners are former Senator Carter, of Montana; former Representative Tawney, of Minnesota; and Frank S. S. Strester, of New Hampshire. L. White Busbey, secretary of the American section, has opened headquarters in the southern building, and is expected any day to hear from the Canadian members as to a date and place for holding the first meeting.

Use of Waterways.

The commission will take up questions relating to the development and use of the waterways between the two nations. The primary work of the commission will be in relation to the use of the waterways, rather than to the location of boundaries. Many plans for the adoption of the waterways to industrial purposes are pending, but up to this time there has been no complete authority for granting permits, and at the same time conserving the interest of people on both sides of the border.

Schemes to be Considered.

Among the schemes awaiting sanction are the plans for developing water-power in the St. John's River, for the development of the Richelieu River, the outlet of Lake Champlain, for the development of water-power in the St. Lawrence River between New York and Ontario, for a sanitary canal around Niagara Falls on the American side, for the development of water-power in the Rainy River, between Minnesota and Canada, for development of water-power in the Lake of the Woods, and the use of waters in Saskatchewan and Montana for irrigation.

The creation of the commission provides for direct negotiations between Canada and the United States, avoiding the delays consequent upon diplomatic communication between Washington and London, and hence back to Ottawa.

◆

DISTRESS FROM FIRES IN NOVA SCOTIA.

Mr J. M. Fraser, manager, Canadian Bank of Commerce, at Shelburne, N.S., informs The Monetary Times that about fourteen families both in Roseway and Clide River, N.S., were rendered homeless and deprived of effects by recent fires in that district. Anything in the nature of assistance from the public, whether money, clothing, or housekeeping utensils, will be appreciated. Such donations can be forwarded to Councillor Charles D. Hagar, Roseway, Shelburne Co., N.S., or to the Editor of The Shelburne Gazette, Shelburne, N.S.

The following is a list of those who suffered fire losses:—Thomas McKenney, house and general store, uninsured; Rufus J. McKenney, house, uninsured; Thomas Doane, house, barn and workshop, uninsured; William Doane, barn, uninsured; Hugh McKay, house and barn, uninsured; John C. Perry, house and barn, uninsured; James A. Perry, barn, uninsured; Allen Perry's estate, house and barn, uninsured; James E. Perry's estate, house and barn, uninsured; Albert Whitman, house and barn, uninsured; Rufus P. McKenney's estate, house, uninsured; James T. Hamilton, house, barn and workshop, uninsured; Lewis Perry, house, uninsured; Jabez Doane's house and barn, occupied by John Stalker, uninsured; Agnes Farmer's house and barn, occupied by Charles Laver's family, uninsured; Charles Laver's house, unoccupied, uninsured.

The following public buildings were also destroyed and were insured: Methodist Church, schoolhouse and public hall.

◆

Mr. Alfred N. Mitchell, assistant secretary of the Manufacturers Life Insurance Company, was recently made the recipient of a cabinet of silver on the occasion of severing his connection with this company, after ten years service, to assume the duties of assistant general manager of the Federal Life Assurance Company. He was also tendered a complimentary dinner by the head office staff at the National Club, Toronto.

DOMINION ASSOCIATION OF CHARTERED ACCOUNTANTS

Annual Convention at Montreal—Over-Capitalization of Joint Stock Companies Discussed—Uniformity of Standards Among Provincial Societies—Standards of Professional Conduct and Practice and Reserves

Accountants from nearly every province in Canada gathered together last Friday and Saturday at Montreal, the occasion being the ninth annual convention of the Dominion Association of Chartered Accountants. Nearly one hundred delegates were present and manifested lively interest in the proceedings.

The Dominion Association is composed of the membership of the various provincial societies. Its objects are to establish uniformity in standards of examination and membership throughout the Dominion, and to act in an advisory capacity to the provincial societies.

The convention was held in the building of the McGill Union and was a commendable success. Keen interest was taken in the various papers read.

May Establish Commercial Course at McGill University.

One of the most important announcements of the convention was made at the annual banquet held in the Windsor Hotel on the Friday evening, when Dr. F. G. Adams, Dean of the Science Faculty of McGill University, stated that it was the desire of the University to get into closer touch with the commercial life of the city. Dr. Adams stated that McGill hoped at an early date to follow the example of the University in Birmingham, England, and establish a faculty of commerce, whereby men might get a preliminary training for industrial law, accountancy, economics and modern languages, by a two years' course. This movement, he hoped, would be the means of bringing the university and the city into closer relations.

Convention a Big Success.

The social side of the convention was not lost sight of in the vortex of business, and the luncheon at the Royal Victoria College, as guests of the Montreal association, the visit to the new medical building of McGill University; the annual banquet at the Windsor Hotel; and the automobile drive to the Forest and Stream club at Dorval, were much appreciated by the members.

The convention was a happy one and the council of the Dominion Association, together with the Montreal Association, are to be congratulated on the success which attended their efforts to make the ninth annual convention the best in the history of the Association.

FIRST DAY

After the delegates had registered, Mr. J. Macdonald Hains, president of the Montreal Association, extended to them a hearty welcome.

Mr. A. F. Riddell, president of the Dominion Association, said that although the past year had been somewhat quiet and uneventful, satisfactory progress had been noted. The Saskatchewan Institute was incorporated prior to the last annual meeting and the Alberta Institute had been admitted to the membership of the Dominion Association. The president briefly referred to the disallowance by the government of the act passed in 1910 by the Ontario legislature affecting the Ontario Institute, stating that the council of the Dominion Association realized the matter to be of supreme importance to the profession in Canada. On the representation of the Ontario Institute, they afforded such assistance as was in the council's power in endeavoring to overcome the objection of the government to the Ontario act. Their efforts were unsuccessful in preventing disallowance. The Alberta Institute have also invited the assistance of the Association in regard to similar proceedings which may be taken by the government in regard to their act of incorporation. A suggestion had been received from one of the provincial associations that the Dominion Association make representation to the government in connection with the question of bank audits. The council thought that any action which might be taken by the Dominion Association was liable to be misconstrued and that it would be better to await developments until an invitation to do such work came to them.

Uniformity of Standards Among Provincial Societies.

A paper on "Uniformity of Standards Among Provincial Socieies," prepared by Messrs. H. Meredith Smith and George C. McDonald, was then submitted. Mr. Geo. C. McDonald, secretary-treasurer of the Dominion Association read the paper, which touches particularly on: (1) "By-laws re-admission and standards of examination;" (2) "Interchange of membership." "In tabulated form," said Mr. McDonald, "the various differences that exist amongst the provincial societies on the question of apprenticeship, are:

Montreal requires four years apprenticeship with a member of the association, with intermediate examination to be passed at least one year before final.

Ontario in the ordinary course prescribes three years service with a public accountant before writing final—one year to elapse between primary and intermediate and between intermediate and final.

Manitoba requires intermediate and final examinations with one year between, and which must be passed in the service of a practising chartered accountant.

Saskatchewan—preliminary, intermediate and final examination. One year between latter—no clause re service with chartered accountant. Candidate must satisfy council as to sufficiency of experience in accounting.

A. F. RIDDELL.

Past President, Dominion Association of Chartered Accountants.

Nova Scotia—preliminary, intermediate and final. Candidates must be 21 years before taking final—no clause re service or period intervening between exams. Accounting experience must be satisfactory to council.

Alberta—intermediate—final one year after passing intermediate. Accounting experience satisfactory to council

British Columbia—preliminary, within one year of registration as a student unless entitled to exemption. Intermediate—one year after preliminary. Final—two years after intermediate. Before final—candidate must have been at least two years in office of a member of the Institute or in the office of a qualified chartered accountant of a recognized association of chartered accountants.

Should Make a Three Year Period.

The term as will be seen at present varies between two and four years. There are, however, certain exemptions.

Montreal allows half-time to clerks who have served with members of sister associations in Canada and Great Britain, but not more than two years off. University and Royal Military College graduates are allowed one year off apprenticeship but no exemption from examination.

Ontario, on the other hand, makes no allowance for time served with members of sister associations in Canada or Great Britain, but recognizes equivalent examinations of any Incorporated Institute or Society of Accountants which carries with it a shortening of the term of apprenticeship. Nova Scotia has a similar provision.

Discrepancies exist as present, and if any mutually approved by-law can be passed it would be advisable to make the period for all a three year period which must be served in the office of a practising chartered accountant.

The suggestion of a three years' service in a chartered accountant's office is merely tentative in view of present existing conditions. In due course a five year term should be aimed at. Business conditions are daily growing more complex—huge corporations are being formed and the work and duty of the chartered accountant is becoming more onerous and responsible. It should be the aim of the various provincial societies recognizing these developments and conditions to co-operate in framing by-laws so that by practical training and examination they will turn out men competent to deal with any problems or situations that may confront them.

A provision allowing university and Royal Military College graduates one year off is a good one, as it tends to bring into the various associations a very desirable element and if adopted generally, could not but be in the best interests of the profession.

Standards of Examination.

The following table outlines the subjects which are at present compulsory in the examinations held by the different provincial societies.

Ontario.—Preliminary: Business correspondence, spelling and punctuation, penmanship, English grammar, Canadian history, geography, arithmetic, bookkeeping, and bills of exchange. Intermediate: Arithmetic, bookkeeping and accounts, auditing, mercantile law, statute law. Final: Bookkeeping and accounts, auditing, business investigations, accounting systems, municipal accounting, statute law.

Montreal.—Intermediate: Arithmetic, algebra, bookkeeping, elementary questions in company law, partnership and insolvency. Final: Bookkeeping, accountancy, auditing, company law, partnership, banking and bills of exchange, insolvency, trustees and executors, and elementary political economy.

Saskatchewan.—Final: Auditing Dominion companies act, Saskatchewan companies ordinances, business investigations, commercial law, municipal accounting and auditing and bookkeeping.

British Columbia.—Preliminary: Dictation, arithmetic, algebra, and a choice of geography, stenography, French or correspondence. Intermediate: Arithmetic, including annuities sinking funds, and law, including British Columbia companies acts, creditors, trust deeds, acts, bookkeeping. Final: Insolvency and bankruptcy, Dominion of Canada and British Columbia statutes, partnership, arbitration, bills, cheques, sale, insurance and bonds, actuarial science, political economy, theory and practice of bookkeeping, auditing, management of bankrupt estates, trusts, formation, administration, reconstruction, liquidation of public companies, procedure under judicial references and arbitrations.

Manitoba.—Intermediate: Mathematics, bookkeeping, partnership law, common law. Final: Auditing, bookkeeping, partnership, joint stock company accounts, assignments, general commercial law.

Nova Scotia.—Preliminary: Penmanship, spelling, history and geography, grammar, arithmetic, bookkeeping and commercial law. Intermediate: Arithmetic, bookkeeping and partnerships, bookkeeping and executorships, commercial law, auditing. Final: Bookkeeping and partnerships, bookkeeping and executorships, auditing, mercantile and statute law, accounting systems.

What the English and Scottish Societies Have Done.

Here it may not be out of place to show what the English and Scottish societies have done in the matter of standardization of examination. In 1892 the three Scottish societies formed a general examining board in order that rules of admission and standards of examination should be similar. For the English Institute of Chartered Accountants there is one central examining board consisting of not less than seven members of council with power to appoint examiners.

Although recognizing that in Canada educational matters in each province are under the control of their own provincial legislature it would seem that a great deal of labor could be saved, and the standard and position of the profession in Canada improved by following the example of the Scottish and English societies in appointing one general examining board to set all the papers except those relating to certain law subjects where the legal enactments of the various provinces differ. This could be arranged by the several provincial societies conferring on the Dominion Association the authority to appoint a central examining board consisting of representatives from each association. This central board would set the examination papers for all subjects, except local statute law, and establish standard of marks which all candidates must attain to be successful.

Papers Could be Approved by Provincial Associations.

The papers set and approved by the board would be sent to the secretaries of the local associations, and the latter bodies would add to these papers such questions on local statute law as they might deem advisable, the whole would then form the examination to be written by the different candidates. A common day would be settled on by the central board so that all candidates would be writing at the same time. Supervisors of the candidates would be appointed by each local body. After the examinations are finished the papers bearing on the questions set by the central board would be sent to its secretary who would convene a meeting where all papers would be passed on and a report sent to each local association upon its candidates. The local bodies would then be in a position to deal with all applications for membership. Under a scheme as above outlined there would be no question as to difference of standards in the different associations and the autonomy of the local associations would be fully protected.

Another phase is the tendency to affiliate with the universities for the purpose of instruction and examination. This has occurred in the most recently organized of our provincial societies—Saskatchewan and Alberta. This if accompanied by a sound practical training as an apprentice in an accountant's office cannot but tend in the right direction. The possible objection that a university examination might be too theoretical is taken care of in the cases cited by the provision for a joint examining board composed of chartered accountants and university professors.

Uniformity in Standards of Admission of Members of Sister Associations.

The provincial associations are gradually working to this end, but as will be seen from the following comparisons there are various differences as regards the qualifications necessary and procedure prior to admission which might be standardized: Montreal—Members of recognized sister associations in Canada and Great Britain who are in good standing, and practising at the date of their application may at the discretion of the council be admitted on such conditions as they, the council, shall see fit subject always to the ratification of the association by a three-quarter vote at next general meeting. Membership is restricted to public practising accountants. Procedure: Montreal—Applicants must be over 21 years. Proposed by three members—application approved by council—three-quarter vote at next general meeting.

G. U. STIFF.

Secretary, Dominion Association of Chartered Accountants.

Ontario and Nova Scotia—Members in good standing of certain registered sister associations exempt from final on satisfying council that they have reasonable grounds for wishing to join the association. Applicants must be over 21 years of age.

Manitoba and Saskatchewan—Will exempt members of incorporated societies on the council being satisfied and on production of certificate from society. Procedure: Manitoba—Proposed by two members—application approved by council—balloted for by association, and five negatives exclude. Saskatchewan—Same as Manitoba except that a majority of negatives exclude.

Alberta—Will exempt members of incorporated societies on the council being satisfied and on production of certificate from society.

British Columbia—Has no by-laws bearing on this subject.

If a general examining board be appointed on the lines already indicated a uniform standard would be established for all the provinces, and on the basis of the regulations of Ontario Institute with restrictions of membership to practising accountants, there would be no hesitation as to free interchange of membership.

Montreal—Applicant must be in practice for himself in Quebec for one year prior to application. Must pass intermediate and final examinations.

Ontario—Exempt from intermediate if in practice as public accountant for five years prior to date of application.

Manitoba—Two years practice as public accountant gives exemption from intermediate.

Saskatchewan—Same as Manitoba, two years exempt intermediate.

Alberta—Three years continuous practice to satisfaction of council will exempt from intermediate, or if applicant has passed equivalent test of some other institute.

Nova Scotia—No provision.

British Columbia—Five years in practice as accountant—two years of which must be in British Columbia. Evidence thereto to satisfaction of council. No exemption from intermediate or final.

Here again we have by-laws evidently framed to suit local conditions. The question is whether by judicious alterations of the by-laws in question can all the provincial societies be brought into line.

It must be recognized that in the newer provinces it will be almost impossible to build up an association, if its membership should be restricted to practising accountants only. However, in the older provinces it would be in the interest of the profession to insist on such a qualification. In this connection it might be advisable to point out the application of this to candidates for membership other than those qualifying through a regular apprenticeship or service with a member of an association. When a man is publicly practising he is careful in his work so as to secure and retain the confidence of the public, and in addition he is under the observation of the members of the different associations with the result that, when his application for membership comes up, the members of the association are in a position to intelligently pass thereon.

.G. C. MACDONALD.

Retiring Secretary of the Dominion Association of Chartered Accountants.

Restriction of Membership.

In the foregoing nothing has been said with regard to restriction of membership in provincial societies to accountants actually residing and practising in the provnce. Previous to this year membership in the association of accountants in Montreal had been restricted in this manner. At the same time the charter prohibited anyone practising as a chartered accountant in the province of Quebec unless he was a member of the Montreal association.

These regulations seemed to bear heavily on the tendency of the profession at present to the establishment of large firms with numerous branches and many partners. It precluded the formation of partnerships between members of the Montreal association and those of other associations whether in Canada or Great Britain, that is, as far as practice in the province of Quebec was concerned. Within the past year a change has been made in the regulations of the Montreal association so that it is now possible for a member of a recognized sister association in Canada or Great Britain to join the association without necessarily residing and practising in the province of Quebec.

This brings Montreal into line with most of the other Canadian societies, and it is now possible to establish a partnership of the nature referred to above. It means that all the members of a firm proposing to practice in the province of Quebec must join the local association. This applies also to most of the other provincial societies.

The same object would be gained by restricting membership in the provincial societies to those actually residing and practising in the province and permitting firms of chartered accountants to practice as such in the province on condition that the local representatives of such firm are members of the local association and on condition also that all other partners in such firm are members in good standing of recognized sister associations.

This would do away with a great deal of duplication of membership and still ensure control by the provincial society of all matters coming under its jurisdiction in the province.

Committee Will Investigate and Report.

Mr. F. C. S. Turner, secretary of the Manitoba Association of Chartered Accountants, replied, and while endorsing the views expressed by Mr. McDonald, questioned if a central examining board could meet often enough.

Mr. John Parton, of Winnipeg, suggested the appointment of an eastern and a western board of examiners as the conditions were somewhat different, also that the examination papers should be prepared on work an accountant was likely to undertake.

Mr. W. B. Tindall, Toronto, said that the papers should be prepared with the view of enabling the accountant to undertake work in any part of the Dominion. The standard of a chartered accountant was one of usefulness to clients and those who employed him; while Mr. A. H. Edwards, of Calgary, was of opinion that examinations should be uniform all over the Dominion. That there was no reason for the holding of examinations in the Spring was the opinion of Mr. W. T. Kernahan, of Toronto. As an alternative he suggested that the papers set for examination could be forwarded to the Dominion Association, and the examiners could meet the day before the annual meeting and decide on the subjects.

Mr. W. A. Henderson, of Winnipeg, favored the appointment of a central examining board as it would strengthen the position of the association, and moved that the new council appoint a committee to investigate what could be done and report at the next annual meeting.

Mr. Geo. U. Stiff, Toronto, seconded the resolution.

Modern Methods of Over-Capitalization Condemned.

"The Capitalization of Joint Stock Companies," was dealt with by Mr. J. W. Johnston, M.P.P., F.C.A., of the Institute of Chartered Accountants of Ontario. He unsparingly condemned the practice of organizing companies with a large amount of watered stock.

"The capitalization of joint stock companies as a subject for discussion at the annual meeting of the Dominion Association of Chartered Accountants suggests that conditions have arisen in connection with limited liabilty companies that demand serious attention," said Mr. Johnston.

"It is a matter that deeply affects the general public, but the general public, as a rule, is ignorant of or indifferent to matters of finance, and can be easily plucked without being conscious of the plucking. It becomes the duty, therefore, of those charged with the making of the Dominion and provincial laws to safeguard the common people by preventing oppression, deceit and extortion as far as it is within the power of legislation to accomplish that object.

"The vast development in the commerce of the world during the past half century has been rendered possible by joint stock companies bringing together the surplus capital of many people into great concerns. Knowing definitely the extent of their liability, individuals are willing to take the defined risk and invest their money to create and carry on enterprises that are of infinite service to the locality in which they are situated and the community that they serve, and are of advantage to the world at large. It is right that special privileges should be guaranteed by legislation to the shareholders of these companies. Without these privileges they would never have existed and the great things they have done would never have been accomplished.

Watered Stock Should be Called Wind Stock.

"The financial liability of each general partner in a general partnership is unlimited, his entire assets are liable for payment of the debts and obligations of the partnership, and each partner, acting within the scope of the partnership, can bind his fellow partners to an unlimited extent. Each is the agent of the others. Legislation has provided in connection with all joint stock companies, incorporated either under the General Act or by special acts with the exception of banks, that the amount of stock for which he has subscribed is the full extent of the shareholder's liability, and that the shareholders in banks shall be liable to the same extent and for as much more as the par value of the stock in the event of failure. No shareholder's act can bind another shareholder or make him in any way responsible.

"Early joint stock legislation, assumed that subscriptions to stock were intended to be paid in cash or in property measurable by cash, and that the net income earned would be a percentage of profit upon actual investment. The first divergence from this principle was the allotting of dividend stock, and later came the introduction of that which is known as watered stock, which is the creation by a joint stock company of liabilities (to shareholders) against which there are no tangible assets, watered stock has neither body nor soul, and might as well have been designated wind stock.

No Attempt Made to Conceal its Existence.

"When the practice of issuing watered stock first began it was carried on covertly. In these days no attempt is made to conceal its existence and it is openly advertised in newspapers and in prospectuses as a bait to effect sales of stock. So far as I can ascertain, gas companies in Chicago and New York were the first joint stock companies to resort to this method of deceiving the public and extorting, through this instrument of tyranny, excessive prices and exorbitant profits from consumers of their products. It is worth while to note here for commendation that the charter of the Consumers' Gas Company of Toronto prevents such manipulation. When the profit reaches a certain percentage of the actual capital that was paid by the shareholders in cash the company is bound to reduce the cost of gas to consumers at the intervals when the conditions are ascertained, and, in consequence, the consumers of gas in Toronto pay for it now only 75 cents per M cubic feet.

"This is what the wicked American companies did. I quote: 'The gas companies are playing their usual tricks upon the consumers. In Chicago all the existing companies have agreed to combine. The capital actually invested in them amounts to about $10,000,000, but the amalgamation intends to water this up to $25,000,000, in order to conceal the size of the dividends yielded by extortionate rates. In New York the Consolidated Gas Company was established to swallow up the various companies then existing, which had invested $11,215,000; the capital has now been watered up to $39,078,000. The rule that should be enforced is, that corporations using such franchises should not be permitted to water their stock, and that their profits should be restricted to a reasonable annual percentage of the money actually invested.'

Canadian Banks Have No Watered Stock.

"Canadian banking companies have never issued watered stock. The balance sheets of those that have failed in recent years contained fraudulent figures among the asset accounts, but such an account as 'Good Will,' or similar fictitious asset accounts used to make debits against the issue of watered stock and about as valuable as an inflated bladder, never appeared, and yet, there is not a business carried on in any line of trading or manufacturing in this country that can possess as good will anything to be compared in value with the custom built up by a great Canadian bank.

"The privileges conceded by legislation to the shareholders of joint stock companies should impose corresponding obligations and responsibilities upon them. They should not be permitted to use an instrument of tyranny to impose upon the public, increase prices by combinations, or prevent or restrain competition in trade. Over capitalization, by the medium of watered stock, is, as practised in the United States, a greater instrument of tyranny over the people than the most cunningly devised scheme of extortion that was ever put in force by ancient despots. This instrument of imposition upon the people is now being used in Canada. I can prove the existence of combinations, in connection with the food which is daily on the table of the poor man struggling to support his wife and family of Canadian boys and girls, through which absolute control of production and sale has been secured. I can prove that the prices of food with which the companies that were cajoled or coerced into the combines were satisfied, and which yielded a fair return on investment, were increased fifty per cent. when the combines got control.

"Water stocked mergers could not secure sufficient money to effect their object. Watered stock is the handy tool when the demand for the goods is so general and the control so perfect that the assurance is present from the start that the profits will be enormous.

"It is one of the scandals of the world that in the United States, mergers and combines rule, dominate and control the people more powerfully than does their Congress. The tyranny they exercise is made possible through over capitalization, the instrument of which is watered stock. The octopus created by over-capitalization is making rapid strides in Canada. Its tentacles are spreading. The people must be protected by legislation, as they cannot crush it or resist it by any effort of their own.

Over-Capitalization One of Greatest Dangers.

"Mr. Wallace Nesbitt, K.C., one of the most eminent lawyers in Ontario, formerly of the Supreme Court Bench, stated in a speech at Chatham in January, 1911, that 'One of the greatest dangers at the present time to the community is the unwarranted issue of capital stock of corporations as against so-called good-will and other intangible assets; in a word what is known as the issue of watered stock.'

"Mr. Justice Clute, of the Ontario Bench, said to me in February last, that the effort made at the last session of the Ontario legislature to prevent, so far as its jurisdiction extends, the issue of watered stock, was one of the most commendable things ever attempted in that House. During the recent tour in the West of Mr. R. L. Borden he was asked at a public meeting for his opinion of watered stock, and he answered that he 'would favor a bill to prohibit it.' Hon. E. R. O'Malley, ex-Attorney General of the State of New York, stated in a speech delivered before the Canadian Club in Toronto in February last 'That the prevalent opinion in the United States is that it is chiefly due to the big industrial combinations, which have cornered both the source of production and the manner of distribution, that the prices of the necessaries of life are now so high.'

Mr. Meighen Opposed to Mergers.

"Mr. Robert Meighen, president of the Lake-of-the-Woods Milling Company, one of the most prominent business men in Montreal, and one of Canada's greatest merchants and most distinguished men, died in July last. His friend, Mr. Robert Bickerdike, M.P., said in the Montreal Star, after his death, that 'Mr. Meighen was opposed to mergers and the watered stock of great corporations. He urged me to bring in a bill in Parliament making watered stock an indictable offence. 'I hold,' Mr. Meighen declared on one occasion, 'that there should not be any monopoly in a line that would affect the price of bread to the entire community; but that, on the contrary, there should always be at least reasonable competition. I am not going to make any money at the expense of the people of the country through selling my holdings in order to effect a merger of these two milling industries.

"Speaking generally, and from the point of view of the common people, the ideal condition, insured by legislation, should be that no capital liability or obligation to shareholders should be permitted on the books of a joint stock company that has not for its basis the payment of cash, the transfer of property, the retention by the company of profit actually earned, services rendered, valued at their actual worth. I would prefer, however, that services be paid for in cash, which would be charged to formation expense account and should be gradually written off within five years after the company's formation. I would eliminate fiction absolutely. This process would wipe out good will and similar fictitious asset accounts.

Bonus of Common Stock is Offered as a Bait.

"In a statement presented by a well-known firm of chartered accountants, which appeared along with a recent advertisement offering for sale a million and a half of cumulative preference stock, carrying a bonus of 25 per cent. in common stock, I find the sum of $3,820,000 under the head of real estate, buildings, plant and good will. I venture the opinion that it was the duty of the accountants to name the sum charged to good will account separately.

"The many companies of recent birth that have offered and are offering a bonus of common stock as a bait for the sale of preferred stock are starting business in an atmosphere of deceit, and with the incentive to charge excessive prices in order to earn a dividend upon bogus stock. It would be interesting to get a list of the names of the fictitious asset accounts which they use to make the debits against the credits to capital stock account of this bonus issue, debits which the science of double entry bookkeeping requires. I have known in some cases that the matter was made exceedingly simple by keeping few, if any records, and making no attempt to pursue the system of double entry bookkeeping."

Ontario Legislature Had Taken Right Step.

Mr. A. H. Edwards, of the Alberta Association, held similar views, as well as a number of other accountants. The view was expressed that the Ontario legislature had taken a step in the right direction by insisting upon sufficient publicity to show what was being really done, although the opinion was advanced that the ingenuity of the company promoters was sufficient to overcome the law so long as they had only ordinary investors to deal with. The prospective investor should engage an expert to find out when buying stock which represented tangible assets or merely securities, such as good will, patents, etc., that might prove worthless.

After considerable discussion it was decided that the matter should be studied by a committee during the year and taken up again next year with the idea of preparing a report which might ultimately lead to legislation for not only the protection of the investing public, but also the prevention of the increase of the cost of living, caused by mergers, which secured complete control of trade and advanced prices so as to earn dividends upon enormously inflated capitals.

"The Standards of Professional Conduct and Practice" was the subject of the first paper presented at the afternoon session of the convention. The paper was read by Mr. A. K. Bunnell, first vice-president of the Ontario Institute.

"Let every chartered accountant," said Mr. Bunnell, "deem it his first and most important rule of conduct—his privilege as well as his duty—to devote some reasonable fraction of his time and talents in furthering the well-being of his Alma Mater. There is no better or more effective course of training or study in 'The Standards of Professional Conduct and Practice' than one's earnest and continuous effort to elevate them in concert with his fellows.

Should a Chartered Accountant Advertise?

"Advertising.—Upon no subject in its relation to our profession is there greater diversity of view. What is advertising? In its broadest acceptation, any and every act which makes for publicity is advertising. The man who seeks office, the man who heads the public subscription list, the man whose views and voice are heard on the platform or in the press, the man whose home has been made the centre for social observances, these men may be advertising as surely and perhaps more shrewdly than the man who pays for a column of display matter or for the distribution of calendars or circular letters. The motive for publicity in such cases is gain. The difference in method may only serve to emphasize the fact that some advertisers are better judges of human nature than others.

"If you concur in the foregoing observations, you will probably arrive at the conclusion that any general condemnation of advertising—or publicity—will be out of place. Where then must we draw the line, and what is the best? Shall we say that if the professional man is able to conceal his real intentions by some specious method of obtaining publicity, he must not be censured? Or if, per contra, with the identical object in view, he adopts the more straightforward method—and we can always surely commend the qualities of candour and good purpose in combination—of saying to the public—his constituency—'I want a share of your patronage,' and paying the commercial value of that announcement to specialists in publicity—shall we say that he violates the canons of his profession?

Methods Which Are Declared Unprofessional.

"A clear line ought to be drawn between the man who announces on the one hand—his name, standing and address, these facts taken together meaning 'I desire a share of your patronage' and the man who proceeds to the point of inviting public comparison, either to his charges, methods of work, or defined results. The last named procedure must always be declared unprofessional and deteriorating, and happily is practically unknown amongst us. It is worth while giving a little time to the discussion of the desirability of certain forms of advertising because of the somewhat conservative views held by our professional brethren in Great Britain. It is interesting to observe that a member of the Institute in England may advertise his authorship of books, wherein his professional standing and business is stated, but he may not place his card as a practising accountant in any public print. Similarly a member of the Institute may advertise particularizing his success in coaching students—who are his public—but he may not place his card as a practising accountant in any public print. These would appear to be very fine distinctions indeed, and it would be interesting if at this convention some explanations could be had.

"This branch of the subject cannot be dismissed without inviting comment upon the objections frequently urged by the younger practising men that to prohibit all forms of advertising benefits only firms of long standing and established reputation, and tends to discourage beginners. As a rule the beginner prepares the way for his public appearance by soliciting and obtaining the definite support of his business friends, not however by the methods here broadly defined as advertising. It is doubtful if his announcement in the public prints will mean much to him at this stage. It is only continued, persistent advertising that can be expected to bring results, and very often the sort of attention attracted is not at all flattering to one's self-esteem. Applications for positions, requests for advice upon all sorts of subjects, invitations to invest in California Oil, or other questionable projects as a condition of receiving professional work, these and other irritants oftentime appear to be the sole reward for well-meant advertising efforts by the ambitious beginner. The older firms are not subject to the same extent to such annoyances.

Difficult For One to be Impersonal.

"Soliciting Business.—It is difficult for anyone to be impersonal in his methods, whether he be in trade or the professions. The departmental store, the transportation companies, amusement enterprises and the like—who cater to the needs of the entire community—find it practicable. The average business and professional man believes his chances to be improved, according as he utilizes the personal equation. There are people—individuals—interests, which above all others he desires to reach. Advertising, in its broadest sense, is not the method best calculated to produce results.

"The objection to the practice of soliciting business lies rather in the general conditions to which such practices—if generally followed—may lead, than in the act itself.

"The functions of an accountant contemplate always the necessity for difference of opinion with his client; he must never be the mere creature of anyone. For all practical purposes, he may be deemed to occupy a strictly judicial attitude upon all matters upon which he is required to pass.

"The sense of favors received is not always consistent with the theory of an open and unbiassed mind when the time of trial comes and the issue has to be determined. We are all human, and most of us may be able to recall instances in our careers as public accountants when we would have given much to escape from the implication of treachery towards our friends while seeking only to do our duty.

Competition Means Cutting Rates.

"It becomes largely a question for the accountant to decide on the circumstances of the case before him, whether by soliciting that particular item of business he endangers his professional independence.

"There is another sense in which solicitation of business may be deprecated. Assuming that the chartered accountant has become an indispensable factor in mercantile progress it follows then that a certain definite volume of professional work fails to distribute itself among those available therefor. If allowed to distribute itself in the natural way, there is the absence of undignified competition, and the accountant may expect to receive the rewards of conscientious and painstaking labor. Introduce competitive conditions, and it is doubtful if anyone—accountant or client—benefits. Competition means cutting rates, cutting rates may mean superficial work, superficial work involves the loss to a chartered accountant of that very moral quality, upon which the whole fabric of his professional reputation rests. Here then is a view of the matter which is of vital consequence to us all.

"Whatever else may be debatable our standards of conduct in the matter of solicitation of clients should never lead us to the point of seeking to deprive a brother accountant of a client, or in any way, directly or indirectly, to weaken or impair the confidential relationship existing between them. Such an effort, whether successful or not, can only lead to reprisals. Once such a relationship exists, it must not be interfered with except on the initiative of one or other of the parties to the arrangement.

Should An Accountant Take Up Any Other Work.

"A dangerous distinction is apt to be drawn between those who are, and those who are not members of our own organization, when the occasion arises to consider our attitude, under circumstances where a brother accountant's interests are involved, and it has even been laid down as a principle of professional conduct in this limited sense. If it is wrong to seek a position held by Jones, C.A., it must be equally wrong if the position be held by plain Smith. If he ought not to compete with Jones, how can he consistently compete with the presumably inferior Smith, not to mention the undignified nature of such an act. The claims of brotherhood outrank those of membership in any guild or class, and in proceeding to fix standards for ourselves, we must not cloud our view of the thing itself by reservations as to the persons affected thereby.

"What occupations may an accountant combine with his professional work, when force of circumstances make such choice a matter of necessity? Ought an accountant ever to combine another occupation with that of an accountant when it is not a case of necessity? These are live questions.

"To serve the public well, and thereby fulfil the charter obligation imposed upon us, our societies must in every reasonable way encourage the competent men who form their membership to distribute themselves as widely as possible over the territory within their jurisdiction, in order that local interests may be facilitated. Rarely does previously untried field produce sufficient, even after years of careful exploitation, to compensate a man for the sacrifices and toil of fitting himself for the functions and responsibilities of a chartered accountant. Some latitude is necessary, and it is gratifying to know that the sense of what is due, not only to himself, but to the profession at large, will appeal effectively against an unwise or undignified course.

Accountants Should Not Have "Side Lines."

"Others, not impelled by necessity, will protest against limitations upon their freedom of action and claim the privilege of entering upon the pursuit of wealth along any line which the fancy may dictate. Thus we find amongst us, insurance, real estate and loan agents, brokers, etc. These are obviously reputable callings in themselves, but they may be deprecated as tending to detract from the character and dignity of the profession.

"As our ideals develop with our environments, we may reasonably expect that chartered accountants will place their professional status above considerations of mere gain, and endeavor to 'make good' without side lines of any sort. Andrew Carnegie advised his readers to put all their eggs in one basket and watch the basket. Can we follow better advice?

"A closely related question is that of underground or private compensation—either received or paid by a public accountant. Commissions from newspapers, auctioneers, solicitors and others in relation to a client's business, or commissions to agents, shareholders, solicitors and others for procuring business, are offences against professional decency everywhere and with reason. The penalty is not infrequently forfeiture of membership privileges.

"Fine opportunity for usefulness is presented to the Dominion Association of Chartered Accountants to stimulate laudable endeavor along the line of standardizing our professional relationships, not only among our own Canadian practising accountants, but with the brotherhood throughout the English speaking world."

A profitable discussion followed the reading of Mr. Bunnell's paper.

Reserves Prove To Be a Live Question.

The question of "Reserves" was then taken up and the paper prepared by Messrs. James Hutchison and John Patterson, of the Montreal Association, was read. The paper was as follows:—

A reserve has been defined as "a provision charged against profits with a view to covering an expected loss."

Those of us who are not men of independent means recognize that some day the source of our livelihood may be cut off, either through old age or some other unavoidable circumstance, and therefore, whilst we are in a position to do so, we should be laying aside our surplus earnings as a reserve for the rainy day which comes sooner or later.

Insurance may be divided into three classes: (1) fire; (2) life; (3) accident, guarantee, and other contingent. The reserves necessary to provide for contingent liabilities common to all classes of insurance may be stated generally to include reserves for cancellations, for guarantee and re-insurance premiums, for commissions, claims, bad debts, interest, dividends, loans, etc.

Reserves for Cancellations.

At the close of the year a large number of premiums will be outstanding on agency, head office, and branch accounts, and a number of the policies represented by these premiums will be allowed to lapse. It is therefore, necessary to make a reserve to meet such cancellations.

Reserves for Guarantee and Re-Insurance Premiums.—Risks are reinsured to a large extent, and as they run from one date to another, at the end of the year there will be a large number unexpired on which there is a contingent liability which requires to be provided for.

Commissions.—The commissions unpaid on business written will have to be provided for.

Claims.—It will be necessary to make a reserve for all claims admitted or advised, including claims in respect of guaranteed policies. It should be noted that the company is entitled to take credit for amounts recoverable under re-insurances.

Bad Debts.—As in all other concerns, insurance companies are liable to make losses in the collection of their accounts, and provision should be made each year to take care of this.

Interest, Dividends, Loans, etc.—It will usually be found that a certain amount of interest will be carried forward as an asset in respect that there will be amounts accrued on investments not received at the close of the financial year, There may, however, be cases where it might work the other way.

Reserves for Depreciation.—The greater part of the assets of insurance companies are in investments in stocks, bonds, mortgages, etc., and the value of these necessarily fluctuate from time to time. It is therefore, necessary that a reserve should be made to keep those assets at least equal to or below market value. It should be noted that the book value of investments should not be written up.

Claims Specially Applicable to Fire, Accident, etc., Companies.

It is necessary to set aside a certain proportion of the premiums received in order to provide for possible losses arising under the contingency insured against. The premiums are always received in advance so that at the close of any financial year, the company will be in the position of having received moneys to fulfil contracts which had not expired. It will be necessary to reserve such an amount of the premiums as will be applicable to the unexpired periods of the respective contracts. It is the practice of certain old established and wealthy companies to make reserves for as much as a full year's net premium income, but naturally younger companies are usually content to show only such proportion as they consider absolutely necessary.

Reserves Applicable to Life Assurance Companies.—In this case companies enter into permanent contracts, which are renewable at the option of the policyholder, and the consideration paid by the policyholder is paid by instalments represented by the premium. The reserve necessary in such cases is arrived at by means of an actuarial calculation whereby the liability in respect of each individual contract is calculated. It is important to see that this reserve has been properly made, and that the basis of valuation is in accordance with sound principles.

Reserves Applicable to Banks.

(1) Depreciation of Securities held for Investment.—Like all other institutions holding securities for investment, it is necessary that provision be made for any depreciation which has taken place in the value of these investments. It is well understood, however, that the older and wealthier banks make very large reserves for this purpose—much larger indeed than many people think are necessary or expedient. Such provision in excess of any depreciation which has actually taken place may be considered as a secret reserve, and the whole question, therefore, hinges upon whether or not secret reserves can be justified.

Loss on Advances Considered Doubtful.—In any soundly managed institution reserves under this heading will be considered essential. As in the case of the preceding heading, many of the more conservative institutions may take far larger reserves for this purpose than many people consider justifiable, and here again, we have a secret reserve. The important matter is to see that the reserve for this purpose is adequate.

Reserves For Interest on Unexpired Bills.

This is generally termed rebate on bills discounted. There will also be the reserves for interest accrued on savings bank accounts, on deposit receipts, and for all outstanding accounts of whatever nature.

Joint Stock Companies.—Fixed Assets.—On buildings, plant, machinery, etc., it will be necessary to provide for the depreciation which takes place every year.

(a) Buildings.—The rate of depreciation on buildings which are kept in good repair is not high as a rule. It has to be kept in view, however, that all buildings sooner or later will require to be rebuilt, either on account of decay or unsuitability for the purpose for which they were constructed. Each year should, therefore, bear its share of the cost of the expenditure, which will be necessary when it is estimated the building will have to be replaced.

(b) Plant and Machinery.—It is impossible to lay down definite rules regarding amounts which should be written off for depreciation. Perhaps the most usual course followed by directors is to set aside a round sum to cover depreciation after having provided for renewals and repairs. It is exceedingly difficult for a layman to satisfy himself as to the sufficiency of such provisions. Where at all possible, it is advisable to segregate the account into different heads, which can be dealt with separately and in groups which have more or less a life of similar duration. It is not difficult to ascertain whether sufficient provision is being made in specific cases where the accounts are separated, but considerable difficulty arises in connection with the general plant of an undertaking which, if it is kept in good repair, it is often contended, suffers no depreciation. To an cacountant, this is no argument, because his experience tells him that sooner or later every plant wears out or becomes obsolete. Heavy expenditures will, therefore, be necessary at some future date, which, if the company has no reserve, may seriously affect its position or showing for that particular period.

(c) Loose Tools, etc.—In large undertakings this account will sometimes amount to a very large figure. The depreciation is, however, very rapid, and, perhaps, the only satisfactory way of ascertaining the loss is to make frequent valuations. Moulds, patterns, etc., may be conveniently referred to here, and, while they, in certain business, form an exceedingly valuable asset to the particular business, at the same time their value is apt to be temporary, and when they cease to be used their value is only that of scrap. They should, therefore, be depreciated at a high rate. Of course, patterns, which are made specially for a particular job, should be treated as part of the cost of that job.

Patents, Franchises, Trade Marks, Good-will, etc.

Patents and franchises should be written off entirely during the life of the patent or franchise. Trade marks and good-will are not as a general rule, treated as depreciating assets. One leading authority takes the view that it is not only unnecessary to charge depreciation for good-will, but that it is improper to do so.

Liquid Assets.—The only reserves necessary for liquid assets will be provisions for bad debts, outstanding claims and accrued items.

Sinking Fund on Debentures.—Where bonds or debentures are redeemable it is usually provided that a sinking fund of a certain amount be set aside each year to provide for the redemption of the debentures at maturity. In order that there may be an amount available in cash without realizing upon the regular working assets of the company, the amount of the sinking fund should be invested in securities outside the business. A sinking fund is somewhat outside the exact sphere of this paper, inasmuch as a sinking fund is not a reserve fund, strictly speaking, but is a sum set aside to meet known and defined contingencies, while a reserve or a reserve fund is set aside out of profits to meet known but unascertained contingencies.

Public Institutions.

These are taken to include hospitals, colleges, schools and similar institutions. As in the case of other corporations holding investments, it will be necessary to see that reserves are made for depreciation where necessary. Where special donations or legacies are left for specific purposes no doubt arises as to the proper method of treatment in the accounts. There are frequently donations and legacies left without any direction as to how the funds are to be used, and it is a question as to whether these should be reserved for special purposes or contingencies. If they be used as part of the current income, it may not only lead to great fluctuations in the annual revenue, but there may be exceptional expenditure from time to time for which no fund or reserve exists, and it would seem prudent to set aside such donations or legacies to meet contingencies.

Other reserves which may be necessary in such accounts will be found to apply to the cases covered under previous headings.

Secret Reserves.

This part of the subject has so many peculiar and important aspects that it has been thought well to deal with it at some length rather than to devote much time over the more usual reserves with which most of us are familiar. A secret or hidden reserve may arise in various ways: (1) An excessive reserve for depreciation in securities held for investment, the amount of such depreciation being deducted from the value of the investments as appearing in the balance sheet. (2) An excessive provision for depreciation or reserve for losses estimated to arise from bad debts, the amount being deducted from the assets in the balance sheet. (3) The continuance of assets in the balance sheet at book value, these assets having largely increased in value. (4) The writing down of fixed assets, such as buildings, at a rate in excess of reasonable depreciation.

The institutions which are supposed to issue balance sheets with secret or hidden reserves to a greater extent than others are banks, and the question from their standpoint presents an interesting study. As a general rule, secret reserves are indefensible on the ground that a statement which is under-estimated is incorrect just as much as a statement which is over-estimated is incorrect. Can, then, the existence of secret reserves be justified? Under certain circumstances, and to some extent, we think they can. Perhaps a bank is in a different position from most other companies, but we think in the case of a bank, at least, that the existence of secret reserves to a considerable amount is not only expedient, but necessary if the institution is to move successfully and fulfil all the functions for which it was incorporated, including the meeting of the mercantile needs of the country during periods of stress, as well as in days of prosperity.

Banks and Secret Reserves.

It is particularly important that a good bank should show that it is not periodically hampered by special losses, which might tend to create lack of confidence. For instance, were a bank to neglect to make any provisions for losses beyond those which they immediately foresaw, and were some special loss to arise during the following year, which had to be entirely charged against the profits of that year so as to create a diminishment in the apparent success of the bank, the result might put a serious check on the future development of the institution. If there had been a secret or undisclosed reserve against which such a loss could have been placed, there would have been no apparent change in the position of the institution as compared with the previous year Banks also have very important duties to perform besides those of paying good dividends to their shareholders. They receive valuable privileges from the government, in return for which onerous duties are placed upon them. These duties, if strictly interpreted, involve the care and direction of the financial resources of the country. We all know how sensitive the money market is—how any rumor of weakness in a large institution creates a certain lack of confidence and disturbance of business. It is, therefore, essential to the welfare of a country that the banks should be conducted in such a manner as to create the greatest amount of confidence. Not only should all known or expected contingencies be provided against, but the management which provides against the remotest contingency will not only be worthy of our commendation, but of that of the whole community whose interests they serve.

Where it is the practice to have banks audited by chartered accountants, there are reports from several of those gentlemen approving of the existence of the practice of having secret reserves by the banks whose accounts they audit. Again, a reserve is often declared to be set aside for the purpose of equalizing dividends, but should it become necessary to resort to such a reserve for the purpose of declaring the usual dividend, it would be looked upon as a sign of weakness, and it would be much simpler and less liable to criticism were a company in a position to utilize its secret reserves.

On the other hand, it has to be remembered that a declining business might continue to show by this method the same profits year by year, thus keeping up the value of shares which might be quoted on the stock exchange. In such cases an auditor would have to exercise great care and judgment as to how far secret reserves could be made use of in such cases.

Writing Down of Fixed Assets.

With reference to the writing down of fixed assets, such as buildings, a well-known example may be given in the case of the Bank of England, which omits all reference to its banking premises, which have been estimated to be worth upwards of £2,000,000 sterling. While it is quite true that banking premises would be of comparatively little value to a bank in the time of crises or liquidation, it seems ultra conservative to treat them as of no value whatever. One of the weaknesses of so treating assets is that they are not really a secret reserve, as in time of success they could not be utilized without prominently drawing attention to the fact by the appearance in the balance sheet of a new asset.

It may be concluded that secret reserves will not be a source of anxiety to auditors, whose difficulties will more usually arise through reserves being inadequate.

Annual Banquet a Great Success.

On Friday evening the annual banquet of the Dominion Association was held in the Windsor Hotel. Mr. A. F. Riddell, the president, presided, and among those who supported him were Alderman Dandurand, representing the city of Montreal; Dr. F. G. Adams, representing McGill University; Mr. H. J. Elliott, K.C., representing the Montreal Bar, and Messrs. John McD. Hains, George Edwards, George U. Stiff, George C. Macdonald. About one hundred members and guests attended. Alderman Dandurand, in the absence of the mayor, welcomed the guests, and Mr. H. J. Elliott, K.C., extended greetings on behalf of the Montreal Bar.

The toast list was brief, the chief one being "Our Guests," which was proposed by Mr. J. McD. Hains, and responded to by Messrs. George Edwards, of Toronto, and Mr. J. W. Johnston, M.P.P., F.C.A., of Belleville.

Mr. Johnston referred to his long association with Montreal, and urged upon the city the necessity of making the harbor such as to beat Boston, Philadelphia and New York. "We must not," he said, "get too familiar with our neighbors."

Dr. F. G. Adams, dean of the Faculty of Science of McGill University, mentioned the example of Birmingham, England, where commercial men imparted their expert knowledge of mercantile and industrial affairs to the students. At McGill, it was proposed to arrange for a two years' course whereby men might obtain training in industrial law, accountancy, economics, and modern languages. He hoped this movement would bring city and university into closer relations.

To Mr. G. A. Savage, of Montreal, was delegated the honor of proposing the toast of "The Ladies." "The Press" was proposed by Mr. W. A. Henderson, of Winnipeg, and responded to by Messrs. T. Clugston Harrison, Monetary Times, Toronto, and George U. Stiff, The Canadian Chartered Accountant.

SECOND DAY.

The proceedings of the second day were of a business nature. Satisfactory reports were received from the various provincial institutes The financial statements and auditors' reports, together with the report on The Canadian Chartered Accountant, the new official organ of the association, were received by the delegates with satisfaction.

At the council meeting the officers elected for 1911-12 were as follows: President, Mr. George Edwards, Toronto; vice-president, Mr. W. A. Henderson, Winnipeg; secretary-treasurer, Mr. George U. Stiff, Toronto. Council—Messrs. D. Mowat, Saskatchewan; A. H. Edwards, Alberta; W. T. Stein, British Columbia; E. C. Kunbach, Nova Scotia; W. T. Kernahan, Ontario; J. W. Ross and A. F. Riddell, Montreal.

Toronto was chosen as the meeting place for the 1912 convention.

MISUSE OF WORD "TRUST" IN COMPANY TITLES.

Mr. William Harvey, Managing Director of the Standard Trust Company, Writes on the Misuse of the Term.

In Western Canada there are a large number of companies who use in their title the term "Trust Company," when the nature of their business is far from being in accord with the methods commonly accepted as those of companies with that title. Upon this question an interesting contribution has been made by William Harvey, managing director of the Standard Trusts Company, of Winnipeg, to the Trusts Companies' Magazine. Mr. Harvey says:—Thirty years ago, the trust company in its relation to purely trust and fiduciary business was unknown in Canada. About twenty-nine years ago one company was formed in the city of Toronto, and it has been pursuing its function in a successful, dignified and honorable way to the present time. It has not had a meteoric career for the reason that it took a long time to school the public of Canada in the advantages of a corporate executor, trustee and administrator; but, by virtue of steady, persistent effort, the public came to recognize its value, and there came to be discharged by that company many varied and important duties, which, in the hands of an individual, would have been almost impossible of fulfilment.

Trust Company Ethics.

This pioneer indirectly brought into being other similar institutions of equal worth and reliability, all pursuing the same avocations, but in an increased degree and with marked ability and enterprise. To them success came more rapidly because of the educative tendencies of the time, the needs that had created their existence, and the well-known high regard those several companies entertained for what is known to-day as "business ethics." Their directorates were formed out of the best professional and business material obtainable, men held in high esteem in their respective localities, and whose acumen and push served to inspire confidence and command success from the start.

Appear in the Court.

Not one of those companies, adhering as they do to their legitimate business, has had levelled against it the breath of suspicion. They appear in the courts from time to time as plaintiffs and defendants alike, when necessity arises to enforce or defend the claims for or against the estate sought to be protected, but always in the best interests of the trust committed to their care—rarely to defend their honor or sense of fair dealing in the course of their administrations, and if compelled in this latter regard to do so, have emerged from the litigation stronger and more esteemed in the public eye than ever. This is, in brief. the position of the reputable trust company in Canada to-day.

Some Specious Promoters.

With the development, however, that has taken place in this young giant of the north in the past few years—a development not confined to any particular area of the country, but common to the whole of it from Halifax to Vancouver—there has sprung up a style of company, usually fathered by someone of phantasmagoric ideas, that in a specious, seductive prospectus quotes the profits and successes of the legitimate trust companies not only in Canada, but throughout the United States, and seeks to show that in the wider and more speculative fields of real estate, mining, and timber, larger profits are obtainable, and in order to clothe itself in respectable raiment, the little but significant word "Trust" is inserted in its title name.

From Provincial Legislatures.

A number of such companies obtained their charters from different provincial legislatures, receiving, unfortunately, trust powers which they had little thought of exercising, and it was only after those companies began business that it was realized how great a mistake had been committed in permitting the use of a name that stood for all that was non-speculative, stable and sacred. The public in many cases unwittingly entrusted their funds to their care, to be employed not in legitimate first mortgage securities of a revenue-bearing character, but in ultra-speculative ventures such as outside urban subdivisions, oil shares, mining stocks and other equally uncertain ventures, some even having the hardihood to advertise the fact that they dealt in sale contracts yielding the investor ten and twelve per cent. per annum and over, where the security was vacant real estate sold under the sale contract and held by the vendor for the purpose and in the hope of commanding a higher figure later on by a resale.

A new country like Western Canada whither hundreds of thousands of people are now yearly migrating, offers to companies of this calibre a tempting field for their operations. Values are barometric, and while the human tide flows and the vast railway development continues opening up fresh fertile areas, while new towns at the rate of four and five hundred a year are being born, and a free distribution of money in high wages continues, so long will this speculative "trust" business last. But it is reassuring to know that the several attorney-generals in the several provinces affected, have had the fact brought to their noitce, and in several cases the offending companies have had their charters cancelled. Two provincial governments, at least, have given notice that a continuance of this class of business operated under the guise of "trust" business will result in prosecution, while every application for a charter and a license to operate a trust company will, in future, at each legislature, and before their law amendments committees, come in for such a measure of close scrutiny and investigation as to preclude the possibility of wild cat ventures being launched as reputable trust companies.

An Enviable Reputation.

Canada has justly earned an enviable reputation in respect to her laws and their administration; her banking system has long ago proved its efficiency by withstanding the assaults of panics and other financial disturbances; her mercantile and manufacturing interests are conserved by a body of men through the media of the numerous boards of trade throughout the country that reflect honor and stability alike upon them; and in the knowledge that there is also an equally high type of the genus homo engaged in the trust business from the Atlantic to the Pacific, it behooves each and all of them in Canada and out of Canada to see to it, that none but the best and the cleanest of men and of methods are introduced in the conduct of a business that is synonymous with honor, integrity and security.

WESTERN LIFE ASSURANCE COMPANY.

The Western Life Assurance Company of Winnipeg was licensed to transact business under the Manitoba Insurance Act on 13th of June, 1911. Since that date registration has been secured in the Provinces of Saskatchewan, Alberta and British Columbia. An efficient organization has been established throughout the West, and the company already has over a quarter of a million dollars of insurance in force.

This new Western institution brings into existence another life company with head offices in Winnipeg, making the fourth with head office in the Western Metropolis. The Western Life Assurance Company has been organized on an economical basis and is in a good financial condition.

The directorate is composed of well-known business and professional men, who have made successes of their own particular business in Winnipeg. Mr. Adam Reid, the managing director, is well qualified for the important position which he holds, having spent eighteen years in the insurance business in various capacities.

TIMBER USED BY MINING COMPANIES.

The Forestry branch of the Department of the Interior has been collecting statistics of the amount of timber used by mining companies. During the past year mines to the number of 136 have used considerable quantities of timber annually in their operations. Unsawn timber was used to the extent of 52,848,000 lineal feet and cost an average of $9.90 per thousand, 22,305 board feet of sawn lumber and timber were used worth $13.63 per thousand. The total quantity of timber used cost $827,000. The round timbers varied in diameter from 3 to 36 inches and were used mostly underground as mine supports to give artificial support for insecure roots and walls and to protect shafts, drills and gangways. Ordinary lumber constituted most of the sawn timber and was used above ground for building, etc. Mines use species of wood which are abundant, cheap and easily obtainable from near-by localities. Thus in each province certain species were used to the exclusion of all others. British Columbia used all the fir. Nova Scotia used all the spruce, balsam and hemlock. Alberta used all the jack pine, larch and poplar. These three provinces contain the principal coal mines and consume over 95 per cent. of Canadian mining timbers. The ore mines of Ontario, although many in number, used only 1 per cent. of the total. These mines are small, shallow and in the solid rock, so that little timber is required for supports.

THE MONETARY TIMES OPPOSES THE PROPOSED RECIPROCITY PACT

BECAUSE IT IS A FACT THAT

As a whole, reciprocity is not in the interests of Canada.

President Taft instructed his Secretary of State to offer free trade to Canada.

We are not dependent upon the United States in any sense for our markets.

Great Britain has loaned us $1,860,000,000, and is still sending us $200,000,000 a year.

The Canadian farmer is not at present satisfying the demands of the home market.

The farmers are the backbone of Canada, but a country cannot walk on its backbone.

The twelve favored nations are in the aggregate large exporters of agricultural produce.

The Canadian home market has consumed eighty per cent. of Canadian farm products.

Canada is the granary of the Empire, and the granary should be kept within the Empire.

Twelve favored nations are given entry to the Canadian market but not to the United States.

In five years we sold to Great Britain $160,000,000 worth of goods more than we sold to the United States.

The present tariff has brought into Canada American factories representing a capital investment of $125,000,000.

If trade and loyalty are to be considered together, it is the Mother Country that has the first claim upon us.

An immediate gain of a few cents in some lines should not overshadow the national policy of conservation of natural resources.

Every American legislator interviewed by The Monetary Times at Washington stated that absolute free trade with Canada is wanted at once.

Our widely scattered territory, with its diversified interests, requires the strengthening of every national tie to build a strong and united people.

Canada will be exchanging a valuable home market for a foreign market, the owners of which are exporters of both manufactured and agricultural products.

It would help to build up United States cities, ports and transportation routes by directing the trade thither now carried through our own channels.

Mr. Champ Clark told The Monetary Times that he did not want to hear anything more about his annexation utterances until reciprocity had passed.

The Canadian farmer anticipates getting prices quoted in the American protected market. Reciprocity will open the market and may reduce the expected prices.

The purchasing power of the Canadian home market is rapidly expanding, 1,764,475 new citizens in ten years having brought in new capital amounting to $636,000,000.

Reciprocity would not help our national autonomy Treaties are subject to interpretation, and Washington interpretations have always been unfavorable to Canada.

Canada is chuckling with prosperity under present conditions. If the United States desires our products and manufactures, minus duty, it is their privilege to lower their tariff barriers.

In the face of a duty of 25.7 per cent. on all the goods we sell to Great Britain she allows free access to her market, while the Americans exact a duty of 42 per cent. for a similar privilege.

Manitoba flour usually brings a higher price on Mark Lane than any American brand. If American wheat moved freely across the border the genuineness of Manitoba flour could not be guaranteed.

The Monetary Times entertains every respect for the Dominion Government, particularly for its Finance Minister, Mr. Fielding, and for their judgment, but it does not believe that that judgment in this instance is in the best interests of Canada's national individuality

BECAUSE IT WAS SAID THAT

"Canadian annexation would be wise."—Troy (N.Y.) Free Press.

"I am for the annexation of Canada."—Senator Cummins, of Iowa.

"Canada will come in. That will happen when we want her."—New York American.

"It is a splendid beginning towards a great all-American policy."—Milwaukee Free Press.

"Buffalo is the logical distributing point for Canadian grain and farm products."—Live Wire, Buffalo.

"The Taft policy spells the doom of British Imperialistic commercial unity."—Minneapolis Journal.

"Eventually, beyond question, the whole North American continent will be one nation."—New York Journal.

"Meanwhile full reciprocity in exchange of citizens and products and steady Americanization."—Minneapolis Journal.

"The farmers of Canada accept the reciprocity agreement only as part of their demands."—The Grain Growers' Guide.

"The scheme will give the United States greater control of the wheat market than it ever had before."—New York Sun.

"The reciprocity agreement will check the east and west development of Canada."—T. C. Shotwell, in the New York American.

"Freer trade relations with Canada would relieve the United States of many unnecessary burdens."—St. Louis Post-Despatch.

"The free admission of grain places the control in the hands of American grain growers."—United States Secretary of State Knox.

"The only fair way for free trade would be to let the Stars and Stripes float over Canada."—Ex-Governor N. T. Bachelor, New Hampshire.

"Many of us may live to see the result that Champ Clark hopes for brought about by the reciprocity agreement."—Los Angeles Herald.

"I hope to see the day when the American flag will float over every square foot of the British North American possessions."—Mr. Champ Clark.

"Reciprocity will command a greater Boston, and American capital will no longer seek Canada to build up factories."—Governor Foss, Massachusetts.

"The inevitable day will be more quickly reached when Canada and the United States shall be politically one."—Hon. S. McCall, American House of Representatives.

"From Canada we have nothing to fear. The advantage lies altogether with us. Canada has more to fear from us than we from Canada."—American Journal of Accountancy.

"The agreement opens the channels of commerce northward and southward and blocks the policy of trade eastward across the ocean to the special gain of England."—New York Times.

"The present American tariff has driven American manufacturers across the Canadian border, built vast plants with American capital on Canadian soil, employing Canadian workingmen."—Senator Beveridge, Indiana.

"If we admit Canadian grain free, the elevators for storing and handling it should be on this side of the line and the steamers of the Canadian railway should in the winter time at least find their home port in Boston, New York and Portland."—Mr. H. M. Whitney, in the Atlantic Monthly.

"If American mills had more hard wheat available, they could regain their lost export trade. The Canadian market for live stock is to be untrammelled as the market in any part of the United States. There will be a big market in Western Canada for Minnesota, Dakota and other state dairy products."—Moline Daily Despatch, Illinois.

NEW INCORPORATIONS.

Sixty Companies Were Granted Charters During the Past Week—Many Have Small Capital.

Sixty companies were incorporated during the past week with a total capitalization of $14,148,000. The following have capitals of a million dollars and over:—Imperial Wire and Cable Company, Montreal, $5,000,000; Nashwaak Lumber Company, Marysville, N.B., $2,500,000, and North West Mortgage Company, Winnipeg, $2,000,000.

Financial and real estate concerns are again in evidence this week, there being eight of the former and seven of the latter.

The following is a list of charters granted during the past week. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Princeton, B.C.—W. C. Fry, $25,000.

Laura, Sask.—Laura Hotel Company, $20,000.

Fruitlands, B.C.—Fruitlands Country Club, $10,000.

Ribstone, Alta.—Ribstone Siding Company, $5,000.

Battleford, Sask.—Battleford Investments, $100,000.

Phillips, Alta.—Phillips Threshing Company, $5,000.

Prince Rupert, B.C.—Tsimpsean Fish Company, $200,000.

Regina, Sask.—Saskatchewan Stock Farm Company, $100,000.

Moose Jaw, Sask.—Ainslie Fleming Land Company, $100,000.

Bassano, Alta.—Bassano News Publishing Company, $10,000.

Calgary, Alta.—Western Canada Athletic Association, $10,000.

New Westminster, B.C.—Cloverdale Poultry Company, $50,000.

Notch Hill, B.C.—Shuswap & Lillooet Fruitlands, $250,000.

Hazelton, B.C.—Hazelton Water, Light & Power Company. $50,000.

Peachland, B.C.—Peachland Lumber & Manufacturing Company, $40,000.

Grunthal, Man.—Grunthal Milling Company, $20,000. J. Braun, P. T. Funk, P. F. Krahn.

Lancaster, N.B.—Furnishers, $20,000. H. P. Robertson, L. Dunn, W. H. White, St. John.

Fredericton, N.B.—Smith Foundry Co., $75,000. P. G. Smith, A. C. Smith, H. A. Smith.

Galt, Ont.—Menger Audit Company, $25,000. E. W. Menger, G. H. Glennie, Miss J. Lapsley.

Pembroke, Ont.—Hunter & Company, $100,000. W. A. Hunter, S. S. M. Hunter, W. L. Hunter.

Saskatoon, Sask.—Queen's Park Corporation, $50,000. Occidental Elevator Company, $50,000.

Estevan, Sask.—Estevan Gas, Oil, Heat, Light & Power Company, $20,000. Prairie Nurseries, $35,000.

La Patrie, Que.—Poulin Circular Vat Company, $20,000. S. Gobeil, Jr.; La Patrie; N. G. Scott, S. Poulin, Scottstown.

Montmagny, Que.—Manufacture de Meubles de Montmagny, $20,000. C. A. Corriveau, H. Guenard, A. Letourneau.

Port Arthur, Ont.—Chambers, McColeman, Harrison Company, $40,000. R. A. Chambers, D. McColeman, W. H. Harrison, Nepigon.

Burbidge, D. L. Bastedo, R. C. McPherson. F. W. Wood & Company, $5,000. P. MacKissock, F. W. Wood, W. B. MacKissock. National Loan & Investment Corporation, $100,000. J. W. Wilton, E. J. McMurray, L. A. Delorme. Interior Construction Company, $100,000. C. H. Forrester, D. MacLean. Brokers' Investments, $40,000. T. H. Crotty, R. H. Young, R. Lawson. Business Woman's Cafeteria, $5,000. Mrs. E. S. Lilley, R. McKenzie, Miss K. Johnston. Boyce Carriage Company, $150,000. E. Boyce, G. Bailey, L. H. Dwinnell. Canada West Land Company, $250,000. F. W. Louthood, R. T. Wilson, R. M. Myers. Hargrave Investment Company, $30,000. H. Keene, A. R. Burton, H. W. Webster. Prairie Provinces Land & Investment Company, $200,000. F. R. Nason, D. Laird, R. Jacob. Ansell's Agencies, $20,000. T. C. Ansell, A. McCurdy, E. L. MacLean.

WESTERN CANADA.

Fall Trade Will be Good—In the Wheat Markets.

Monetary Times Office,
Winnipeg, September 12th.

With the utmost allowance made for damage to the crop by cold, wet weather, such as the West has not known in many years, the production of Western Canada farms will still be large, and all indications point to a heavy fall trade. The estimate of the wheat crop given last week, of 178,650,000 bushels is thought to be an accurate one.

Comparison of acreage under crop show that where there were 5,911,500 acres in 1905, there were 14,041,187 acres in 1910, and 16,052,710 this year. Excellent weather for plowing and the splendid crop have caused much new breaking, and it will not be surprising if the spring of 1912 sees nearly twenty million acres under crop in Manitoba, Saskatchewan, and Alberta. Threshing is in full swing all over the three western provinces, but the weather has been somewhat backward for good progress being made.

There is a feeling of confidence amongst the bankers with respect to the ability of the farmers to liquidate their indebtedness this fall. It is generally maintained that with the exception of certain districts the farmers will have grain of good quality for the market. That the majority will have more than the usual quantity of high grade wheat is the opinion amongst the bankers.

When the wheat starts for the market, and the inspector and thresher respectively determine the quality and the quantity, the banks will have no mean task on their hands in providing the necessary currency for the increased business that will result.

When the movement reaches its apex about the last week in November the bankers will not be surprised if the limit of ordinary as well as special currency is reached.

In the Wheat Markets.

Markets have shown considerable strength during the week, and the trend of prices is still upward. The chief influences at work are the damage to the spring wheat crop of the North American Continent, the impairment to and reduction in the Russian yield, together with increase in European demand, and bullish changes in world's wheat statistics. Russian exports, which averaged six million bushels a week last year, are now greatly diminished, and European importers have turned to this side of the Atlantic for a large portion of the necessary supplies. The extent of the demand, accompanied by advancing markets in Europe, has had the effect of making our markets strong and active, and of stiffening prices accordingly.

Cash Wheat Active.

Business on our local market was active during the week, and the demand for cash wheat was only limited by the supply. Supplies of old wheat are now a scarce commodity, but the movement of the new crop has made a good start, and meantime a considerable quantity has been sold ahead for export. The lower grades are still in demand by the United Kingdom and the Continent; and judging from conditions in Europe it is believed there will be a greater demand than ever this year for every grade of grain the Canadian West has to offer.

DATING OF LIFE INSURANCE POLICIES.

Insurance Commissioner Criticizes Agents in "Dating Back" Policies in Order to Meet Competition.

Insurance Commissioner Frank H. Hardison, of Massachusetts, devotes considerable space in his annual report to the evils growing out of the practices of agents in dating back life insurance policies in order to meet competition. The commissioner says:—

"One disturbing element in the life insurance situation is the lack of a uniform rule for the dating of policies. One company refuses to date a policy back of the day the application was actually signed; another will adopt any date asked for by the applicant. An agent of the former company, after the expenditure of much time and effort gets a person to the point of placing his name on 'the dotted line.'

To Give a Lower Rate.

"Then an agent of the second company, upon hearing somehow that the person referred to is considering the matter of insuring his life, steps in and makes a proposition to the prospect to take a policy in the company he represents, offering to date back the policy to give the prospect the lower rate for a younger age. The second agent gets the application. Naturally the agent who worked upon the case and brought the man into the frame of mind where he was ready to sign an application does not relish the interference of the second agent with a proposition that the company represented by the first agent fears is discriminatory, and, therefore, refuses to permit to be offered by its agents.

" The agent first working up the case is generally willing to meet competition and an argument along lines of legitimate rivalry, as he terms it, but when his competitor for applications steps in with an offer that he cannot meet because his company has stricter ideas as to what the laws require or equity calls for, and carries off the application for that reason only and gets with it the commission he did little to earn, the original agent in the case cannot be blamed if he makes an uproar. Complaints arising from situations of this character occasionally come to this office, but more frequently go to the offices of those companies which refuse to allow the dating back of a policy to give an applicant the premium for a younger age.

Will Make Law to Fit.

" The question arises whether there is any remedy in the law to meet this unsatisfactory situation. The answer is that if there is any such remedy in Massachusetts it will have to be found in a statute not directly designed to meet this state of affairs, for there is no law which specifically covers it. If there is discrimination involved the anti-discrimination statute would reach it. But there is a difference of opinion as to whether the dating back of a policy involves discrimination within the meaning of the law. Some companies hold that inasmuch as they offer to allow each applicant to select the date his policy is to bear there can be no discrimination, even if one person gets a premium for a younger age than he has really attained while another does not.

Violence to Mortality Table.

" Such companies have a certain advantage over those which believe that such a rule does not avoid discrimination, but on the contrary hold that to make a contract with a man to give him insurance at a rate lower than other policyholders are paying under the same conditions involves discrimination which can be avoided by having a definite rule against the dating back of policies and sticking to it. Moreover, it is pointed out further that the dating back of policies generally to give applicants the premiums for ages younger than they really are does violence to the mortality table, which has been adopted for making premiums and for computing reserves.

" To disregard the mortality table, which is the basis of the business, is a serious matter, and that is what is really done when an applicant whose age is fifty is given a rate for age forty-nine. It will be argued that this is offset by the fact that the insured pays for insurance which he does not get and by losses to him in other ways. In some cases that might be selected possibly this view would be correct, but to make it of value and controlling it would be necessary to show that in no case would there be a gain by the dating back of the policy, which cannot be demonstrated universally."

Views of Life Presidents.

The commissioner then gives the views on this subject of the presidents of all life insurance companies authorized to transact business in Massachusetts, and concludes as follows:—

" It has been evident to the reader of the foregoing statements and arguments that the views of the companies differ as to what is right and proper with respect to the dating of policies in this commonwealth. It is also true that those views are in many cases interfered with by the laws of some of the States and by the rulings of insurance commissioners in others. The only companies, in fact, that are not interfered with, and so are able to apply a uniform rule wherever they operate, are the companies which refuse to date a policy back of the actual day of the application. No law and no commissioner's ruling appears to interfere with this rule.

" The companies, however, which give an option to the applicant run up against prohibition in some States to dating back more than six months and against commissioners' ruling in others. The result is that in one State the policyholder's option is supreme; in another it is limited by a six months' provision; in another by a commissioner's ruling that the policy must not be dated back to give the applicant advantage of a younger age. In fine there is no uniformity shown by the records of such companies in respect to this matter, even though they be mutual companies where uniformity is expected.

Uniformity of Practice.

" That there should be uniformity of practice on the part of companies is the belief of the Massachusetts commissioner, and it is shared by many others. The adoption of a uniform rule would not only remove a bone of contention as between agents, and remove the occasion for agents to importune their companies to break over the rule of the office, but would be for the good name and the best interests of the life insurance business. While a man who wants insurance may accept the proposition that gives him a rate at an age younger than he knows she has attained, still his respect for a business where the methods are such that one company does what another refuses to do on the ground that it is in violation of law must be greatly lessened. If no agreement is reached by the companies on this important matter a rule should be established by statute, uniform as far as practicable in all the States. That that rule should not permit a policy to be given a date earlier than the date of the application therefor is the belief of the Massachusetts commissioner."

FIRE INSURANCE CONDITIONS BAD.

Fundamental conditions in the fire insurance business are held to be serious and even dangerous in the report of the governing committee presented to the annual meeting of the Western Union of Fire Underwriters, in session at Niagara Falls recently. In the face of a steadily increasing loss ratio, the average rate is going down, and the proportion of term business is increasing with alarming rapidity. The average rate in Western Union territory was $1.27 in 1907 and had fallen to $1.18 in 1910.

In the meantime the liability carried has increased $1,306,000,000 at the same time the proportion of term business was increasing very rapidly, which should normally increase the average rate. In 1910 the proportion of the total liabilities written under term contracts was 38 per cent. and term rates made up 35 per cent of the total premium income. Since 1907 the annual liability has increased 14 per cent., while the annual premiums have increased less than 4 per cent.

The term liability has increased 21.7 per cent. and the term premium 20.7 per cent. The larger the volume of term business the greater the reserve required, while the situation has been made more serious by the heavy increase in losses so far in 1911.

AUGUST FIRE LOSS.

The fire losses of the United States and Canada in August, as compiled by the Journal of Commerce, aggregate $12,662,650, as compared with $21,570,550 for the same month last year, when the destruction of timber by forest fires contributed greatly to the total value of property destroyed. The following table gives a comparison by months for this and the preceding year:—

	1910.	1911.
January	$15,175,400	$21,922,450
February	15,489,350	16,415,000
March	18,465,550	31,569,800
April	18,091,800	17,070,550
May	18,823,200	21,422,000
June	13,183,600	20,691,950
July	26,847,900	25,301,150
August	21,570,550	12,662,650
Total, 8 months	$147,647,350	$167,655.550

The August fire losses in Canada alone, as compiled by The Monetary Times, were $920,000.

INCORRECT LIFE INSURANCE INFORMATION.

Important Decision at Montreal, Where Court Held that Fraud Nullified Incontestability Clause.

An interesting decision was handed down last week by Mr. Justice Delorimier in the Montreal Superior Court, involving the invalidation of an insurance policy on account of incorrect replies made by the insured to questions asked at the time of the issue of the policy.

The position taken by the court was that, so great was the effect of such fraudulently given information that the original nullity of the contract could not be overridden by the clause providing for the incontestability of the policy after a lapse of a given time. Though in the case at issue this time had not elapsed, the court declared that even if it had passed the replies given by an applicant in seeking a policy formed such an essential part of the contract that, in the present instance, they would determine its validity or nullity.

Policy of Three Thousand Dollars.

The case was that of Abraham Dupere against the Excelsior Life Insurance Company, the plaintiff demanding that the company be forced to pay a policy of $3,000 issued on the life of his sister, Miss Dorothy Dupere. The latter died January 14, 1906. He was the beneficiary named in the policy, which was issued dating from January 1st, 1905.

The main contention of the defendant company, which was sustained by the court, was that the replies made by the applicant to questions put to her in the application blank, as well as in the certificate of the medical examiner, were not in conformity with the truth. She had stated that her mother had died from illness resulting from childbirth and that two brothers had died of typhoid fever. In the case of the mother, who passed away in the early eighties, it was a matter of record that she had been long suffering from tuberculosis, whilst in the case of the brothers, certificates showed that they had been affected by the same malady.

Insured Must Have Known.

Miss Dupere herself died of tuberculosis, this fact showing that the disease was hereditary. The company represented that at the time when she made answer to the questions put to her, the insured must have known the circumstances surrounding the illness of her mother and brothers. Thus, claimed the company, the insured had given false answers. In this position the company was sustained by the court, the judgment declaring that, as there was a clause in the policy to the effect that the contract would be considered null and void in event of there being false answers, the assured takes all responsibility in law for replies so given.

As to the contention advanced by the plaintiff, who cited the "incontestable clause," the court ruled that said clause was binding only, granting the policy was validly issued in the first instance and could not be considered as applicable when the contract was "ab initio" annulable for any cause of fraud. Dealing with the replies given by the insured, the court held that they were of such a nature as to give reason to believe that they were given with a view to deceive and were furthermore of such a nature as to completely change the character of the illness from which the insured's relations died.

Insurance When Ill.

The judgment then goes on to give a review of the plaintiff's activities along the line of insuring the lives of his relatives, and coming to the specific instance before the court, declares that circumstances went to show that the same course had been followed by him. Miss Dupere, who was an employee of the Bell Telephone Company, took ill in the early part of 1904, forsook her employment, went to her home in Gaspe, and afterwards returned to Montreal to reside with her brother, the plaintiff. In the interval endeavors were made to have her life insured in the Montreal Life Insurance Company, the Equitable Life, and the London & Lancashire. The amounts varied from $3,000 to $7,000.

For His Own Advantage.

Continuing, the court held that it is in the proof that the plaintiff, as far as the policy involved is concerned, followed his system of seeking to use to his own advantage the policy secured on the life of his sister, as shortly after the contract was issued the policy was transferred to third parties, finally reverting to plaintiff. The judgment concludes by asserting that the assured acted as a prete nom for her brother, and that the latter had no legal or legitimate interest in the matter. Accordingly the plea of the defendant company is sustained, and the action of plaintiff dismissed. Messrs. Laflamme and Mitchell acted in the interests of Mr. Dupere, whilst the Excelsior Insurance Company was represented by Messrs. Archer, Perron and Taschereau.

PERSONAL NOTES.

Judge Louis Sicotte died suddenly at Vaudreuil, Que., this week.

Mr. Lindsay, general agent of the Union Life at Niagara Falls, is dead.

Mr. J. N. Greenshields has resigned as president of the Wabasso Cotton Company.

Mr. Alex. MacLean of the London and Lancashire Guarantee and Accident Company is ill.

Mr. John T. Hall, Board of Trade Industrial Commissioner at Lethbridge, Alta., is dead.

Sir John Milbank, V.C., a prominent British soldier, is at present touring Western Canada.

Fire Chief Turner, of North Vancouver, has resigned after nearly seventeen years service.

Mr. C. P. Borland is the new manager of the Bank of Toronto, Riverdale branch, Toronto.

Mr. E. Haberer has been appointed manager of the Molsons Bank, St. Lawrence Street, Montreal.

Mr. Philip M. Ray, of the Canadian Bank of Commerce, Hamilton, has been transferred to Vancouver.

Sir Harold Sydney Harmsworth, younger brother of Baron Northcliffe, is now on a visit to Western Canada .

Mr. R. S. Barron, manager of the Union Bank of Canada at Winnipeg, spent a holiday on the Pacific coast.

Sir William Whyte has been appointed a director of the Imperial Guarantee and Accident Insurance Company.

Mr. W. B. Meikle, managing director of the Western Assurance and the British America, recently visited San Francisco.

Mr. H. W. Givens has been appointed Western manager for the Huron and Erie Loan Company, with headquarters in Regina, Sask.

Mr. Louis S. McMurray of the Riverdale branch of the Bank of Toronto has been appointed manager of the Yonge Street branch, Toronto.

Sir William Howell Davies, M.P., chairman of the Bristol Docks Committee and of the Bristol Finance Committee, is at present in Western Canada.

Lieut.-Col. Frank Meighen has been elected a director of the Canadian Northwest Iand Company, to succeed his father, the late Mr. Robert Meighen.

Mr. Frank L. Coulson, manager of the Bank of Toronto, Yonge Street branch, Toronto, has been appointed manager of the King and Bathurst Streets branch.

Mr. R. L. Innes, director of the Dominion Canners, Limited, and of the Dominion Bond Company, has been elected a director of the Canada Machinery Corporation, Limited.

Mr. J. G. Cuthbertson, manager of the Bank of Toronto, King and Bathurst Streets Branch, Toronto, has been appointed manager of the Board of Trade Branch, Montreal.

Mr. R. A. Mannings, of the Royal Liverpool, has been appointed secretary of the Canadian life department, to succeed Mr. A. R. Howell, recently made Canadian manager of the Gresham Life.

Mr. A. C. Finzel, a Toronto representative of the North American Life Insurance Company, is leaving for Sudbury, where he enters the office of Mr. S. E. Wright, the company's district manager.

Mr. John J. Mains, vice-president and managing director of the Polsons Iron Works, Toronto, has resigned from active management. Mr. John J. Conradi, a British engineer, will now be in charge of the company's plant.

Mr. A. Homer Vipond, of Montreal, president of the Life Underwriters' Association of Canada will be one of the speakers at the annual meeting of the National Association of Life Underwriters, to be held at the Hotel La Salle, Chicago, October 10 to 12.

Mr. William McKinnon, B.A., Canadian Trade Commissioner at Birmingham, Eng., has resigned, and will go into private business. Mr. McKinnon was for some years in the fruit branch of the department of agriculture and was sent to Bristol as trade commisisoner in 1904. Mr. J. E. Roy, trade commissioner at Havana, Cuba, will succeed Mr. McKinnon in Birmingham.

NORTH TORONTO DEBENTURES AND MILL RATE.

Discussion of Curious Proposal is Continued—Many Opinions Cited.

The town of North Toronto is still discussing what tax rate it will strike for the coming year. Several members of the council advocate that in this year's collection, provision should be made for only one half of the first year's principal and interest of the sewerage debentures. Mr. Gibson, the town solicitor, says:—"The arrangements for the construction of the sewer system was that after the passing of the by-law with the Bank of Montreal, a temporary loan not to exceed $50,000 at 5 per cent. per annum was to be advanced as required, to meet the cost of construction. When that arrangement was made it was definitely understood by the bank that the council had decided to offer the debentures for sale without delay and the advance would be repaid to the bank out of the proceeds of the debentures.

Bank Increased Sum.

"Later it was found that $50,000 would not be enough and the bank agreed to increase the sum to $100,000. The proposal advanced now is to borrow the whole amount $265,000, as a temporary loan elsewhere, and that the debentures need not be sold or dated until some time next year, thus the first levy need not be made until 1912.

"I do not think it is possible to borrow the whole amount as proposed, and if it were the rate of interest would be higher than mentioned in the debentures. By assuming so large a debt the town of North Toronto would place itself in a position I do not think it should. The by-law provides for 30 successive levies of the same amount in each year and if you wish to avoid financial embarrassment I can see no escape from commencing with the year 1911.

Immediate Sale of Debentures.

"It is admitted that the whole amount will have been spent before the end of this year and the most economical way of providing the money is by the immediate sale of the debentures, which bear interest at 4½ per cent. per annum. This involves the addition to this year's taxes of a sum sufficient to meet the first yearly instalment of interest and principal. I need hardly add that in my opinion this is the course prescribed by the municipal act."

Messrs. Watson, Smoke, Chisholm and Smith asked their opinion as to whether provision should be made in the collection of taxes for this year, for the collection of the annual amount to be levied under by-law 1230, say: "We are told that the debentures bear date August 1, 1911, and have been sold or will shortly be sold to some intending purchaser. The first debenture will therefor be payable on 1st August, 1912, and the first half-yearly coupon of interest will be payable on 1st February, 1912. These debentures in accordance with the act are to be defrayed by a special general tax, which is chargeable on all the rateable property of the town.

First Debenture Payable.

"Paragraphs of the enacting portion of the by-law provide that during 30 years the currency of the debentures to be issued under the authority of this by-law in addition to all other rates there shall be raised, levied and collected annually by special rates, the sum of $16,299.46 for the payment in each of the said years for principal and interest for the town of North Toronto for the next 30 years. As we have pointed out the first debenture will be payable on August 1, 1912, and during that time that debenture will be current."

Reviewing in detail the several steps leading up to the present condition of affairs, Mr. W. A. Werrett of Messrs Werrett & Thompson, has this to say: "Under the above statement of facts, I am of opinion that there was no other course open for your council legally to pursue, save that which they have pursued, namely, to sell the debentures to pay for the work which your town are having done in connection with the sewage system.

To Raise by a Subterfuge.

"I am further of opinion that the changing of the estimates to endeavor to raise by a subterfuge, part of the amount required for interest and instalment of principal falling due on the first day of February, and the first day of August, 1912, is illegal, and that your council was wrong in eliminating this item, namely, $1,750 from the estimates of the year 1911.

"Under the Municipal Act, the borrowing powers of your town are limited and from a glance at the figures, it appears to my mind that it would be impossible for the council of 1912 to finance the affairs of the town, and in addition thereto raise this $16,750."

BRITISH COLUMBIA.

Display of Minerals at Vancouver Exhibition Creates Much Interest.

(Staff Correspondence.)

Vancouver,
Sept. 9th.

A feature of the Vancouver Exhibition that deserves more than passing mention was the mineral display. This was the best to be seen in the province, apart from that in the government buildings at Victoria. During the past few years, several new districts have come into public notice, and the ores on view were from every part of the province and even from Dawson. In collecting the samples a point was made to get large pieces as taken out of the ground rather than picked specimens, so that those who examined the mineral could get an idea of the value of the property. About one-half of the exhibit will be returned, and the other half will form the nucleus of a permanent display to be on view throughout the year in a building in the exhibition grounds. to be set aside for that purpose.

Quartz was sent by the Dawson Board of Trade, and some very fine samples of copper-gold ore from Whitehorse. The specimens from the vicinity of Kitselas on the Skeena river were also very fine, being also copper-gold, but with higher gold values than that from Whitehorse. Hazelton showed some of its excellent silver-lead ores, and the Stewart Commercial Club had an array of Portland Canal ores. The gold ores from Surf Inlet on Princess Royal Island attracted much attention, as did the quartz from Valdez, Alaska. The Ikeda company, operating on Moresby Island, also sent a shipment of its product. Until one particularizes, one fails to realize for the moment the amount of mining done on the coast and the importance of the new districts like Hazelton and Kitselas. Although Whitehorse is a little back from the coast, there are fine copper deposits near there, but it will be closer to Prince Rupert that the greatest activity will take place in the near future, for with people going in there because of the construction of the Grand Trunk Pacific, more attention will be drawn to the resources of that part of the country.

Galena Specimens in View.

The Hope Citizens' Committee had galena specimens on view, and display was made of placer and quartz from Siwash Creek. Twenty years ago claims were staked on Silver Creek, twenty miles from Hope, but these eventually lapsed, but recently work has been done there, and some of the best mispickle ore in British Columbia was shown from that district. Several individual mining companies also sent specimens, these being from the Boundary, Lardeau, Silverton, and the Nickel Plate. There were ten tons in all, and the extensive display was a revelation to mining men not thoroughly acquainted with the various districts. A sample of the mineral salts (Epsom) from the lake at Keremeos obtained a diploma. This deposit may be worked in the near future.

The principal display was that of the Consolidated Mining & Smelting Company, of Trail. Located in the interior, a great deal is not heard of the operations of this company, and what it had to show enabled people to understand that the industry is a large one. The exhibit, complete and extensive, comprised manufactured lead pipe, sheet lead, pig lead, lead-silver bullion, bluestone, high and low grade copper matte, and samples of the ores from various mines smelted at Trail. What may be done by a large company like this is indicated by the finding in the old War Eagle better ore than was ever taken out of this mine. The property was taken over less than two years ago by the Consolidated Mining & Smelting Company, and continuing development to greater depth the better grade was found. Recently the company took over the Le Roi mine at Rossland.

Want Lower Freight Rate.

Once again the Vancouver Board of Trade appealed to the Board of Railway Commissioners for a lower freight rate. The board has a permanent officer who looks after the traffic end of this discussion, and he appeared as an expert witness before the commission. It is expected that the board will secure some concession through the commission.

The Canadian Pacific Railway is making extensive improvements at Coquitlam to take care of terminal business and relieve the yards at Vancouver. While in the city, Sir Thos. Shaughnessy was interviewed by a committee of the Board of Trade, when local matters were taken up. Regarding the export of grain through this port, Sir Thomas said that while it would not be extensive under present conditions, with the completion of the Panama Canal it would be incumbent on the Canadian Pacific Railway to construct an elaborate system of elevators and grain shipping machinery on the Vancouver waterfront.

NEW CANADIAN MANAGER APPOINTED

To Toronto Branch, General Accident Assurance Corporation—Mr. Claude Norie-Miller Goes to Philadelphia.

According to some of the American insurance papers, Mr. C. H. Boyer, former manager of the United States industrial department of the General Accident is being retained by the company. This is incorrect. The Monetary Times learns that Mr. Boyer's dismissal has not been reconsidered and therefore stands.

It will be recalled that Mr. Franklin J. Moore was dismissed as manager of the company's American branch, together with Mr. Boyer and others. This was the first result of a report by the New York State Insurance Department on an examination of the company's American business. Mr. F. Norie-Miller, general manager, from Perth, Scotland, is reorganizing the American office.

Mr. J. J. Durance, who has been with the company 4½ years, and lately as head of the liability department, has been appointed manager of the Canadian branch at Toronto, in succession to Mr. C. Norie-Miller, who succeeds, jointly with Mr. John A. Kelly, Mr. Franklin J. Moore.

Only One Opinion.

The divergent opinions held as to Mr. Boyer, one of the dismissed officials, is noticeable in the two following extracts, the first from The Insurance Age of New York:—"As we have thought all along, it does not seem likely at this writing, that the management will disturb Mr. Charles H. Boyer in his position as industrial manager of the company. He has built up a wonderful business for the General, and it is not considered by the management that the abuses for which the company was criticized by the Insurance Commissioners, warrants so drastic an action as the dismissal of Mr. Boyer, which demand appears to be merely a whim on part of the commisisoners. At this writing, it appears likely that Mr. Boyer will continue in his present position, and that his department will keep on growing and prospering very largely as it has done in the past."

J. J. DURANCE,

Who has been appointed manager of the Canadian branch of the General Accident Assurance Corporation at Toronto.

As The Monetary Times has stated above, Mr. Boyer has been dismissed and his retirement from the company stands.

Here is Another.

The Detroit Indicator takes a different view to that of its New York contemporary and says:—"The work of 'cleaning house' would not have been complete without this, for he was the worst offender. Working under a profit-sharing contract he had enriched himself through the beating of honest claimants out of their just dues and made of this department a stench and a byword. His actions have no justification and his dismissal was the only proper thing to do."

The report of the New York Insurance Department referring to Mr. Boyer, said in part:—

"Charles H. Boyer is the manager of the industrial department. His wife is the superintendent of agencies. His brother, J. B. Boyer, is at the head of the legal bureau. His brother-in-law, J. C. Steinbach, is assistant to the chief of the claim department. Another brother-in-law, George H. Summers, is at the head of the policy department; while J. Warren Isett, a cousin, is at the head of the accounting department. Another significant fact is that the industrial department manager, whose family is thus apparently in charge at the home (United States) office, is largely compensated through a profit-sharing contract, under the terms of which such manager received 15 per cent. of the net profits derived from the industrial business, based upon the premium income, expenses, loss payments, etc. He thus shares financially in all gains which may be made through adjustments in the claim department. His profits under this contract in 1910 were $14,564.85, while his flat salary was $4,800."

C. H. BOYER,

Who has been dismissed as manager of the Industrial department of the United States branch of the General Accident Assurance Corporation by home office officials, following a report of the New York State Insurance Department on the company's American affairs. Mr. Boyer's salary was $4,800 and his commissions in 1910 amounted to $14,564.

Among the recommendations of the Insurance Department was the following:—

"For the future there must be such a reorganization of the industrial department as will, so far as possible, separate any person holding a position of influence or decision at the home office (United States) who holds a profit-sharing contract from any control, supervision or suggestion as to the settlement and adjustment of claims."

* * *

Representative Bennett, of New York, on February 16, 1911, in the American House of Representatives, offered a resolution directing President Taft to enter into negotiations from time to time with the British Government for the annexation of Canada to the United States.

The longer the American tariff of 25 cents a bushel on Canadian wheat is maintained the better for Canada, as our wheat has a distinct place in the British market. If the market of the United States were freely opened it would be impossible to maintain its identity in passing through American elevators.

The alleged "market of ninety millions for Canada" is delusive. The population of the United States is about ninety millions, of which 35.1 per cent. were farm families. The southern and south-western states with a population of thirty-six million will not provide a market for Canadian farm produce.

The Canadian farmer should compare the prices he obtains for his products in a small village near his farm, not with the prices in Boston, New York, Chicago, but with the prices obtained by farmers in small villages in the United States equally distant from the great centres of population.

EXTRAORDINARY LIFE INSURANCE DEAL.

International Insurance Company, of Edmonton, Alberta, Has Arranged to Purchase Canadian Guardian Life Insurance Company—The Charter of the Latter Was Cancelled for Good Reasons by the Dominion Government Early this Year.

Mr. J. M. Spence, formerly of the Canadian Guardian Life Insurance Company, whose charter was cancelled by the Department of Insurance at Ottawa, following a very adverse report by chartered accountants on the company's position, is again active. He has become managing director of the International Insurance Company, Limited, with head office at Edmonton, Alta. This company's charter, we believe, was granted some years ago and has remained dormant. Mr. J. M. Spence and his associates will give it life if possible.

Alberta has no insurance Act, and if the International Insurance Company is run along lines similar to those on which the Canadian Guardian Life Insurance Company was run by Mr. Spence, we may anticipate some complications

Capital of the New Company.

At a meeting of the shareholders of the International Insurance Company, held at Edmonton, last month, Mr. J. M. Spence presented a report of which the following is an extract:—

"The authorized capital of the company, amounting to $250,000, divided in 5,000 shares of the par value of $50 each, has been offered for sale, and of this amount over 2,100 shares have already been subscribed for, on account of which $15 per share (or 30 per cent.) is being turned over to the company, and the balance will in order of subscription be allotted upon a payment of $20 per share, of which sum $15 will be credited to the capital and $5 applied to the surplus of the company.

What Was Proposed.

"Your board of directors having arranged for the purchase of the Guardian Life Insurance Company, now ask for authority to carry the same into effect in the following manner.—

" (a) By taking over the assets of the said company (after providing for all liabilities) at their present or market value.

" (b) By accepting applications from the policyholders of the said company and issuing to them new policies in this company, such policies to be dated back so that they will correspond with the policy they now hold, both as to the amount guaranteed therein by way of legal reserve or otherwise and

" (c) By paying to each of the persons who (at the time of completing such purchase) may be shareholders in the Canadian Guardian Life Insurance Company an amount that will be equal to his or her holdings in the said company, provided, however that such payment shall be made by way of the said shareholders accepting shares in the capital of the International Insurance Company, Limited."

Some Past History.

This is certainly an interesting transaction—the purchase by one insurance company of another insurance company whose charter has been cancelled by the government for excellent reasons. The memory of the people of Western Canada must be short in regard to insurance happenings in Eastern Canada.

The Canadian Guardian Life commenced business in 1901, and had during its existence no less than eight secretaries. A report made on the company's position on behalf of the Dominion Insurance Department showed that the operating loss for 72 months was $61,223, apart from the liability of the company to the then existing policyholders.

The dividend declared in 1910 was one of several contributed by the specific surrender of three shareholders, who were also directors, of $15,000 share subscriptions. The government auditors also noted the "very extraordinary method adopted by the board of the Canadian Guardian Life to avoid showing an operating deficit." A vote of $1,000 a month was made to Mr. J. M. Spence, the company's president, as salary for the years 1907 and 1910, an increase of from $250 a month during the preceding years for the purpose of enabling him to acquire shares for the benefit of the company. In November, 1910, the increase was cancelled. Intending shareholders of the International Insurance Company, of Edmonton, of which Mr. J. M. Spence is managing director, before subscribing, should read the full report of the government auditors on the position of the Canadian Guardian Life Insurance Company, of which Mr. J. M. Spence was president, and whose charter was cancelled.

RECENT FIRES.

Monetary Times' Weekly Register of Fire Losses and Insurance.

The following particulars are gathered from first Press reports of conflagrations. Upon these are instituted further inquiries which appear under heading "Additional Information."

Napanee, Ont.—September 8.—Premises of the Whirlwind Sale Company damaged. Origin unknown.

Vineland, Ont.—September 8.—Barn belonging to Mr. James Lydon damaged. Loss unknown. Origin, incendiarism.

Chatham, Ont.—September 6.—Barns of Mr. Wm. Crafts destroyed with season's crops. Loss unknown. Origin, lightning.

Ridgetown, Ont.—September 12.—Mills of Howard Cooperage and Lumber Company destroyed. Loss unknown. Origin, lightning.

Collingwood, Ont.—September 6.—Shipyard of Mr. Robert Morrill destroyed. Loss about $5,000 with insurance $2,000. Origin unknown.

London, Ont.—September 11.—Residence of Mr. Charles Castle, 576 King Street, damaged. Loss small. Origin, matches carelessly thrown.

Esquimalt, B.C.—September 6.—Home of Mr. A. J. Hicks, Constance Avenue, destroyed. Mrs. Hicks burned to death. Loss and origin unknown.

Ridgetown, Ont.—September 11.—Barns of Arlington Hotel badly damaged. Loss about $200. Origin unknown. Four tons of timothy hay destroyed.

Walkerville, Ont.—September 12.—Horse barns of Messrs. Hiram Walker & Sons destroyed, also eight horses. Loss about $3,000. Origin unknown.

Milton, Ont.—September 12.—Barns of Mr. John McLeod with season's crops destroyed, also 2 hogs, one dog, a calf and a number of poultry. Loss unknown. Origin. lightning.

Toronto, Ont.—September 12.—Plant of British American Oil Company, Cherry Street, damaged. Loss about $200. Origin unknown. September 13.—Second blaze at British American Oil Company's plant. Loss about $150. Origin, supposed spark from engine.

Belleville, Ont.—September 9.—Boarding stable of Mr. Dennis Lucas damaged. Loss unknown. Origin, incendiarism. September 6.—Cheese box factory of Mr. Stanley Vandervoort destroyed. Loss and origin unknown. September 12.—Barn of Mr. Charles Burkard, second concession of Thurlow, destroyed with season's crop. Loss unknown. Origin, lightning.

Montreal, Que.—September 8.—Premises of Merchants Awning Company, Notre Dame Street. Loss and origin unknown. Factory of Canadian Rubber Company, Notre Dame Street and Papineau Avenue, damaged. Loss and origin unknown. September 6.—Factory of Blangas Company of Canada, Limited, St. Patrick Street, Cote St. Paul, damaged. Loss unknown. Origin, overheated retort. September 12.—Rear of premises of Mr. L. H. Goulet, 482 St. Denis Street, destroyed; also valuable horse with two carriages, harness, etc. Loss unknown. Origin, supposed incendiarism.

◆

NOTES OF BIDDING.

For the $310,000 40-year 5 per cent. debentures of the Saskatoon School District seven bids were received, four from Toronto bond firms, one from Regina, one from the Imperial Bank, Saskatoon, and one from the National Trust Company. The offer of Messrs. Wood, Gundy & Company, Toronto, was accepted.

Six bids were made for the $7,000 5 per cent. 10-year road debentures of Meota, Sask. The award was made to the National Finance Company, Regina branch.

◆

Construction work on the Central Railway of Canada may be commenced next week. Hon. Mr. Matheson, provincial treasurer of Ontario, informs The Monetary Times that the company's claim to a land grant in that province will be opposed by the government.

In 1897 the parliament of Canada repealed the legislation then existing relating to reciprocity. Since then neither the people of Canada nor their parliament have given the government authority to negotiate such an important treaty.

"If we take down the tariff wall we shall sell more agricultural products to Canada than she will sell to us. We do now, and we shall sell her even more after the treaty goes into effect."—President Taft.

MONTREAL STREET RAILWAY.

Harbor Commissioners Make Progress in Their Work —New Marine Insurance Rates Are Being Prepared.

Monetary Times Office,
Montreal, Sept. 13th.

The reports that Mr. W. G. Ross will resume his position in the Montreal Street Railway as managing director are denied by President Robert. It is now nearly a year since the control of the Street Railway changed hands and the new directorate assumed the reins of office.

At a meeting of the Board of Railway Commissioners on the 28th inst. the Terminal Railway Company and the Park and Island Company will apply for the sanction of an agreement for the sale of the two companies' undertakings to the Montreal Street Railway Company. This, no doubt has reference to the amalgamation of the Montreal Street Railway, the Public Service Corporation, the Park and Island Railway and the Terminal Railway under the name of the Montreal Tramways Company, which, in a recent speech, Mr. Robert intimated would be effected by the end of the present month.

Conditions of the Sale.

The following are the terms upon which the sale of the Park and Island Railway to the Montreal Street Railway will be made, subject to the permission of the Railway Commission: A release to the Montreal Park and Island Railway Company of its indebtedness to the Montreal Street Railway Company. A covenant on the part of the Montreal Street Railway Company: To pay all the debts, liabilities and engagements of the Montreal Park and Island Railway Company, and to indemnify the Montreal Park and Island Railway Company against the same, and against all actions, proceedings, costs, damages, claims and demands in respect thereof. To pay the shareholders of the Montreal Park and Island Railway Company, other than the holders of such shares as are owned by the Montreal Street Railway Company, an amount equal to $100 per share for the shares owned by such shareholders, such ownership to be evidenced by the register of the company and by the delivery to the Montreal Street Railway Company of the share certificates of the respective holders thereof, endorsed in blank.

The Terminal is to be taken over on the following conditions: A release to the Montreal Terminal Railway Company of its indebtedness to the Montreal Street Railway Company. A covenant on the part of the Montreal Street Railway Company to pay all the debts, liabilities and engagements of the Montreal Terminal Railway Company against the same, and against all actions, proceedings, costs, damages, claims and demands in respect thereof.

Work on New Elevator is Proceeding.

A new electric hoist has been put into commission near the Montreal Commissioners' offices. The hoist is capable of lifting ten tons to its topmost reach in thirty seconds. This crane will be used for hoisting goods to the second storey of the dock sheds.

Work is proceeding on the new elevator, and immediately adjoining it the foundations for a large addition are being laid. The main building will be ready for the opening of navigation next year, and extension will be completed at an early date. The Commissioners believe that shortly the elevator will require to be enlarged on the north also, and that it may be necessary to extend the building right up to the revetment wall. At Victoria Pier for many years river boats have docked. On the lower portion of the pier the wooden wharves still remain. The pier is being extended, and the whole will be rebuilt in concrete. Beside the accommodation for the river and lake vessels, safe berths will be provided for ocean liners. The current here is strong, and the Commissioners are constructing into the current an extension to the guard-pier in order to divert the current from the wharf out towards St. Helen's Island. The channel over at St. Helen's Island is also being dredged in order to give greater room for the diverted current.

Demand for Space at Harbor Active.

Beyond the foot of St. Helen's Island Tarte Pier has been reconstructed in concrete, and the Commissioners have already begun to build two large steel sheds. When these have been completed, two more steel sheds will be added. Applications have already been received to rent them, thus showing the active demand for space which exists in the port of Montreal. The pier is being leased by an oil company, the consideration being 6 per cent. interest on the construction cost, which is the equivalent of $6,000 a year.

Interest is taken in the site for the new dry dock. The specifications for the approach to the dock call for a channel of fifty feet. The dock is to accommodate steamers of 20,000 tons. Instead of wasting the earth which is being taken from the river in dredging for the entrance to the dock, the Commissioners are creating about thirty acres of new land out in the river for Vickers, Sons & Maxim. This land will be used by them for a ship building plant, the company paying a rental of $18,000 per year to the Commission. The company may acquire holdings on the mainland adjoining the dry dock site, and there erect large shipbuilding yards.

Before the close of navigation next year, the Canadian Pacific Railway elevators below Victoria Pier will have been demolished. The company will then use the Harbor Commissioners' new elevator. The Commissioners have just granted the company a new forty-year lease for track purposes only on the site of the old Canadian Pacific Railway elevators.

In carrying out the improvements to the harbor the Commissioners have during the past two years expended the entire $6,000,000 loaned them by the Dominion Government for this purpose.

New Scale of Marine Insurance Rates.

A scale of marine insurance rates applicable to the new improved conditions on the St. Lawrence route is being prepared by the Harbor Commissioners of Montreal. Insurance rates to Montreal have always been much higher than to competitive points, such as New York, Portland, etc., the claim being made that the dangers of accident in the St. Lawrence route were such as to justify the higher rate. In years past a large number of accidents have taken place in the St. Lawrence River and Gulf, and because of these the rates to this port are maintained at a high level. Since the channel has been widened and deepened serious accidents have almost been unknown, and vessels are now almost as immune from accident in the St. Lawrence channel as they are on the high seas.

These arguments, and proofs thereof, will be submitted, together with the new scale of insurance rates, to the Marine Underwriters' Association, with a view to lessening the charges under which the port labors. These insurance rates, even though they may once have been justifiable, are no longer so. No information has been given out as to the details of the new schedule, but an effort will be made to have Montreal placed on an equal footing with competitive ports. The hope is expressed that the representations of the Harbor Commissioners will be successful, and that by the opening of next season the port will have a serious disability removed.'

◆

DEBENTURES AWARDED.

Hull, Que.—$227,500 4½ per cent. to Banque Provincial, Hull.

Taber S.D., Alta.—$4,000 5½ per cent., 30-years, to Messrs. Nay & James, Regina.

Erskine S.D., Alta.—$1,000 5¾ per cent., 20-years, to Messrs. Nay & James, Regina.

Champagne S.D., Sask.—$7,000 6 per cent., 10-years, to Messrs. Nay & James, Regina.

Renfrew, Ont.—$28,000 5 per cent., 20-years, to Messrs. Brent, Noxon & Company, Toronto.

Arnprior, Ont.—$10,000 5 per cent., 20-years, to Messrs. C. H. Burgess & Company, Toronto.

Village of Earl Grey, Sask.—$1,000 6 per cent., 15-years, to Messrs. Nay & James, Regina.

Dresden, Ont.—$16,000 4½ per cent., 30-years, to Messrs. C. H. Burgess & Company, Toronto.

Innisfree, Alta.—$3,000 7 per cent., 10-years, for local improvements to Mr. T. R. Billett, Winnipeg.

Luduc S.D., Alta.—$19,000 6 per cent., 30 instalments, to Messrs. C. H. Burgess & Company, Toronto.

Hochelaga S.D., Que.—$45,000 4½ per cent., 40-years, to Messrs. National Finance Company, Toronto.

Rural Municipality of Winslow, Sask.—$10,000 6 per cent., 10-years, to Messrs. Nay & James, Regina.

Small Schools, Alberta and Saskatchewan.—$8,500 6-7 per cent., 10 years, to Messrs. Nay & James, Regina.

Village of Brock, Sask.—$2,000 7 per cent., 15-years, for local improvements to Mr. T. R. Billett, Winnipeg.

Pelee Township, Ont. — $4,000 5 per cent., 20 instalments, to Messrs. National Finance Company, Toronto.

Berlin, Ont.—$7,500 5 per cent., 10 equal annual instalments to Messrs. R. C. Matthews & Company, Toronto.

Township West Oxford, Ont.—$4,328 5 per cent., 5-10 instalments, to Messrs. C. H. Burgess & Company, Toronto.

Saskatoon S.D., Sask.—$310,000 5 per cent., 40 years, to Messrs. Wood, Gundy & Company, Toronto. The school district has now an assessment of $25,200,803 and a debt of $485,407, with an estimated population of 18,000.

"CAPITAL INVESTMENTS IN CANADA."

By FRED. W. FIELD

THE MONETARY TIMES

Price - - $2.50

The following are the chapters of the volume—

1. British investments in Canada.
2. American investments in Canada.
3. Foreign investments in Canada.
4. French investments in Canada.
5. German investments in Canada.
6. Other countries' investments in Canada.
7. Canadian Government borrowings in London.
8. Municipal borrowings in London.
9. The financing of Canadian railroads.
10. Industrial investments in Canada.
11. Investments in Canadian land and lumber.
12. Investments in Canadian mines.
13. Canadian banks, British and foreign capital.
14. Registered stock or bearer securities?
15. Canada's credit abroad.
16. Canadian securities and the British Trustee List.
17. New capital from immigration.
18. The relation of trade to borrowed money.

APPENDICES

1. Canada's share of British capital.
2. Is Canada over-borrowing?
3. Canada and International finance.
4. Editorial comment respecting British, American and foreign capital investments in Canada.
5. List of Canadian flotations in London January, 1905 to April, 1911.

THREE INDEXES

The volume is very completely indexed, one index being devoted to personal names, another to companies and institutions, and a third to subjects.

Nearly three hundred companies, Canadian, British and foreign, are referred to, while numerous authorities on the subject of investment are quoted.

"This book will appeal to a wide circle of investors."—*Cambridge Independent Press.*

"An interesting and valuable publication, carefully edited and compiled, and the most comprehensive work yet published in the field of Canadian finance."—*Toronto Mail and Empire.*

"It will prove of great value, and is the first contribution on the subject, dealing specifically with Canada, to the business man's library shelves."—*London Financial News.*

MOROCCO AND THE MARKETS.

Well-informed opinion states there will be no resort to arms in settlement of the dispute between France and Germany over Morocco. The stock markets have suffered considerably from rumors of possible war. These could best be settled and public confidence reassured by an announcement in Berlin as to what the situation between the two nations really is, says a London cable. Both countries have faced a difficult problem, and with the principle settled it would be better for the representatives of the nations to take time to elaborate a scheme which would stand the test of working. France in her own interests, after paying the price in Congo territory, secures herself from further interference in Morocco on the part of Germany. She sees that any undue extension of Germany's commercial interests there will inevitably provide an excuse sooner or later for interference. Germany cannot give France the protectorate of Morocco, for Morocco is an "independent" country, but she will acknowledge France's sole right to act as the executrix of the will of the powers expressed in the treaty of Algeciras. This means eventually a protectorate similar to that which the British exercise in Egypt.

Several sharp declines have occurred on the Berlin Boerse throughout the entire list, notably in Canadian securities, Baltimore, Deutsche Bank and all staple properties. Runs on savings banks have been frequent. This period of disturbance should not continue much longer. In the meantime, war is extremely unlikely.

BIDS FOR BONDS AND CANNOT BE FOUND.

This is What the Montreal Investment and Trust Company Seems to be Doing—Experiences of Campbelltown and Newcastle Towns.

Who is Achile Laurin? Where is he to be found when municipal authorities desire to accept his bid for debenture issues? Where is the Montreal Investment & Trust Company located? These questions need a speedy answer to satisfy at least two municipal officials and several bond houses.

The town of Newcastle, N.B., is searching for a firm which offered to purchase an issue of $30,000 5 per cent. town debentures at par. The name of the financial house is given as The Montreal Investment and Trust Company. The town clerk's letters regarding the bonds have not been delivered at Montreal where the post office authorities say they cannot find the firm. Many letters addressed to them have been sent back to the original senders, and frequent applications to the postmaster have met with the same response: "We cannot find the company."

Firm Was Registered.

At the Tutelle Office there is an entry that registration of the company was made on June 16th, 1911. There is no address given, and the City Directory and the Bell Telephone Directory give no clue as to the address of the company.

The following three tenders were received by the town of Newcastle, N.B.:—Montreal Investment & Trust Company, $30,000; Royal Securities Corporation, $29,475; and the Dominion Securities Corporation, $29,403.

In the meantime, the town of Campbellton, N.B., has had a similar experience as the following correspondence shows:—

"We beg to advise you," wrote Mr. John Reid, the town clerk, on Sept. 5th, "that our recent issue of $100,000 guarantee debentures were sold to Messrs. C. Meredith & Company, Montreal, at $97,500 with accrued interest.

"The following is a list of our bidders and the amount of their tenders:—

Dominion Securities Corporation, Ltd., Montreal....	$97,265
I. M. Robinson & Sons, St. John, N.B.............	96,875
Brent, Noxon & Co., Toronto......................	96,538
City & District Savings Bank, Montreal...........	95,500
Wood, Gundy & Co., Toronto.......................	94,513
J. C. Mackintosh & Co., Halifax, N.S.............	93,500
Ontario Securities Corporation, Ltd., Toronto......	89,507
Æmilius Jarvis & Company, Toronto	93,170

"I might say that the delay in winding up this matter has been unavoidable on our part as a certain firm purporting to do business in Montreal made us an offer of par for these bonds and we accepted this. However, they failed to make good and, in fact, we were not able to locate them and at length were forced to the conclusion that the firm was not in existence."

In response to a query as to the name of the firm, Mr. Reid wrote on Sept. 9th:—

"In reply to yours of the 8th inst., would say that the firm referred to in our letter was The Montreal Investment and Trust Company, Room 44, Trust and Loan Building, per Achile Laurin."

What Municipalities Should Do.

These pranks of Achile Laurin are an unwelcome factor in the bond market. In view of the circumstances noted above, we would advise municipal authorities not to consider tenders from the Montreal Investment & Trust Company, and bond houses in tendering to inform the advertisers for bids of the happenings noted here.

We understand that the same mysterious company tendered the highest bid for the $45,000 4½ per cent. 40-year debentures issued by Hochelaga School District, but the award was made to the next highest bidder, Messrs. The National Finance Company, Toronto.

BOND TENDERS INVITED.

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials.

Hamilton, Ont.—The ratepayers may be asked to vote on an expenditure of $600,000 for waterworks system.

Chippawa, Ont.—Until September 30th, for $11,000 5 per cent. 30-year debentures. W. A. Myer, village clerk.

High River, Alta.—The expenditure of $125,000, for waterworks and sewerage systems has been passed by the ratepayers.

North Toronto.—The ratepayers have passed the following by-laws:—$25,000 for new road and $20,000 for opening two new streets.

Calgary R.C. S.D. No. 1, Alta.—Until October 23rd, for $60,000 30-year 4½ per/cent. debentures. J. McCaffary, secretary-treasurer.

Village of Hastings, Ont.—Until September 30th, tenders are invited for $6,000 5 per cent. 20-year debentures. Mr. Alex. Wilson, clerk.

Greenfield Park, Que.—A by-law was read recently by the city council for a third time dealing with the borrowing of $25,000 for roads and drainage.

Portage la Prairie, Man.—The ratepayers have approved of a by-law for $100,000 for the purchase by the city of the plant of the Central Electric Company.

Macdonald Municipality, Man.—Until September 27th for $4,000 20-year 4 per cent. debentures, and $6,862.50 20-year debentures. H. Grills, secretary-treasurer, Sanford.

Tavistock, Ont.—The council decided not to accept any offers submitted for the $20,000 4 per cent. 30-year debentures, for which tenders were called up to September 1st.

Brandon, Man.—Until September 22nd, for $45,000 5 per cent. 30-year school debentures. J. B. Beveridge, secretary-treasurer. (Official advertisement appears on another page).

Diamond City, Alta.—Until September 25th, for $6,000 6 per cent. 20-year school debentures. R. Laughton, secretary-treasurer. (Official advertisement appears on another page).

Prince Rupert, B.C.—The ratepayers have passed the following by-laws:—$550,000 for permanent water works and hydroelectric system, and agreement with respect to taxation of Grand Trunk Pacific Railway.

Moose Jaw, Sask.—Until September 30th, for $125,000 4½ per cent. 30-year school debentures. C. Kempton, secretary-treasurer, Moose Jaw Public School Board, District No. 1. (Official advertisement appears on another page).

Bathurst, N.B.—Until September 30th tenders will be received for the following:—$5,000 5 per cent. 40-years, and $5,500 5 per cent. 40-year school debentures. Mr. B. C. Mullins, secretary-treasurer. (Official advertisement appears on another page.)

Montreal, Que.—Until September 18th tenders will be received for £1,438,300 sterling or $7,000,000 currency or francs, 4 per cent. registered stock or coupon bonds to mature November 1st, 1951, for public parks, waterworks and working for construction of schools.

Calgary, Alta.—Money by-laws for civic improvements, involving an aggregate expenditure of $1,490,000, passed their second reading at the special meeting of the city council recently. They will be voted on about the middle of October. The burgesses will be asked to sanction an expenditure of $375,000 for street railway extensions, $395,000 for water extensions. $42,000 for sewer connections and machinery, and $30,000 for conduit system extensions.

Municipal accounting and book-keeping methods were discussed at a recent meeting of the Council of South Vancouver, B.C. After much discussion, it was resolved that the comptroller and clerk should confer with the official heads of departments to see what book-keeping system would best be adapted to the present requirements.

"Canada has a large, remunerative export trade in agricultural products with Great Britain. Such portion of those exports as may be diverted to the United States under free trade will come on the payment by our importers of a price that will divert shipments from the British markets. So at the most only a small part of Canada's agricultural products will come into the American market."—Moline Daily Despatch, Illinois.

Brent, Noxon & Co.
50 Canada Life Bldg., Toronto

A new stock issue will be made by the Dome Mining Company, which is controlled by interests in the International Nickel Company, and which has been practically a private corporation. The capital of the Dome is now $2,500,000, divided into 250,000 shares of $10 each. The capital will be increased by another $1,000,000 in $10 shares, and this will go to present holders in the ratio of one new share for every two shares now held. The funds will be used to pay for the newly built plant, and it is also said that the recent bond issue of $400,000 may be taken up.

The directors of Toronto Railway Company have declared a quarterly dividend of 2 per cent., payable October 1st, to shareholders of record September 15th. This rate was expected. It places the stock on an 8 per cent. basis, and is in accordance with the announcement made at the meeting some time ago, when the directors cut the now famous "melon," which apportioned $2,000,000 in new stock at par and included a bonus of $1,000,000 in new stock. The dividend record of Toronto Railway is as follows:—1901, 4½ per cent.; 1902-3-4-5, 5 per cent.; 1906-7-8, 6 per cent.; 1909-10-11, 7 per cent.

Campbell, Thompson & Co.
43 King Street West, Toronto.

The action brought by the Alberta Government to obtain control of $7,400,000 of funds of the Alberta and Great Waterways Railway now lying in the custody of the Royal Bank, Edmonton, will be tried at the full sitting of the Supreme Court, October 3rd.

Mr. Andrew A. Allan, president of the Marconi Wireless Telegraph Company of Canada, has issued a report for the year ending January 31, 1910, which shows a steady growth in receipts. During the year ending January, 1906, the total traffic receipts from short-distance stations was $1,425; for the year ended January, 1907, $8,600; for 1908, $15,000; for 1909, $19,200, and for the year ended Jaunary, 1910, $36,100, and there is every reason to believe that the traffic receipts for the current year will exceed the receipts of the past year by at least 20 per cent. In order to place the finances of the company on a sound basis, the directors ask authority to create and issue $2,500,000 30-year first mortgage 6 per cent. gold bonds. It is proposed to issue $1,000,000 worth immediately, and the directors expect to sell these bonds at an early date, and the proceeds will be used to pay off the indebtedness of the company and to supply ample funds to carry on its business and to make the necessary extensions from time to time for the development of the system. The balance of the bonds issued to remain in the treasury until the development of the company requires the additional capital.

WANTED

Advertisements under this heading will be accepted hereafter at the following rates: "Position Wanted" advs., one cent per word each insertion; "Men Wanted" advs., two cents per word each insertion; "Agencies Wanted" advs., two cents per word each insertion. A minimum charge of fifty cents per insertion will be made in every case.

SITUATION WANTED.—Young man (27) with over seven years' experience in office work, five years being with prominent Toronto wholesale and manufacturing houses, and at present with a firm of Chartered Accountants in Saskatchewan, wishes position, other than in a Chartered Accountant's office. SOVEREIGN BANK DIRECTORS HELD LIABLE.

The directors of the Sovereign Bank are liable to the bank for $187,794 on promissory notes given by the directors for the alleged purpose of nominally covering the illegal purchase of the bank's stock by the bank itself. As the result of this test case, sums totalling $400,000 will be due the bank in a similar manner. This is the gist of a judgment handed out in the Court of Appeal, Toronto, this week, by Mr. Justice Garrow.

The judgment reversed the decision of Chancellor Boyd, who held that the directors were not liable, and the defendants against whom the case has now gone will appeal again. It is possible that the case may go to the Privy Council.

Mr. W. E. Stavert, Curator of the Sovereign, took action against Donald McMillan, Donald D. McMillan, James Mcphee, and D. A. Campbell, in 1906 to recover the amount of these notes, which came into his hands. The defendants pleaded that the notes were made and endorsed on the understanding that they should not be sued on them, and that they should be indemnified by the bank in respect of them.

Mr. Justice Garrow says in giving judgment:—

"A gross breach of trust had been committed to which at least one of the directors (Mr. Stewart) was a party. The duty of the other directors to the shareholders was, under the circumstances, perfectly plain. They should, at once, unless they too were to become implicated, have repudiated Mr. Stewart's illegal acts, and have insisted upon a restoration to the bank of the funds which had been so illegally diverted. This could have been easily done by insisting upon the nominal purchasers and holders of the shares paying up their overdrafts and then doing as they pleased with the shares.

"Instead, however, of taking this position and thus protecting those whom it was their duty to protect, the other directors seem to have made common cause with Mr. Stewart, thereby becoming parties to the breach of trust, if they were not so already."

◆

In five years we bought from Great Britain $596,000,000 worth of goods less than we bought from the United States.

Acquiring a Better Knowledge of Investments

Nothing can be of greater benefit to the investor than to have a better knowledge of the different grades of investments. One should seek to know when is a favorable time to sell, as well as a favorable time to buy.

It has always been the endeavor of our Statistical Department to develop a close personal relationship between every client and the house, with a view of always being able to place at the disposal of every client all particulars we may have secured before purchasing the securities we offer.

We would also be pleased to place your name on the mail ing list for our Weekly Circular.

Moose Jaw has in progress now or about to be started works which will cost $929,750, made up as follows:—Sewer and water system, $400,000; street paving, $160,000; incinerator, $45,000; electric light system, $35,000; ornamental lighting, $15,000; cement walks, $55,000; culverts, $9,000; isolation hospital, $13,950; city's share of Sixth Avenue bridge, $50,000; house connections, $10,000; street improvements, $10,000; filter, $6,800; Snowdy Springs development, $1,000; general hospital, $75,000; Collegiate Institute, $14,000; market, $30,000. Total, $929,750. The street railway is also a public improvement, so that it might well be included in the total spent on civic improvements, as well as the Canadian Pacific's share of the cost of the Sixth Avenue bridge. Adding in these sums the grand total in public improvements to the city this year is $1,280,000.

DIVIDEND NOTICE.

THE SHAWINIGAN WATER AND POWER COMPANY.

Dividend Notice.

Notice is hereby given that a dividend of one and one-quarter per cent. (1¼%) has been declared upon the Common Stock of the Shawinigan Water & Power Company, for the quarter ending September 30th, 1911, payable on October 20th, 1911, to shareholders of record at the close of business on October 7th.

By order of the Board,

W. S. HART,
Montreal, September 11th, 1911. Secretary.

"Capital Investments in Canada."

By FRED. W. FIELD.

(A new volume to be published this month.)

$2.50 PER COPY.

Three hundred and seventy-two million pounds sterling have been invested by Great Britain in Canada. American capital has helped the Dominion's industrial development to the extent of nearly $417,143,221, while foreign capital in excess of $139,589,650 has also been invested in the Dominion.

A series of articles respecting the investment of British, American and foreign capital in Canada is appearing weekly in The Monetary Times of Canada. In response to many requests, the articles, which are from the pen of Mr. Fred. W. Field, Managing Editor of The Monetary Times, and Imperial Trade Correspondent at Toronto, will be reprinted in book form, at a popular price, together with other articles, early in the autumn.

In view of the general interest in the subject of investment in Canada and of the Dominion's trade relations, this new volume, "Capital Investments in Canada," will prove of great value. It is the first contribution on the subject to the business man's library shelves.

Orders for the publication are now being received at the arious offices ot The Monetary Times as follows :—

Toronto, Ont.: 62 Church Street.
Montreal, Que.: B. 33 Board of Trade Building.
Winnipeg, Man.: Room 404 Builders Exchange Building.
London, Eng.: Grand Trunk Building, Cockspur Street.

When in London call on The Monetary Times, Grand Trunk Building, Cockspur Street.

THE DOMINION OF CANADA GUARANTEE & ACCIDENT INSURANCE CO., TORONTO

THE MAN WHO DOES NOT NEED INSURANCE.

Now and then we meet a man who has had moderate success in business, who feels that he does not need life insurance. He has enough to leave his family, he thinks. Life insurance may be all right for the man who hasn't anything, but as for him, he cannot see the wisdom of it.

Such a man has about as much sagacity as an ostrich. He seems to think he is immune from all the perils that beset the world of business. Other men may meet reverses, other men may lose their all, but not he.

Rare tact is needed to handle a man of this kind. Vanity is his most vulnerable point. He is proud of his accomplishments, and he will be proud to be numbered with the "well-to-do." He will not resent it a bit if you link his name with those of eminently successful men; he will rather enjoy being in the crowd. And when you get him there let him see how these other men view the life insurance question. Show him what a monumental mistake it would be, after attaining the position in life that he holds, to expose himself and his family to the risk of adverse tides.

Millionaires count life insurance a good thing to have. There are few of them who are not insured. In a recent article along this line Harper's Weekly had this to say: "A feature of the recent business in life insurance is the number of very wealthy men who are taking out large policies on their lives. A few years ago a New Yorker who carried a million dollar policy was so much of a rarity that he was sure, if discovered, to get his picture in the Sunday sections of the newspapers. To-day there are so many of these men who have their lives insured for even two or three times that amount that they pass unnoticed and are uncommented on by the press."

If it is an act of prudence for the man who is able to purchase life insurance in million-dollar blocks, is it not good business sense for the moderately successful?—Fidelity Bulletin.

The Prudential Investment Co., Ltd.

Head Office · VANCOUVER, B.C.

Authorized Capital	$2,000,000.
Subscribed Capital	$1,090,000.

Assets of over a Million Dollars.

Paid-up Capital	$780,000.00.
Reserve	$250,000.00.

Owing to the fact that the ordinary stock of the company has all been subscribed, the $1,000,000 of 7 per cent. cumulative first preference stock is now being placed at par $100. The ordinary stock now changes hands at $160 per share.

The 7 per cent. preference stock will yield an income 50 per cent. greater than equally secure stocks or other financial securities usually listed on the exchanges, and is available on very favorable terms. Full particulars may be obtained by addressing Dept. 1, National Finance Co., Ltd., Vancouver, B.C.; or at Toronto, Ont.; Ottawa, Ont.; Halifax, N.S.; St. John, N.B.; Winnipeg, Man.; Regina, Sask.; or Calgary, Alta.

THE GREAT-WEST PERMANENT LOAN COMPANY

Head Office · WINNIPEG, Man.

Branches: Vancouver, Victoria, Calgary, Edmonton, Regina, Fort William

Paid-up Capital	$1,825,000
Assets	4,000,000
Reserve	520,000

MONEY TO LOAN ON IMPROVED CITY AND TOWN PROPERTY

4% allowed on deposits of $1 and upwards

5% allowed on debentures of $100 or over, issued for terms of from 3 to ten years

CAPITAL STOCK 7% INVESTMENT

The Company, having disposed of its Capital Stock some years ago, has, therefore, none for sale, but the stock may be purchased through the Toronto, Winnipeg and Vancouver Stock Exchanges, at prices ranging from $128 to $130 per share.

The last seven half-yearly dividends have been at the rate of **9 per cent. per annum,** so that, at the current prices, the **Investment** will **net 7 per cent.**

The Company will be pleased to furnish prospective purchasers with its Financial Statement or other information bearing on the Company, and, if so desired, the Company will purchase the Stock for the investor through the Stock Exchange, or privately, at the current prices.

Since its inception the Company has enjoyed uninterrupted prosperity, and has taken a very active part in the development of the West. With the rapid growth of Western Canada, the demand for money is so great that the present profitable rates of interest will be maintained for years to come; and with such a desirable field for loaning operations, combined with a progressive management, the price of the Company's Stock should continue to advance, and with the prevailing high dividends, the Stock of this Company will undoubtedly be in great demand by those who desire a safe and profitable investment.

BOARD OF DIRECTORS: W. T. Alexander, Esq., Managing Director The Canada National Fire Insurance Company, President and Manager; E. S. Popham, Esq., M.D., Director Standard Trusts Company, Vice-President; Nicholas Bawlf, Esq., President Bawlf Grain Company, Director Bank of Toronto, Director Standard Trusts Company, Second Vice-President; Sir Gilbert Parker, M.P., London, England; E. CANADA'S HARDWOODS.

Canada is dependent for its lumber supply on the soft woods of the forest much more than is the United States, as seen from the 1910 Forest Products report compiled by the Dominion Forestry Branch and shortly to be published. Of the 1910 Canadian lumber cut amounting to nearly five billion feet, only one-twentieth consisted of hardwoods or broad-leafed trees, worth barely five million dollars; on the other hand almost one quarter of the lumber cut in the United States consists of hardwoods, which country has far greater hardwood forests than ever did Canada. Canada is already feeling a shortage of the hardwood supply and makes up the national deficiency by importing annually from the United States, hardwood lumber to the value of seven and a half million dollars. Thus the value of the hardwoods imported into Canada during 1910 exceeded by 50 per cent. the value of the hardwoods manufactured into lumber. Nearly all of these imports are from the United States and consist of the most valuable species such as oak, hickory, tulip or yellow poplar, chestnut, gum, walnut, cherry and a large amount of hard pine which is so frequently used as a hardwood. From these above figures it is seen that we are becoming more and more dependent upon the United States whose available supply for export is surely and rapidly decreasing. Whatever can be done to improve the resources of Canada by the elimination of wood waste, and particularly by the development of the small wood lots of Ontario, Southern Quebec and the Maritime provinces, should be done with all possible speed.

◆

The Grazelli Chemical Company, of Cleveland, will erect a million dollar plant in Hamilton, Ont., at an early date. They will employ 2,000 men.

Mr. Algernon E. Aspinwall, secretary of the West India Committee, an organization in London founded in 1750 in order to promote trade between the West Indies and Great Britain, was in Montreal recently, his organization being now engaged in looking after the betterment of trade relations between the West Indies and the Dominion of Cnada.

INVESTMENT AND LOAN COMPANIES

BRITISH COLUMBIA

The Land of Successful Investments.

THE WATEROUS ROAD ROLLER

Is built essentially to suit Canadian road-building conditions. With over 100 Rollers in use in every part of the Dominion, the Waterous Roller is daily more firmly establishing its right to the title—

"The Canadian Good Roads Pioneer"

Built in three sizes—10, 12 and 15 ton. Carries a double cylinder, double crank engine, a quick-steaming locomotive type boiler of large capacity, has two speeds for fast and slow work, and all gearing cut from the solid steel. Supplied with all standard engine and boiler fittings.

If there is no Waterous Roller in your vicinity, write for our twenty-page catalogue, No. 301, or better still, visit the Brantford Works and see the Roller being built and tested—a practical demonstration that is its best selling argument.

The Huron and Erie Loan Company will locate a branch in Regina, Sask., at an early date.

A license has been issued to the Canada Accident Assurance Company, of Montreal, authorizing the transaction of guarantee insurance in addition to accident, sickness and plate glass insurance for which it is already licensed.

It may be taken as an indication how close to the hearts of Americans the game of baseball has grown to be when we find the Detroit baseball club manager among the preceptors and exhorters at the celebration last week of the Michigan Life. And Mr. Jennings worked in a neat little "ad." for his club, too. Said he: "The 'Tigers' are not disheartened. Baseball is something like life insurance. A bad beating one day only gives more zest and determination to win the next."

The layman is the man we want to reach, said Paul Merton of the big New York Life company, speaking to Elbert Hubbard. The philosopher from the Ryecroft shop told Mr. Merton at first that he did not know anything about insurance, which brought the reply from Mr. Merton: "If you write only on subjects you know something about you will never write anything worth while." What that well-known life company president wanted was an advertisement that would set forth the insurance question from the layman's point of view.

H. & A. ALLAN - MONTREAL, QUE., or
77 YONGE ST., TORONTO

The Vancouver board of trade is having prepared data on the prospects in the province for manufacturers, the industries existing and possibilities along lines which have so far not been developed.

The British Columbia Electric Railway Company has awarded a contract for $250,000 to the Seattle firm of Messrs. C. C. More & Company to increase the capacity of its steam auxiliary plant in Vancouver.

The Canadian Mortgage Association of Paris, organized by French capitalists and represented by a Vancouver board, will make loans on Vancouver property. The local board consists of Messrs. A. Jukes, manager of the Imperial Bank; J. P. Roberts, manager of the Northern Crown Bank, and C. S. Douglas. The agents are Messrs. Ceperley, Rounsfell & Company.

That was a very sensible suggestion made by the Michigan commissioner before the National Convention the other day, namely, that when renewal fire policies are given every one or three years, the local agent of the property insured should himself inspect the risk. A year may make a very great difference in the hazard on a risk.

The fire commissioners of the United States conclude that reform in the matter of fire waste must come largely from the public. But in reaching the public, fire insurance local agents can be of very great assistance. For instance, they can secure the insertion in local journals of warnings and intimations about the dangers of fire. Such warnings lie all around us and about us, but we are so used to them that we forget how dangerous matches thrown away are, how doubly dangerous cigarette stumps.

Canada's trade continues to expand, as shown by the financial statement for the month of August, just issued by the Finance Department. The account for the five months shows revenue receipts of $52,036,616, an increase of no less than $6,206,246, as compared with the corresponding five months of the previous year. The expenditures on account of the consolidated fund for the same period was greater by $1,980,613, while the capital expenditure for the five months amounted to $8,983,158, an increase of $178,295 over similar expenditures for the corresponding period of the fiscal year 1910.

AGENTS WANTED

COBALT ORE SHIPMENTS.

The following are the shipments of Cobalt ore, in pounds, for the week ended September 8th:—La Rose, 130,500; Nipissing, 134,560; Cobalt Lake, 60,300; O'Brien, 70,530; Right of Way, 60,580; Crown Reserve, 58,160; McKinley-Darragh, 60,400; Coniagas, 43,090; total, 618,120 pounds, or 309 tons. The total shipments since January 1st are now 34,786,663 pounds, or 17,393 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144 tons, valued at $1,437,196; in 1906, 5,129 tons, valued at $3,900,000; in 1907, 14,040 tons; in 1908, 25,700 tons; in 1909, 29,751 tons; in 1910, 34,041 tons.

COLLECTION OF ACCOUNTS.

The Canadian Credit Men's Association is circulating some philosophic literature on the collection of accounts. If every country merchant, they say, could collect his outstanding accounts, he could in turn pay his own bills. The wholesaler would then be receiving his money, and the banks would be receiving theirs. Broadly speaking, the credit question narrows down to one of the farmer paying in the fall for the goods he has purchased during the time his crop has been maturing.

This is the time when the retailer should get busy on his collections. He should get out his statements promptly and should keep sending them at regular intervals to those who do not settle. He should follow this up by personally seeing those of his customers whose accounts are of sufficient importance to justify it. He should keep track of those who have threshed and those who have shipped. Where settlements are made by his customers at the local elevators, the collections should follow automatically. Where, however, the former ships himself either alone or with others in car load lots, then the excuse will often be made that there is delay in delivery, receipt of certificates, etc. In point of fact, in such cases the farmer can always raise at least 90 per cent. on the value of his shipment without waiting for returns. He can do this and pay his debts. He ought not to be allowed to delay settlement under such circumstances, because if he does it is almost certain that he is using the money in some other direction. It is up to the retailer then by the exercise of the utmost vigilance and energy to see that his accounts are collected. He should take a firm stand with his customers and insist upon an early settlement.

This can only be accomplished by the farmer disposing of his crop as soon as possible after harvesting same.

The merchant should, therefore, lose no opportunity of impressing upon his customers the advisability of doing this, and if every retailer would issue a letter strongly urging upon the farmer the desirability of effecting an early settlement of his store accounts, much good could no doubt be accomplished.

Attention should be called to the heavy crop and the congestion in transportation that is almost sure to result in the endeavor to rush the grain through before the close of navigation, the congestion at the elevators which always follows a heavy crop, and the desirability from the standpoint of both the farmer and the merchant of an early settlement for the goods purchased by the farmer during the past summer.

RAILROAD AND COMPANY EARNINGS.

Railroad earnings for week ended Sept. 7th:—

	1910.	1911.	Increase or decrease.
C. P. R.	$1,958,000	$2,230,000	+ $272,000
G. T. R.	969,494	1,033,652	+ 64,158
C. N. R.	286,500	336,500	+ 50,000
T. & N. O.	28,305	40,616	+ 12,310
Halifax Electric	5,364	8,553	+ 3,188

The Canada Northwest Land Company continues to make a favorable showing in its farm land sales, the August statement indicating an increase of $63,469.19 in the land sales. The record for the year to date is still behind that of 1910, however, the decrease amounting to $14,250. The report follows:

	Acres	Amount
August, 1911	5,598.47	$82,172 42
do. 1910	1,765.27	18,703 24
Increase	3,833.20	$63,469 18
From Jan. 1	31,030.17	426,915 40
do. 1910	41,914.33	501,165 53
Decrease	10,884.16	$ 74,250 13

Operating profits for La Rose Consolidated Mines for the month of July amounted to $105,121. During the period there were produced 326,823 ounces of silver, having a gross value of $171,836. Sundry income amounted to $1,045, bringing the total income for the month to $172,881. Total expenses were $67,760, resulting in the operating profit as shown above.

For the seven months of 1911 ending July 31, total production amounted to 2,152,798 ounces, having a gross value of $1,131,489. The total income for this period was $1,139,599. Deducting from this, marketing expenses, concentrating and total operating expenses at the mine of $392,848, there resulted an operating profit for the seven months of $746,751.

INSTITUTE OF ACTUARIES.

The announcement of the yearly examinations of the Institute of Actuaries to be held in April, will be found in this issue. This institute stands at the head of actuarial bodies and the degrees of A.I.A. (Associate of the Institute of Actuaries) and of F.I.A. (Fellow of the Institute of Actuaries) secured by passing the severe tests imposed by its examinations, are much valued in actuarial spheres. Special interest has always been taken in the examinations at Toronto, where a record unequalled in other colonial centres has been made both in regard to the number who have been successful and the high stand which they have attained. In view of the adoption in the curriculum of the University of Toronto of a course of actuarial study, an added interest has now been given to the Institute's examinations.

◆

The city of Toronto has received from the Toronto Railway Company the total sum of $757,879 as percentage on receipts and payment for mileage during the year ending Aug. 31. Last year the city received from the railway company $661,399, the big increase this year being of course in the percentage receipts, which were $668,730, as compared with $578,403 in 1910, an increase of $90,327. The receipts this year exceed those of last year by $450,000, representing an increase in sales of all classes of tickets of 10,119,274. The total income of the company last year was $4,643,651; in 1910 it was $4,192,015.

TO INVESTORS

Brandon, Manitoba

and surrounding territory presents to **Intending Investors,** large and small, the best possible opportunity at the present time (now) to realize large returns quickly.

Brandon Real Estate has never been boomed as other Western cities have, consequently prices are low comparatively.

With hundreds of thousands of dollars being spent in paving and other civic improvements.

With a million dollars' worth of contracts already let for private enterprises this year, Brandon is sure to forge ahead and increase greatly.

Brandon is the place for the conservative investor.

Correspondence solicited.

SIX PER CENT. BONDS
REAL ESTATE SECURITY

CANADIAN REAL ESTATE BOND CORPORATION SIX PER CENT BONDS

The Canadian Real Estate Bond Corporation offers for sale its ten-year six per cent. bonds. The bonds are offered and issued at par in denominations of $100, $500, and $1,000.
They are a first lien upon all real estate and all other assets of the corporation.
The bonds, as well as all other assets of the corporation, are secured by the absolute ownership in fee of approved real estate in the city of Winnipeg and other Western Canadian cities, or by first mortgage upon such real estate.
The bonds mature in ten years. They have interest coupons attached payable semi-annually.

Send for prospectus and other information.

HERE TO ENCOURAGE TRADE WITH AUSTRIA.

The development of trade relations between Austria, Canada and the United States is the object of a visit of Mr. Gustav P. Eisenschiml, of Vienna, to the Dominion. This gentleman, the representative of the Austrian Chamber of Commerce, was in Toronto during the week. In an interview with The Monetary Times he expressed belief in an early extension of trade and commerce between his country and Canada.

There is a fairly large Austrian population in the Dominion, and immigration from that port of Europe will be encouraged.

Austria has as yet few investments in Canada, although the question of interesting Austrian capitalists in Canadian lands is being considered. The fact that that country contributes largely to the emigration stream to Canada may be a contributory factor to investment at a later date. Reimbursements for corn, which is sometimes exported from Canada to Austria, are probably made through Belgian bankers.

Last year the principal imports from Austria-Hungary to Canada were:—Breadstuffs, $28,465; broom corn, $36,177; buttons, $79,962; clocks, $11,200; collars and cuffs, $32,884; cotton and manufactures of, $17,237; drugs, chemicals, etc., $11,095; earthenware and chinaware, $55,338; electric apparatus, $23,969; fancy goods, $37,840; flax, hemp, and manufactures of, $17,468; glass and manufactures of, $93,042; gloves and mitts, all kinds, $31,146; hair, $19,367.

The principal exports from Canada to Austria-Hungary in 1910 were iron and steel manufactures, $55,401. The total trade between the two countries in the same year was: Exports to Austria, $60,508; imports from Austria, $1,410,800; total, $1,471,308.

Mr. Eisenschiml will remain in Canada until December.

Intrinsic Value of Investments

When considering investments one should study closely the intrinsic value. When the intrinsic value is much greater than the price one can be sure of profit. When the intrinsic value is less than the price then speculation may increase the selling value, but there is no assurance.

British Columbia wild lands, which under cultivation will return from $50 to $500 per acre in crops, may now be bought from $10 to $15 per acre, depending on quality and amount of purchase. Some of our clients have coal and timber licenses which are worth considering on the above theory regarding intrinsic value

This company acts solely as agent—buys and sells for customers but has nothing of its own to dispose of.

DIRECTORS OF MANY COMPANIES.

The American Directory of Directors shows that the record of seats on corporation boards is now held by Mr. W. C. Brown, president of the New York Central, who holds 96 directorships, instead of Mr. W. H. Newman, who now holds only 95, as against 112 in 1909. Mr. J. P. Morgan has steadily risen from 31 ten years ago to 65 in the present year, while Mr. George F. Baker holds 58, against 30 in 1901. Mr. John D. Rockefeller is content with the one directorate—the Standard Oil Company. Mr. Lovett, of the Union Pacific, is gradually filling the vacancies left by Mr. Harriman's death. The following table from the New York Evening Post gives the principal pluralists with their relative positions at intervals since 1901:—

	1901	1905	1909	1911
W. G. Brown	0	0	87	96
W. H. Newman	0	67	112	95
F. D. Underwood	0	22	85	83
W. K. Vanderbilt, junr.	0	4	32	76
J. P. Morgan	31	47	59	65
W. K. Vanderbilt	48	61	72	62

"Opportunities in Nova Scotia"

Is the name of a little booklet which we are distributing among those Nova Scotians who are anxious that friends in other countries should know what opportunities for profitable investment are offered in this grand old Province of ours.

Agriculture, Fisheries, Mining, Forests, Manufacturies, Sport Fishing and Hunting are in turn dealt with.

This little book contains a lot of information regarding Nova Scotia which we are particularly desirous of placing before investors and business men likely to be interested in such subjects. If you have any such friends we shall be very glad if you will send us their names and addresses.

The Bank of British North America . .

Incorporated by Royal Charter

The Court of Directors hereby give notice that an interim dividend, free of Income Tax, for the half year ended 30th June last, of Thirty Shillings per share, being at the rate of six per cent. per annum, will be paid on the sixth day of October next to the Proprietors of Shares registered in the Dominion of Canada.

The Dividend will be payable at the rate of exchange current on the sixth day of October, 1911, to be fixed by the Managers.

No transfers can be made between the 22nd inst. inclusive and the 5th proximo inclusive, as the books must be closed during that period.

By order of the Court,
A. G. WALLIS, SECRETARY,
No. 5 Gracechurch Street,
London, E.C.

5th September, 1911.

INVESTMENT AND LOAN COMPANIES

THE MAXIMUM OF SECURITY

Real Estate Mortgages afford investors the maximum of security. More than twenty-seven million dollars of this Corporation's investments are in first mortgages in carefully selected, improved real estate securities. It is in these that the funds entrusted to our care by our Debentureholders are invested, thus assuring

Safety of Principal and Certainty of Interest.

That the conservative investor of small means may be afforded the advantages of this most desirable security, we issue our debentures in sums of one hundred dollars and upwards. Don't wait till you have accumulated more money. If you have a hundred dollars to invest, write us for particulars.

CANADA PERMANENT
MORTGAGE CORPORATION
Toronto Street - - - Toronto
ESTABLISHED 1855

The Huron and Erie
Loan and Savings Co.

Notice is hereby given that a Dividend of two and one-half per cent. for the quarter ending September 30th, 1911, being at the rate of Ten per cent. per annum, upon the paid-up Capital Stock of this Company, has been declared, and will be payable at the Company's offices in this City, on and after **Monday, October 2nd, 1911,** to Shareholders of record on the 15th of September, 1911.

By order of the Board,

London, September 5th, 1911. HUME CRONYN, Manager.

THE STANDARD LOAN COMPANY

We offer for sale debentures bearing interest at FIVE per cent. per annum, payable half-yearly. These debentures offer an absolutely safe and profitable investment, as the purchasers have for security the entire assets of the company.

FINANCE AND PEACE.

Early this year, some one predicted the end of warfare through the medium of national interdependence in trade and finance. It was contended that a shell fired by any one nation upon another, would scatter the value of international investments to the four winds. This is largely true. British money, for instance, as we know, is invested in every part of the world. Canada and Newfoundland have had £372,000,000; Australia and New Zealand, £380,000,000; South and West Africa, £380,000,000; the United States, £688,000,000. France and Germany, who have been sparring over Morocco difficulties, have had between them £13,000,000. Fifty-three millions sterling have gone to Japan, and £26,000,000 to China. The Argentine Republic has had £270,000,000. Mexico, Brazil, Peru, Russia, Turkey, Egypt, nearly every important country has had its share of British capital on which to develop national undertakings. Of the total amount invested, 53 per cent. has come to America, 16 per cent. went to Asia, 14 per cent. to Africa, 12 per cent. to Australasia, and 5 per cent. to Europe. From these few figures, one may gather an idea of the supreme importance of diplomacy when war clouds loom above the horizon.

Parisians claim that, in relation to the Morocco dispute, the French Premier is the first to apply finance to diplomacy with success. He is said to have eliminated all sentimental elements from the question and reduced it to a purely business matter. This theory of the power of finance as a peacemaker is propounded, too, in a book by Norman Angell, published a year or two ago. In an interview the other day he asked: "If the mere rumours of war caused runs on banks and cost finance and industry several millions, what would war itself do?" and continued:—

"The crisis was really caused by the failure of Germany's foreign creditors to renew loans. Now Germany might be the most powerful country in Europe, but she could not compel European bankers to lend her money unless they wanted to. That is, unless they thought the security good, and unless they had funds available.

"France holds the purse-strings, and Germany cannot open them by cannon. German financiers, merchants and manufacturers would not get their loans renewed by having their Government declare war on France, and, even if they were made a free present of Morocco, German industry as a whole could not make from that country what it would lose by having its credit facilities stiffen for it in the great economic centres of Europe." Whether or not Mr. Angell's explanation is strictly accurate does not minimize the importance of the principle. The greater is the sphere of international commerce and investment, the less is the danger of an outbreak of war, because the situation is judged from the viewpoint of preservation. War usually destroys rather than protects credit.

FREIGHT AND CABLE RATES.

An increase in Atlantic freight rates has been threatening for a considerable time. Protest and opposition to such a course apparently stayed the advance, but a cable message this week states that the shipping companies engaged in the Atlantic trade have decided to increase freight rates ten per cent. The change will likely be made on October 1st, and the reason given is the result of the recent strike.

The steamship combine, as it is commonly called, has attracted attention in Canada on more than one occasion. When the Canadian Northern last spring inaugurated its Bristol-Montreal service, unofficial stories were heard that the new line would fight the combine, and speculation was rampant as to what would be the fate of the Canadian Northern vessels when pitted against specially directed competition. Rumors were settled when the Mackenzie-Mann ships joined the Conference.

Early this year the North Atlantic Westbound Freight Conference proposed to increase materially the transportation charges for ocean freights from British to Canadian ports. This caused protests by the Toronto and Montreal Boards of Trade, by shippers generally, while Montreal importers asked for the appointment of a Royal Commission to investigate the action of the Conference. Mr. G. M. Bosworth, fourth vice-president of the Canadian Pacific Railway, at the time stated in London that ships lose money on the westbound trade cargoes. Later, a large delegation of Montreal importers waited upon the Dominion Government respecting the proposed increased charges. This energetic opposition apparently had effect. But the steamship combine is a powerful institution, and one which governments are apparently not very willing to attack. This time the increased rate seems likely to be enforced by the companies.

A more gratifying cable message informs us that the report of the Pacific Cable Board states that negotiations for the establishment of a reduced rate for messages that are not urgent give promise of a satisfactory outcome. The Postmaster-General thinks the advantages of a reduction are such as to make it highly desirable to adopt it throughout the cable service of the Empire, and between British dominions and external States. He approached British and American cable companies, and after obtaining their approval had negotiated with foreign governments. There is now every prospect that within the next few months it will be possible for messages, other than cypher, to be sent at half the existing rates and charges, subject only to conditions that transmission must await for a period not exceeding twenty-four hours.

LIFE INSURANCE UP TO DATE.

The movements of Mr. J. M. Spence in a life insurance company shuffle are decidedly interesting. This gentleman was president of the Canadian Guardian Life Insurance Company. The Dominion Department of Insurance chartered the company, and, although the Department had fairly full knowledge of the extraordinary workings of the insurance corporation's affairs, it was allowed to go unmolested until early this year. An examination was then made of its position by chartered accountants, when it was seen that so much "cooking" had been applied to certain figures and books that the company had no further right to write new business in Canada.

Its charter was withdrawn and a limited one issued, so that its policies in force could be surrendered or reinsured. The company had an Ontario certificate of registry, which was not renewed this year, apparently for the same reasons that influenced the Dominion authorities. The Ontario Department of Insurance also issued a temporary certificate to permit the company to collect the premiums on policies in force and to pay accruing claims. Therefore, we have the Canadian Guardian Life Insurance Company in a moribund condition, and with sufficient legal power to wind up its affairs. To learn how the winding is being done, we must turn towards Edmonton, Alberta.

In that city on August 29th, 1911, a meeting of the International Insurance Company was held, of which Mr. J. M. Spence, former president of the Canadian Guardian, is managing director. He presented a report to the shareholders and directors, asking for authority to purchase the Canadian Guardian Life Insurance Company, "your board of directors having arranged for the purchase." In plain words, Mr. J. M. Spence, managing director of the International, has arranged with Mr. J. M. Spence, president of the Canadian Guardian, to purchase the latter company, the deal being carried out naturally enough with the help of consultation with other gentlemen. The proposal of the Edmonton company is to take over the assets of the Canadian Guardian, to accept applications from their policyholders, issue them new policies in the International, and to get shareholders of the Canadian Guardian to become shareholders of the International.

Remembering the career of Mr. J. M. Spence as president of the Canadian Guardian Life, dealt with at some length on another page in this issue, The Monetary Times is inclined to think that Mr. Spence is responsible for one of the coolest reinsurance schemes ever mooted in Canada. Are the passengers of a sinking ship, captained by J. M. Spence, likely to gain anything by tranferring to another vessel, likewise captained by J. M. Spence?

Will the Department of Insurance at Ottawa countenance the proposals of the International Insurance Company as outlined by Mr. J. M. Spence, its managing director? The answer to the first question is No. The answer to the second question should also be No.

SMALL CHANGE.

Mr. John Canuck, nephew of Uncle Sam and son of John Bull, is reported by the physician to feel better after the operation performed on Thursday.

* * * *

Several prominent financiers have drawn attention to the misuse of the word "trust" in company titles. The further West one goes, the situation seems to become worse. A correspondent tells The Monetary Times that there are about 150 so-called "trust" companies in British Columbia, and that if the weaklings were weeded out, about fifteen would be left. These self-termed "trust" companies are too prone to obtain incorporation with large authorized capital and only a few thousand dollars paid up. It is common talk that some companies have used their trust moneys in order to speculate. When successful, the interest is paid on the trust funds and the gamblers pocket the profits. If a slump should ever occur when real estate speculation is in its zenith, there will probably be some peculiar positions from which the officers of these alleged "trust" companies will have to crawl.

UNLIMITED POSSIBILITIES IN THE MARITIME PROVINCES

Raw Materials, Railroad and Shipping Facilities and Power Make a Good Foundation for a Prosperous Country

Slowly the capitalists, investors and business men are realizing that the Maritime Provinces offer excellent possibilities for trade and capital. As in other parts of the Dominion, Nova Scotia, New Brunswick and Prince Edward Island have a home market which is rapidly increasing in purchasing power. When the tide of immigration takes a more decided turn to the provinces down by the sea, that purchasing power will become stronger and gain impetus.

The Maritime Provinces have a good brand of men. They are financially conservative, cautious in business and have unbounded faith in their country. The chief difference perhaps between the men of the West and the men of our Atlantic Coast is that they have not learned completely the art of telling the world what possibilities lie dormant in the great Maritime Provinces of Canada.

There there exist raw materials of high quality and abundant variety. They are conveniently located and can be assembled by rail or water at almost any given point in the Provinces, quickly and economically. Coal of the best quality is available, while in most sections either water, natural gas, commercial gas or electric power will contribute to low cost of production.

Shipment From All Points.

Distribution of the manufactured product from points in the Maritime Provinces presents no difficulty. Practically every industrial centre throughout these provinces is situated at a point where shipment by water can be made if necessary. Low cost shipment to the Western markets is obtained by the low rate schedules on the Intercolonial Railway, whose general traffic manager, Mr. E. Tiffin, is responsible for an excellent pamphlet just published on "Industrial Opportunities in Nova Scotia and New Brunswick."

Markets have been exploited, conquered, and Maritime Provinces goods made known, until now the good influence has broadened the possibilities to a considerable extent. The opportunities have been proved. Even as far back as 1901 (when the last general census was taken) $57,409,352 represented the fixed and working capital invested in Maritime Provinces manufacture. Markets have been developed for Maritime Provinces products.

The power problem is reduced to a minimum in the country skirting Canada's Atlantic coast, for it has large bituminous coal mines. In many sections natural water power can be developed to a high horsepower, either as an auxiliary or as a complete source of power. In other localities there is natural gas. Mr. J. B. Challies, C.E. of the Department of the Interior, has estimated that New Brunswick and Nova Scotia have waterpowers of a minimum flow development of 204,300 horsepower, of which only 13,300 horsepower has been developed.

Some Opportunities Indicated.

Opportunities are numerous for woodworking manufacture in all its branches. Ash, birch, maple, oak, pine, hickory, tamarac,, hemlock and spruce, are all available, the variety varying with the location. A varied mineral wealth awaits the capitalist and scientist. Besides the coal deposits, iron, tungsten, gold, copper, silver, antimony, manganese, gypsum, limestone, building stone, slate, fire clay, graphite, etc., are all present in the various sections of the provinces. Shales, rich in oils and ammonium salts occur in large quantity. Eleven wells in Albert County, New Brunswick, it is said, now produce 40,000,000 cubic feet of natural gas per day and several good oil wells have been developed.

The canning industry is one which is capable of development with an abundance of native supplies of fruit and vegetables which are grown in large quantities The fruits include apples, blueberries, foxberries, plums, pears, cherries. etc., of select quality, while the soil is particularly productive of fine vegetables, peas, beans, potatoes, turnips, as well as staple grains, wheat, barley, oats, rye, corn and buckwheat.

The curing and canning of fish foods present another field of opportunity; almost every kind of fish is caught in the waters of the Maritime Provinces—salmon, cod, herring, smelts, mackerel, halibut, haddock, pollock, etc., besides every variety of shell fish such as oysters, lobsters, scallops, clams, etc.

The Maritime Provinces have a rich soil, readily brought to a high standard of productiveness by scientific cultivation. Cattle and sheep raising and dairying are other industries. The cattle raiser and dairyman has no need to go beyond the borders of these provinces for a market.

At Halifax, St. John, Campbellton, Dalhousie, Petit Rocher, Bathurst, Newcastle, Fredericton, Chatham, Loggieville, Moncton, Pt. du Chene, Dorchester, Sackville, Ft. Lawrence, Pugwash, Pictou, Pictou Landing, Mulgrave, Point Tupper, Iona, Grand Narrows, North Sydney, Sydney and Dartmouth are found facilities for the handling of water-borne traffic.

There are 74 branches of our chartered banks in New Brunswick, 112 in Nova Scotia and 14 in Prince Edward Island. Two banks have their head offices in the Maritime Provinces.

Some Successful Industries.

Here is a partial list of successful industries which at present thrive in the Maritime Provinces. Many factories are devoted to some, very few to others, but in nearly every case there is room for more. There are also facilities for opening up the branches of trade which so far have not been touched—the scope for which is wide.

Excelsior; railway rails, cars and locomotives; bridge iron and machinery; engines and boilers; nails, bolts, nuts, angles, etc.; wire fencing; stoves, radiators and ranges; axes, edge tools and springs; mining tools; pumps and windmills; castings (brass, iron and steel); stamped ware and enamelled ware; lumber; furniture, joiners' work; matches; brooms and brushes; fertilizers; woolen and cotton goods; ropes and twines; cement; biscuits and confectionery; butter and cheese; chocolate; tea, coffee and spices; flour and feed; harness; boots and shoes; sugar refining; coal mining; cooperage stock; creosote, pitch and tar; fish curing; canned goods; cured meats; paints; agricultural implements and carriages; rifle sights and explosives; paper boxes and bags; woodpulp and paper; building, roofing and wrapping papers; building, grinding and whet stones; clothing, hats and caps; beds and mattresses; lime and plaster; brick and tiles; sewer pipe; vinegar and pickles; condensed milk, cream and coffee; drugs and chemicals; soap; cigars and cigarettes; ales, beers and porters; mineral waters; leather.

Here then in the Maritime Provinces is an old yet little exploited country, full of opportunities for the business man at home and abroad.

◆

CANADA'S MINERAL OUTPUT.

The total value of the mineral production of Canada during the past year exceeded $105,000,000, an increase of $13,209,517 over that of 1909. This is indicated by a preliminary report just issued by the mines branch of the Department of Mines.

The increase is 14 per cent., and, according to the report, "should be particularly gratifying not only to those who are directly interested in the development of the mineral resources of the country, but to the public at large who indirectly profit thereby."

There has been an increased production in nearly every province, the only decline being shown by New Brunswick, while Ontario is well in the lead with over 40 per cent., of the total for Canada. In silver production alone there was an increase of 16 per cent., this being chiefly credited to the Cobalt, Porcupine and adjacent mining districts in this province. The net production of silver in Ontario, totalled $15,711,513.

◆

According to a dispatch from New Westminster, B.C., the money stolen from the Bank of Montreal's branch at that city included $10 notes numbered 492,001 to 493,000, series A, B, C, and D, inclusive; numbers 501,001 to 562,000 inclusive, series C; in $5 bills, Nos. 824,001 to 825,000 inclusive, series A, B, C, and D; numbers 827,001 to 828,000, series A, B, C, and D; numbers 802,001 to 803,000 inclusive, series A, B, C, and D; numbers 829,001 to 830,000 inclusive, A, B. C, and D, and 814,001 to 815,000, series A, B, C, and D.

MONTREAL FAILED TO MARKET BIG LOAN.

Not a Single Bid was Received—City Authorities Blame the War Scare in London.

Montreal city authorities gathered on Monday to open tenders for $7,000,000 4 per cent. 40-year debentures. Although the issue had been widely advertised at home and abroad not a single offer was made. This came as a surpise to the civic authorities who blame the war scare in Europe for the lack of bids. While that factor may have contributed to the surprising disappointment, there are two others which must not be overlooked. These are, firstly, the present congestion of the London market with 4 per cent. securities in relation to a new load of $7,000,000, and secondly, the high price at which Montreal's last issue was purchased and consequently its probable slow absorption by the British investor on that occasion.

The present loan was for £1,438,300 sterling or $7,000,000 40-year 4 per cent: registered stock or coupon bonds to mature November 1st, 1951. The loan was required for the following purposes:—

Working capital	$1,000,000
Filtration of water	1,500,000
Public works	4,500,000
Total	$7,000,000

Tenders were also invited for a special loan of $350,000 issuable in the form of 4 per cent. coupon bonds for construction of schools. There was an offer from the Dominion Securities Corporation of 96 and a fraction for this small issue, but City Treasurer Robb recommended its rejection.

What the City Treasurer Says.

Commenting on the lack of offers for the loan, the City Treasurer was of the opinion that had tenders been opened at noon, instead of 10 a.m., the situation might have been somewhat different. European banks, he explained, only cabled offers at the last moment for loans owing to the constant fluctuation of the money markets. He also thought the war situation in Europe was the principal reason why there had been no offers. He pointed to the fact that the German banks were in an unsettled state, owing to the war rumors, while matters were not much better in France, and other European countries.

May Negotiate Temporary Loan.

Controller Wanklyn also thought that the war situation was entirely the cause why no bids had been made, and there was no reason to think the credit of the city had been impaired in any way in Europe. As the city is in need of a portion of the seven million loan, it is expected that temporary loans will have to be floated. It was decided to report to the City council the fact that no tenders had been received, and also to ask the Council what should be done with the offer of the Dominion Securities Company for the school bonds.

Notes of Past Loans.

Early in 1910 Montreal sold an issue of £1,000,000 4 per cent. stock due in 1950 to the Bank of Montreal. The bank's offer was to take over the whole loan without any expense to the city, at £101 3s. per £100, or a premium of 1 3-20 per cent. The net return to the city on the loan was $4,922,633 instead of the face value of the treasurer's certificates of $4,886,667, a premium of $56,000. The loan was on inscribed stock of the city for forty years at 4 per cent.

The offers, besides that of the Bank of Montreal, were Dominion Securities Corporation, $98.62 7-10 per $100; Royal Securities £99 2s. 7d. per £100, half of 1 per cent. for services in floating, and one-eighth for services in redemption, these latter charges to be paid by the tenderer; Alex. McPhee Company, $99.50 per $100, with one-eighth of 1 per cent. domiciliation charge, quarter of 1 per cent. for services and one-eighth for redemption.

When this issue was sold to the bank, the city had a right by charter to borrow in the neighborhood of $7,000,000, although but $5,000,000 was required. The loan was to cover the expenditure on permanent work for which a loan of £650,000 was authorized but not issued and to provide £350,000 for work to be undertaken this year. Mr. Robb then stated that Montreal loans in recent years had commanded better prices, all things considered, than New York and other big cities.

For the loan of £650,000 authorized but not issued, tenders were asked in June, 1909. The only tender above par was that of Messrs. C. Meredith & Company, who offered £100 11s. 6d. for every £100. The other tenders received were from Messrs. Wood, Gundy & Company, who offered 98½, and from L. Stearn, of Cobalt, who offered 97 for a portion of the loan.

Some criticism was heard when all these tenders were rejected.

In April, 1909, tenders were invited for £400,000 4 per cent. stock due in 1949, when the three tenders were received as follows: R. Wilson Smith, £100 0s. 8d.; Royal Bank, £100 1s. 8d.; Hanson Brothers, representing Messrs. Coates Son & Company, London, £100 5s. 1d. The award was made to the last named firm.

What a Banker Said.

It must be admitted that the Montreal authorities have to some little extent in the past few years played with the market. As a result they have been criticised, sometimes rightly and sometimes wrongly. For instance, when the offers for the advertised issue of £650,000 were rejected, City of Montreal stock stood at 102-103. An offer of 100 and a fraction was not entertained at that time. The reason was given that the city was not then in need of money. But in Montreal then it was said that the city was bound to have $500,000 by August 18th and needed $2,000,000 more by the end of the same month. The offers were rejected in July. A London banker was quoted as stating that the financial reputation of the city was unenhanced and credit unimproved by such incidents. There was also the case of a so-called "popular" loan of $2,000,000, which was issued apparently to see how the small investor in Canada would take to it. In the end, however, it was awarded to a local firm acting on behalf of a stock exchange syndicate for issue in London.

Montreal, in its present predicament, may be to some extent suffering from financial reflex action. In view of present market conditions and the size of the issue it desires to sell, the city may have to obtain some sound financial advice.

◆

MOOSE JAW SCHOOL DISTRICT DEBENTURES.

In connection with the offering of 125 school district debentures of $1,000 each, it is interesting to note that the total debenture indebtedness is $91,633, and the assessed value of the city this year $27,774,194. The tax rate for the current year is divided as follows: General municipal, 9½ mills; public school, 2½ mills; collegiate, ½ mill. The population of Moose Jaw is 17,000. Past debentures have been issued and sold as follows, the particulars being in order, date sold, issue, price received, buyers:—January, 1906, $55,000 5 per cent. 30-year, $55,851 inc. int. and exc., Wood, Gundy and Company; November, 1906, $10,000 5 per cent. 30-year, $10,470.77 inc. int. and exc., National Trust Company; February, 1908, $10,000 5 per cent. 30-year, $9,494.52 inc. int. and exc., Wood, Gundy and Company; December, 1908, $6,000 5 per cent. 10-year, 100.11, Dominion Securities; October, 1909, $25,000 5 per cent. 30-year, $25,327 net, C. Burgess and Company.

Within the last two years many important municipal improvements have been carried out at Moose Jaw, and many others are now under way. During 1910, $140,000 was spent in creosote block paving, and a further $170,000 is being expended during the present year on additions thereto. At present there are 13½ miles of concrete sidewalks, which in the business section are 20 feet wide, together with a large amount of plank sidewalk. The municipality is also installing an incinerator at a cost of $45,600, as well as a modern sewerage disposal system, which when completed will be one of the most up-to-date in Canada.

The total expenditure for water extensions and sewerage disposal this year amount to $175,000. During 1911, the total improvements on all departments will aggregate three quarter of a million dollars. The city owns and controls its own electric light plant. The first electric street railway system in Saskatchewan is now undergoing construction in Moose Jaw. Eight miles of track are laid, the cars are on the rails, and the system will be in operation by the end of July this year. The owners—an Ottawa syndicate—are thus showing their faith in the city's future in a tangible manner. An efficient telephone service is operated by the Saskatchewan Government, and long distance connection may be had with all points in Saskatchewan and Manitoba. All telephone lines are laid underground in the paved area and in the lanes in the unpaved area, giving the streets a much better appearance.

A street lighting system of iron standards, with five electric globes to a standard, is being installed on the main thoroughfares at an initial cost of $15,000. Mr. C. F. Kempton is secretary-treasurer of the city.

CANADIAN CHARTERS FOR FOREIGN ENTERPRISES.

New Incorporations with Large Capital—More Money for Mexico.

Barcelona Traction, Light and Power Company, Toronto, $40,000,000.
Mexican Midland Light and Power Company, Toronto, $15,000,000.
Vancouver Harbor and Dock Extension Company, Vancouver, $10,000,000.
Ebro Irrigation and Power Company, Toronto, $2,500,000.
Royal Dome Gold Mines, Hamilton, $2,000,000.
Reciprocity Mines of Porcupine, Toronto, $1,000,000.
Land Corporation of Canada, Winnipeg, $1,000,000.
Graham Island Oil Fields, Prince Rupert, $1,000,000.

Eight companies this week account for an aggregate of authorized capital amounting to $72,500,000. Three of these are responsible for $65,000,000. The Barcelona Traction, Light and Power Company, capitalized at $40,000,000, divided into 400,000 shares of $100 each, has received a Dominion charter giving it power to develop and sell electrical energy. The Ebro Irrigation and Power Company, Limited, has obtained very similar powers in a Dominion charter. Its capital is $2,500,000 divided into 25,000 shares of $100 each. Both companies have their head offices in Toronto and members of the legal firm of Messrs. Blake, Lash, Anglin and Cassels are noted as the provisional directors.

The Mexican Midland Light and Power Company, Limited, with capital of $15,000,000 divided into 150,000 shares, has received an Ontario charter, giving the company power to carry on outside of Canada the business of an electric light, heat and power in all its branches. Among the provisional directors are Mr. T. M. Sanders, civil engineer, and Mr. F. J. Robinson, electrical engineer, of London, England. Mr. T. H. Kilgore, of Toronto, and Mr. E. C. Boeckh, president and general manager of Boeckh Brothers, Limited, brush manufacturers, Toronto, are also directors.

Two big Porcupine companies have been formed, the Royal Dome, while the other bears the appropriate name Reciprocity. The Grasselli Chemical Company, with capital of $250,000, has been granted an Ontario charter with head office at Hamilton. This is a branch of the American firm of the same name which has its headquarters in Cleveland, Ohio. Evidence of further activity in Northern Ontario is seen in the incorporation of the New Ontario Timber and Trading Company. Real estate movements are reflected in the chartering of the Humber Land Company at Toronto, and the Land Corporation of Canada at Winnipeg. Mr. E. M. Carroll is a director of Wright and Carroll Investments capitalized at $100,000, with headquarters at Toronto.

The following is a list of charters granted during the past week. There are 43 companies with aggregate authorized capital of $76,213,000. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Prince Rupert, B.C.—Graham Island Oil Fields, $1,000,000.

Simcoe, Ont.—Lea's, $50,000. J. Hawthorne, A. McKnight, W. Sutton.

Salaberry de Valleyfield, Que.—Compagnie Dion, $99,000. E. Bion, B. Bion, L. Laplante.

Sackville, N.B.—Fawcett Milling Company, $200,000. H. E. Fawcett, C. W. Fawcett, G. A. Peters.

Waterdown, Ont.—Bethanbreck Orchards, $50,000. W. Gilchrist, A. E. Day, Miss V. Hughes.

Bracebridge, Ont.—Bracebridge Hotel Company, $40,000. J. Thomson, D. E. Bastedo, J. F. Colley.

St. Stephen, N.B.—Mann Axe and Tool Company, $49,000. C. E. Huestis, G. Clarke, F. M. Murchie.

Nolalu, Ont.—Farmer's Mercantile Association of Nolalu, Ontario, $20,000. J. Salmi, A. Saari, Henry Maa.

Transcona, Man.—Transcona Theatre Company, $25,000. J. W. McCrea, A. A. McCrea, T. M. Funnell.

Ottawa, Ont.—Ottawa Concrete Homes Company, $200,000. C. M. Ramsay, W. H. Roughsedge, R. V. Sinclair.

Markdale, Ont.—Grey Real Estate and Investments, $100,000. J. M. Davis, J. Vair, Owen Sound; A. Ego, Markdale.

Welland, Ont.—Lennox Mining and Prospecting Company, $40,000. T. Witkop, La Salle, N.Y.; J. Campsall, P. Campsall, Derby, N.Y.

Missanabie, Ont.—King and McDonald, $40,000. S. A. King, Missanabie; D. McDonald, Nepigon; W. F. Langworthy, Port Arthur.

Bruce Mines, Ont.—New Ontario Timber & Trading Company, $50,000. T. H. DeCew, Mrs. M. V. DeCew, Bruce Mines; J. A. DeCew, Montreal.

Lagace Settlement, N.B.—North Shore Colonization Company, $200,000. W. Lagace, Lagace Settlement; W. L. Allain, Neguac; T. I. Byrne, Chatham.

Montreal.—Commercial Travellers, $25,000. J. A. Benoit, J. F. L. Dubreuil, L. J. Decelles. Distillerie De Liqueurs Francaises, $300,000. H. S. Ross, R. Taschereau, T. Rinfret.

Hamilton, Ont.—Royal Dome Gold Mines, $2,000,000. G. F. Penhale, New York; D. M. Brogan, Brogan, Ore.; F. R. Close, Hamilton. Grasselli Chemical Company, $250,000. T. Hobson, H. S. Lees, L. F. Stephens.

Winnipeg, Man.—Hardstone Brick Manufacturing Company, $500,000. E. R. Chapman, F. Leitner, F. Euwecke. Land Corporation of Canada, $1,000,000. C. H. Locke, C. A. Crawley, H. Dunk. Garry Investment Company, $100,000. A. R. Pattinson, H. R. Welsford, E. H. Bennest.

Vancouver, B.C.—Alberta Townsite Company, $50,000. Italian Commercial Exchange, $20,000. British Columbia Clothes Drier Company, $50,000. Pier Island Syndicate, $75,000. Maritime Investment Company, $50,000. Beddington Investment Company, $50,000. Vancouver Harbor & Dock Extension Company, $10,000,000. Universal Sanitary Cooler Company, $100,000.

Toronto.—Hilborn Company, $50,000. A. C. Hilborn, J. H. Thomson, Mrs. J. Hilborn. Toronto Taxicabs and Garage, $100,000. W. A. Brodie, D. M. Sorenson, H. J. Davidson. Airozone Electric Ventilating Company, $350,000. G. Grant, R. McKay, D. Grand. Canadian Carpet and Comforter Manufacturing Company, $100,000. H. P. Lawson, Georgetown; S. Syer, H. B. McCarthy, Toronto. Reciprocity Mines of Porcupine, $1,000,000. I. S. Fairty, G. Cooper, W. H. Male. Wright and Carroll Investments, $100,000. E. M. Carroll, G. Wright. J. G. Carroll. Superior Swastika Mines Company, $40,000. J. M. Godfrey, W. A. Henderson, T. B. Malone. Mexican Midland Light and Power Company, $15,000,000. T. Makinson-Sanders, F. J. Robinson, London, England; E. C. Boeckh, Toronto. Tommy Burns Gold Mines, $100,000. J. I. Grover, Misses E. K. Avery and B. Webster. Canadian Fibre Wood & Manufacturing Company, $40,000. W. J. McCormick, F. W. Burrows, G. Shepard. Humber Land Company, $100,000. H. C. Macdonald, T. J. W. O'Connor, W. A. Goetz. Ebro Irrigation and Power Company, $2,500,000. J. S. Lovell, R. Gowans, W. G. Flood. Barcelona Traction, Light and Power Company, $40,000,000. J. S. Lovell, R. Gowans, W. G. Flood.

◆

MONTREAL STREET RAILWAY.

Monetary Times Office,
Montreal, September 20th.

Although nothing definite has yet developed in connection with the Street Railway arrangements, the announcement is now made that the shareholders of the Montreal Street Railway are to meet on the 5th of October, at ten o'clock, to ratify the new deal. This will consist of the acquisition of the Montreal Street Railway, the Park & Island and the Montreal Terminal Railway by the Montreal Tramways Company. The terms are still being kept private, the notice simply stating that it will be on such terms as may be approved by a majority of the shareholders.

This week the City Council decided that another effort should be made to resume negotiations with the railway for a new franchise, and the comptrollers will once more communicate with the company with that end in view. It is believed, that as the notification for the shareholders' meeting for the ratification of the deal has been called for October 5th, the railway will thereafter be in a position to resume business with the city, so that it is quite likely that the council will not be very urgent in its request in the meantime.

◆

Four Toronto bond firms bid for the Medicine Hat, Alta., $83,000 5 per cent. 5, 10 and 20-year debentures awarded to Messrs. Wood, Gundy & Company.

Three offers were made for the $3,000 5 per cent. 10-year sidewalks and general improvement debentures of Innisfree, Alta. The bid of Mr. T. R. Billett, Winnipeg, was accepted.

DOMINION NOTE CIRCULATION

Has Passed the One Hundred Million Dollar Mark for the First Time—Examination of the Position.

By H. M. P. Eckardt.

On July 31st, 1911, the Dominion note circulation passed the $100,000,000 mark for the first time. According to the figures published in The Canada Gazette the circulation at the end of July was $100,431,110. This represents an increase of nearly $10,000,000 during the three months May, June and July. The increase of notes in circulation was accompanied, as provided by law, with an increase of a similar amount in the specie holdings of the Government. In the following table the increase of the various classes of Dominion notes is traced through a number of years:—

Dominion Note Circulation.

	Fractionals.	$1, $2, $4, $5, $10, $20, $50, $100,	$500, $1,000, $5,000,	Total
July, '11	$663,807	$20,226,302	$79,541,000	$100,431,110
March '11	648,832	17,668,437	71,677,000	89,994,270
December '10 ..	641,469	19,094,935	70,986,500	90,722,905
September '10.	614,928	18,894,067	72,611,000	92,119,996
June '10	605,272	17,357,955	71,322,500	89,285,728
March '10	591,104	15,953,964	70,589,000	87,134,068
December '09 ..	574,664	17,065,678	69,344,500	86,984,843
September '09 .	546,037	16,858,853	63,051,500	80,456,391
June '09	537,334	15,418,465	63,049,500	79,005,300
March '09	526,307	14,490,773	64,334,000	79,351,080
December '08 .	513,443	15,900,250	63,021,000	79,434,693
September '08 .	494,805	15,863,137	60,020,500	76,378,442
June '08	487,522	14,894,603	47,676,000	63,058,125
March '08	478,345	14,486,645	45,491,000	60,455,991
December '07 .	471,735	16,125,633	46,029,000	62,626,368
September '07 .	452,997	16,380,660	45,080,500	61,914,157
March '07	437,164	14,900,932	40,456,500	54,794,596
December '06 .	428,319	15,833,463	40,214,500	56,476,282
September '06 .	414,071	15,600,862	35,857,500	51,872,433
September '04 .	364,648	13,218,428	33,034,000	46,617,076
September '03 .	353,568	12,793,872	27,488,500	40,635,940
September '02 .	343,121	12,080,688	20,525,000	32,948,809

The figures show that the outstanding note circulation of the Dominion has trebled in amount in less than ten years. However, the increase has been chiefly due to the action of the chartered banks in augmenting their cash reserves It will be found that in the case of each large increase of the Dominion note circulation the process was as follows:—

Note Circulation Process.

First there would appear in the newspapers reports of shipments of gold from New York to Montreal or Toronto. In the quarter or half-year comprising one of these periods several millions of dollars would arrive in Canada addressed to several of the chartered banks. The banks turn the gold immediately into the Dominion Treasury and get large Dominion notes in exchange. Thus each important import movement results in expansion of the Government note circulation with a corresponding increase of the specie in the Treasury; also there occurs an increase in the amount of Dominion notes held by the banks.

So the steady increase of the Dominion circulation is due to the chartered banks bringing in gold from New York, The business and deposits of the bank increase steadily from year to year. From time to time the executive officers of the bank decide that the growth of the liabilities necessitates an increase of the cash in vault It may be that an increasing volume of business requires the carrying of more cash to meet balances at the clearing houses; and the bank importing gold may consider that as its liabilities grow larger it must augment its cash reserve. Now the money carried as cash reserve must be convertible at will into gold.

Are Really Gold Certificates.

The Dominion notes possess this qualification. They are in effect gold certificates. The law provides that for every dollar in notes issued by the Government in excess of $30,000,000, there must be held a dollar in specie in the Treasury vaults. And for the issue up to $30,000,000 a reserve of 25 per cent., or $7,500,000, in specie must be held. Consequently it comes to pass that against the issue of $100,000,000 of Government notes there exists a specie reserve of $77,500,000 This makes a solid and satisfactory basis for the Government issues and establishes their credit securely against any political or financial convulsion.

Moreover, the bankers have confidence that the Government will not by legislation undermine the position or security of its note issues. Possessing this confidence in the good faith of the Government the banks have increased their holdings of Dominion notes from $30,941,367 at the end of December, 1903, to $84,400,035 at the end of July, 1911. In other words, out of an increase of $59,344,000 in the Dominion note circulation since December, 1903, as much as $53,459,000 occurred as a result of the banks strengthening their cash reserves.

Gold Reserve and Government Expenditures.

In view of these figures it is interesting to speculate as to what steps the banks might take to protect themselves if it should happen at some time in the future a Finance Minister should arise who would seek to appropriate a portion of the gold reserve now pledged against the Dominion notes for the purpose of meeting the ordinary or extraordinary expenditures of government. When Governments break faith with their creditors by taking a step of this kind it is usually done through putting its own bonds in place of the gold appropriated. Such a step taken by the Canadian Government would have a tendency to weaken the convertibility of its demand notes. Carried to a certain point the policy might largely destroy the convertibility of the notes. The embarking of the Government upon such a policy would cause the bankers to lose, in a measure, their confidence in the Government notes. And it is to be expected that a fall in the Government circulation would ensue. Persistence in the policy would lead to a further sharp decline as the bankers endeavored to convert their Dominion notes into gold. Eventually the policy might lead to the ultimate settlement of differences at the Canadian clearing houses by means of drafts on New York, as the banks might be compelled to carry their gold reserves at that centre.

◆

BRITISH TRADE LAST YEAR.

The second volume of the Blue Book, containing the annual statement for 1910 of the trade of the United Kingdom with foreign countries and British possessions, has just been published. The total exports for the year to foreign countries were £374,742,984, as against £331,653,534 for 1909, while the exports to British possessions increased from £137,871,632 in 1909 to £159,402,833 last year.

The imports totalled £678,258,024 last year, £507,806,758 representing foreign trade and £170,450,266 trade with British possessions, in both of which departments there was a large increase as compared with 1909, when the figures were: Foreign countries, £479,453,108, British possessions £145,251,139. In 1906 British import trade with British colonies was £139,914,333, and with foreign countries £467,974,167. Export trade with the United States rose from £59,254,166 in 1909 to £62,181,886 last year, while imports were slightly less, being £117,607,435, against £118,353,893 in 1909. In 1906 the figure was £331,054,366, rising in 1907 to £134,346,708. In 1909 it dropped to £123,900,831.

Trade with Germany comes next in size—exports being £54,905,383, an increase on the figure for 1909, which was £47,165,686, while imports rose from £57,784,655 to £61,829,590, the highest figure shown for any of the five preceding years. Exports to France amount to £33,455,426, as against £31,073,452 in 1909; imports also rose slightly, the figure being £44,285,020, as against £44,205,650. Exports to Russia amount to £21,220,727, as against £18,325,844 in 1909, while imports rose from £37,970,085 in 1909 to £43,644,648. In 1909 there were only £29,719,249. The Argentine Republic took £19,710,537, an increase on the preceeding year, when the figure was £19,188,387, while our import trade with the Republic declined, being £29,009,738, as against £32,717,295. Exports to Belgium amounted to £17,838,334, as against £16,475,104 in 1909; imports rose from £17,672,418 in 1909 to £19,195,974.

Regarding British trade with the Colonies, India is the largest customer, exports to British India amounting to £47,032,027, as against £44,695,624, imports rising from £35,430,771 in 1909 to £42,763,715. The totals for Australia are: Exports, £31,072,623, as against £27,207,430; and imports, £38,584,370, as against £32,646,415 in 1909. In the case of Canada, the total exports last year amounted to £32,614,972, as compared with £18,074,767 last year. The figures for imports in 1909 were £25,634,686, as against £25,222,963 in the preceding year.

◆

That there should be a fire marshal for the province of Ontario was the opinion freely expressed at the recent convention of Fire Chiefs of Ontario.

AVERAGE CONDITION OF FIELD CROPS.

Official Bulletin Shows Position at End of August—Estimates of Production.

A bulletin on the field crops of Canada gives their average condition at the end of August, together with estimates of the production of spring wheat, oats and barley at that time. The per cent. condition of wheat is given as 86.80, of oats 84.44 and of barley 84.73, which is about five to seven per cent. higher than last year and nearly the same as two years ago. The other crops range in condition from 80 to 86 per cent. and are generally somewhat lower than in 1909 and 1910. The rains of August hindered the ripening of grain and some injury was caused by hail storms, low temperature and rust. Towards the end of the month frost prevailed in many sections of the Northwest provinces, the full extent of which could not be determined at the date of the reports, but in the case of wheat, oats and barley production was lowered by probably 12 per cent., which has been followed in the table. In the older provinces the grains ripened earlier and little damage was sustained excepting from drouth in some localities, and the reported condition was 75 or over.

Yield of Spring Wheat.

The average yield of spring wheat is estimated at 19.14 bushels per acre for the Dominion, which is seven bushels more than last year, and the total yield at 186,928,000 bushels. The fall wheat was reported last month at 17,706,000 bushels, being grown almost wholly in Ontario and Alberta. The total wheat yield of the country is therefore estimated to be 204,634,000 bushels or 81,849,000 bushels more than last year at the same date. The average per acre is 19.50 bushels, or 6.30 bushels per acre more than last year.

For the Dominion the yield of oats is given as 568,153,000 bushels, which is 84,906,000 bushels more than last year's estimate at the same date, and the average at 35.81 bushels per acre, being more than last year by 7.10 bushels. The average for barley is also higher than last year by 7.31 bushels, and the total yield is estimated at 51,559,000 bushels as against 39,388,000 bushels for last year.

In the Western Provinces.

The estimated yield of spring wheat for Manitoba, Saskatchewan and Alberta this year is 181,535,000 bushels, of fall wheat 3,193,000 bushels, of oats 204,758,000 bushels, and of barley 30,205,000 bushels, as compared with 98,808,000 bushels spring wheat, 1,082,000 bushels fall wheat, 92,201,000 bushels oats and 14,723,000 bushels barley in the previous year.

In Prince Edward Island, Nova Scotia and New Brunswick the estimated yield of spring wheat is 1,453,000 bushels, of oats 16,699,000 bushels, and of barley 437,000 bushels; in Quebec 1,777,000 bushels spring wheat, 44,619,000 bushels oats and 2,389,000 bushels barley; and in Ontario 2,163,000 bushels spring wheat, 14,513,000 bushels fall wheat, 102,077,000 bushels oats and 18,528,000 bushels barley.

Final Estimates Last Year.

The final estimates of last year printed in the December Census Monthly gave the production for the whole country as 16,610,000 bushels fall wheat, 133,379,600 bushels spring wheat, 323,449,000 bushels oats and 45,147,600 bushels barley.

The October number of the Census Monthly will give the statistics of the areas of field crops of the Dominion this year as taken by the census of June 1st.

◆

SOVEREIGN BANK DIRECTORS.

On the application of Mr. D. L. McCarthy, K.C., at Osgoode Hall, Toronto, this week the directors of the Sovereign Bank, who were found liable for $178,000 by the Court of Appeal, were granted a stay of any proceedings against them till September 30. The directors who agreed to be bound by the decision of the Court of Appeal are W. K. McNaught, C. B. McNaught, the estate of Randolph Macdonald, George B. Shaw, Thomas Baker, A. E. Dyment, and Simon Dyment. These directors will hold a meeting to decide whether an appeal will be made to a higher court.

◆

The Home Bank of Canada has opened a branch in Weyburn, Sask., with Mr. J. K. Hislop as manager.

The Ontario Railway and Municipal Board has issued orders validating debentures of the town of North Toronto for $265,500 for sewage purposes.

BRITISH COLUMBIA.

Vancouver Stock Exchange Makes Progress — Zinc Industry in Slocan District—System of Reforestation Should be Adopted.

(Staff Correspondence.)

Vancouver,
September 16th.

It was with satisfaction that Mr. J. S. Rankin, speaking at the annual banquet of the Vancouver Stock Exchange, told of its progress since 1907. From June, 1909 to June, 1910, shares changing hands on the Exchange amounted to 1,829,716, valued at $673,842.64. Last year the number was 9,631,303, the value being $2,568,704.38. For the first two months of the new financial year the sales have already reached 1,879,929, with a value of $212,525, which is a big increase compared with the same period of last year. The Exchange has grown in membership, the number being 35 at present, compared with 13 at starting. A further indication of progress and success was the purchase of two lots on which the Exchange will erect its own building, something to be desired now that more room is required. Mr. Rankin did not forget a good word for his predecessors who had done so well, namely, Messrs. C. D. Rand, J. Waghorn, and H. J. Thorne.

Other speakers included Messrs. Ewing Buchan, manager of the Bank of Hamilton; Thos. McCaffrey, manager of the Union Bank; J. H. Campbell, manager of the Molsons Bank; H. D. Burns, manager of the Bank of Nova Scotia, who proposed the health of the Vancouver Stock Exchange; and Messrs. Lambert Bond, F. C. Wade, K.C., G. I. Gwynn, C. D. Rand, and A. E. Austin.

Zinc Industry in Slocan District.

For some years the zinc industry in the Slocan district of British Columbia has travelled through precarious times. The large low grade ore bodies in that district all carry zinc values, and frequently suggestions are made which it is hoped will materialize into something that will enable the owners of mines to profitably work them. A few weeks ago the possibility of a smelter at Medicine Hat was mentioned, men interested in the Lucky Jim mine being connected with the proposition. That something will be ultimately done is indicated by the visit here of a prominent and wealthy manufacturer from Great Britain, who is making enquiries for a zinc property. Evidently he sees the time when there may be a smelter on this side of the line, and if not then the tariff into the United States may be so reduced to permit the shipment of zinc ores to points across the border where they may be profitably treated.

Despite the argument that reciprocity in natural products will lead to annexation of Canada by the United States, the export of one natural product is increasing from British Columbia. Some time ago, the British Columbia Electric Railway Company made arrangements to supply the town of Sumas with electricity, and now it is proposed to export 10,000 electric horse-power to Blaine, Wash. There will be plenty of demand on the lower mainland for electric power, although the water-powers of the Vancouver Power Company and the Western Canada Power Company may be developed to capacity.

Particular attention was paid by the visiting newspapermen from Great Britain, who arrived here a few days ago, to the agricultural industry. The visitors were impressed with what they saw and one remarked that in a few years, once it became generally known what possibilities were in Western Canada, would be found here the best stock of the old land, the best workers who were willing to abandon the fuller life of Great Britain for the freer life of the wide west. Another stated if a system of reforestation was not adopted the lumbering industry might decline, which would lessen the demand for labor in winter, bringing about acute conditions in the cities. He said it would not be improbable that when such a problem presented itself some suitable solution would be forthcoming. The party was welcomed at the Hotel Vancouver by a deputation from the Board of Trade consisting of Messrs. A. G. McCandles, president; William Skene, secretary; W. H. Malkin, John Hendry, E. H. Heaps, C. H. Macaulay, and C. S. Douglas. The visitors were given a motor trip about the city, and were guests at a Canadian Club luncheon.

The pulp mill of the Swanson Bay Forests, Wood, Pulp and Lumber Mills, Limited, at Swanson Bay, has resumed operations after being closed a year. During that time considerable improvements have been made. Much British capital is invested in this plant. The actual cash layout is about a million dollars. American capital is behind the large pulp manufacturing enterprises at Powell River and Ocean Falls, both of which will be in operation shortly.

AUGUST BANK STATEMENT

Commercial Discounts were Increased by Nearly Eleven Million Dollars—Deposits Make Further Gain.

	August, 1910	July, 1911.	August, 1911.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$256,613,172	$316,973,780	$311,111,668	+21.2	—1.8
Deposits after notice	546,357,452	570,789,435	575,740,956	+ 5.5	+0.8
Current loans in Canada	657,813,770	723,765,358	734,683,962	+11.6	+1.5
Current loans elsewhere	38,609,568	32,870,114	33,689,196	—12.7	+2.1
Call loans in Canada	60,427,996	65,339,288	65,106,110	+ 7.7	—0.3
Call loans elsewhere	100,447,288	104,009,030	101,713,820	+ 1.2	—2.2
Circulation	81,321,439	89,018,079	90,630,530	+11.4	+1.8

The above are the principal items and changes in the August bank statement, compared with the previous month's statement and that of a year ago. A glance will reveal the fact that it is a very strong statement, especially in view of the close proximity of the crop movement. The only decreases during the month were in deposits on demand, call loans in Canada and call loans elsewhere. There were gains, in some cases substantial ones, in deposits after notice, current loans at home and abroad, and in circulation.

The most satisfactory feature of the August bank statement is the surprisingly large expansion in commercial discounts. A year ago this item stood at $657,000,000. Last month it had risen to $734,000,000, a gain in the twelve months of 11.6. The extension of this account is more strongly defined when comparing the August figures with those of the previous month. In July the total current loans in Canada were approximately 723 millions; last month they had increased to 734 millions, a gain of 11 millions, or 1.5 per cent.

Canadian Loan Situation.

The Canadian loan situation during the past thirteen months is best reflected in the following table:—

Loans	Current in Canada.	Call in Canada.
1910—August	$657,813,770	$60,427,996
September	668,976,522	62,428,576
October	679,820,039	64,561,641
November	677,617,478	62,866,513
December	677,064,829	63,983,912
1911—January	682,506,695	60,200,781
February	689,234,781	59,132,692
March	710,604,072	58,369,712
April	712,032,758	57,832,690
May	708,093,677	57,709,853
June	717,869,386	61,507,268
July	723,765,358	65,339,288
August	734,683,962	65,106,110

Current and Call Loans.

Both current and call loans in Canada show a large increase in the period noted above. The domestic current loans declined slightly only thrice in the thirteen months and call loans six times. In the period mentioned current loans at home have never been below 657 millions, and at the end of August stood at 734 millions. The lowest point to which domestic call loans descended was 57 millions, the figures last month being 65 millions. The great increase in credit granted by the Canadian banks at home and abroad is shown in the following table compiled by The Monetary Times:—

	August, 1907	August, 1908.	August, 1909.	August, 1910.	August, 1911.
Current loans in Canada	$580,075,932	$517,984,921	$543,154,663	$657,813,770	$734,683,962
Current elsewhere	25,033,806	23,729,816	30,661,437	38,609,568	33,689,196
Call in Canada	47,765,531	39,511,570	56,680,172	60,427,996	65,106,110
Call elsewhere	62,088,232	62,764,972	120,659,509	100,447,288	101,713,820

Curtailment of Domestic Loans.

Four years ago domestic current loans stood at 580 million dollars. They declined to the extent of 63 millions in August, 1908, but have exhibited a gradual increase since then until last month they totalled 734 millions. This was a gain in the four years of 154 millions or 26.5 per cent. Call loans in Canada also declined in 1908, following the trade depression and stringency of the previous year, the loss being about 8 millions. In 1907 this account stood at 47 millions and last month had increased to 65 millions, a gain of 18 millions or 38 per cent. Current loans abroad have also experienced expansion during the past four years, the figures changing from 25 millions to 33 millions, a gain of 8 millions or 32 per cent. Call loans out of Canada have almost doubled, changing from 62 millions in August, 1907, to 101 millions in August, 1911. Last month's figures, however, show a decline from those of August, 1909, when the amount was 120 millions.

Since the beginning of the month it is generally understood that there has been a curtailment of domestic loans, and this feature will undoubtedly be defined in the September bank statement issued in the middle of October.

Demand Deposits Less.

The demand deposits show a slight decline from the July figures, about $6,000,000 or 1.8 per cent. This item has experienced four losses during the past thirteen months as the following table shows:—

	On demand	After notice
1910—August	$256,613,172	$545,357,452
September	273,529,461	545,630,667
October	280,838,612	549,016,725
November	289,759,025	551,113,835
December	280,910,695	544,220,710
1911—January	270,178,480	549,774,479
February	268,360,503	551,424,373
March	278,171,792	553,032,466
April	281,964,369	555,822,930
May	298,784,206	562,209,148
June	309,804,854	564,867,554
July	316,973,780	570,789,435
August	311,111,668	575,740,956

Expansion in Notice Deposits.

Deposits after notice have experienced only one decline in the thirteen months' period. In August, 1910, the total deposits in this account were 545 millions and last month 575, a gain of 30 millions or 5 per cent. It is doubtful whether any other account of the chartered banks has shown such extraordinary expansion as the deposit account. This is clearly shown in the following table compiled by The Monetary Times:—

August.	On demand.	After notice.	Total.
1907	$160,459,470	$425,727,356	$586,186,826
1908	175,947,237	407,481,904	583,429,141
1909	228,397,679	472,591,818	700,989,497
1910	256,613,172	545,357,452	801,970,624
1911	311,111,668	575,740,956	886,852,624

Demand deposits have gradually increased since 1907 from 160 millions to 311 millions, a gain of 151 millions or 94 per cent. Deposits after notice, although exhibiting a decline in August, 1908, and August, 1910, have changed from 425 millions in 1907 to 575 millions in 1911, an increase of 150 millions or 35 per cent. Total deposits four years ago stood at 586 millions and last month at 886 millions, a gain of 300 millions or 51 per cent.

Question of Circulation.

The only item in which financial stringency found a place was in note circulation. Last month this item stood at $90,630,530, a gain of 11.4 per cent. over the figures of the previous year and 1.8 per cent. over those of the previous month. Since the end of August the banks have been obliged to use various media to increase circulation, and those institutions doing a large grain business have been using the notes of the smaller banks. The note circulation at the end of August was more than $19,000,000 greater than at that date two years ago, when the banking capital shown in the statement was almost as large as it is now.

An interesting article on the Dominion note circulation of the chartered banks, which in July for the first time exceeded 100 millions, appears elsewhere in this issue.

MYSTERIOUS BIDDERS FOR CANADIAN BONDS.

Nothing Heard Yet Respecting the Montreal Investment and Trust Company—Reproduction of Their Campbellton Offer.

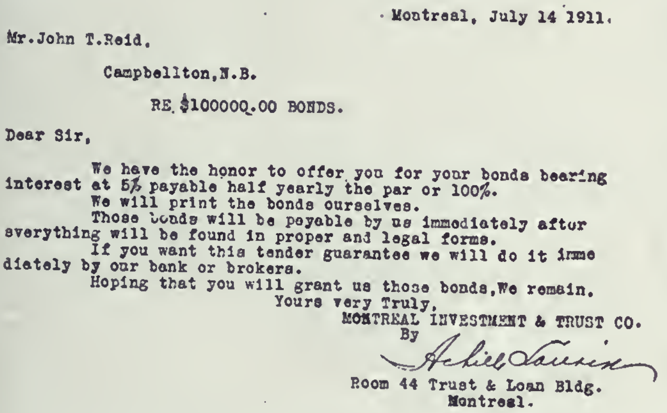
The mystery as to the identity of Achille Laurin and the Montreal Investment and Trust Company remains. As noted in The Monetary Times last week, the town of Newcastle, N.B., awarded an issue of $30,000 5 per cent. town debentures to this firm, which had offered par. The Montreal Investment and Trust Company was notified but the letter was returned to the Newcastle authorities, the postmaster stating that he could not find the company.

The town of Campbellton had the same experience. Mr. John T. Reid, the town clerk, writing in regard to delay in awarding an issue of $100,000 of debentures, said:

"I might say that the delay in winding up this matter has been unavoidable on our part as a certain firm purporting to do business in Montreal made us an offer of par for these bonds and we accepted this. However, they failed to make good and, in fact, we were not able to locate them and at length were forced to the conclusion that the firm was not in existence."

The Gentleman's Signature.

Here is an exact reproduction of the letter sent to Mr. Reid by the mysterious company. It was written on half a sheet of paper, without any note heading:—



Montreal, July 14 1911.

Mr.John T.Reid,

Campbellton,N.B.

RE.$100000.00 BONDS.

Dear Sir,

We have the honor to offer you for your bonds bearing interest at 5% payable half yearly the par or 100%.

We will print the bonds ourselves.

Those bonds will be payable by us immediately after everything will be found in proper and legal forms.

If you want this tender guarantee we will do it imme
diately by our bank or brokers.

Hoping that you will grant us those bonds,We remain.

Yours very Truly,
MONTREAL INVESTMENT & TRUST CO.
By
Achille Laurin
Room 44 Trust & Loan Bldg.
Montreal.

On September 13th The Monetary Times addressed the following letter to the firm. To date, no reply has been received:—

No Reply Received.

Dear Sir,—I understand that your company has bid for debenture issues of the town of Newcastle and the town of Campbellton, New Brunswick. In both cases the town authorities awarded your company the issue, but were unable to locate you. I shall be glad to hear from you respecting this matter."

As stated last week, in view of the circumstances noted above, we would advise municipal authorities not to consider tenders from the Montreal Investment and Trust Company, and bond houses in tendering to inform the advertisers for bids of the happenings chronicled here.

◆

Upon instructions from the head office of the Bank of Montreal, the reward in connection with the robbery at the New Westminster branch has been increased to a total of $32,000, $5,000 for information leading to the arrest and conviction of the perpetrators, and 10 per cent. of the sum returned. The total sum stolen was $272,000. If all is recovered, the detectives will divide $27,000 in addition to the $5,000.

Mr. John Ferguson, one of the London managers of the National Bank of Scotland, was in Montreal this week en route for the Pacific Coast, and stated during an interview recently, that Canada had taken such a front place in the eyes of the British financial world that every English banker now feels it to be a necessity to visit this part of the overseas dominions. He is visiting the Dominion for the first time, and is more than pleased with the stability of Montreal's industrial, financial and commercial institutions, and the progressive, yet conservative character of the men at their head. Mr. Ferguson said that they all realized that Canada was sufficiently large to support three great transcontinental railway

FIRE LOSS THIS YEAR

May Exceed that of Last Year—Commissioner Lindback, of Manitoba, Says Fire Prevention Largely Matter of Cleanliness and Carefulness.

In the opinion of Mr. A. Lindback, Manitoba fire commissioner, the total fire loss for 1911 will probably exceed that of last year.

Cleanliness and carefulness in and around individual premises will prevent at least 50 per cent. of fire loss. Let us individually, says Mr. Lindback, remember that most of the fire loss is preventable. All fires are the same size at the start, but if any building containing valuable merchandise, machinery, etc., no matter how well built, is carelessly left to its own device during the time not occupied for business, the individual owner becomes responsible, not only for the fire that may destroy such building, but for the damage which occurs to others as well.

Not only should all fire apparatus be subjected to a thorough overhauling, but all chimneys and flues should be carefully inspected and repaired, basements cleaned out, all windows in warehouses freed from obstructions, exits to fire escapes made clear, rubbish of all kinds done away with, unused stovepipe holes properly closed with metallic stoppers; all floors protected from overheated stoves.

No one has a warrant against fire, not even in a heavy insurance policy, except by cleanliness and carefulness, and when prepared to check the small beginning fire. It is when the season for heating the buildings starts, that the increase in fire calls and costly fires also begin.

Winnipeg Fire Record Is Bad.

The fire record of Winnipeg for the year 1910 was a disgrace to the city, so far as its losses were concerned—a proof of carelessness and indifference, which if in connection with any other calamity but fire, would mark it as a place well worth to keep away from.

There is for the commercial section a water protection as good as any in the world; the fire department is equipped equal to any on the continent; the best automatic alarm system known, with a record of fifteen years, not equalled by any other known system, is available at a reasonable outlay, and still a city of perhaps 170,000 population rolls up in one single year a fire loss aggregating more than a million dollars—representing a per capita loss of more than six dollars.

No amount of money spent for protection, no promulgation of city ordinances, not the efficiency of the fire department, nor any other protection, will count in the reduction of our fire waste, as will the sense of individual responsibility for prevention.

It is for the contractor, property owner, and tenant to see that the furnace, the chimney, the stove and the flues are fit and ready; to look after the elimination of rubbish, oily rags and other offal; to discard the criminal phosphorous match and adopt the one which can ignite only on a prepared surface, to discard your indifference or carelessness—that and that only will eventually reduce these insane losses, which as much as any other factor is responsible for the increased cost of living.

Insurance Covers Only Small Part of Loss.

To sum up: Do not put trust in "fireproof buildings," the responsibility is just as great as in a wooden structure. Risks are dangerous or not, as the owners make them so, it is not wholly the nature of the business. It is the nature of the man.

Study to prevent fires in the house or place of business. Be prepared to put fires out before they become dangerous. Be prepared to save every person in your employ if your place burned—plan before fire occurs.

Insurance will only cover a small part of your loss if you have a fire; insurance is a partial repayment, not an absolution.

Fire prevention is largely a matter of cleanliness and carefulness.

◆

Mr. R. A. Rumsey, assistant manager of the Canadian Bank of Commerce at Winnipeg, has been transferred to the head office, Toronto.

For the Wetaskiwin, Alta., $11,500 5 per cent. 20-year electric light and fire hall debentures five bids were received, four from Toronto bond houses and one from the Imperial Bank. As previously noted, the award was made to Aemilius Jarvis & Company.

CANADIAN GUARDIAN LIFE'S POSITION.

The Company is Working Under a Limited Dominion Charter and Ontario Certificate—The International Comes to the Rescue.

The affairs of the Canadian Guardian Life Insurance Company have become much involved since the Dominion Superintendent of Insurance on May 1st, 1911, in a public notice stated that its charter had expired and that it was "not expedient to further renew the same."

Its Dominion charter was withdrawn, as noted in last week's Monetary Times, following an adverse report made by chartered accountants, on behalf of the government, on the company's position. The company was then granted a limited Dominion license for the purpose of making arrangements for the surrender or for the reinsurance of its policies remaining in force.

As late as November, 1910, the company applied to the Ontario Department of Insurance to transfer its deposit from the Dominion Department to that of Ontario. This request, properly enough, was refused. Early in 1911 the Ontario certificate of registry given to the company was not renewed but a temporary certificate issued in order to permit the corporation to collect the premiums on policies in force and pay accruing claims.

Finally Mr. J. M. Spence, president of the Canadian Guardian Life, has appeared in Edmonton, Alta., as managing director of the International Insurance Company, which is apparently inducing the policyholders to surrender their policies in the Canadian Guardian and to accept new policies in the International. Similarly, the persons who are now shareholders in the Canadian Guardian are apparently being induced to accept shares in the capital of the International. In other words, the policyholder of the Canadian Guardian (president, Mr. J. M. Spence), the Dominion charter of which was cancelled for good reasons, is asked to accept a new policy in the International (managing director, Mr J. M. Spence).

What It May Mean.

What this may eventually mean, can be gathered from the report made to the Dominion Government in February, 1911, respecting the position of the Canadian Guardian Life Insurance Company:—

" So far as we can determine," says the report, " the statements furnished to you, and as published, are in accordance with the books of account as they tell from year to year, save that journal entries have been made in a later year dealing with transactions of the preceding year. The company, under its different titles, since its incorporation on the 23rd of February, 1901, has had eight secretaries and some of them left their work incomplete and it has remained uncompleted.

Secretary Wanted to Adjust Account.

" The existing shareholders on the 30th November, 1910, some 470 in number, with aggregate subscriptions of $461,900, are shown, by the record, to have paid thereon $40,812; hence they are still liable to the extent of $421,087, and this statement is probably not far from being accurate, and it may be quite so. The books of account show the subscribed capital of $500,000 and the amount due thereon $457,205. The present secretary expresses his desire to go through the work of past years and adjust this account. Where the vouchers of the company are intact we should suggest, as a simpler and more complete method, the re-writing of the whole books of account.

" We venture to submit as a fair summary of the company's operations for the above named seventy-one months, the following statement, and believe that any adjustments that may be found necessary, will not vary the result materially:—

Premiums received from Palicyholders		$ 85,166 33
Deduct therefrom.		
Paid Commission to Agents	$ 9,444 18	
Paid Death losses	11,599 13	
Paid Policyholders, as surrender values	9,259 16	
Loans to Policyholders	4,221 24	
		$ 34,523 71
		$ 50,642 62
Expenses for the seventy-one months		111,865 88
Operating loss		$ 61,223 26

Apart from the liability of the company to existing policyholders. (The amount of the legal reserve not computed.)

" This $61,223.26 has been made up entirely by past shareholders, as follows:—

Shares as per list, cancelled for non-payment 264,300, upon which has been paid............	$36,856
Shares as per list, voluntarily surrendered $253,800, upon which has been paid...........	25,900
A total of	$62,756

How Dividend Was Declared.

" The dividend declared in 1910 was also contributed by the specific surrender of three shareholders who were also directors, of $15,000 of share subscriptions, upon which $1,500 had been paid. We are unable to express an opinion as to the legality of this method of financing.

"We do not find the president, Mr. J. M. Spence, to have personally benefitted by the series of note transactions between himself and the company, to one of which you drew attention in your last printed report. The proceeds of each bill was paid by it. It is true that the liability was never shown in the annual returns. The directors, by their minute book, continuously authorized the transfer to Mr. Spence or some member of his family, of shares acquired by him from subscribers.

" We are obliged to conclude that the vote of $1,000 a month to the president, as salary for the years 1909 and 1910, an increase from $250 a month during the preceding years, was made for the purpose of enabling him to acquire shares for the benefit of the company, and we find that on the 19th of November last, on page 304 of the directors' minute book, they cancelled this increase, thus restoring his salary to the previous rate of $3,000 per annum. There has been no concealment with regard to the very extraordinary method adopted by the board to avoid showing an operating deficit.

" The premium received upon sales of capital stock during the year 1909 and 1910 was five per cent.; the rate of commission paid to agents for the sale of such stock was also five per cent."

Granted Limited License.

This report was printed in full in the official Canada Gazette, and in the same publication on May 1st, 1911, the following notice appeared, signed by Mr. W. Fitzgerald, Dominion Superintendent of Insurance:—

" Notice is hereby given that a modified license has this day been issued to the Canadian Guardian Life Insurance Company as follows:—

Canada Insurance License, modified as proved by section 41 of The Insurance Act, 1910. Whereas the license No. 203 heretofore issued to the Canadian Guardian Life Insurance Company under the Insurance Act and from time to time renewed up to the present time, has now expired and it is not expedient to further renew the same, and with a view to enabling the company to procure a surrender of its outstanding policies or a reinsurance thereof in some company licensed in Canada under The Insurance Act, 1910, the undersigned Minister of Finance, in pursuance of the power vested in him by said Act, hereby certifies that the said company is authorized to collect the premiums due and to become due upon the policies outstanding and in force at the date hereof and to pay the claims arising thereon and to transact all business appertaining thereto, and generally to do all things necessary for the protection of the holders of said policies: Provided, however, that no new business is to be transacted by said company. Dated at the City of Ottawa this first day of May, 1911. (Sgd.) W. S. Fielding, Minister of Finance.

Then Went Westward.

Holding a limited Dominion license and Ontario certificate, which were necessary for the purposes mentioned above, Mr. J. M. Spence hied to the West and was much in evidence at a meeting of the shareholders of the International Insurance Company, held at Edmonton on August 29th, 1911. He presented a report of which the following is an extract:—

"Your board of directors having arranged for the purchase of the Canadian Guardian Life Insurance Company, now ask for authority to carry the same into effect in the following manner:—

"(a) By taking over the assets of the said company (after providing for all liabilities) at their present or market value.

"(b) By accepting applications from the policyholders of the said company and issuing to them new policies in this company, such policies to be dated back so that they will correspond with the policy they now hold, both as to the amount guaranteed therein by way of legal reserve or otherwise and "(c) By paying to each of the persons who (at the time of completing such purchase) may be shareholders in the Canadian Guardian Life Insurance Company an amount that will be equal to his or her holdings in the said company, provided, however, that such payment shall be made by way of the said shareholders accepting shares in the capital of the International Insurance Company, Limited."

"Successful Home Company."

If the shareholders and policyholders of the Canadian Guardian Life have perused the report on the company's position made to the Dominion Government, it is highly improbable that they will seek further knowledge of the business and underwriting capabilities of Mr. J. M. Spence. Mr. G. F. Downes, at the shareholders' meeting, noted above, stated that "the disposition of the capital, the class of business being transacted and the extension of the company, are all movements in the right direction and towards the building up of a large and successful home company." The Monetary Times thoroughly disagrees with Mr. Downes. The matter is discussed further in the editorial columns.

PERSONAL NOTES.

Mr. George Bennett, Mayor of New Glasgow, N.S., is dead.

Mr. J. B. Pauze of Messrs. J. B. Pauze & Company, general contractors, Montreal, is dead.

Mr. Joseph Gauthier, for many years with Messrs. Marcotte Freres, Montreal, died recently.

Mr. H. T. Wilguis, the Canadian Pacific Railway agent at Yokohama was in Vancouver recently.

Mr. Martin Nordegg, of the Brazeau Collieries, leaves next month for Europe where he will spend several months.

Mr. Julius Neurihuer, a biscuit and confectionery manufacturer of Newark, N.J., may locate a plant at Ottawa, Ont.

Mr. W. J. Fyle of Cleveland, Ohio, is in Winnipeg with a view of establishing a branch of his cement roofing business there.

Mr. Charles F. Miller of the Sterling Trust Corporation, has returned to Regina, after spending several weeks in Toronto and eastern Canada.

Mr. W. McMaster of Montreal has been appointed a member of the Canadian board of directors of the North British & Mercantile Insurance Company.

Mr. James Thompson of the Hudson Bay Company of Victoria, B.C., has been transferred to Winnipeg to assume the duties of the company's land commissioner.

Mr. Robert W. Merritt has been appointed manager for Toronto of the Travellers Life Insurance Company of Canada. Mr. Merritt was for many years manager of the Montreal Life of New York.

Mr. John W. Loud, freight traffic manager of the Grand Trunk Railway system, the Grand Trunk Pacific and the Central Vermont railways, has resigned to take effect at the end of the month.

Mr. W. R. Manton, representing the International Supply Company, states that they may locate a factory in Medicine Hat, Alta., for the manufacture and repair of gas and water drilling apparatus.

Viscount de Kergariou, of Paris, was in Vancouver, recently. When asked his impression of Canada as a country for commercial opportunity, he said: "If I were a young man I would come to Canada and make money."

Mr. Howard Murray, treasurer of the Shawinigan Power Company, is president of the New Canada Carbide Company, which is a consolidation of the Wilson Carbide Company, the Ottawa Carbide Company, and the Shawinigan Carbide Company.

Sir Ingo Thomas, secretary of the British Admiralty, has been elected a director of the Sherwin Williams Company of Canada. The board, which is now complete, stands as follows: Messrs. W. H. Cottingham, C. C. Ballantyne, W. J. White, K.C., William McMaster, J. W. McConnell, Sir Ingo Thomas, James Garson.

Mr. Dudley Ward, a member of the British Parliament, who is at present touring Canada, says: "To note the development of agriculture in the various provinces from the old established farms of Quebec and Ontario to the frontier homesteads of Saskatchewan and Alberta, is to realize something of the future possibilities of this great Dominion as a food producing nation."

GRAND TRUNK'S AMERICAN LINES.

Company Said to Have Acquired Portland Railroad—Arrangements at Boston.

Acquisition by the Grand Trunk interests of control of the Portland Railroad and the Atlantic Shore Railway, two trolley roads, is reported. The Portland Railroad would give the Grand Trunk its own route from its Portland station to the famous summer resort of Old Orchard. A four-mile link from Old Orchard to Biddeford would connect with the Atlantic Shore Railway, which runs to Kittery, Me., where it connects by a ferry, one-quarter mile long, with Portsmouth, N. H. From Kittery to Beverly, Mass., is 29 miles and Beverly is the terminus proposed for the high-powered electric line to run over a private right of way from Boston, which recently received a charter from the Massachusetts legislature despite strenuous opposition by the New York, New Haven & Hartford interests.

Mr. Charles M. Hays, president of the Grand Trunk Railway, said regarding the entrance of that road into southern New England: "We hope to be running trains into Providence next year. We are building from Palmer, Mass., on our Central Vermont line, through a string of manufacturing villages, products of which shall haul the entire length of our line to Chicago and eventually across Canada for export to China and Japan as well as to Alaska and the Yukon.

Between Providence and Chicago.

"These towns produce practically everything wanted in the West and require practically everything in the way of agricultural products of Canada. They are a great market for hay, oats, and all kinds of vegetables and fruits. From the innumerable factories vast quantities of manufactured merchandise are shipped to Chicago, Buffalo and other points on the Grand Trunk line for distribution.

"It is a very promising proposition for there is little difference in the hauling distance between Providence and Chicago over the Grand Trunk as compared with the lines through the United States. We are meeting with support and encouragement from the governor and people of Rhode Island but the New Haven is resisting every move we make."

Grand Trunk's Boston Plan.

The Boston & Eastern Railway will enable the Grand Trunk to run trains to Boston through a harbor tunnel with a passenger terminal at Post Office Square and with freight terminal near the piers to be built at East Boston Flats by the new Boston Dock Commission, all to be completed within two years. Mr. C. S. Mellen, president of the New Haven, has said: "I do not know that the Grand Trunk is back of the Boston & Eastern, but I would not be surprised if such were the fact."

Mr. C. S. Baxter, attorney and spokesman of the Boston & Eastern, said:

"There is nothing in our charter to prevent our roadbed being used by the heavy trains of the Grand Trunk, if they are moved by electric power. The Grand Trunk Railway, if it wished to connect with us, could build across from Palmer, Mass., a station on the Central Vermont, or construct 29 miles to connect with the two recently acquired trolley lines stretching south from Portland through Old Orchard with entrance into New Hampshire. Portland is the present terminus of the through Grand Trunk line from Montreal."

FARMERS BANK DOUBLE LIABILITY.

Sixty-five shareholders of the Farmers Bank, who are held liable for $27,632, have not disputed the claim of Mr. J. A. McAndrew, Official Referee, within the statutory time limit, and will now be placed on the list of contributories, they being unable to lawfully enter an appeal. There are several more shareholders held liable who may yet appeal as their period for such has not expired. The amounts involved are principally comparatively small. Most of the contributories reside outside of Toronto in small villages and towns. In Toronto there are two contributories, Messrs. James F. Ellis, 185½ Queen Street West, held liable for $310, and F. W. Stair for $5,800.

Mr. H. C. Gordon, treasurer of the National Finance Company, Limited, Vancouver, B.C., visited Toronto last week. He is enthusiastic regarding the possibilities of British Columbia.

Mr. Frank H. Merriam, of Winnipeg, was recently appointed district manager for southwestern Manitoba of the London and Lancashire Life and General Assurance Association, Limited, with office in Brandon, Man.

BOND HOUSES AND "MUNICIPALS."

Some Considerations for Buyers and Sellers — Ten Elements for the Ideal Investment.

Security of principal.
Stability of income (or security of interest).
A fair return.
Marketability. } **Convertibility.**
Value as collateral.
Tax exemption.
Freedom from Care.
Acceptable duration.
Acceptable denomination.
Possibility of Appreciation.

Those are the ten elements for the ideal investment, as enunciated by Mr. Lawrence Chamberlain, in an interesting article in Moody's Magazine, on the work of the American bond house in buying municipals. Whether the possibility of appreciation, he says, is not purely a speculative quality may be open to discussion, but otherwise the list is probably unquestionable and comprehensive. We may say then that if a bond house can obtain for its clients an issue with (1) principal reasonably secure, (2) interest payments regular and certain, (3) a fair return in income, (4) a fairly responsive market, (5) hypothecary value at the banks—an issue, (6) that is free from direct tax, and (7) requires merely semi-annual coupon clipping, and (8) matures after a satisfactory lapse of time, and (9) comes in convenient units of denomination (small for the frugal poor, and large for the rich, so as not to crowd the strong box), and (10) has as good a chance of appreciating as of depreciating when its qualities become more generally recognized—well, a bond house cannot furnish such an issue, for it does not exist.

"Evidently then," he continues, "there is plenty of room for discrimination and selective judgment in bond buying. Incidentally, however, is there any other kind of investment that will so nearly meet these ten requirements? Will mortgages?

Three Investment Qualities.

"The three investment qualities that receive the most consideration are security, income, and marketability. Obviously all three cannot exist in a high degree in the same paper. If the investment is safe it cannot return a high rate of interest, and at the same time have a broad and active market, for such a market implies competitive demand, and the competition for a security that was at once of safe and high yield would immediately bid up the price and thus lower the yield.

"Therefore assuming a good security, the first problem of the bond house is the choice it must make for its specialization between large transactions with small profits in issues with broad markets, and small transaction with much larger profits in issues without vogue or reputation.

"If, because of prejudice, or want of knowledge concerning its qualities, an issue is without vogue, and has to be sold painstakingly by personal solicitation, it may be both safe and of high return. It is the principal and thoroughly commendable function of the better American bond houses to sell to their clients issues of bonds which have unimpeachable security and yet an income considerably higher than would be the case were the issues well known to the investing public.

Problem of Buying Municipals.

"The problem of buying municipals and the quasi-municipals such as county and tax district bonds, may be divided according to the character of their investment destination. From the business point of view municipals are broadly either 'legals' or 'general market' bonds.

"By legals are meant municipals that conform to the high requirements of the older, richer states governing the investment of savings bank deposits trust funds, and possibly insurance funds. In the nature of the case the legals are, in general, superior to the general market municipals.

"In purchasing legals the question of security is almost nil. No banking house, for instance, would or could be held morally responsible for the default of any municipal issue that is a legal investment for the savings banks of Massachusetts or New York. The questions of legality and validity are quite apart from those of the financial competency or the good faith of a city. It is not a function of the bond houses to establish legality but that of their attorneys. It may astonish many to learn that a record of sales I kept in 1907, of the more important municipal issues of that year, shows that of a total of $200,000,000 of municipal and state bonds issued, some $4,000,000 or 2 per cent., divided among 65 loans, were finally declined by those who had purchased them subject to approval of counsel; and, usually, but not always, declined on the ground that the issue was invalid because of some lack of compliance with minor requirements of law. This $4,000,000 does not take into account a very much larger amount of issues that the attorney of the purchaser found insufficiently protected by law, but that by further acts at his suggestion, the issuing community was able to validate completely without formal resale.

Not All Bond Attorneys.

"Not all bond attorneys, however, are competent. Even an apparently 'legal' municipal may be unsafe if its validity has been passed upon by a lawyer who is more interested in making immediate profits for his client the bond house, than considerate for his reputation and its future welfare. Any bond house dealing in municipals can name certain attorneys whose 'legal opinion' is worthless in its eyes because of incompetence or lack of scruple. Not long ago one such attorney in New York State accepted as valid an issue of bonds signed by a man who had never been appointed or elected to the office designated under his signature.

"It is the business of the bond house to protect its clients against the work of these charlatans. They are very few and far between, and lower but little the high plane of legal skill and ethics that are devoted to safeguarding American bond issues.

Buying of Legals.

"The buying of legals as a mercantile, rather than legal, problem narrows down to technical skill in sensing the current demand and steering the bid in that very narrow channel of profit that lies between the Scylla of competitive bids and the Charybdis of too high an asking price.

"It is easier to guess what price the bonds will bring when sold in the public, than what price the other houses will bid at the public sale; but conceding the municipal buyer could be fairly certain of both, he is not yet saved. He must compute the selling cost to him per bond, and be sure, humanly speaking, of a margin of profit. How many houses do this? How many of the thousand and more bond firms in the United States have any intelligent cost accounting? It may be interesting to know that a certain house that does a large and very general bond business throughout the country computes the selling cost at nearly $14 a $1,000 bond. This includes the cost of the slow moving 'specialties,' but also the cost of mere brokerage transactions on which the profit may be only 1-32, or 31 cents a bond.

Gross Profit in Selling.

"At the present time the gross profit in selling legal municipals surely does not exceed $10 a bond or 1 per cent. I believe it is not over $7.50 a bond. If these statements of costs and profits are approximately correct, are the bond houses charging too much for the services they perform? If these statements are correct, are institutions and individuals ordinarily wise in bidding direct for bonds at public sale, rather than accepting the established market after the sale? The answer will be found by study of the list of bidders, and the amounts bid, in any sale of New York City bonds. If these statements are correct, are municipalities wise in trying to sell their loans, bond by bond, 'over the counter,' rather than by paying, as a matter of economy, the middleman's profit?

"It would not be possible for houses to live on such small profits if the bonds did not in the long run 'carry themselves,' i.e., produce a sufficient coupon income to offset the interest charges of their hypothecation at the banks. A diamond or wool merchant, it is to be observed, or a merchant in any other commodity, has not this advantage of a self-supporting collateral.

Change of Market Conditions.

"With a gross 1 per cent. profit, that may be wiped out by a change in the market conditions, it is essential that the bidding for legal municipals should be most circumspect. With this in view a properly equipped house will keep on its books a record of past bidding for all municipal issues of consequence. This record will show the amount of the flotation, the face or coupon interest rate, the duration, the purpose of the issue, the date of sale, the price the bonds brought at the sale, the net yield at this price, the name of the purchaser, and, when possible, the basis price or net yield that the bonds brought when retailed. Every one of these facts is of prime importance in gauging the price to pay for municipals, for one should never, or almost never, bid with a first thought on competitive bids, but rather with heed first to the price that the market will bear, and next to the margin of profit that is acceptable under the conditions.

"The application of these details of issue to prospective bidding becomes instinctive to a professional bond buyer. He will run through a few pages of proposals for bids and check off with almost unerring accuracy the cases in which

(Continued on Page 1337.)

FURTHER EDUCATION ON FIRE WASTE.

"The battle against flames has been a losing fight, all things considered." In these words Mr. Edward F. Croker sums up his observation of twenty-five years' service as chief of the New York Fire Department. This was said, although the department's equipment, steadily improved since 1884, is "the most scientific and complete in the world," the department being "greater than the combined departments of the next five largest cities." In spite of all this, the fire losses in life and property and the dangers of frightful holocausts in New York are, he declares, steadily increasing.

That is a serious indictment, not of fire-fighting men or apparatus, but of fire-causing circumstances—national carelessness of fire and national indolence in not changing methods of house-building. In describing two fatal fires in manufacturing buildings in Newark and New York, respectively, the one an old, the other a new building, the former fire chief says: "In both we have an awful example of how our national carelessness with fires nullifies our efforts to reduce our annual tribute to the flames."

In a comment upon the series of articles Mr. Croker is producing on the "Losing Fight Against Fire," a sensible New York critic declares the simple fact to be "that we are neglecting the only real remedy, the prevention of the fires themselves. It is the lesson so long taught in the countries of Europe. In German cities this loss is barely a tenth of our own, and in those of England scarcely a fifth." Fire underwriters in Canada, as well as the States, recognize that there is something more for them to do than to pay losses when they come. They have to co-operate with others for the repression of fire. Since the destruction by fire still keeps pace with the means for its quelling, there is still need for the further education of the people of this continent on fire dangers and the necessity for improvement in building

◆

FEMALE LIFE INSURANCE RISKS.

Some Companies Are Giving Women Better Rates—Subject is Being Studied by Actuarial Society.

A heated discussion occurred, as some will remember, at the Dominion Life Underwriters' Association Convention in July on the subject of life insurance policies for women. Mr. Wm. McBride, the then president, referred in his address to the "discrimination of some companies against the fair sex." He continued:—"Many of the companies charge a lady about $5.00 extra per $1,000 on a life plan, because they argue she is a poorer risk in consequence of her sex. Yet if the same lady asked the same companies for an annuity policy, she would get a smaller annuity than a man of the same age, because they would argue she is a better risk in consequence of her sex and would live longer to draw the annuity. Companies' actuaries should be made to see the ridiculous anomalies in these discriminations.

Actuaries Did Not Agree.

These remarks were resented by several actuaries present. Now we learn that many life insurance companies are becoming more liberal in the acceptance of female risks. By an increasingly large number of old line life insurance companies, policies are being issued to women without a charge being made for an extra premium because of their sex.

Only recently the Travelers of Hartford announced that women would be written hereafter on all forms of policies, with the exception of term insurance, without an extra charge. Ordinarily policies issued to women, however, cannot be written for an amount in excess of $10,000.

"It is," says the Insurance Press, "only within the past few years that life insurance companies have begun to realize that insurance on women can be written safely on the same basis on which male risks are accepted and that any special tendencies toward illness or disease to which the gentler sex is heir to is compensated for by reason of their immunity to accident and their more temperate habits.

"In fact the mortality tables show that the longevity of women is greater by several years than that of men, at the same age, and the experience and observation of anyone will probably confirm this idea.

"There has been a prejudice, however, on the part of most companies toward accepting this class of business, and it is estimated that not over 2 per cent. or 3 per cent. of policies written by life insurance companies, in the past, were on women. Nevertheless, the Provident Life & Trust of Philadelphia, which has for many years done a big business among self-supporting women, is said to have as much as 10 per cent. of its business on female lives.

More Insurance Being Written.

"Another reason for the life insurance companies frowning upon the writing of women in the past has been that as the average woman did not insure, the companies were discriminated against in the selection of risks. The large increase every year in the number of self-supporting women who are wage earners has opened a new field for the life insurance companies and their agents. There has been a great increase in the number of women agents who are soliciting members of their sex and the women's department of some of the big companies are becoming more important every year.

What Has Been Argued.

"It has been argued all along that while it is sound business to insure the man who supports the family, to write the woman who brings up this family is bad business. In writing female risks the companies have found that they must keep ever before them the question of insurable interest. With the average man there is seldom a question of insurable interest, while with a female risk there is a slight discrimination against the sex because of a lack of insurable interest in many cases.

"This feature of the situation has been so strong that in many cases where women were not wage earners the companies would refuse to accept them as risks, believing that the husbands had some sinister motive in seeking to have a policy issued on their wives. Companies will accept such business if they can be satisfied as to insurable interest. This then, has been the theory and practice, but some of the companies are at present taking more liberal views of the question.

"On the other hand, if a woman is wealthy or has money in her own name, the average life insurance company will accept her application but will consider each case on its individual merits, the idea being that in the case of a woman of means, there is no intention on the part of her better half to put her out of the way or to realize from her life insurance any larger sum than he could secure from her death through natural causes. Companies permit a woman to insure her life for the benefit of her children quite frequently provided the individual case seems to warrant the insurance being written.

Are Conducting an Investigation.

"For these reasons and because of the disabilities which are placed about the insurance of married women, life insurance agents have an excellent argument in canvassing self-supporting women before they enter the married state. An endowment policy furnishes an excellent anchor in stress of weather, for whether a woman is still single or not, the surrender and loan values are large enough frequently to tide the policyholder over rough places.

"In the medico-actuarial investigation now being conducted under the joint auspices of the Actuarial Society of America and the Medical Directors' Association, and participated in by over 40 companies, cognizance has been taken of the factor of women in life insurance. The scope of the investigation includes a study of four groups of women, viz., spinsters; married women whose husbands are the beneficiary of their policy; married women who have named any other beneficiary than their husband, and widows and women who are divorced. Statistics along these lines are expected to be particularly instructive.

In Favor of Women.

"Under the head of occupations, in the investigation, female trained nurses are to be studied while in the section devoted to medical impairments, a large number of diseases to which the female is particularly prone are being examined carefully. It has been remarked that it would be an interesting experience to watch the operation of a company which devoted itself exclusively to the insurance of self-supporting women and it has been predicted that such a company would show a much lower loss ratio than any of the conservatively managed legal reserve companies. The reasons for this are that besides the fact that women live longer than men, they as a rule do not dissipate to the extent that men do, either by the use of alcoholic liquors or tobacco."

HALIFAX FIRE LOSS.

Fire Chief Broderick Issues Interesting Report—Statistics for the Past Year.

Number of Alarms	**129**
Total Fire Loss	**$ 88,301**
Loss to Insurance Companies	**71,958**
Losses not Insured	**16,343**
Insurance at Risk	**411,975**

During the year ended April 30th, 1911, the Halifax, N.S., fire department received 129 alarms. Of these 46 were bell alarms, 33 were for No. 1 chemical, 20 for No. 2 chemical, 18 for No. 3 chemical engine, 10 were still alarms, and two were false alarms. Of the bell alarms 37 were first alarms, five were second and four were third alarms. The total fire loss during the year was $88,301.50. The loss to the insurance companies was $71,958.50; the losses not insured were $16,343; the insurance at risk was $411,975.

Biggest Fires of Last Year.

The large fires were as follows:—May 3rd—Hillis & Son, loss $22,593; insurance, $9,100. September 16th.—Market wharf, loss, $18,467; insurance, $27,000. September 20th.—E. J. Kitz and others, loss, $7,356; insurance, $16,500. February 4th.—Merchants Bank of Canada and J. and M. Murphy, loss, $16,575; insurance, $22,000. March 7th.—Morrow fire, loss, $7,418; insurance, $35,000. The loss by these five fires was $72,409. The loss by the other 124 calls was $15,892.

The insurance and total losses for the past eight years have been as follows:

Year.	Alarms.	Insurance loss.	Total loss.
1903-04	123	$127,934	$135,224
1904-05	96	484,178	499,640
1905-06	110	95,578	96,556
1906-07	112	48,600	60,016
1907-08	92	52,154	68,600
1908-09	120	23,860	27,015
1910-11	129	71,958	88,301

Fire Apparatus Owned by Department.

New apparatus costing $4,337.76 was added during the year. The La France service ladder truck cost $2,263.25. Four horses cost $1,190. The other items were not important. At present there are 34 horses in the department. The condition of the horses is satisfactory.

Apparatus owned by the department is as follows:—2 chemical engines, 1 combination chemical and ladder truck, 2 ladder trucks and ladders, 1 ladder truck in reserve, 7 fire engines, five in commission, two in reserve; 1 aerial truck and ladders, 1 turret hose wagon, 7 hose wagons, 1 repair wagon, 1 reserve wagon, 1 turret hose sleigh, 7 hose sleighs, 4 spare sleighs, 2 ladder sleighs, 1 set of bobs for No. 2 chemical, 1 wagon and sleigh for chief.

Causes of Fires.

The list of fires and their causes is given as follows:—Sparks from chimney setting fire to roof, 10; oil stove, 4; smoking in bed, 1; lamp explosion, 1; matches, 3; oven, 3; drying plaster, 1; overheated furnace, 4; false, 2; chimney, 27; gas stove, 1; unknown, 19; children setting fire to grass, 12; stove upset, 2; defective flues, 12; grates, 7; heated stove pipes, 6; burning rubbish, 3; overheated putty, 1; painter's lamp, 1; clothing, 2; tar pot, 1; gasoline, 1; gas bracket, 3; wax explosion, 1; lightning, 1; total, 129.

◆

A branch of the Merchants Bank of Canada has been opened at Chauvin, Alta., under the management of Mr. S. E. James.

The estimated salmon pack in British Columbia is 750,000 cases. The estimated pack of sockeyes in British Columbia this year is as follows: Skeena River, 120,000 cases; Fraser River, 60,000; Naas, 32,000; Lowe Inlet, 13,000; Bella Coola, 5,000; Kimsquit, 3,000; Namu, 5,000; Rivers Inlet, 87,000; Smith Inlet, 18,000; Alert Bay, 4,000; Knight Inlet, 1,500; Quathiaska Cove, 1,500; Alberni, 7,000; Clayoquot, 6,000; Wark Island, 2,000. Total, 365,000.

◆

The Royal Commission to investigate taxation problems in British Columbia will hold sittings in various cities of the province during September and October. This Commission was appointed, after protests from business men regarding the operation of the Assessment Act.

FORGERY IS A BAD RISK.

Surety Company's President Draws Attention to Negligence of Some Bank Tellers—Operations Based in Canada.

Another surety company has found the writing of forgery bonds an extremely hazardous undertaking, and it is more than likely that the rate for this class of protection will be materially increased.

Forgery bonds were first issued to banks by the United States Fidelity & Guaranty Company about a year ago. The bond guaranteed them against loss by forged checks, and the National Surety Company soon followed the lead of the United States Fidelity & Guaranty in issuing this class of indemnity.

Developed High Loss Rate.

The losses under forgery bonds quickly developed a high loss rate, and after a trial of several months the United States Fidelity & Guaranty Company decided that the business was too hazardous and stopped issuing such bonds.

The National Surety continued alone in the field, but now it is announced by President Joyce of the National that several bad losses have occurred by means of forged checks which have been certified and then cashed in other cities.

As a result President Joyce has just issued a warning to banks in this State calling their attention to this feature and asking that tellers in banks having the National forgery bonds be required to insist that applicants for certification of checks be identified as a means for preventing such frauds.

First Certified by Bank.

President Joyce in his statement says:

"During the last three months the National Surety Company has paid four claims to banks in New York city on account of forged checks, such checks being first certified by the bank and later deposited in another bank, from which latter bank the forger secured the cash.

"These losses were all due to the gross negligence on the part of the teller of the bank in certifying such checks, some of which were not on the regular form of check used by the customer, in some instances a rubber stamp being used when in fact the customer never used a rubber stamp, and, in each instance a check was used which was but an ordinary bank check—not the form or color of the check used by the customer of the bank.

"In one case the loss was $5,012.50 drawn on a trust company; another of $5,000, drawn on one of the largest banks in the city, and two others, one of $800 and one of $775, drawn on other banks in the city. The two small amounts were first secured and the forger evidently now realizes that he can easily secure large sums in this way.

Operations in Canada.

"This forger evidently bases his operations in Canada, for in the two large cases he went to Canada with the certified checks and obtained the funds. One puzzling feature is how the forger ascertains the names of the customers of banks having large balances, and in one instance he came within two of the serial number of the check.

"We urge that tellers be requested not to certify any checks of customers without thorough investigation being first made. A continuation of their failure to investigate the correctness of the signature on checks presented for certification will result in further heavy losses and will necessitate the present rates for forgery bonds being at least quadrupled."

◆

ANOTHER FARMERS BANK ARREST.

Mr. Claude H. Smith, former secretary-treasurer of the provincial directors of the Farmers Bank, was recently arrested in Vancouver on instructions from Toronto. He is charged with conspiracy in obtaining the bank's charter. Only Messrs. Nesbitt and Wishart remain unaccounted for, and the latter may return for trial.

◆

Branches of the Bank of Toronto have been opened in Saskatchewan at Pelly, Preeceville and Stener.

The convention of the Pacific Coast Association of Fire Chiefs and the British Columbia Fire Chiefs' Association was recently held in Vancouver, B.C.

MANY FIRES ARE DUE TO CARELESSNESS.

People Should be Educated to Dangers of Fire from Common Causes—Canada's Fire Loss is Heavy.

That the majority of fires are caused by carelessness and ignorance was the opinion expressed by Fire Chief White of Regina at the recent convention of Western Canada Firemen's Association at Calgary, Alta.

There are a great many little things cause fires such as putting hot ashes in wooden boxes, or up against the side of a building; allowing children to play with matches, or setting a lighted lamp under a curtain or some other flimsy material; all of which is nothing but carelessness.

The common causes of fires are those most commonly neglected, hence the result of hundreds of fires that might easily have been prevented by the exercise of the minimum of care, together with common sense.

Educate the People to Dangers of Fire.

If more was made of these common causes of fires, and were so impressed upon the minds of both young and old, the yearly loss of life and property in this country would be lessened at least 50 per cent. It ought to form the subject of frequent instruction in schools, and children should be taught how great is the danger of playing with fire in any shape, form or manner; how serious are the risks they run, through the careless use of matches, making bonfires and playing around them, and going away and leaving them burning, what are the perils in the indiscriminate use of fireworks of all kinds; to the use of coal oil in starting fires, placing hot ashes in wooden boxes, and leaving greasy or oily rags lying around, and other stuff that tends to generate spontaneous combustion.

Another great source of danger, and loss of life and property, is the habit some people have of going away and leaving small children alone in the house. They get some paper and start playing around the stove, their clothes catch fire, the fire department is called out, the chief is soon on deck, and he is told there are children in the building, he gives the word, the firemen go up the ladders, and rush into the building through blinding smoke and flame to the rescue of its occupants. Life is just as sweet to a fireman as to any other person, but he is only human and cannot live in a seething mass of flames even if it is to save a human life, and many a fireman has lost his life in trying to save the life or property of some other person, and then there are some people mean enough to say, that is what he is paid for.

The Way Gasoline is Generally Handled.

The way gasoline is generally handled is another source of danger, and we should have stricter laws for the handling of dangerous oils. It seems almost impossible to get people to understand how dangerous it is to handle gasoline, benzine, etc., where there is an open light of any kind, or a stove with a fire in it, or smoking a pipe or cigar. Dozens of cases of fires can be cited which were caused by gasoline, and in every case the result of carelessness.

Educate the people to use a little better judgment, and not be so careless and it will go a long way towards stopping so many fires, and most important of all, perhaps oe the means of saving a human life.

Building by-laws are to blame for the majority of big fires. They allow almost any kind of construction. They call for solid brick or other incombustible material for the outside walls, but the inside may be built of any old thing and in any old way. In a building four, five or six storeys high covering a large area, with open stairways elevator shafts, light wells, etc., there is not even a dividing wall in the whole building, or if there is a wall it is built of boards, or ordinary lath and plaster.

The architects could remedy this kind of construction considerably as a suggestion from them to a prospective builder about the advantage of fire-walls through the building with all openings protected by automatic fire doors, enclosed stairways, and elevators, would in the majority of cases be approved of by the owner.

These common defects have been alluded to, and not a day passing without a big fire occurring from one or all such causes, yet when a building is destroyed as sometimes happens, the blame is not laid where it should be, but on the local fire department, who are made to shoulder the responsibility.

Canada's Fire Loss is Heavy.

When people in general can be made to see that to follow the old course is bad business, and to understand in reality, that they are the sufferers from fires, rather than the insurance companies, that the insurance companies can recoup themselves by raising the rates, they will better comprehend how it is for their own advantage to guard against fires, and when they further realize that fire waste does not end with the direct loss, but that the indirect loss always affects not only the insurance companies, and those insured, but also others more or less intimately concerned with them, and, that therefore the whole community suffers to a greater or less extent, they should be more careful to guard fire itself, and to act up to the principle that prevention is better than the cure.

There is an immense loss of life and property in Canada from preventable causes. This is not because of the vastness of our population, but because of carelessness. During 1909-1910 the loss of life by fire in Canada was 475 lives, and this does not include the number that were dangerously or seriously injured by fire. The loss to goods and buildings, not including forest fires for 1910 was $10,233,332.

Everything possible should be done by the governments, insurance men and citizens to strengthen the movement for better building, by legislation, improved construction, and protection, and a greater sense of individual responsibility for the fire waste.

Individual Responsibility.

The following is a partial list of fires from carelessness in New York City during 1910. On nearly every fire chief's annual report you will find the same causes given for the starting of fires, and all because of carelessness and thoughtlessness on the part of some person:—Hot ashes igniting wood, 31; chimney fires, 483; children playing with matches, 357; carelessness with cigars and cigarettes, 825; carelessness in the use of gas, gas lights, etc., 549; upsetting or heat from coal oil lamps, 133; carelessness with matches, 1,022; stoves, stovepipes and furnaces, 516; coal oil or gasoline stoves upsetting or exploding, 62; spontaneous combustion from oily waste, 86; vapor of gasoline or benzine igniting, 240.

The loss on the above list of fires is about $2,000,000.

AUGUST'S COBALT ORE SHIPMENTS.

The following are the shipments of Cobalt ore during the month of August:—

Mine.	Tons.
Beaver	247.7
Boyd Gordon	1.2
Buffalo	96.0
Chambers-Ferland	64.0
Cobalt Lake	154.7
Cobalt Townsite	70.6
Colonial	23.7
Coniagas	292.8
Crown Reserve	96.8
Drummond	145.0
Green-Meehan	30.0
Hudson Bay	126.1
Kerr Lake	152.1
La Rose	494.1
McKinley-Darragh	319.2
Millerette	20.8
Nipissing	184.4
O'Brien	63.4
Right of Way	90.6
Temiskaming	70.2
Trethewey	24.4
	2,767.8

The shipments for July were 1,891.6 tons.

The vaults of the New Westminster, B.C., branch of the Bank of Montreal were blown open by burglars and $315,000 stolen.

The Bank of Toronto has opened branches at the following points: Pelly, Sask.; Preeceville, Sask.; Stenen, Sask.

Mr. Hughes Leduc, of Montreal, has entered action for $15,000 damages against Mr. Wm. S. Strachan. Mr. Leduc is acting on behalf of his minor daughter who was run down by an automobile. Peculiar interest is attached to the case because the company which insured the automobile owner against any accident which he might have, will defend Mr. Wm. Strachan. This is a new line of business arising since automobiles became numerous, and the first time such a case has been in the courts.

"GENERAL ACCIDENT" AFFAIRS

Are Resuming Normal Course—Mr. Norie Miller Has Returned to Scotland—Mr. Franklin J. Moore Gets a New Job.

Mr. F. Norie Miller, general manager of the General Accident Assurance Company of Perth, has sailed for Scotland from New York. During his stay in the United States and Canada, which was short, he ousted Mr. Franklin J. Moore, as the United States manager of the corporation, made Messrs. Claude Norie Miller and John A. Kelly the United States managers, received the resignation of Mr. C. H. Boyer, manager of the industrial department, received the resignations of Messrs. John Steinback, W. I. Mullers, J. J. Krist and three of Mr. Boyer's associates, and appointed Mr. J. J. Durance as the new Canadian manager.

Mr. Charles H. Boyer, manager of the industrial department of the corporation, preferred to terminate his contract with the corporation rather than have the corporation terminate its contract with him. Mr. Boyer appreciated the fact that it was necessary for the General Accident to comply with the requirements of the insurance departments, and that the easiest way out of the trouble was for him to resign.

Statement by Mr. Miller.

Before sailing for Scotland Mr. Miller gave out this statement:

"In consequence of the report of the commissioner of insurance for New York State with reference to the settlement of certain claims in the industrial department of our business, accompanied by the Earl of Dunmore, our chairman of directors, and Mr. James Simpson, one of our board and general counsel for the corporation, I have of late been engaged in an investigation into the conduct of our business in the United States.

"As agreed by the New York commissioner our financial position, with the large surplus which we show, is beyond criticism. We intend that our corporation shall continue to hold that position, and we are prepared to do everything that is necessary to keep our corporation in the very first rank of companies transacting insurance business here.

Dissatisfied With Mr. Moore.

"For a year or more, we have been dissatisfied with the management of Mr. Franklin J. Moore, whose services have now been dispensed with, and we have appointed as United States managers, with control of all departments, Mr. John A. Kelly, of New York, well known in insurance circles in all parts of the United States, and Mr. C. Norie Miller, who for the past five years has been manager of our company in Toronto. These gentlement, whose loyalty to the corporation is beyond doubt, possess also the executive ability, technical knowledge and conviction as to need for economy in administration which are adequate to make our commercial and liability departments successful in the future, as the industrial department has been in the past.

Have Deposed Mr. Boyer.

"Upon the demand of certain of the insurance commissioners, we have dismissed from our service those who were held to be directly responsible for unsatisfactory settlement of claims—and upon the same ground we gave, with great regret, our industrial manager, Mr. C. H. Boyer, notice of the termination of his agreement at the end of twelve months in accordance with its terms and conditions, in the meantime deposing him from the management of the department and all conduct of claims. Mr. Boyer, during the whole period of his service with us, has worked loyally in the interests of the corporation. Rather than accept such position, Mr. Boyer has preferred to terminate his service on five days' notice, which he may do in virtue of his agreement. The other recommendations of the commissioners (which have regard mainly to the settlement of claims) we are complying with also in their entirety, and all occasion for complaint against the corporation will thus be removed.

As to Claim Payments.

"In our investigation we have found that it is not any large proportion of the claims settled that have been in any way ungenerously dealt with, and that there are, as might be expected, a great number of cases where the assured have received payment in excess of the amount to which they were entitled, or where the payments made were altogether gratuitous.

"Our new managers will, I am satisfied, act up to what have been the principles of this company in transacting its business in every part of the world, namely: fair and generous treatment of its policyholders and liberal terms to its agents."

Mr. Franklin J. Moore states that his new position with the Preferred Accident Insurance Company will be that of general manager of the casualty departments, and that President Atwood continues as general manager of the company.

◆

VANCOUVER FIRE LOSS FOR AUGUST.

Although there were but 12 fires where damage occurred during August, the Vancouver Fire Department responded to a total of 70 alarms. Bush fires were responsible for 25 of these calls; there were 14 false alarms, 2 chimney fires, 2 calls outside of the city limits, 2 were smoke scares, 1 exhibition run and 12 were for small fires where no damage resulted. The estimated total loss for the month was $16,865; the loss covered by insurance was $13,625, leaving the loss above insurance paid $3,240. The total value of the property involved was $56,465. The total amount of hose laid to extinguish the fires was 21,550 feet, while 1,029 gallons of chemical were used. The most serious fire during the month occurred on August 24th, in Chinatown, when numbers 19-21-23 and 25 Canton Alley were gutted. The building, which was a three storey brick, with many wooden partitions, was a regular fire-trap, and six Chinamen were removed to the hospital suffering from burns and other injuries received at the fire; one of the victims named Loo Wong died shortly after his arrival at the hospital. The estimated damage at this fire was $9,700. A complete list of fires where damage occurred follows:—

1st. An express wagon on fire in the alley in the rear of the Province Theatre, 400 Block Hastings Street W., caused by a moving picture film catching fire and being thrown into the alley by the operator. Damage, $50.00. 3rd. Fire in the shed in rear of 1045 Hare Street, owned by Captain Sprague. The shed was stored full of furniture and both shed and contents were destroyed before the arrival of the fire apparatus. The shed in rear of 1049 was also slightly damaged. Damage, $1,575.00, partly covered by insurance. 4th. Small fire in front room at 847 Homer Street caused by clothes being hung too close to the gas stove. Building owned by Mr. Thornton and occupied by Mr. Henry. Damage, $209.00, covered by insurance. Automobile No. 1517 on fire at Garral and Hastings Street, caused by colliding with another auto and bursting the gasoline tank and the tail light igniting the gasoline. Damage, $400.00. 13th. Fire in a two-storey frame building at 629 Main Street, owned by Mr. Temple Godman and occupied by Mr. W. Black and used as an auction sales room and furnished rooms on the second floor. Cause of fire unknown. The blaze had a good hold on arrival of the fire apparatus and both building and contents suffered considerable damage. Damage, $2,368.00, covered by insurance. 15th. Automobile on fire at the corner of Hastings and Abbott Street, caused by back fire in the carbureter. Car owned by Mr. Woods. Damage, $10.00. 20th. Small fire in a gasoline launch at the Pacific Coast Mill wharf, caused by back fire in the carbureter. Boat owned by Mr. Snyder. Damage, $5.00. 23rd. Small fire in attic at 672 Homer Street, caused by a lighted cigarette being thrown in some clothes. Building owned by Mr. McCartney and occupied by Miss A. Morgan. Damage, $15.00, covered by insurance. 24th. Fire at 19-21-23 and 25 Canton Alley, Chinatown; cause unknown. The blaze had a good hold on arrival of the fire apparatus and it took some time to bring it under control. The wooden partitions and the interior of the building were a total loss but the outside brick walls were left intact. Building owned by Lum Yick Company and occupied by Chinese Rooms, etc. Estimated damage, $9,700, partly covered by insurance. 27th. Fire in gasoline launch at English Bay, caused by a gasoline explosion. Boat owned by Mr. F. W. Cunningham. Damage, $12.00, partly covered by insurance. Mr. Cunningham had his hands and face badly burned while trying to extinguish this fire and was taken to the hospital for treatment. Fire in vacant house at 231, 14th Avenue West, caused by defective chimney. The blaze spread to the attic and roof before it was extinguished. Building owned by Mr. Marshall. Damage, $715.00, covered by insurance. Fire in roof and attic at 723 Seymour Street, caused by flying sparks. Building occupied by Mrs. McMurdo and owned by Mr. J. F. Mahon. Damage, about $618.00, covered by insurance.

Three Toronto bond firms bid for the $107,186 4½ per cent. 20-year paving and sewer debentures of Walkerville, Ont. The offer of the Dominion Securities Corporation was accepted.

RECENT FIRES.

Monetary Times' Weekly Register of Fire Losses and Insurance.

The following particulars are gathered from first Press reports of conflagrations. Upon these are instituted further inquiries which appear under heading "Additional Information."

Colborne, Ont.—September 12th.—Residence of Mr. Wm. McNeal destroyed. Loss and origin unknown.

Bothwell, Ont.—September 16th.—Residence of Mr. Connor damaged. Loss unknown. Origin lightning.

Orangeville, Ont.—September 20th.—Orangeville Casket Factory destroyed. Loss, about $10,000. Origin, incendiarism.

Peterboro, Ont.—September 17th.—Plant of Peterboro Gas Company damaged. Loss about $100. Origin unknown.

Bewdley, Ont.—September 14th.—Sawmill owned by Mr. T. B. Chalk destroyed. Loss heavy, no insurance. Origin, lightning.

South Monaghan, Ont.—September 20th.—Barn of Mr. John Blakeley and contents destroyed. Loss about $3,000. Origin unknown.

Killarney, Man.—September 12th.—Schoolhouse at Fairdale midway destroyed, also two dogs. Loss unknown. Origin, lightning.

Woodstock, Ont.—September 14th.—Box car near Canadian Pacific Station destroyed. Loss unknown. Origin, supposed incendiarism.

Toronto, Ont.—September 17th.—Paper room at Union Station badly damaged. Loss about $300. Origin, supposed rats gnawing at matches.

Granton, Ont.—September 15th.—Plant of McCloud Milling Company destroyed, also coal sheds of Mr. J. Clatworthy. Loss about $10,000. Origin, supposed hot pulley.

Albermarle Township, Ont.—September 13th.—Bank barn and silo of Mr. C. E. Whicher, including season's crops, destroyed. Loss about $3,000, insurance, $1,500. Origin, supposed incendiarism.

Yarmouth, Ont.—September 17th.—Barn of Mr. Sherman Zavitz, fourth concession, destroyed, also one horse, ten hogs, 400 bushels oats, twenty tons hay, 175 bushels wheat and implements. Loss and origin unknown.

◆

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

Ridgetown, Ont.—The loss sustained by the Arlington Hotel was $200 on stock and $50 on buildings. No insurance.

◆

CLEARING HOUSE RETURNS.

The following are the figures for the Canadian Clearing Houses for the weeks ended September 22nd, 1910; September 14th, and September 21st, 1911, with percentage change:—

PROSPECTS OF AMERICAN POSTAL SAVINGS BANKS.

How Conditions in the United States Differ from Those in Canada—Two Per Cent. Allowed in United States, Against Three Per Cent. in the Dominion.

A recent estimate by a Washington official of the amount of deposits in the postal savings banks of the United States places it at about $2,000,000 as at the end of August. Beginning in the second half of September the third class post offices are to be designated as savings banks at the rate of 100 offices per day until they are exhausted. "This," says Mr. H. M. P. Eckardt in an interesting article in the New York Journal of Commerce, "insures a considerable increase in the amount of funds placed at the disposal of the Board of Trustees. And however much the bankers and others, interested in finance may dislike the invasion of the savings bank field by the Government, it will be necessary for them to give the most careful attention to the development of the new system.

Proportions of Postal Bank Funds.

"As yet there is room for much conjecture as to the proportions which the postal bank funds will attain. It would not be proper to be guided by the experience of other countries unless due allowance is made for the different conditions prevailing in those countries. Speaking broadly, the success of a system of postal banks depends upon the character or nature of the facilities for saving provided by other corporations or associations. In those countries where the people have been amply supplied with facilities for saving by other parties possessing and deserving their full confidence the postal banks have not made great headway. And on the other hand, the postal savings idea has had its greatest development in those countries wherein private initiative had not provided adequate or confidence-inspiring facilities for the convenience of the large and small communities.

"Then the amount of deposits accumulated in the savings banks, public and private, is largely dependent upon the habits of the people and upon the degree of prosperity enjoyed by them. When it is considered that the deposits of the postal banks in the United States have reached the neighborhood of $2,000,000 in less than seven months with the establishment of a comparatively small number of offices, it may be taken as practically certain that the funds deposited in the postal banks will in a very short time far exceed the total of deposits held by the postal banks in Canada. It will be worth while at this juncture for critics in the United States to take account of the progress of these governmental savings banks in the Dominion and of the circumstances that have operated to make them decline in importance in the past few years.

Canada's Postal Banks.

"Before it instituted the system of post office banks the Dominion Government had inaugurated a number of savings bank offices. These offices were styled 'Dominion Government Savings Banks' and an official was appointed as manager of each bank. The appointment of the managers was for life. When the post office banks were started some years afterward the Government decided to carry on the two systems of banks until the managers appointed for the first named banks should pass away.

"Accordingly, when one of these managers dies the savings bank office controlled by him is closed and its business transferred to the post office. Ultimately the whole business will fall to the post office banks. In considering the figures it is necessary to bulk the totals of the two systems in one sum. For example, at the end of July, 1911, the deposits in the post office banks were $42,956,536, and the deposits in the Government savings banks $14,479,227—the total held by the Government amounting to $57,435,763. The progress of the combination of the two Government banks is shown in the following table:—

Deposits in Canadian Post Office and Government Savings Banks.

July 31, 1911	$57,435,763	June 30, 1908	$66,985,274
June 30, 1911	57,276,258	Dec. 31, 1907	60,978,856
Dec. 31, 1910	56,408,943	Jan. 31, 1907	61,619,218
June 30, 1910	57,232,779	June 30, 1904	60,117,012
Dec. 31, 1909	57,121,717	Oct. 31, 1903	64,163,717
June 30, 1909	58,329,193	June 30, 1902	56,585,309
Dec. 31, 1908	59,050,953	Dec. 31, 1902	58,668,132

Why They Declined.

"These banks showed steady increase up to the end of October, 1903. Since then they have declined—the figures reported at the end of July, 1911, representing a fall of $6,700,000 from the high level obtaining in 1903. This decline was due undoubtedly to the great expansion of the branch systems of the commercial banks. In 1901 and 1902 the chartered banks began to put in force an active policy of establishing branches in the smaller towns and villages. In the last ten years they have doubled the number of their branches—most of the new branches being established in country villages and in the manufacturing, retail and residential districts of the larger cities. At all of these points the ordinary banks maintained savings departments, offering interest at 3 per cent. on sums of $1 and upward.

"Although their rate of interest was exactly the same as paid by the Government, the chartered banks invariably drew the Government's depositors away. The credit of the banks in many cases was practically equal to that of the Government, and money could be deposited with them and withdrawn again with much less bother and delay. Ignorant foreigners in the cities, who are afraid of every banker but the Government, timid women, a few suspicious and distrustful old farmers, now comprise a large portion of the Government's depositors.

"The chartered banks are well content to have this class of depositors on the Government books. They would be a source of peril or danger to the banks.

"It will be well, next, to mention a few of the circumstances which seem to indicate that the postal banks will have a different development in the United States. To be taken account of at the outset is the fact that the postal banks in the United States pay a rate of interest below the market rate. Two per cent. is allowed, as against 3 in Canada. The rate in Canada is equal to bank rate, but in the States it is well below bank rate. In fact, it is only half the rate allowed by many good savings banks. This should tend to check the flow of money into the post offices.

"But on the other hand, a depositor may withdraw money from the American post offices more expeditiously. The rules and regulations provide for the repayment of deposits practically on demand or on presentation of certificates. Under the Canadian system the depositor in the post office must wait till his application for funds is mailed to Ottawa and till a reply is received from there. It may take three or four days or longer to get his money. This difference counts heavily in favor of the American system. Next to be considered is the character of the facilities supplied by the ordinary banks.

"It must be said that, owing to the non-existence of branch banking, the facilities for saving in the workmen's quarters of the great cities and in the small country villages are not to be compared with the facilities provided by the Canadian banks. There are many places of respectable size in the country where no depositories exist—at least no respectable depositories. In this respect again the postal banks in the Republic should make a far better relative showing. In many little communities they will comprise the sole depository available. Next, there is the matter of the foreign population. It is very large in certain sections of the States. A large proportion of these foreigners will put no trust in any bank other than the Government. Their deposits alone should suffice to bring the funds in the postal banks to most important dimensions."

Mr. Eckardt contributes an interesting article to this week's issue of The Monetary Times on the Dominion note circulation, which in July for the first time exceeded $100,000,000.

FIVE EUROPEAN BANKS RAISE RATES.

Bank of England Protects Reserve and Bank of France Raises Rate for the First Time in Three Years.

	Rate from	Increased to
Bank of England	3	4
Bank of Germany	4	5
Bank of France	3	3½
Bank of Belgium	4½	5
Bank of Austria	4	5

The Bank of England raised its discount on Thursday, as generally expected, from 3 to 4 per cent., in order to protect its reserve against possible demands before the usual autumn gold shipments. The Bank of France raised its discount rate from 3 to 3½ per cent., the first change in three years. Three other banks in Europe raised their rates, as noted above.

Position of Bank of England.

The weekly statement of the Bank of England shows the following changes:

Total reserve, increased	£1,033,000
Circulation, decreased	425,000
Bullion, increased	608,028
Other securities, increased	2,699,000
Other deposits, increased	1,236,000
Public deposits, increased	1,963,000
Notes Reserve, increased	946,000
Government securities, decreased	500,000

The proportion of the bank's reserve to liability this week is 56.70 per cent. Last week it was 58.10 per cent.

Why Rate Was Raised.

One of many London cables states that despite the increased rate, money remains cheap and plentiful, and the Bank of England's stock of coin and bullion stands near $215,000,000. But a measure of protection was considered necessary in view of the continental political situation and the advanced bank rates in Europe.

The fact of London discount dealers having forced the private rates over the Bank's minimum of 3 per cent., causing an inundation of bills to the Bank of England, was another factor in the adoption of the higher minimum.

The previous change in the Bank of England's rate was in March, a decrease from 3½ to 3. In 1910, there were 9 changes, the rate being raised three times and lowered six times. The highest figure was 5 per cent. in October, and the lowest 3 per cent. in February and June.

The change in rate of the Imperial Bank of Germany was raised from 4 to 5 per cent. on Monday. The previous change was made on February 18, 1911, when the rate was reduced from 4½ to 4.

Comparison of Gold Stocks.

Comparison of the stocks of gold held by the principal European banks this week with the amounts owned a year ago brings out the fact that there have been increases at all the principal centres with the conspicuous exception of Paris, where a loss of $48,000,000, or from $675,000,000 to $627,000,000, has occurred. The Reichsbank makes the best showing in the matter of increase if the Russian Treasury be eliminated; the gain of Berlin has been $22,000,000. Curiously enough, the Imperial Bank of Germany and the Bank of England report exactly the same supply of the yellow metal, namely, $212,000,000.

Consols on Monday fell to the unprecedented low record of 76⅞ and a further fall is predicted. The big holders who are quietly unloading are compelled to scale price in order to find purchasers as no one wishes consols while so many better yields are obtainable from other securities.

◆

ROOSEVELT'S SON IN NEW BRUNSWICK.

The fact that Mr. Kermit Roosevelt, who accompanied his father, the ex-President, in his hunting expedition to Africa, is now in New Brunswick woods with companions and guides and a camera, indicates that the big game resources of that province will obtain the best advertisement they have ever received. The party are in the province to secure specimens of moose, caribou, beaver and other game for the Smithsonian Institute and National Museum at Washington. They will also secure views of wild life in New Brunswick forests.

WESTERN CANADA.

Crop and Transportation Facilities—A Plea for Mixed Farming—Record Sale of Fire Company Stock—In the Wheat Markets.

Monetary Times Office,
Winnipeg, September 19.

The weather in the West has not been favorable so far for threshing operations, and some anxiety is felt in regard to threshing and marketing the grain.

There has been too much rain and cold weather to enable the farmers making good progress. Considerable threshing has already been done, some reports say the crop is half threshed, but good weather is urgently needed from now on to enable the farmer to have his fall work finished in time.

A large quantity of new wheat is being marketed, and it is encouraging, taking into account adverse reports of frost and rust, to be able to state, that up to the present time grain inspector's returns show a better grade than was at first anticipated.

The bulk of the crop, however, will not begin to move until next month, and in November.

Not the least important in the marketing of the wheat crop is the transportation end of the business. Up to last year there was a deal of trouble caused by shortage of cars. This trouble became rather acute several years ago and the subject was one that entered largely into the hearings conducted by the Royal Commission appointed to inquire into conditions of the grain trade of the country. The following figures show how the railroads have taken the matter of grain transportation in hand:

Crop.	C.P.R.	C.N.R.	G.T.P.	G.N.	Total cars.
1910	61,895	30,675	6,968	1,199	100,737
1909	72,658	32,799	5,451	4,089	114,997
1908	60,751	21,851	1,819	3,536	87,957
1907	46,027	16,532	....	1,423	63,982
1906	62,740	18,767	....	....	81,507
1905	55,676	13,498	....	....	69,174
1904	32,238	8,158	....	....	40,396
1903	30,967	9,332	....	....	40,299
1902	43,325	11,670	....	....	54,995
1901	47,642	9,858	....	....	57,500

It is estimated that it will take 160,000 cars to carry this year's wheat to market. This is an increase over last year of about 50 per cent.

A Plea for Mixed Farming.

Western Canada will ultimately be a mixed farming country, and already many instances are noted where the old custom of growing wheat for year after year is giving way to stock raising and general mixed farming. The Monetary Times representative met a farmer in Alberta this spring who farmed 17,000 acres of land, and had upwards of 5,000 head of stock of different kinds. The farm was divided up into four parts, and over each division was a foreman who looked after his work and varied interests in his section, each going their rounds in automobiles. There are a number of colonization companies who go in more for mixed farming, and the Canadian Pacific Railway are doing good work in this line.

Mr. W. D. McBride writing of the West says: "One thing is certain. If the West to-day is attracting some attention in the world it will compel the world to take notice of its doings by 1931. Let us suppose that 170,000,000 of the 335,000,000 acres are under crop, and 100,000,000 is in wheat which yields a fair average of 20 bushels per acre. This will mean 2,000,000,000 bushels. Certainly we shall need all our railways to the east working at full pressure and an outlet on Hudson's Bay as well. In such a case also we might suppose, with reason, that 20,000,000 acres would be in oats, and at a fair average yield for the West this would mean another billion bushels of grain. The cereal and other crops and live stock which this West is capable of producing is such that there is no need of possible reason to be shown why our population should not reach many millions of people. It is inevitable, and in the best interests of the country, that agriculture shall become more diversified. Experts say growing wheat year after year is simply mining the soil, and they look to alfalfa and clover culture not only to restore something to the soil and the fertility taken from it, but also to feed countless herds of cattle as the prairie grasses for centuries fed the buffaloes in their millions. Such a change in agriculture may be expected also to be accompanied by urban growth and industrial development."

The Canada National Fire Insurance Company, of Winnipeg, have commenced business, and are beginning under circumstances that would be hard to improve upon. Over $2,000,000 in stock in the company has been subscribed within the past few months, and at a premium of fifteen per cent. On every share subscribed, $25 has been paid, and in numerous instances more than that amount. It is learned on good authority the actual cash received is over $525,000. From this it will be seen that this new Western company is a strong one from the start, payments are still coming in on account of capital, and before another twelve months goes by The Canada National's paid up capital will be $1,000,000.

The West has now assumed a position of wealth and the country as a whole has prospered so well, that it is now possible to offer a legitimate proposition with the above satisfactory result. What is of greatest interest in the success of the flotation of this company, is that the greater proportion of the stock has been taken up by Western men, and from the list of the company's shareholders it is obvious that the stock has been distributed in every centre of Western Canada.

Something like $1,000,000 has been taken up by the 100 holders. Eleven hold 200 shares or more, and thirty-five hold 100 shares each, and a very large number hold fifty shares, but there is a long list of shareholders who have purchased 10 shares, and these are located very largely in Western Canada. The fact of so many business men taking shares involving a liability of $10,000 and over is in itself an assurance that the company is in good hands.

Although it has only taken four or five months to successfully put on the market over $2,000,000 in stock, it is understood, from the best authority, that the actual expense of disposing of this stock has been less than 1½ per cent. of the amount subscribed. This will come as a surprise to many who have had experience in the placing of stock of fire insurance companies. It is no uncommon thing for stocks in companies to be offered at a premium of 10 per cent., the whole of which has been paid to the agent as a commission for selling the stock. This way of securing capital for fire insurance companies has been looked upon as economical. The promoters of this new company, however, has shown that the West has now arrived at a point when it is not necessary to pay heavy commissions for selling stock for any legitimate enterprise. This probably is the most interesting aspect of the accomplishment for which the promoters of the Canada National Fire have a right to feel proud.

In the Wheat Markets.

Markets were well supported during the past week, and the general grain situation is a strong one. The position of the market is aptly described as one of marking time, one of the influences in this direction being the reciprocity question. If the agreement is confirmed, and free entry of Canadian wheat to the United States follows, buyers look for a decline in prices, but in the event of rejection a sharp advance is looked for. Meantime the market continues more or less of a trading affair, the fluctuations being within a narrow range. Values fell off slightly towards the close of the week under the influence of bearish conditions, foreign crop news reporting a greatly improved outlook. Everything seems to point to a strong international situation in all grains and feeding stuffs later on.

Winnipeg Market Active.

On our local market trade was active, fluctuations following closely those in the United States markets. There was a splendid demand for all grades of cash wheat, but the supply continues short. It is suggested that farmers are holding back, awaiting higher prices, but in any case the crop movement is now assuming large proportions, and shipments should increase from now on. Expert inquiry was brisk, but bids as a rule were out of line, while trading in future deliveries was quite active at times. The grading of the new crop is better than expected, the inspections showing plenty of good milling wheat.

LARGE FIRE INSURANCE COMPANY

Must be experienced and capable of taking charge of Ontario business. Apply at once. Box 427, Monetary Times Office.

THE DEFEAT OF RECIPROCITY

Thoughtful Canadians, no matter which country rocked their cradles, do not gloat over the defeat of the government. They rejoice at the overthrow of reciprocity. The pilgrimage to Washington early this year was made with the best intent and the most harmless of motives. The fact remained that it was the thin end of the wedge for the cleavage of British connection. In our present economic, financial and general strength, it could mean little else, when matching our wits and commercial sinews and muscle against those of an enterprising and astute neighbor.

President Taft thoroughly recognized the vital importance of the issue. He was more frank than any man in North America in giving utterance to its import. He plainly stated that Canada was at the parting of the ways. On Thursday, Canada gave her reply, turning to its own land, its flag, and the British Empire. It was partly a matter of sentiment, but the occasion was one of those few in the world's history when sentiment helps to write the future pages of the historical tome.

In the matter of business, the country recognized that Great Britain is still our best market, and that the United States still have the privilege of lowering their tariff barriers should they desire our products, minus duty. When Canada becomes a commercial giant, as the United States now is, then will be the time to have an international conference at Washington. Two nations, speaking the same language and trading as two nations on one continent as we do, may be an economic curiosity, but unusual governing circumstances have made it not only a possibility, but also a practical permanency, producing prosperity.

Sir Wilfrid Laurier's name will go down to posterity as a great statesman and a gentleman. Had reciprocity not been the issue on Thursday, it is quite probable that his government would have been sustained. Indeed, an election would not have occurred, had reciprocity not appeared upon the Canadian horizon. Our ministers who journeyed to Washington were astonished at President Taft's offer of free trade. As a government seeking tariff concessions on behalf of the Western farmer, Sir Wilfrid and his colleagues felt bound to accept all that was possible of the trade offering from Washington. In other words, it was President Taft who unexpectedly forced reciprocity upon the Dominion. It was a master stroke of American diplomacy, and as an American, the occupant of the White House deserves great credit. The stroke was foiled by the voice of the Canadian people, a tribute to our loyalty, our independence, our faith in the future and the Empire's cause.

A few hours ago, the news was flashed to every part of Great Britain and its Dominions overseas. There is surely in the message an invitation to the Motherland to become more strenuous in its duty of knitting, commercially and otherwise, the integral parts of the British Empire.

Finally, we wish to see the farmers of Western Canada, the backbone of the country, work in harmony with the captains of industry. Their interests are common. Prosperity or adversity affects them both. East must not be set against West or West against East. Only in this way can we remain a united Canada, and in a united Canada, reside peace, plenty and prosperity.

NEW BRUNSWICK.

Sugar Refinery May be Established—Another Coal Company Incorporated—St. John Harbor Improvements.

St. John, N.B.,
September 19th.

(Staff Correspondence.)

Mr. D. McNicoll, general manager of the Canadian Pacific Railway, was in St. John last week, and stated that the company hoped to begin operations this fall to provide further terminal facilities on a large scale, on the property recently acquired from the city at West Saint John. Mr. McNicoll stated that a car ferry service across the Bay of Fundy between St. John and Digby, to connect with the Dominion Atlantic Railway service in Nova Scotia, was almost an assured thing.

It is expected, in connection with this train ferry that the terminus of the bay steamers will be removed to the head of the harbor, where the company are now preparing to erect extensive warehouses and railway yards. There is a wharf close to this property which would be available, and Mr. McNicoll stated that the company would be glad if it were possible for them to secure more property at a reasonable price and enlarge their yards at this point. Asked concerning the prospect for export and import trade through the port of St. John during the coming winter, Mr. McNicoll stated that a large volume of business was anticipated and preparations were being made with this end in view.

Sugar Refinery May be Established.

Mr. G. C. Cossar, of Glasgow, Scotland, who has a farm in Queen's County to which Scotch boys are brought to be converted into Canadian farmers, has just visited the farm. He states that he is much pleased with the manner in which the farm is conducted, and he believes that before long this colonization scheme will not be only of great benefit to the Scotch boys and to agriculture in New Brunswick, but that it will actually pay its way.

Mr. F. C. Durant, who was the promoter of the sugar refinery which was to be established in St. John, and for which a site was secured by arrangement with the city council and Federal government, has written that he hopes to succeed in financing the project. Nothing had been heard from him for so long that the citizens had concluded the enterprise had failed, and there was talk of having the site utilized for other manufacturing purposes. There is still considerable doubt as to the ability of Mr. Durant to finance his scheme.

On behalf of American capitalists, Mr. R. Max McCarty has taken an option for $26,000 on a property owned by the city at Green Head, where it is the intention to establish a cement manufacturing industry. A company will be organized to erect kilns on the property of the General Oil Shales Company in Alberta County, to manufacture builders' lime. Enormous deposits of good limestone have been uncovered, and the lime can be produced very cheaply, because the oil produced from the shale rock will prviode the necessary fuel, free of cost. The New Brunswick Portland Cement Company in the same neighborhood, are going ahead with their plans for the manufacture of cement on a large scale.

Another Coal Company Incorporated.

A company called the Newcastle Mines, Limited, with capital of $600,000, is seeking incorporation to operate a coal mine in Queen's County. Among the directors are Messrs. George B. Jacques and Henry Seligman, of New York, and Albert L. Schultz, of Pittsburg. The Rothwell Coal Company, which controls an area in the same district, has just installed a modern coal mining plant said to be superior to any in the province. Montreal capitalists are interested in this company, which expects to be in a position very soon to undertake large contracts. A survey is being made of the route of the proposed railway from Minto in the coal fields to Fredericton. This important branch will soon be constructed, giving the Coal fields of Queen's County connection with the whole Canadian Pacific Railway system, and thus opening wider markets.

A representative of the Franklin Baker Company, of Philadelphia, has been in communication with the St. John Board of Trade, relative to the conditions under which the company might establish a branch factory in St. John. They are manufacturers of shredded cocoanut, and canners of tropical fruits. Nothing definite in the way of a proposition has yet been submitted.—W. E. A.

NOW READY

"CAPITAL INVESTMENTS IN CANADA."

By FRED. W. FIELD

THE MONETARY TIMES

Price - - $2.50

The following are the chapters of the volume—

1. British investments in Canada.
2. American investments in Canada.
3. Foreign investments in Canada.
4. French investments in Canada.
5. German investments in Canada.
6. Other countries' investments in Canada.
7. Canadian Government borrowings in London.
8. Municipal borrowings in London.
9. The financing of Canadian railroads.
10. Industrial investments in Canada.
11. Investments in Canadian land and lumber.
12. Investments in Canadian mines.
13. Canadian banks, British and foreign capital.
14. Registered stock or bearer securities?
15. Canada's credit abroad.
16. Canadian securities and the British Trustee List.
17. New capital from immigration.
18. The relation of trade to borrowed money.

APPENDICES

1. Canada's share of British capital.
2. Is Canada over-borrowing?
3. Canada and International finance.
4. Editorial comment respecting British, American and foreign capital investments in Canada.
5. List of Canadian flotations in London January, 1905 to April, 1911.

THREE INDEXES

The volume is very completely indexed, one index being devoted to personal names, another to companies and institutions, and a third to subjects.

Nearly three hundred companies, Canadian, British and foreign, are referred to, while numerous authorities on the subject of investment are quoted.

"This book will appeal to a wide circle of investors."—*Cambridge Independent Press.*

"An interesting and valuable publication, carefully edited and compiled, and the most comprehensive work yet published in the field of Canadian finance."—*Toronto Mail and Empire.*

"It contains a carefully compiled list of investments by the various countries of the world in Canada."—*Toronto Star.*

"It will prove of great value, and is the first contribution on the subject, dealing specifically with Canada, to the business man's library shelves."—*London Financial News.*

BIDS BY WIRE.

Last week a reputable bond firm made a bid by telegram for Ottawa's $589,000 debentures. The rules for bidding called for the tenders to be made on a specified form. The telegraphed tender, therefore, was not accepted. It was naturally a temptation to the city to award their bond issue to the house which was late in making its offer, and which had to do so over the wire. If this bid had been accepted, the city would have gained $2,532.70, for it was a fraction of a point higher than the figure quoted by the successful tenderer. While the financial house which telegraphed its bid was acting quite honestly and in the best of intentions, undoubtedly the attitude of the Ottawa authorities was strictly ethical and correct. Wrongdoing in this particular case was not intended, but, as all bond houses and municipal officers know, telegraphed tenders have before now been the result of secret knowledge of bids already in the hands of the city or town inviting offers. Too much caution cannot be observed in the matter of receiving bids and making the awards.

The town of Dunnville, Ontario, has also followed a good precedent. It was offering $10,000 of high school debentures. Nine tenders had been received and nothing was heard of them. In response to an inquiry by a bond house, the reply from the town was that the offers had been received, but, as it had been impossible to obtain a quorum of the town council, the bids for the time being were "all under lock and key, and will be held as a sacred trust, unopened."

These are incidents which have helped to build Canadian municipal credit, and which will assist in maintaining it.

◆

SEVEN BOND HOUSES AND TWO BANKS

Bid for Ottawa's Large Debenture Issue — List of Tenders.

Ottawa has sold $589,000 of its 4 per cent. 40-year and 20-year bonds, the price realized being 97.57 and Messrs. Brouse, Mitchell & Company, Toronto, being the successful tenderers.

The Dominion Bond Company, Toronto, offered 98 for the bonds in a telegram tender. As the specifications called for the tenders to be made on a specified form this offer was not accepted. The price obtained is .44 higher than the last sale brought, the price then being 97.13.

List of Tenders.

The following are the tenders for the $515,000 city of Ottawa bonds, bearing 4 per cent. interest, the first named, the highest, being the successful bid:—

Brouse, Mitchell & Company, Toronto, 97.57.
Montreal City and District Savings Bank, 97.15.
Ontario Securities Corporation, Toronto, 96.07.
C. Meredith & Company, Limited, Montreal, 96.00.
Wood, Gundy & Company, Toronto, 95.55.
Dominion Securities Corporation, Toronto, 95.43.
Bank of Ottawa, 95.10.
National Finance Company, Toronto, 95.08.

For the city of Ottawa bonds, amounting to $73,500 for public school purposes, the following tenders were received, the first named being the successful one:

Brouse, Mitchell & Company, Toronto, 97.57.
G. A. Stimson & Company, Toronto, 97.50.
Wood, Gundy & Company, Toronto, 96.089.
C. Meredith & Company, Montreal, 96.00.
Dominion Securities Corporation, Toronto, 95.91.
National Finance Company, Limited, Toronto, 93.48.

The amount of $515,000 is made up of the following estimates of expenditure:—Parks, $10,000; fire alarm, $9,000; relief sewer, $42,000; registry office, $7,000; fire stations $50,000; Lady Grey Hospital $2,500; Lansdowne Park, $50,000; Sussex Street driveway, $75,000; west end drainage, $220,000; waterworks, $50,000.

Owing to the price received some of the estimates will have to be cut down slightly. As the tender for the west end drainage only amounts to about $210,000 most of the departments will receive nearly the full amount.

Ottawa 4 per cent. bonds amounting to £156,900 were sold in London in May 1909, at 103.

BOND TENDERS INVITED.

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials.

Chippawa, Ont.—Until September 30th, for $11,000 5 per cent. 30-year debentures. W. A. Myer, village clerk.

Grimsby, Ont.—The ratepayers have authorized a by-law to loan $10,000 to the Radiant Electrical Company.

Raymond, Alta.—Waterworks extensions amounting to $12,000 have been recommended and approved by the town council.

Deloraine, Man.—Until October 26th for $6,000 20-year local improvement debentures. D. L. Livingston, secretary-treasurer.

Outremont, Que.—Until October 2nd for $250,000 4½ per cent. town bonds, due November 1st, 1953. J. Kruse, secretary-treasurer.

Wilkie, Sask.—Tenders are invited for the $35,000 waterworks and electric light debentures. Mr. T. A. Dinsley, secretary-treasurer.

Diamond City, Alta.—Until September 25th, for $6,000 6 per cent. 20-year school debentures. R. Laughton, secretary-treasurer.

Calgary R.C. S.D. No. 1, Alta.—Until October 23rd, for $60,000 30-year 4½ per cent. debentures. J. McCaffary, secretary-treasurer.

Village of Hastings, Ont.—Until September 30th, tenders are invited for $6,000 5 per cent. 20-year debentures. Mr. Alex. Wilson, clerk.

Macdonald Municipality, Man.—Until September 27th for $4,000 20-year 4 per cent. debentures, and $6,862.50 20-year debentures. H. Grills, secretary-treasurer, Sanford.

Luseland, Sask.—Until October 15 for $8,000 15-year debentures. J. H. Wilson, secretary-treasurer. (Official advertisement appears on another page.)

Govan, Sask.—Bond tenders invited for $5,000 15-year 6 per cent. fire debentures. A. Graham, secretary-treasurer. (Official advertisement appears on another page.)

Galt, Ont.—Until October 2nd for $10,000 30-year 4 per cent. waterworks debentures. A. M. Edwards, chairman, Finance Committee. (Official advertisement appears on another page.)

Regina, Sask.—Until October 16th for $1,032,800 4½ per cent. 20 and 40-year debentures. A. J. McPherson, city commissioner. (Official advertisement appears on another page.)

Hardisty, Alta.—Until October 31st for $3,000 6 per cent. 7-year sidewalk and street debentures. A. Mursell, secretary-treasurer. (Official advertisement appears on another page.)

Clinton, Ont.—Until October 5th, for $5,000 30-year waterworks, and $6,000 20-year road debentures. D. L. Macpherson, treasurer. (Official advertisement appears on another page).

Moose Jaw, Sask.—Until September 30th, for $125,000 4½ per cent. 30-year school debentures. C. Kempton, secretary-treasurer, Moose Jaw Public School Board, District No. 1. (Official advertisement appears on another page).

Bathurst, N.B.—Until September 30th tenders will be received for the following:—$5,000 5 per cent. 40-years, and $5,500 5 per cent. 40-year school debentures. Mr. B. C. Mullins, secretary-treasurer. (Official advertisement appears on another page.)

◆

DEBENTURES AWARDED.

Village of Hawarden, Sask.—$4,000 6 per cent., 10 years, to Messrs. Nay & James, Regina.

Village of Springside, Sask.—$1,500 6 per cent., 15 years, to Messrs. Nay & James, Regina.

Ottawa, Ont.—$589,000 4 per cent., 20 and 40 years, to Messrs. Brouse, Mitchell & Company, Toronto.

Prince Albert S. D., Sask.—$9,500 5 per cent., 30 instalment, to Messrs. Dominion Securities Corporation, Toronto.

Small Schools, Alberta and Saskatchewan.—$9,800 6-7 per cent., 10 years, to Messrs. Nay & James, Regina.

◆

A contract has been given by the Grand Trunk Pacific Railway to the Canadian Locomotive Company of Kingston, Ontario, for the construction of 25 locomotives. The Canadian Locomotive Company is engaged in filling contracts for locomotives received by them from the Canadian Pacific Railway, the Grand Trunk Pacific Railway, the Canadian Northern Railway, the Intercolonial Railway and the Algoma Central Railway.

RAILROAD AND COMPANY EARNINGS.

The net earnings of the Regina municipal railway for August, inclusive of the 29th and 30th of July, amount to $4,390.02. The number of passengers carried was 151,104, and the cars travelled 12,815 miles. The railway's gross earnings were $7,718.50, while the operating expenses amounted to $3,328.48. The gross earnings per car mile were $60.23, and the net earnings per car mile, $34.26.

The Lake Superior Corporation has issued its annual report for year ending June 30th, 1911. It shows that the yearly operations of the subsidiary companies resulted in a surplus of $1,200,216, subject to depreciation and other charges. The output of the steel plant compares with 1910 as follows:—

	1910.	1911.
Pig-iron	$53,528	$170,359
Steel rails	201,615	208,283

The Camaguey Company earnings for August show an increase in gross of 17 per cent., while the gain in net is nearly 28 per cent. over the same month of the previous year. Gross for the eight months ended August 31st shows an advance of 14.58 per cent. over the corresponding period of last year, and net is 29.39 in excess of the figures for the similar period of the year preceding.

Following are the figures in detail:—

	1910.	1911.	Inc.
Gross	$11,749	$13,751	$2,002
Net	5,691	7,267	1,576

The Cuba Railway Company earnings for July were as follows:—

	1911.	1910.	Inc. or dec.
July gross	$262,666	$233,441	+ $29,225
Net	119,352	118,433	+ 919
Surplus after chgs.	59,227	81,766	— 22,539

AN INDUSTRY WITH GREAT POSSIBILITIES
Canada has such tremendous wheat fields that it is recognized that the larger cereal and milling companies should reflect, to the greatest extent, the growth and prosperity of the country.
Among such companies is the CANADIAN CEREAL & MILLING COMPANY, LTD., the 6% First Mortgage Sinking Fund Gold Bonds of which we are offering for a limited period at Par and interest to yield 6%.
We would be pleased to give you any particulars you may desire regarding the company.

BOND HOUSES AND "MUNICIPALS."

(Continued from Page 1320.)

no bids will be received. Usually he will err only when a local bank, for advertising or political purposes, bids above the market.

As to a Small Issue.

"We will say that the rural County of X—— in New York State proposes at the present time to issue $20,000 4¼ per cent. bonds maturing serially from date $2,000 each year. This item may not interest the experienced buyer. In the first place, the issue is a small one—hardly worth printing circulars for. Secondly, bonds in New York State may not be sold by municipalities below par: in this case a 4.25 per cent. basis. The best basis that a bond house can possibly expect to get for this bond in this market is 4.15 per cent. But the difference in a 4¼ per cent. bond between a 4.25 and a 4.15 per cent. basis is .474 or $4.74. This gross profit is or should be too narrow to draw out any bids.

"Another aspect of the unintelligent offering of municipal loans is presented in the following illustration. Some time ago a municipality within gunshot of New York awarded an issue of bonds to various bidders at a price several hundred dollars less than the offer of another house for "all or none." Their action caused some comment at the time, although it was perfectly legal and apparently in good faith. In the light of that experience what shall we say of the stewardship of their officials when last month the same mistake was repeated? The municipality made three awards at the sale, amounting to $153,262.76, whereas if the bonds had been awarded in one lot to the highest bidder the citizens would have received $153,589.96. Was not this $327.20 difference worth saving? A slightly different method of advertising the sale would have accomplished the result.

"What knowledge and experience may have been accumulated hitherto by the bondhouses has not up to this writing found its way into print. The principles of municipal bond investment may be thoroughly explored, but they are yet unpublished. We have at least reached this stage, that the bond buyers of the big New York banking houses will refuse municipal loans they believe unsound. They have common grounds for their faith. About three years ago another community that is almost within rifle shot of the city offered a loan in New York without success. It was finally placed with a Western house that has since failed. The bonds have defaulted, but nevertheless the community has just offered another loan. It would have been interesting to note what houses would dare to purchase the bonds. It is reassuring to state that no bids were received."

◆

ELECTION RESULTS BY PROVINCES.

The following are the election results:—

	Conservative and Nationalist.	Liberal.
Ontario	71	14
Nova Scotia	8	10
Quebec	25	38
New Brunswick	5	8
Prince Edward Island	2	2
Manitoba	10	0
Saskatchewan	2	8
Alberta	2	5
British Columbia	5	2
Total	130	87

The Conservative majority is therefore 43, with four seats to hear from.

DIVIDEND NOTICES.

THE SHAWINIGAN WATER AND POWER COMPANY.

Dividend Notice.

Notice is hereby given that a dividend of one and one-quarter per cent. (1¼%) has been declared upon the Common Stock of the Shawinigan Water & Power Company, for the quarter ending September 30th, 1911, payable on October 20th, 1911, to shareholders of record at the close of business on October 7th.

By order of the Board,

W. S. HART,
Montreal, September 11th, 1911. Secretary.

LA ROSE CONSOLIDATED MINES COMPANY.

165 Broadway, New York, September 18th, 1911.

The Board of Directors has to-day declared a regular quarterly dividend of TWO PER CENT., payable October 20th, 1911, to shareholders of record as of September 30th, 1911. Transfer books will close September 30th, 1911, and reopen October 18th, 1911.

P. C. PFEIFFER, Treasurer.

Automobile Liability
Teams Liability
Elevator Liability and Industrial Insurance

OUR MOTTO: Prompt and Just Treatment of Claims.

"The Unexpected Always Happens."

Who is there but has had brought home to him the truth of the above statement? It is always the accident that was least looked for that actually does occur. Nobody is immune from accident. Your experience and observation confirm that fact.

WISE men prepare for such emergencies by carrying an accident policy. The WISEST men see to it that that policy is an Employers' Liability Combination Policy, issued by

Resources - - - - $2,000,000
Claims Paid (no Claims in Suit or Dispute) 2,280,000
BONDS OF SURETYSHIP

This Company, established in 1872, was the pioneer in introducing Corporate suretyship on the American Continent, and its bonds are accepted by the leading Banking, Railway, Commercial and Financial Corporations in the United States and Canada, many of which guarantee with it their entire staff.

FIDELITY GUARANTEE BONDS

Personal Accidents Policies, including 10 per cent. Bonus accumulations.

Sickness Policies—covering any and every sickness.

THE DOMINION OF CANADA GUARANTEE & ACCIDENT INSURANCE CO., TORONTO

BRITISH WOOD TRADE.

The labor troubles have affected the wood trade of Great Britain to such a degree as to cause the August deliveries of timber and lumber to fall off 28 per cent. from those of August, 1910. In Liverpool, where the trouble was the most acute, the decreased delivery reached 50 per cent. In some directions prices are easier. First class wavey pine is in light stock and values rule high. The demand for first-class Canadian wood is continued into September, for we hear of orders received this week. Price deals were not active last month, values are unchanged. Elm met with fair consumption and is finely held.

Of New Brunswick and Nova Scotia spruce and pine deals the imports to the Mersey were 15,780 standards compared with 13,410 same month last year, and prices are barely maintained. Stocks in Liverpool and Manchester at 1st ult. were 29,320 standards against 21,540, the labor troubles having prevented movement. Ocean freights have advanced considerably. Birch is in fair supply at prices maintained. British Columbia and Oregon pine in slack demand, the moderate supply is fairly held. Pitch pine stocks of logs are reduced, only 76,000 cubic feet having arrived against 246,000 a year ago; values unchanged.

◆

A concern to manufacture undertakers' supplies will locate at Belle River, Ont.

The Central Ontario Railway from Coe Hill to Picton may come under the control of the Canadian Northern Railway on October 1st.

MINERAL PRODUCTION OF CANADA.

The total value of the mineral production of Canada during the past year exceeded $105,000,000, an increase of $13,209,517 over that of the preceding year, an increase of 14 per cent., according to a preliminary report by the Department of Mines. There has been an increased production in nearly every province, the only decline being shown by New Brunswick. Ontario leads with 40 per cent. of the total for Canada.

In silver production alone, there was an increase of 16 per cent., chiefly credited to the Cobalt and adjacent districts. Ontario's silver output amounted to $15,711,513.

◆

Two Toronto girls were seriously burned recently through an explosion of turpentine. The young women were boiling some staining varnish on a gas stove. When the varnish came to the boil they poured in some turpentine which caused an explosion and when they tried to subdue the flames their clothing ignited.

NEW SHAWINIGAN STOCK.

The Shawinigan Water and Power Company has decided to issue $1,000,000 new capital stock, in addition to the $9,000,000 already issued. The new stock will be offered at 108, per share, on the basis of one new share for each nine shares now held. The right to subscribe will expire on October 30th, 1911.

Mr. J. E. Aldred, president of the company, states that this amount is necessary to cover a part of the cost of the new power development which has been in the course of construction during the past year and a half.

◆

Vancouver Island coal properties, laying between Nanaimo and Ladysmith, embracing 2,400 acres, and estimated to contain approximately 30,000,000 tons, have been consolidated into an operating proposition by Mr. Andrew Laidlaw, of Spokane, and Mr. J. D. Farrell, second vice-president and general manager of the Second Division of Oregon and Washington railway.

The Prudential Investment Co., Ltd.

Head Office - VANCOUVER, B.C.

Authorized Capital	$2,000,000.
Subscribed Capital	$1,090,000.

Assets of over a Million Dollars.

Paid up Capital	$780,000.00.
Reserve	$250,000.00.

Owing to the fact that the ordinary stock of the company has all been subscribed, the $1,000,000 of 7 per cent. cumulative first preference stock is now being placed at par $100. The ordinary stock now changes hands at $160 per share.

The 7 per cent. preference stock will yield an income 50 per cent. greater than equally secure stocks or other financial securities usually listed on the exchanges, and is available on very favorable terms. Full particulars may be obtained by addressing Dept. 1, National Finance Co., Ltd., Vancouver, B.C.; or at Toronto, Ont.; Ottawa, Ont.; Halifax, N.S.; St. John, N.B.; Winnipeg, Man.; Regina, Sask.; or Calgary, Alta.

Paid-up Capital	$1,825,000
Assets	4,000,000
Reserve	520,000

MONEY TO LOAN ON IMPROVED CITY AND TOWN PROPERTY

4% allowed on deposits of $1 and upwards

5% allowed on debentures of $100 or over, issued for terms of from 3 to ten years

CAPITAL STOCK 7% INVESTMENT

The Company, having disposed of its Capital Stock some years ago, has, therefore, none for sale, but the stock may be purchased through the Toronto, Winnipeg and Vancouver Stock Exchanges, at prices ranging from $128 to $130 per share.

The last seven half-yearly dividends have been at the rate of **9 per cent. per annum,** so that, at the current prices, the **Investment** will **net 7 per cent.**

The Company will be pleased to furnish prospective purchasers with its Financial Statement or other information bearing on the Company, and, if so desired, the Company will purchase the Stock for the investor through the Stock Exchange, or privately, at the current prices.

Since its inception the Company has enjoyed uninterrupted prosperity, and has taken a very active part in the development of the West. With the rapid growth of Western Canada, the demand for money is so great that the present profitable rates of interest will be maintained for years to come; and with such a desirable field for loaning operations, combined with a progressive management, the price of the Company's Stock should continue to advance, and with the prevailing high dividends, the Stock of this Company will undoubtedly be in great demand by those who desire a safe and profitable investment.

WINNIPEG

The Supply City of Western Canada

Offers greater combined advantages to manufacturers and capitalists than any city in Canada. The remarkable development of this great central market is creating an unprecedented demand for home industries.

Winnipeg Wants these Manufacturers

and offers cheap power, cheap sites, low taxation, varied raw materials, the best of labor conditions, unexcelled railway facilities, and the earnest support of a community that recognizes the importance of its industries. Over a billion dollars produced by the farms of Western Canada in the past five years, and this with only eight per cent. of the available land under cultivation. Consider what this development makes possible for the Western manufacturer.

YOUR OPPORTUNITY.

Get Close to this Market.

Special openings for manufacturing farm and agricultural implements, including gas and steam tractors; paper and strawboard mills, men's clothing, ladies' ready-to-wear goods, food stuffs, starch factory, boots and shoes, felt wear, metal goods, wire nail factory, hardware specialties, flax and jute works, beet sugar factory, elevator machinery, electrical fixtures and appliances of all kinds; automobiles and commercial motor carriages, home and office furniture, leather goods, cereal foods, dairy supplies, building materials, stoves, ranges, furnaces and heating plants, and twenty-five other smaller lines.

Special reports prepared and mailed free of charge on the manufacturing possibilities of any of these lines of industries, by addressing

THE WATEROUS ROAD ROLLER

Is built essentially to suit Canadian road-building conditions. With over 100 Rollers in use in every part of the Dominion, the Waterous Roller is daily more firmly establishing its right to the title—

"The Canadian Good Roads Pioneer"

Built in three sizes—10, 12 and 15 ton. Carries a double cylinder, double crank engine, a quick-steaming locomotive type boiler of large capacity, has two speeds for fast and slow work, and all gearing cut from the solid steel. Supplied with all standard engine and boiler fittings.

If there is no Waterous Roller in your vicinity, write for our twenty-page catalogue, No. 301, or better still, visit the Brantford Works and see the Roller being built and tested—a practical demonstration that is its best selling argument.

Head Office—VICTORIA, B.C. Reference= Merchants Bank of Canada. **Branch Office—VANCOUVER, B.C.**

LEGAL NOTICE

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 12th day of September, 1911, incorporating James Steller Lovell, accountant; Robert Gowans, William George Flood and Robert Musgrave Coates, solicitors' clerks; Samuel Goodman Crowell, George Hamilton Cassels, John Francis Lash and Robert Cecil Hamilton Cassels, barristers-at-law, and Samuel Maximilian Mehr, student-at-law, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To purchase, lease or acquire lands and interests therein and water powers and water privileges and to develop therefrom any power, electrical or any energy and to use the same in connection with their business and to transmit the same, and sell, lease or dispose of lands or interests therein or power and to enter into working arrangements with other companies, persons, firms or corporations for the use thereof and to establish, operate and maintain any electric, gas or other lighting, heating or other plant and to sell and dispose of electric, gas or power light, heat and power; provided always that the rights and privileges hereby conferred upon the company to generate, sell and dispose of electrical energy for light, heat and power when exercised outside of the property of the company shall be subject to all provincial and municipal laws and regulations in that behalf; (b) To sink wells and shafts, and to make, build, construct, erect, lay down and maintain reservoirs, water works, cisterns, dams, culverts, main and other pipes and appliances and to execute and do all other works and things necessary or convenient for obtaining, storing, selling, delivering, measuring and distributing water for the purpose of irrigation and for the creation, maintenance or development of hydraulic, electrical or other mechanical power or for any other purpose of the company; (c) To construct, maintain, alter, make, work and operate on the property of the company, and for the purposes of the company, or on property controlled by the company, reservoirs, dams, flumes, race and other ways, water powers, aqueducts, wells, roads, piers, wharves, buildings, shops, stamping mills, and other works and machinery, plant and electrical and other appliances of every description; (d) To acquire by purchase or otherwise and hold lands, timber limits or licenses, water lots, water falls, water privileges or concessions, and powers and rights and interests therein, and to build upon, develop, irrigate, cultivate, farm, settle and otherwise improve and utilize the same, and to lease, sell or otherwise deal with or dispose of the same, and generally to carry on the business of a land and land improvement and irrigation company; (e) To aid and assist by way of bonus, advances of money or otherwise, with or without security, settlers and intending settlers, upon any lands belonging to or sold by the company, and generally to promote the settlement of said lands; (f) To establish stores for the sale of groceries, provisions and general merchandise to settlers and intending settlers and others upon lands belonging to or sold by the company, or in the neighborhood of such lands, and generally to carry on the business of general storekeepers and merchants; (g) To construct, execute, own and carry on all descriptions of works which may be necessary or useful for the purposes of the company; (h) To manufacture and deal in logs, lumber, timber, wood, metal and all articles into the manufacture of which wood or metal enters, and all kinds of natural products and by-products thereof; (i) To purchase or otherwise acquire, hold, pledge, sell or otherwise dispose of shares or stock, bonds, debentures or other securities in any other corporation, notwithstanding the provisions of Section 44 of the said Act; (j) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the business or objects of the company and necessary to enable the company to profitably carry on its undertaking; (k) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on, or any business similar thereto, or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, rights or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered shares of the company's capital stock, whether subscribed for or not as fully paid and non-assessable, or the company's bonds; (l) From time to time to apply for, purchase or acquire by assignment, transfer or otherwise, and to exercise, carry out and enjoy any statute, ordinance, order, license, power, authority, franchise, concession, right or privilege which any Government or authorities, supreme, municipal or local, or any corporation or other public body, may be empowered to enact, make or grant, and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses thereof; (m) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (n) To raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise, any corporation in the capital stock of which the company holds shares, or with which it may have business relations, and to act as employee, agent or manager of any such corporation or to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (o) To procure the company to be registered and recognized in any foreign country, and to designate persons therein, according to the laws of such foreign country, to represent this company and to accept service for and on behalf of this company of any process or suit; (p) To lease, sell or otherwise dispose of the property and assets of the company or any part thereof for such consideration as the company may deem fit, including shares, debentures or securities of any company; (q) To amalgamate with any other company having objects similar to those of this company; (r) To do all acts and exercise powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking; (s) To do all or any of the above things and as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Barcelona Traction Light and Power Company, Limited," with a capital stock of forty million dollars divided into 400,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 15th day of September, 1911.

THOMAS MULVEY,
12-2 Under-Secretary of State.

Dated at Toronto this 19th day of September, A.D. 1911.

Blake, Lash, Anglin & Cassels,
Solicitors for
BARCELONA TRACTION LIGHT AND POWER COMPANY, LIMITED.

Mr. J. H. Hanna, Calgary, has been appointed the city passenger agent for the Grand Trunk Pacific Railway.

The Hamilton Saw Work have established a branch in Vancouver. This firm recently made a shipment of ten tons of saws to the Ocean Falls Company in this province.

The overthrow of the Spanish monarch was insured against at Lloyd's this week, when the high rate of twenty-five guineas (approximately $126) per cent. was being paid for the policies.

At the first annual meeting of the Canadian Oil Producing and Refining Company, in London, the chairman said the original capital had suffered considerable diminution, owing to the forfeiture of some shares because the shareholders were unable to pay. When all the refinery units were working, however, there was little doubt that there would be considerable profit.

The International Portland Cement Company, headed by J. S. Irwin, of Ottawa, Ont., has acquired a 40-acre site at Mollwood, three miles east of Spokane, where the Fuller Engineering Company of Allentown, Pa., will erect a plant costing $1,000,000. Construction work will begin early in October, and it is planned to have the mills in operation early the coming summer. The plant, which is to be equipped with modern machinery, will employ 250 to 300 men and have a daily output of 2,000 barrels.

FINANCIAL AND REAL ESTATE

TO INVESTORS

Brandon, Manitoba

and surrounding territory presents to Intending Investors, large and small, the best possible opportunity at the present time (now) to realize large returns quickly.

Brandon Real Estate has never been boomed as other Western cities have, consequently prices are low comparatively.

With hundreds of thousands of dollars being spent in paving and other civic improvements.

With a million dollars' worth of contracts already let for private enterprises this year, Brandon is sure to forge ahead and increase greatly.

Brandon is the place for the conservative investor.

Intrinsic Value of Investments

When considering investments one should study closely the intrinsic value. When the intrinsic value is much greater than the price one can be sure of profit. When the intrinsic value is less than the price then speculation may increase the selling value, but there is no assurance.

British Columbia wild lands, which under cultivation will return from $50 to $500 per acre in crops, may now be bought from $10 to $15 per acre, depending on quality and amount of purchase. Some of our clients have coal and timber licenses which are worth considering on the above theory regarding intrinsic value

This company acts solely as agent—buys and sells for customers but has nothing of its own to dispose of.

INTERNATIONAL NICKEL'S VOTING TRUST.

The circular which asks the stockholders of the International Nickel Company to co-operate in forming a voting trust to keep the management in the hands of the present executive committee, has not yet been mailed, as voting trust certificates have not been received from the printer, but according to those in a position to know the success of the plan is already assured. The present management feels, in view of the great showing of International Nickel in the last two years, that it is justified in asking for a five year continuation of the present control.

Earnings of the International Nickel during the last two years have shown up extraordinarily. Net earnings available for dividends for the year ended March 31st last, totalled $3,775,600, and $2,087,528 in the preceding year. The balance on the common last year was $3,240,852, or 27.98 per cent. and for the previous year $1,532,783, or 17.27 per cent. This year is expected to show nearly $3,500,000 on the common, or approximately 30 per cent.

At the next meeting of the directors the common stock, which is now paying 10 per cent., is expected to be placed on a 16 per cent. per annum basis and there is talk of further increasing the rate to a 20 per cent. basis after the opening of the new year.

The month of August was the largest month in the company's history and even should there be a severe decline in the steel business it would be a long time, owing to the specialized nature of the company's business, before such a falling off would be reflected in the affairs of the Nickel Company.

It is likely that within another year the capitalization will be increased in the same manner that the remaining $2,670,000 authorized, but unissued common stock was offered pro rata to the stockholders in July, 1910. As the common stock is practically all outstanding a further stock increase would require the consent of shareholders.

"Opportunities in Nova Scotia"

Is the name of a little booklet which we are distributing among those Nova Scotians who are anxious that friends in other countries should know what opportunities for profitable investment are offered in this grand old Province of ours.

Agriculture, Fisheries, Mining, Forests, Manufacturies, Sport Fishing and Hunting are in turn dealt with.

This little book contains a lot of information regarding Nova Scotia which we are particularly desirous of placing before investors and business men likely to be interested in such subjects. If you have any such friends we shall be very glad if you will send us their names and addresses.

INVESTMENT AND LOAN COMPANIES

THE MAXIMUM OF SECURITY

Real Estate Mortgages afford investors the maximum of security. More than twenty-seven million dollars of this Corporation's investments are in first mortgages in carefully selected. improved real estate securities. It is in these that the funds entrusted to our care by our Debentureholders are invested, thus assuring

Safety of Principal and Certainty of Interest.

That the conservative investor of small means may be afforded the advantages of this most desirable security. we issue our debentures in sums of one hundred dollars and upwards. Don't wait till you have accumulated more money. If you have a hundred dollars to invest, write us for particulars.

GERMAN TRADE WITH CANADA.

The reciprocity negotiations between Canada and the United States were closely watched by Germany. When the proposals were first made, the German government communicated with the Washington authorities as to how far the "favored nations" treaties would allow them to partake of the Canadian-American reciprocity agreement. Germany was informed that the matter was still academic, and that the application was a trifle too premature. This week a Berlin despatch states that exporters in general, and the timber and paper trades in particular, "accuse the Washington authorities of bad faith in regard to Customs duties. It is alleged that the provisions of the Canadian reciprocity agreement, although the proposal has now been beaten in Canada, are being partially enforced. Canadian timber and other commodities, it is charged, are being admitted into the United States at less duties than corresponding German wares, although the agreement between this country and the United States of February, 1910, gave Germany unlimited most-favored-nation terms."

With reciprocity defeated, it is quite likely that the German authorities will seek better trade terms with Canada. Since the removal of the surtax about a year ago, German trade with the Dominion has increased rapidly. This is illustrated in the following figures:—

	1909.	1910.
Total exports	$1,476,552	$ 2,501,191
Total imports	6,001,454	7,958,264
Total trade	$7,478,006	$10,459,455

While the final figures for Germany's total foreign trade in 1910 have been published, final figures of the trade between Germany and the various countries have not yet appeared.

The value, in 1,000 marks, of the total export and import, excluding precious metals, for the last five years, is as follows:—

	Import.	Export.
1906	8,021,890	6,359,029
1907	8,743,976	6,845,224
1908	7,664,021	6,398,572
1909	8,520,125	6,592,242
1910	8,934,126	7,474,661

These corrected figures exceed the provisional official estimates, given in a preliminary report, as far as the export is concerned, by 7,500,000 marks, and as far as the import is concerned by as much as 325,000,000 marks. These discrepancies are explained by the fact that in the official preliminary publication the provisional totals are, as far as the export is concerned, to a very limited extent only calculated upon the basis of the values established for the preceding year, but entirely so far as the imports are concerned. The steady growth of the German foreign trade may be exemplified by the fact that in 1880 the value of the import amounted to only 2,803,400,000 marks, and that of the export to only 2,923,400,000 marks. The two values together (foreign trade as such) amounted in 1880 to 5,700,000,000 marks, but for the year 1910 they amount to 16,400,000,000 marks. The rise in the three decades, therefore, amounts to almost 200 per cent.

We may expect to hear from Germany in the near future. Its competitors for Canada's import trade will do well to keep an eye on that enterprising and progressive nation.

COMBINE LEGISLATION.

It is somewhat of a coincidence that anti-combine legislation should have been levelled at the United Shoe Machinery Corporation almost simultaneously in Canada and in the United States. The first complaint brought under Canada's Combines Investigation Act late last year was against that corporation, which is a branch of the American concern, while last week the parent company was indicted for alleged violation of the Sherman anti-trust Act. The case against the company will probably be heard in the American courts during the winter, while we may expect every day to hear that the Canadian board of investigation has commenced its sittings. The United Shoe Company leases its machines, and shoe manufacturers who use them pay royalties, which, the company's president states, average less than 2 2-3 cents per pair of shoes in the manufacture of all types and grades. The highest royalty paid on the most expensive shoe is less than 5¼ cents per pair.

Mr. S. W. Winslow, the president of the United Shoe Machinery Company, has issued a lengthy statement to the public in defence of the company's operations. In view of the Canadian interest in the matter, it is printed elsewhere in this issue. He says that the object of the consolidation of the three companies of which the United Shoe Machinery Company was formed was not to destroy competition. "The purchase was to reduce the cost of production of the machines, to improve the quality of service furnished without increasing the cost to the shoe manufacturer, and to give to each manufacturer who might wish it an opportunity to get from a single company under these improved conditions such of these machines as he might need in that department of his factory in which soles and heels are attached to uppers—the machines in what is known as the bottoming-room."

Speaking of the beneficial results of the consolidation and the company methods, both to the shoe manufacturer and the consumer, these have been manifest, he adds, and continues: "By leasing machines to all manufacturers, large and small, on the same terms the company enables the small manufacturer to have a credit with every leather dealer, previously entirely unknown; to establish himself in business, and continue business without tying up a large and perhaps a prohibitive amount of capital in his machinery, conscious that he is under no disadvantage in competing with the large manufacturer, who perhaps might feel better able to tie up a portion of his capital in costly machinery, subject to more rapid depreciation than the machinery employed in any other large industry."

The Canadian board of investigation may conduct their enquiry without undue haste. It should prove an easier matter for Canada to deal with the complaint against the branch company after the United States has dealt with the indictment against the parent company.

OF THE LONDON MARKET.

What is the condition of the London market in view of contemplated Canadian flotations there? The answer appears to be one of little encouragement. The best authorities overseas speak of a lengthy crisis, which becomes more perplexing as it unfolds. The situation, at first purely financial, was regarded as a natural reaction from over-speculation. With the Morocco controversy there entered the international element, followed by a succession of serious strikes and uncertainty at many points in continental Europe.

While these causes have aggravated the situation, the primary cause has, perhaps, the greatest meaning for Canada. The origin of the unsettled and unsatisfactory financial state in London, seems to have been in the over-production of new securities and the artificial inflation of old ones. There is a warning therein for Canadian financiers and promoters. Our security issues being prepared for the London market should be only of the best type, and at present as few as possible. That these facts are recognized is apparent by the failure of the city of Montreal to receive any bids from financial houses for its $7,000,000 worth of bonds. To maintain our credit in London and to prevent sacrifices, considerable caution is necessary on our part.

SMALL CHANGE.

That Toronto wholesale merchants have confidence in Northern Ontario is evident from the attitude they have taken regarding the business failures which resulted from the recent Porcupine fire. Almost all the storekeepers who were forced to assign on account of the conflagration were allowed a cash balance and given sufficient credit to re-establish their businesses.

* * * *

There is no longer possibility of the Canadian four dollar bill being mistaken for an one dollar bill as the design has been improved. On the new bill the word "four" has been printed in large type across the top in both corners, while on the back the same change is duplicated, a word being printed across the figure 4 at both ends of the bill. The Lord and Lady Minto series is being used on these bills.

* * * *

Many stories are being circulated as a result of the legislative attack upon the trusts of the United States. A New York paper says it is understood that the United States Steel Corporation, fearing further action against it on the part of the government, will dissolve the trust as it now exists, and come to Canada, where a new company will take out a charter and become a holding company under the Canadian law of the various divisions of the trust in the United States. The despatch adds that if they can get the legislation, or even the charter under the general act, which they desire in Canada, other trusts will follow their example. We scarcely dare to speculate upon the change likely to be made in our economic geography should United States combines find a haven in Canadian charters.

UNITED SHOE MACHINERY COMPANY.

Laws of Canada and the United States Are Levelled at Big Corporation—Company's President Issues Lengthy Statement.

The United Shoe Machinery Company is being assailed both in the United States and in Canada. In the neighboring republic, the company was indicted last week for alleged violation of the Sherman Anti-Trust Act. One indictment charges a monopoly of the trade in shoe machinery and a conspiracy to monopolize the same. The trial will take place some time during the winter months.

A complaint under the Combines Investigation Act of Canada was lodged against the United Shoe Machinery Company of Canada, a branch of the United States corporation, late in 1910. The company was alleged by Quebec complainants to be acting in restraint of trade. Judge Cannon of Quebec granted a request for an inquiry under the law. The application went through a maze of technical protests to the highest court, the privy council. A writ of prohibition, effective until September 15th, was obtained and that alone restrained the board of investigation from proceeding under the order of Judge Cannon. The Canadian board of investigation will probably begin its hearings shortly.

In the meantime President Sidney W. Winslow of the United Shoe Machinery Company, Boston, in view of the indictments in the United States, has issued a statement to the public in defence of the company's operations. He says in part:—

"I feel that the public should be made acquainted with the following facts:

"1. The item of machinery is the only item of cost in the manufacture of shoes which is lower to-day than in 1899, when the United Shoe Machinery Company was formed.

As to Royalties Paid.

"2. The company has lowered many of its charges and has never increased royalty charges or charges for materials furnished manufacturers. The initial cost of the machinery equipment of a shoe factory is lower to-day than ever before.

"3. The average royalties paid by a shoe manufacturer for the use of all machines furnished by the company in the manufacture of all types and grades of shoes is less than 2⅔ cents per pair of shoes. This includes the Goodyear welt shoes, on which the highest royalty paid on the most expensive shoe is less than 5¼ cents per pair.

"4. Goodyear welt shoes constitute less than one-third of the total annual production of the United States. On 164,000,000 pairs of shoes out of the total annual production, including Goodyear turn shoes, McKay shoes, Standard screw and loose-nailed shoes, the amount of royalty received will average less than 1⅓ cents per pair, and this is all the company receives for the manufacture, installation, use, care, and service in keeping the machines in running order and for instruction of operatives.

Three Hundred Machines.

"5. The company now makes over three hundred different machines, some of which are leased to manufacturers, many of which are sold outright and most of which can be either leased or purchased as the shoe manufacturer may prefer.

"6. The United Shoe Machinery Company has many millions invested in machines in shoe factories, and its returns on this investment are not as large, proportionately, as the returns received by the successful shoe manufacturers on their investment.

"7. Of the 7,106 individual holders of the stock of the corporation 4,325 are residents of Massachusetts and more than half the stockholders are women.

"8. The operator's on the company's machines in shoe factories are much more regularly employed and receive higher wages than under the conditions existing prior to the formation of the company.

Notes of Wages Paid.

"9. The wages paid at our Beverly factory average higher than those paid in any other factory of equal size in Massachusetts. According to the official report of the Massachusetts State Bureau of Statistics, the City of Beverly held first place in Massachusetts in 1908 with an average annual wage of $640.17. The average of the Beverly factory exceeds that of the city. The weekly wages in 1910 averaged $15.75.

"10. The provisions for the comfort, safety, health and happiness of the employes at the Beverly factory are not excelled and perhaps not equalled at any other factory in the world.

"11. The company's business has always been carried on frankly and above board.

"The nature of our leases has been a matter of public knowledge for years. The leases have been printed in the public press over and over again. The well-known fact that the public are not familiar with the technical details has given certain critics of the company an opportunity to misrepresent the real facts.

"We have given the Department of Justice every facility for conducting its investigation.

"The company has been advised from the day of its organization by able and high-minded counsel, who have been thoroughly familiar with every page of its history and in whose judgment its course has not in any way been opposed to the letter or the spirit of the law.

"We have never believed that we were doing business in violation of the law and the action of the Grand Jury has not changed our opinion on that point.

Consolidation of Three Companies.

"12. The three companies doing business in 1899, by the consolidation of which the United Shoe Machinery Company was formed, were not competing companies. The principal machines which each made did not interfere with the machines made by any other of the three companies.

"The Goodyear Shoe Machine Company chiefly made machines for sewing the sole to the upper in welt shoes and various auxiliary machines which helped to perfect the shoe. The Consolidated & McKay Lasting Machine Company made machines for lasting a shoe—an entirely distinct operation. The McKay Shoe Machinery Company made machines for attaching soles and heels by metallic fastenings and furnished material for that purpose.

Object of Consolidation.

"The object of the consolidation was not to destroy competition. The purchase was to reduce the cost of production of the machines, to improve the quality of service furnished without increasing the cost to the shoe manufacturer and to give to each manufacturer who might wish it an opportunity to get from a single company under these improved conditions such of these machines as he might need in that department of his factory in which soles and heels are attached to uppers—the machines in what is known as the bottoming room.

"13. The beneficial results of the consolidation and the company's methods, both to the shoe manufacturer and the consumer, have been manifest. By leasing machines to all manufacturers, large and small, on the same terms the company enables the small manufacturer to have a credit with every leather dealer, previously entirely unknown; to establish himself in business and continue business without tying up a large and perhaps a prohibitive amount of capital in his machinery, conscious that he is under no disadvantage in competing with the large manufacturer, who perhaps might feel better able to tie up a portion of his capital in costly machinery, subject to more rapid depreciation than the machinery employed in any other large industry.

Competition in Manufacturing.

"Competition in the shoe manufacturing industry in consequence is more free than in any other extensive industry. There are over 1,200 individual concerns in the United States.

"Under the royalty system a shoe manufacturer can start in business with a modest capital, and although shoes are made on a close margin of profit, the capital being in liquid form can be turned several times a year, thus giving the manufacturer a substantial profit on the total volume of business while giving the consumer the benefit of the narrow margin of profit on each pair of shoes. There is no other large industry of which this is true.

"The watchword of the company has been efficiency—efficiency in the manufacture of machinery, efficiency in inventing and improving machinery, efficiency in keeping that machinery in the best possible operating condition.

To Keep Machines Repaired.

"It is and has long been the policy of the company to maintain at its own expense a large force of skilled mechanics whose business and duty it is to attend and keep in perfect repair all machines leased to manufacturers of shoes.

"The shoe manufacturer cannot practically give his attention to the manufacture or repair of machines. He must center his efforts, skill and energy on making shoes. For him this company furnishes, keeps in repair and improves all the machinery necessary for making shoes.

"It gives practically without charge all the benefits of research, study and invention in the art of shoe machinery."

WESTERN CANADA.

New Field For Canadian Cattle—Western Stocks Are Active—In The Wheat Markets.

Monetary Times Office.
Winnipeg, September 26th, 1911.

It would be an extravagant statement to say that everybody is satisfied with the result of the election, but it is not beyond the truth to say that men of both parties are generally better suited with the fact that the result leaves no room for doubt and the certainty rather than questioning, is the only thing in order. Business men know the base upon which their affairs will rest and the course of trade will resume its wonted flow.

The weather is still unfavorable for the western farmer to get on with his work, and while it is likely that October will be a good month, some anxiety is being felt. Business men in Winnipeg and in the East are preparing for one of the biggest years in their history.

New Field for Canadian Cattle.

There has been considerable activity on the local stock exchange during the past few weeks. South African Warrants which have been selling at a high figure took a slight reaction last week, and the selling price now stands at 850-860. The Canadian Fire Insurance Company, while not active, has been in demand, and 130 was bid for this stock at the close of the week with none offering. Great West Permanent continues to be an active seller, and shares change hands almost every day. Western Canada Flour has been in demand, and 125 was offered, but holders are asking 130.

Brokers state that there has been quite a renewed activity in Canadian railroad stocks since the reciprocity agreement failed to carry, and this will undoubtedly continue to be the case.

Mr. C. N. Bell, secretary of the Winnipeg board of trade, has received a letter from Mr. Phillipp Roy, Trade-Commissioner General for Canada in Paris, which relates to a probable field in France for the sale of Canadian cattle. The letter is as follows:—"I have met several business men here who seem to think that because of a very dry season and a disease which has been acting badly with cattle this year, France would have to import cattle extensively. Owing to an immediate demand for meat, fat animals will have to be imported.

"I am told, although not officially, that the government, for these reasons, will probably reduce the import duty on fat as well as on lean animals for this year, and it has occurred to me that it might be a splendid opportunity for our Canadian exporters to get better known in this great market, and establish here a new line of business which might remain in the future.

"If we can be of any assistance to the Canadian exporters, either by securing further information for them or otherwise, we are entirely at their disposal."

Industrial Bureau Busy.

Interest in Winnipeg is clearly marked by the fact that the Industrial Bureau of this city is receiving an average of seventy-five inquiries a day from different parts of the world—but chiefly from the United States and Great Britain—asking for information about Winnipeg as a city for the location of new business enterprises, and about Western Canada as a field for trade development. The Bureau is able to quote facts and figures which show that there is no better field in the world for this sort of expansion and growth, and very few that are anything like as good. Inquiry so extensive as this and answers so accurate and convincing, must have great effect upon the growth of Winnipeg during the next few months.

Among the facts cited by the Industrial Bureau, are those relating to growth of the banking business in the West. This is set forth clearly in the following figures:—

	Branches in				
Year.	Man.	Sask.		Alta.	Total.
1901	52	....	*19	....	71
1902	53	....	*23	....	76
1903	64	....	*42	....	106
1904	86	....	*74	....	160
1905	90	39	...	41	170
1906	104	48	...	49	201
1907	146	91	...	77	314
1908	161	116	...	89	366
1909	164	131	...	97	392
1910	171	187	...	140	498
1911	187	306	...	209	702

*North-West Territories.

The course of the market was somewhat checked pending the issue of the Dominion election, but the defeat of reciprocity furnished sensational markets in the United States. In Winnipeg the result had no particular effect except that of extreme nervousness, but across the border prices took a big jump. On Thursday the spread between Winnipeg May and Minneapolis May was 4½c., on the following day it had mounted to 11½ cents, while other months also proportionately advanced. The decision of the ballots led to heavy selling on our local market, and a generally wide mixed trade, with good demand for spot cash wheat. Contrary to the experience in the United States our prices ruled slightly lower than before the election. Export houses were free sellers, but values were scarcely in line for an extensive business. It will probably be some days before our market becomes normal in tone. After a time the usual factors of supply and demand will influence the course of international markets.

Shortage of Milling Wheat in United States.

With regard to the position in the States consequent on the shutting out of free Canadian wheat, it is pointed out that the expectancy of the passing of the measure was an important factor in shaping values, and that farmers parted with their winter wheat early and in liberal quantities. The United States, it is stated, is now on a domestic basis. The shutting out of Canadian wheat, on which the great milling interests of the spring wheat states were counting for the season, makes the United States domestic situation a strong one, and the mills, deprived of choice Canadian wheat, will be forced to buy hard winter wheat wherever it can be secured. American reports speak of the pronounced bullish sentiment now prevailing, and in view of the bullish nature of the world's statistical situation, suggest that the market will undoubtedly work higher.

◆

PERSONAL.

Mr. James Findlay, of Glasgow, Scotland, has been appointed fire chief of the North Vancouver, B.C., fire department.

Mr. J. C. Hyndman, of the International Harvester Company, Brandon, Man., has been appointed to the company's agency at Paris, France.

Mr. Robert H. Arkell, of head office staff of the Merchants Bank of Canada, Montreal, has been appointed manager of the Stratford, Ont., branch.

Mr. J. F. Jones, Canadian divisional manager of the International Harvester Company, was in Brandon, Man., recently, arranging for the transfer of the business to Mr. E. D. Gus, the newly-appointed general agent.

Mr. Borgi Eyford, who the past eighteen years has been in the employ of the United States Government as immigration inspector between Pembina, N.D., and Winnipeg, Man., has resigned.

The Duke and Duchess of Connaught will sail for Canada about October 7th, when His Royal Highness will succeed Earl Grey as Governor-General of Canada. The following will be the staff accompanying them: Major H. C. Lowther (Scots Guards), military secretary; Captain T. Rivers Bulkeley (Scots Guards), controller of the household and equerry; Captain W. Long (Scots Greys), A.D.C.; Captain H. C. Buller (Rifle Brigade), A.D.C.; and Captain E. S. Worthington (R.A.M.C.), medical officer.

◆

BANK OF EGYPT SUSPENDS PAYMENT.

A Canadian Press dispatch on Tuesday stated that the Bank of Egypt, Limited, has suspended payment. In a notice to depositors, the directors say that advices from Egypt make it apparent that the bank cannot provide sufficient cash to meet current obligations, and the company will file a liquidation petition. The suspension came as a big surprise, although at the last annual meeting of the bank it was announced that the profits had decreased because of the bad cotton crop and keen competition. It is expected that the institution will be able to meet its liabilities.

The Bank of Egypt Company was incorporated in 1856 and registered as limited in 1887. The authorized capital is £1,500,000. R. L. Barclay is chairman of the board of directors, which includes Lord Grenfell and Lord Rathmore. From 1899 to 1909, inclusive, the bank paid annual dividends from 12 to 18 per cent. In July, 1910, four per cent. was paid on the account of that year.

NEW INCORPORATIONS.

Six Companies Have Capitals of a Million Dollars and Over —Seventy-two New Concerns.

Seventy-two companies were incorporated last week, the total capitalization of which amounts to $13,829,600.

Six companies have capitals of a million dollars and over, the largest being the Rose Gold Mines, $3,000,000, and head office in Toronto. The National Live Stock Exchange, Montreal, has been capitalized at $2,000,000, while the following have capitals of $1,000,000: Ontario Gold and Silver Mines, Toronto; American Porcupine Gold Mining Company, Toronto; Queenston Heights Spring Water Company, Niagara Falls, Ont., and the Merchants Trust Company, Calgary, Alta.

Real estate and financial concerns are again in evidence in this week's list of companies granted charters.

The Vancouver Harbor and Dock Extension Company, with capital of $10,000,000 and head office in Vancouver, B.C., was recently incorporated. This company has been invested with wide powers, including the carrying on of a general shipping business, and will undertake large harbor developments on the coast. Mr. C. F. Pretty is the promoter of the company, and the directors are identified with Pretty's Timber Exchange, Limited, recently chartered. Considerable British capital has been interested in the concern.

The following is a list of charters granted during the past week. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Medicine Hat, Alta.—Scottish Securities, $10,000.

Shand Siding, Sask.—Maple Leaf Mines, $50,000.

Lacombe, Alta.—Lacombe Drug Company, $10,000.

Clover Bar, Alta.—Great West Coal Company, $150,000.

Mountainview, Alta.—Smith Bros. Company, $23,000.

Regina, Sask.—Illinois-Saskatchewan Land Company, $100,000.

Purple Springs, Alta.—Aspern Beach Realty Company, $10,000.

Redcliff,. Alta. — Redcliff Clay Products Company, $100,000.

Pleasington, Alta.—Pleasington Threshing Company, $6,600.

Castor, Alta.—United Farmers' Elevator Company, of Castor, $10,000

Lougheed, Alta. — Farmers' Elevator Company, of Lougheed, $10,000.

Athabasca Landing, Alta.—Athabasca Light, Heat and Power Company, $10,000.

Hamilton, Ont.—Thomas Morris, $40,000. T. S. Morris, W. M. McClemont, W. J. Squibb.

Brantford, Ont.—Joseph Baker's, $50,000. J. A. Baker, London; J. E. Baker, R. E. Baker.

Berlin, Ont.—Niagara Pressed Brick Company, $40,000. C. Asmussen, C. Bramm, A. Asmussen.

Grimsby, Ont.—Radiant Electric Company, $250,000. F. E. Hewitt, M. R. Riddell, S. Castrucci.

Cobalt, Ont.—Mines Water Supply Company, $40,000. J. W. Mahon, J. D. O'Brien, W. G. Atkin.

Berthier, Que.—Papeteries de Berthier, $50,000. O. Lavallee, M. A. L. Aubin, J. O. Daviault.

Hull, Que.—Hull Driving Club, $40,000. C. H. Putnan, P P. Salter, Ottawa; J. B. Galarneau, Hull.

Saskatoon, Sask.—Oddfellow Temple Company, $50,000. Clinkskills, $35,000. Electra Syndicate, $5,000.

Moose Jaw, Sask.—Moose Jaw Grain Exchange, $10,000. Moose Jaw Land and Investment Company, $60,000.

Megantic, Que.—Lake Megantic Realty Company, $100,000. W. G. Craig, D. Murray, W. H. Craig, Kingston.

Walkerville, Ont.—Dominion Paint Works, $50,000. F. W. Davis, New York; T. R. Wyles, Chicago; P. D. Whatley, Detroit.

Niagara Falls, Ont.—Queenston Heights Spring Water Company, $1,000,000. G. W. Clarke, H. F. Upper, F. W. Griffiths.

Ottawa, Ont.—Ottawa Uplands, $100,000. J. F. Orde, M. G. Powell, N. W. Lyle. Consolidated Securities Corporation, $100,000. J. W. Anderson, J. Gray, R. J. Simpson.

Quebec, Que.—Compagnie Caron & Jacquiers, $45,000. L. Eudore Caron, J. V. Jacquiers, Lyons, France; Hon. P. A. Choquette, Quebec. Compagnie d'Amiante de Thetford Centre, $500,000. L. P. Pelletier, N. Belleau, E. Baillargeon.

Edmonton, Alta.—Belgian Investment Corporation of Canada, $100,000. Athabasca Townsites, $20,000. Lewis Bros. Cafe Company, $3,000. Edmonton Cold Storage Company, $150,000. British American Transcontinental Coal and Timber Company, $100,000. Canada Locomobile Company, $10,000. Allan Haynes, $10,000.

Calgary, Alta.—A. B. Cushing Lumber Company, $100,000. South-East Land Company, $250,000. Merchants Trust Company, $1,000,000. Western Canada Supplies Company, $60,000. Macleod Security Company, $18,000. Stone and Clay Company, $100,000. North-West Gas Appliance Company, $50,000. Bertram J. Vine Company, $60,000. Donnelly, Watson & Brown, $500,000. Calgary Collieries, $300,000.

Montreal.—Canada Silk Company, $100,000. W. F. Chipman, R. O. McMurty, F. G. Bush. National Live Stock Exchange, $2,000,000. L. A. David, H. J. Elliott, C. J. E. Charbonneau. West Valley Land Company, $70,000. E. R. Decary, J. B. Peloquin, E. N. Hebert. Montreal Vehicular Traffic Company, $10,000. G. R. Starke, W. A. Clark, W. Walker. Utilities, $20,000. W. Johnson, A. R. Johnson, L. H. Boyd. Arbours Hotel Company, $49,000. H. A. Letourneau, A. Richard, A. Ecrement.

Winnipeg, Man.—Cadillac Motor Sales Company, $50,000. A. Anderson, W. L. Garland, E. T. Sirett. Manitoba White Granite Pressed Brick Company, $125,000. L. F. Willan, J. A. Gowley, J. Smith. Selkirk Securities Company, $100,000. C. H. Locke, C. A. Crawley, H. Dunk. Northern Nursery Company, $60,000. F. L. Gillilan, H. K. Gillilan, J. F. Coughlin. Toronto Plaster Company, $150,000. H. W. Cox, W. J. Sheppard, H. A. Carman. C. E. Miller Company, $20,000. C. E. Miller, E. C. Duffin, F. W. Dudley. South Winnipeg Realty Company, $50,000. F. W. Sparling, M. A. Law, P. J. Proctor.

Toronto.—Canadian Union Land Company, $150,000. S. C. Smoke, W. C. Chisholm, J. G. Smith. Paper Bottle and Package Company, $200,000. W. A. Mackenzie, C. Swabey, J. N. Forrest. Toronto Brick Company, $600,000. R. H. Parmenter, A. J. Thomson, W. S. Morlock. Ross Gold Mines, $3,000,000. J. M. Ferguson, E. V. O'Sullivan, J. F Coughlin. Toronto Plaster Company, $150,000. H. W. Calkins, D. E. Kennedy, Mrs. K. R. Calkins. Tecumseh Hockey Club, $15,000. C. L. Querrie, E. A. Williams, Toronto; A. R. Hall, Montreal. Ontario Gold and Silver Mines, $1,000,000. E. G. McMillan, W. B. Sturrup, J. R. Corkery. American Porcupine Gold Mining Company, $1,000,000. J. M. Godfrey, T. N. Phelan, T. B. Malone. Toronto Hockey Club, $15,000. P. J. Quinn, Toronto; F. G. Robinson, A. R. Hall, Montreal. Security Transfer and Registration Company, $100,000. J. W. Bain, G. B. Strathy, F. R. MacKelcan. Gibson, Taylor, Strathy & Company, $50,000. J. C. Gibson, A. B. Taylor, Toronto; E. K. Strathy, Winnipeg.

◆

MUNICIPAL ASSESSMENT NOTES.

According to the estimate of the Assessment Department, which will issue official returns to-day, Brantford's population has reached 23,700, an increase of 1,500 over that of last year.

The assessment of the city of Toronto for the coming year has been compiled. It shows a total valuation of $359,945,000, which is an increase of $59,193,000 over the figures of the current year. The details for the coming year are:

Land	$154,346,000
Buildings	153,024,000
Business	38,443,000
Income	14,131,000
Total	$359,945,000
Total for 1911	$306,751,000

The population is estimated at 374,672, an increase over the past year of 32,681.

◆

The St. Catharines Broom and Brush Company, of St. Catharines, Ont., may locate a factory in Calgary, Alta.

The Northwestern National Insurance Company, of Milwaukee, Wis., has obtained a license authorizing it to carry on a general fire insurance business in Manitoba.

The United States is being gradually aroused on the subject of the fire risk. The Western Union Association has sent out 250,000 pamphlets, suggesting simple methods of fire prevention and improvement of hazards. A "Fire Prevention Day" has been officially proclaimed in Indiana, Minnesota, Michigan, Montana, Nebraska, and South Dakota.

CANADIAN FLOTATIONS ABROAD.

Preparations Being Made to Make New Issues in London—Period of Rest Has Nearly Expired.

Already we are apprised of activity in the London market in new Canadian flotations. There has been a long period of rest, from July to the present date, with only one Canadian issue made overseas. This was 20,000 shares of £1 each of the Kamloops Land and Development Company, Limited. The company's head office is in Manchester and its bankers are Lloyd's Bank, Limited, and the Imperial Bank of Canada. Mr. W. H. Homfray, of Kamloops, is the managing director.

Had the city of Montreal been able to raise its loan of £1,500,000, that issue would undoubtedly have been made in the London market in the near future. A banking authority in London is quoted as saying: "A state of congestion continues in the Canadian municipal and provincial government market, which is one and the same. This congestion is accentuated by the political and the financial situation, and the failure of London to tender for the Montreal loan is partially the outcome of the general disapproval in the London market of the method of offering securities by public auction to the highest bidder. This practice is adopted by practically no other important borrowers the world over."

Shawinigan Power Stock Issue.

Cable advices state that one of the first Canadian new issues promised for the London market this fall will be Shawinigan Power Company, $1,000,000 common stock, to be offered to existing shareholders at $108 per $100 share, on the basis of one new share for every nine already held.

This company has authorized capital stock of $10,000,000, of which $8,500,000 was subscribed and paid-up at the end of 1910. Its authorized bond issue is $5,000,000, of which at the same time $4,846,500 was outstanding. There is perpetual consolidated mortgage debenture stock of $3,500,000, bearing 4½ per cent. This debenture stock was made a charge on the company's undertaking, subject to the outstanding issue of first mortgage bonds, and especially secured by a deposit of various securities held by the company in subsidiary undertakings, including the entire stock and bond of the North Shore Power Company, of Three Rivers. A comparison of the gross income of the Shawinigan Water and Power Company for 1910 with 1909, shows a gain of $171,858, while a similar comparison of net revenue shows a gain of $85,950.

Periods of Rest.

The numerous Canadian flotations in embryo may be issued in London despite the heavy load of undigested securities still in that market. No Canadian issues were made overseas in August or September, 1906, and only three in October. In 1907 the same two summer months were devoid of Canadian issues, while seven were made during the remainder of the year. In 1908, no issues were made in August and only one in September. The rest of that year accounted for ten. In 1909, August and September were again the quiet months, not a single Canadian issue being made. From the end of September to December, inclusive, ten Canadian issues were made. Last year, July was an unusually busy month for Canadian issues abroad when nine were made, two in August and one in September. Autumn activity was marked by sixteen Canadian flotations. This year, as noted above, only one Canadian issue has been made since the end of July.

◆

SUING CITY FOR FIRE LOSS.

Thirty-five actions for damages aggregating over $20,000, have been entered against the city of Montreal by residents of the newly-annexed Longue Pointe ward, who claim that they suffered damage to this extent through a fire which burned twelve houses and a tenement there, and which was only enabled to gain such headway by insufficient water supply and lack of ample protection against fire. They claim that the city, upon annexation, should have installed adequate fire-fighting apparatus.

◆

There will be no new developments in connection with the York County Loan and Savings Company until early next year, when it is expected that a second dividend of 25 per cent. will be declared to the shareholders.

FOREIGN CAPITAL FOR CANADIAN BANKS.

French interests have acquired $250,000 of the stock of the Bank of Vancouver. This is another illustration of the increasing interest of foreign capital in Canadian bank shares. The Banque Internationale of which Mr. Rodolphe Forget, M.P., is president, is backed by at least $7,000,000 of French capital. The Dresdner Bank of Germany invested $1,000,000 in the Sovereign Bank of Canada, now defunct. Its investment remains in the country as the Dresdner Bank agreed to turn over its Canadian interests to the new company formed to take over the Sovereign Bank's assets. American capital is considerably interested in the Weyburn Security Bank which commenced business in January, 1911.

Large and numerous purchases have been made in Great Britain of Canadian chartered bank shares. These investments extend over a greater period than five years, in which time the investment was approximately $1,125,000. This sum represents but a small percentage of the total British investment in bank shares. As is known, The Molsons Bank sold $2,000,000 worth of its stock to a London syndicate.

A fairly large amount of foreign capital, according to "Capital Investments in Canada," a new book published by The Monetary Times, has been placed in Canada by the purchase of Canadian bank shares. The following table gives details as to the approximate amount:—

Germany	$1,096,150
France	284,750
Italy	32,700
Spain	12,350
Sweden	3,300
Japan	2,100
Belgium	1,650
Servia	1,500
Austria	1,250
China	1,200
Russia	800
Turkey	750
Brazil	600
Holland	400
Cuba	100
Mexico	50
Total	$1,439,650

A part of these amounts may be held by Canadians resident abroad.

◆

BELL TELEPHONE TO ISSUE MORE STOCK.

The Bell Telephone Company has issued the following circular to its shareholders: "At the meeting of the directors held at the office of the company on the 13th day of September, 1911, acting under the powers conferred upon them by the stockholders at the special meeting held on February 22nd, 1906, it was decided to increase the paid up capital of the company from $12,500,000 to $15,000,000.

"Each stockholder of record the 30th September, 1911, is entitled to take, at par, shares of the new stock in the proportion of one share for every five shares now held.

"Subscriptions will only be accepted for full shares. Holdings that are not multiples of five shares can be adjusted by the purchase or sale of rights, but the company will neither buy, sell nor adjust rights.

"The right to subscribe will expire at 1 o'clock in the afternoon of the 31st October, 1911. All stock not taken by subscriptions then on file at the Treasurer's Office, will be disposed of as the directors shall determine.

"Stockholders who take new stock must file their subscriptions, and subscribers under purchased rights must file the assignment under which such rights are acquired with their subscriptions, at the Treasurer's office, before 1 o'clock in the afternoon of the 31st October, 1911.

"Sellers of rights will not subscribe therefor.

"Payment at the rate of one hundred dollars for each share must be made at the office of the company, Montreal, as follows:

"$40 per share on January 2nd, 1912.
"$20 per share on April 2nd, 1912;
"$40 per share on August 1st, 1912.

"Receipts for the amounts paid will be issued in exchange for each payment which will carry interest at the current rate of dividend, and stock certificates will be issued at the date of final payment."

PULP AND PAPER POSITION.

Canada Enjoying the Low Tariff—American Manufacturers are Complaining.

Mr. John Norris, chairman of the Committee on Paper of the American Newspaper Publishers' Association, has issued a statement showing that the defeat in Canada of the reciprocity agreement has expanded the free zone for pulps and paper so as to include all of the favored nations. His statement follows:—

"Canada's rejection of reciprocity raises a question with respect to the favored nation treaties that is unique. Unlike the items contained in section 1 of the Reciprocity Bill, the paper and pulp clause, which was section 2, abolished the duty on Canadian pulps and paper subject only to a condition precedent that the pulps and paper must be made from unrestricted woods.

Until Canada Took Action.

"Section 1 could not go into effect until Canada took reciprocity action, but section 2 became effective July 26, when the President signed the Reciprocity Bill. Canada's vote of rejection will make section 1 ineffective, but it will not impair the pulp and paper section, which cannot be nullified except by a repealing Act of the American Congress, and such repeal is highly improbable.

"The importers of pulps and paper from Germany, Norway and Sweden claim that under the favored nation treaty the products of these countries are entitled to the treatment that Canada obtains when the pulps and paper are made from unrestricted woods, and that the tariff on those articles is automatically abolished under like conditions. Treasury Department officials say no similar case has ever arisen in this country."

Complaint of Paper Makers.

Paper makers in the United States think that they have been unfairly treated and that the action of Congress in putting paper in a class by itself and removing the duty independent of the passage of reciprocity is open to severe criticism. They point out that the Tariff Board reported that Canada had a natural advantage in making paper that more than balanced the tariff. On paper not made from Crown land wood, there is no duty. But American manufacturers have received no immediate hurt. Canada's surplus of paper is small. The acreage of freehold timber available for the paper mills is limited. "When it comes to building new mills," says an American critic, "the American will be on an equal footing with the Canadian. The latter has no start. Most of the future development in the paper industry will naturally be in Canada, for raw material and water power are both plentiful there. But it will be four or five years, at least, before conditions are greatly changed. In the meantime the United States is losing several hundred thousand dollars a year in duty, and it is doubtful if the price of paper will show any reduction."

A Washington dispatch states that practically all the wood pulp and print paper produced in New Brunswick until August 1st, 1912, will enter the United States free of duty. This is made possible by a revised rule made this week by the Acting Secretary of the Treasury, Mr. Curtis, under the only operative clause of the Canadian reciprocity agreement.

New Law of New Brunswick.

The Surveyor-General of Customs of New Brunswick advised the Treasury Department that the new law of that province restricting the exportation of wood pulp and print paper did not apply to lands operated under licenses issued or renewed prior to October 1st, on which date the act becomes effective. The lands are used under long-term laws, governed by yearly licenses, and August 1st is the date for renewing these licenses. Consequently until that time there will be no American import tax on pulp wood or print paper originating from those lands.

Regulations also were issued by Mr. Curtis governing the taxation of Canadian pulpwood and print paper coming partially from Crown lands and partially from private lands. American Customs collectors will insist upon sworn statements showing the percentage of origin, assessing duty on products of Crown lands where the importation is restricted and entering the remainder free.

◆

Following the purchase of the assets of the Sovereign Bank by the International Assets Company on August 3rd, the liquidator states that no information can be given with regard to the probable settlement until all the assets have been realized upon.

NOT QUITE EIGHT MILLION PEOPLE

Is Canada's Population—This Will be Shown by New Census Figures.

The preliminary figures of Canada's fifth census, which was begun in June, are complete with the exception of the returns from Yukon and the Northwest territories. According to the facts at present available, the population of Canada has not quite reached 8,000,000, as some phophets had predicted. The returns show that Toronto and Montreal have made the largest gains in population, the former the greatest percentage of gain and the latter the largest gain in numbers.

The Maritime Provinces of New Brunswick and Nova Scotia have not grown as have Quebec and the other provinces. The gains in New Brunswick and Nova Scotia are confined practically to Halifax and the mining sections.

Large Gains in Quebec.

The Province of Quebec will show large gains both in town and country; all the cities and towns increased and the increase included the rural districts. In Ontario the population of the rural districts has declined, notably in Western Ontario, from which there has been a large immigration to the west since the last census. This has been partially offset by a great increase in population in Northern Ontario, in the four districts of Nipissing, East and West Algoma and Rainy River and Thunder Bay, where the population has more than doubled. All the western provinces show large increases, the largest percentage of gain being credited to Alberta. The cities of Winnipeg and Calgary show the largest gains of any of the western cities.

Manufacturers Have Increased.

Mr. Archibald Blue, chief of the census and statistics bureau, said that a glance at the figures relating to manufactures showed many surprising gains and instanced the city of Hamilton, Ont., whose manufacturies have increased more than one hundred per cent. since the last census. The cities of Montreal and Toronto would show similar gains.

The census of the district along the west shores of Hudson Bay and west to the Height of Land was taken under the direction of the Royal Northwest Mounted Police, and is complete, showing a population of fifteen hundred Eskimos and Indians and a few white and half-bred trappers. The enumerators there and in the Yukon and North West districts had to travel thousands of miles by canoe and horseback and on foot in some remote sections of the far north the duties were performed by missionaries and the men of the Hudson Bay Company. The census of the Arctic waters was taken by Captain Bernier, the explorer, who has just returned.

Guessing at Redistribution.

The large increase in the Province of Quebec may raise the basis of representation in the House of Commons from 25,000 to 28,000. This will result in Nova Scotia and New Brunswick each losing two seats and Prince Edward Island losing one seat. Ontario will certainly gain no members and will lose one or more. The Provinces west of Lake superior will gain about twenty-seven additional members, which will increase the membership of the House of Commons after redistribution from 221 to 241 members.

The following population figures of the previous four census years are of interest:—1871, 3,485,761; 1881, 4,324,810; 1891, 4,833,239; 1901, 5,371,315.

◆

COBALT ORE SHIPMENTS.

The following are the shipments, in pounds, of ore from Cobalt Station, for the week ended September 22nd: La Rose, 238,480; Nipissing, 151,090; Coniagas, 123,150; Drummond, 120,000; Trethewey, 64,960; Cobalt Townsite, 100,520; Right of Way, 56,980; McKinley-Darragh, 64,250; Cobalt Lake, 60,670; Temiskaming, 40,320; Buffalo, 60,860, Crown Reserve, 50,800; Kerr Lake, 60,870; total, 1,192,950 pounds, or 596 tons. The total shipments since January 1st are now 37,308,453 pounds, or 18,654 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144 tons, valued at $1,437,196; in 1906, 5,129 tons, valued at $3,900,000; in 1907, 14,040 tons; in 1908, 25,700 tons; in 1909, 29,751 tons; in 1910, 34,041 tons.

FIVE COAL FIELDS OF VANCOUVER ISLAND.

Nanaimo Area is the Most Important—Some Notes of Great Possibilities.

The five coal fields of Vancouver Island, Nanaimo, Comox, Suquash, Cowichan and Koskeemo, all bituminous fields, are the most valuable on the Pacific Coast of North America. Mr. D. W. Dowling, of the Geological Survey of Canada, considers the Nanaimo field the most important of these, and gives its area as 350 square miles, with an average thickness of six feet of coal, or a content of 1,344,000,000 tons. Comox is given an area of 300 square miles, and a similar thickness of coal to Nanaimo, giving its content as 1,152,000,000 tons.

Suquash has an area of 10 square miles, with an average thickness of 3 feet of coal, or 19,000,000 tons. Mr. Dowling made this estimate before any development work had been done outside that of the Hudson Bay Company in 1848. Recent development shows this field to have two seams of economic value, hitherto unknown, while diamond drilling shows the coal area to be much more extensive than formerly supposed.

Of the Cowichan Field.

The Cowichan field has an area of 9 square miles, averaging 4 feet of coal, or 23,000,000 tons.

The Koskeemo field is placed at five squar
an average thickness of 3 feet of coal, or 9,000,000 tons. Cowichan and Koskeemo fields are the only two lying dormant. Attention has been paid to Koskeemo, diamond drilling and geological investigation having been employed with a view to ascertaining the prospects of opening it economically, but so far with little success, owing to the disturbed nature of the country tributary to the Sound. The Koskeemo field is a continuation westerly of the Suquash field, and it is not improbable that the two may be yet found to be continuous. The area is older than either the Comox or Nanaimo fields, and is co-related to the still older formation of Graham Island.

A new field is likely to be added to the above, namely, Alberni. It has been recognized as probable that coal might be found at Alberni, outliers of the Comox formation having been recognized there, and as a result the Alberni Land Company Limited, in disposing of its lands there, reserved the coal rights.

Coal Areas of the Island.

When the extension of the railway was under construction last fall, the steam shovel uncovered a seam of coal, and the company recently started development on it, with the result that so far as the slope has been run, about 170 feet, a continuous seam of coal of high quality, and of a width of 4 feet has been proved up.

It seems probable that the coal areas of Vancouver Island are good for about three billion tons of coal, or enough to supply 10,000 tons a day for 800 years, so that the people of to-day have not much need to worry over the possibility of the exhaustion of these great coal fields. The Vancouver Island coal fields have produced to date coal to the value of $70,000,000.

Of the Nanaimo Field.

The Nanaimo field occurs in Upper Cretaceous formation, and has been proved by the developed mines and bore holes to be coal bearing over a length of 55 miles, by an average width of six miles. About a fourth is land area and the remainder submarine. The basin lies north-west and south-east and dips easterly. The average dip is from five to twelve degrees, with variations due to several faults. Its continuity is proved from the old Wellington mine northwest of Nanaimo, to Tumbo Island, near the south-eastern boundary of the Gulf of Georgia area of British Columbia, Mr. W. Blakemore, M.E., representing Mr. A. E. Hepburn, M.E., having proved by diamond drilling the extension of the field to the latter point. Over a considerable portion of the area the coal deposits are probably at too great a depth to be economically workable at present, but toward the western portion of the field they gradually rise to the surface, and their outcrops are traceable from the old Wellington mine to Oyster Harbor.

Three Seams of Coal.

So far as proved up the Nanaimo field carries three seams of coal of such volume as to be available for economic operation. The lowest seam, known as the Wellington, outcropped at the old Wellington mine, at Nanaimo River and Extension. At Wellington and Extension it was operated by the Dunsmuir interests, since acquired by the Canadian Collieries, Limited, and in the vicinity of Nanaimo it is worked by the New Vancouver-Nanaimo Coal Company, Limited.

The Wellington seam is irregular in thickness, having been laid on a floor with numerous depressions and eroded channels, the coal-forming matter accumulating in the basins, accounting for swells in the seam, causing it to vary in thickness from two feet to 28 feet. The average width of the seam is probably nine feet.

The middle seam is the Lower Douglas, and lies on a horizon about 800 feet above the Wellington seam. It is narrower than the other seams, but very uniform in width, running from two and a half to three and a half feet in thickness. It is particularly well adapted to longwall mining. It outcrops at Nanaimo and South Wellington.

Notes of Seams.

The Upper Douglas seam occupies a horizon varying considerably in its relation to the Lower Douglas, the two being found at depths apart varying from 22 feet to 120 feet. This seam also outcrops at Nanaimo and South Wellington. In characteristics it is almost a perfect counterpart of the Wellington seam, being laid on an uneven, wavy floor, and varying in thickness from two feet to 26 feet. The roof of the Upper Douglas seam is mainly shale, while that of the Lower Douglas is sandstone. The tonnage mined in the Nanaimo field last year was 1,615,160 tons.

◆

STATISTICS OF THE UNITED STATES.

Area Greatly Increased Within a Century—Progress of the Country in its Material Resources.

"Statistical Record of the Progress of the United States, 1800-1911," is the title of a small document just issued by the Bureau of Statistics, Department of Commerce and Labor. It pictures in statistical form conditions in the commercial, financial, industrial and transportation systems of the United States at brief intervals since the year 1800, down to, and in many instances including the year 1911. In those cases in which the subjects considered are measured by Governmental fiscal year periods, the figures for the fiscal year 1911 are included; in those in which calendar year periods are used, statements can only terminate with the calendar year 1910.

Among the interesting facts shown are that the area of continental United States was 843,255 square miles in 1800, advancing to 1,734,630 square miles in 1810; to 2,995,536 square miles in 1850; and 3,026,789 square miles in 1853, since which date no change in area is shown. The population, which was 5⅓ million in 1800, was 93¾ million in 1911. Public debt, which was 83 million dollars in 1800, reached 2,675 million dollars less cash in Treasury in 1865, the figures of 1911 being 1,015 million dollars.

Per Capita Debt.

The per capita debt, which was $15.63 in 1800, and in 1865 $76.98, is in 1911 $10.83. The interest charge per capita, which amounted to 64c. in 1800, and $4.12 in 1866, was in 1911 23c., and the total annual interest charge, which was in 1866, 146 million dollars, was in 1911, 21⅓ million dollars. Money in circulation, stated as 26½ million dollars in 1800, was in 1911, $3,228,627,002, and the per capita circulation, which was in 1800 $4.99, was in 1911, $34.35. Deposits in all the banks in the country cannot be shown earlier than in 1875, at which date they are set down as a little over 2 billion dollars, and in 1910, over 15 billion dollars. The number of depositors in savings banks in 1820, the earliest year for which the figures can be shown, was a little less than 9 thousand; and in 1910, over 9 million. Government receipts, which amounted to $2.04 per capita in 1800, were in 1866, $14.65, and in 1911, $7.45, or about one-half what they were in 1866. Exports of domestic merchandise which amounted to 32 million dollars in value in 1800, were over 2 billion dollars in 1911; and imports, which amounted to 91 million dollars in 1800, were 1⅓ billion in 1911.

Imports and Exports.

Many other subjects of this character stated by the document in question, include details of imports and exports by great groups and grand divisions, and principal ports through which shipped; the production of principal articles, such as wheat, corn, cotton, coal, sugar, copper, etc., from 1800 to 1910; the attendance in public schools, and sums expended for that work; postal receipts and expenditures; and a few pages devoted to monetary and commercial conditions in the principal countries of the world.

Copies of the publication in question can be obtained by applying to the Bureau of Statistics, Department of Commerce and Labor.

DOLEFUL STORY OF AMALGAMATED ASBESTOS.

One of the First Big Mergers in Canada is Not in the Best of Positions—Bonds Sold at Low Point This Week.

Monetary Times Office,
Montreal, Sept. 27th.

The sale of $10,000 of the bonds of the Amalgamated Asbestos Corporation on the Montreal Stock Exchange, at 40, this week, calls attention to one of the most unfortunate flotations of any considerable magnitude which has ever been made in Canada. The previous low point was reached some time ago when some of the bonds sold at 50.

It is now about a year since there arose apprehension that the dividends on the preferred stock of the Corporation would be passed. Up to that time only one annual report had been submitted, and this report indicated that the company had not been doing any too well, but that at the same time it had been earning far more than its bond interest. It even went to show that the preferred dividends were being earned.

About this time, also, the preferred stock commenced to break, indicating that for some reason or other insiders were getting out. Messrs. Cramp, Mitchell & Shober, of Philadelphia, the syndicate underwriters, in September last, advised the subscribers that they would have to take up their securities which were being carried in the Royal Trust Company. All this coming at the one time caused holders of the Amalgamated Asbestos bonds and stocks to feel pessimistic. It was not till the next financial report of the company was issued that the holders of the securities became appraised of the seriousness of the situation. This report was issued at what corresponded to the second annual meeting, although in reality it was for a period of but seven months, this being for the purpose of changing the financial year of the company. It was then shown that the company, for the period under revision, had earned about $30,000 less than its bond interest.

Reorganization Was Commenced.

Something in the nature of reorganization took place in the company some months ago. Mr. E. B. Greenshields, who first was president, retired last year and his place was taken by Mr. Thomas McDougall of the Quebec Bank. Later on, other changes were made in the directorate and also in the management of the company's properties. A policy of retrenchment was introduced and it was understood that the situation had greatly improved. The fact that the bonds stayed around 50 to 60 still showed that they were not regarded as a very advantageous purchase.

Altogether the Amalgamated Asbestos affair has been unfortunate from the start. There is now talk of reorganization in connection with the securities of the company. The holders of the preferred and common stocks are apprehensive as to what may happen, and even the bondholders are not very comfortable.

The Amalgamated Asbestos Corporation was formed in the spring of 1909 and was the first of the many mergers which have taken place in Canada during the past few years. The securities at that time were:

	Authorized.	Issued.
Bonds, 5 per cent.	$15,000,000	$7,500,000
Preferred cumulative, 7 per cent...	1,875,000	1,875,000
Common stock	8,125,000	8,125,000

Later on, $300,000 more bonds were issued, making a total of $7,800,000.

The underwriting was offered to the public at par for the bonds, a bonus of 25 per cent. preferred and 25 per cent. common stock accompanying the purchase. The issue was a pronounced success, it having been necessary for the subscribers to pay down 20 per cent. only in cash. Arrangements were made to have the Royal Trust Company carry the rest for a certain length of time.

Subscribers Signed Agreement.

Each of the subscribers signed an agreement, whereby Messrs. Cramp, Mitchell & Shober, of Philadelphia, had the privilege, subject to certain conditions, to dispose of their bonds at no less than 88 per cent. of par; and the expenses were to be a charge against the bonds.

The first annual report issued by the company showed net earnings of $517,969. The bond interest amounted to $375,000. That is, the net earnings, as shown by the company during its first year's operations, were largely in excess of the requirements for bond interest.

At the present price of 40 for the bonds, the value of the issue becomes reduced from $7,800,000, par, to a market value of $3,120,000. It is claimed that the company has liquid assets in manufactured asbestos, etc., equal to $1,000,000, which would reduce the risk on the bonds to $2,120,000, on a basis of to-day's prices. It is stated that the properties cost the company over $6,000,000, but it is doubtful is this could be regarded as a legitimate valuation, inasmuch as the whole deal seems to have been upon a wrong basis from the inception.

Many say that the properties were taken over at far more than their actual value. However, at 40, it would certainly seem that the bonds ought to be good enough value. The common stock sold as high as 33 in 1909, the preferred selling at the same time at 91½. The common continued to decline during 1910 and is now quoted at anywhere from $3 to $4 a share. The preferred sold highest in the spring of 1910, when 98 was touched. To-day, it is quoted at $20 a share.

All this simply goes to show how difficult it is to know when a deal is right.

Names on the Directorate.

The array of names on the directorate of the Amalgamated Asbestos Corporation was as fine as could be desired, including, as it did, several prominent Montreal men, as well as well-known New York and Philadelphia people. The names of the Bank of Montreal, the Bank of Commerce and the Royal Trust Company were used somewhat freely, and although these in no way guaranteed the deal, conclusions were drawn which are costing the subscribers dearly. It is not impossible that, given time, the Amalgamated Asbestos Corporation may pull out and make good, as it owns fine properties in the Black Lake district and, together with one or two other companies, has practically a monopoly of certain grades of asbestos. At present there seems to be a little friction between some of the companies, and it may be that the rivalry is forcing prices to a level which will not permit them to show profits which would justify even bond interest.

NORTHERN EXPLORATION COMPANY.

The managers of the Ontario Exploration Company have been moved by the repeated requests for information which have come from this side. The directors have decided to issue to shareholders an interim report and statement of accounts up to June 30.

In response to a specific request for details of the company's position, the following information has been furnished a Toronto firm:—

(1) Up to September 12, 1911, there had been issued 119,425 shares of one pound each of the company's capital.

(2) Options are outstanding on the balance of the unissued capital, namely 280,575 shares.

(3) There is no stock in the treasury free from options.

(4) The Northern Exploration Company still owns 6,000 shares of Hollinger.

(5) The company also owns 165,908 shares of Ontario Porcupine Gold Fields Development, fully paid, also 17,250 shares on which fifteen shillings per share is paid up, and 95,590 shares on which ten shillings per share is paid up.

(6) The company has cash on hand of 85,000 pounds, or approximately $425,000.

◆

The position of the wrecked freighter Joliet, which was rammed and sunk in the St. Clair River last week by the steamer Phipps, is such a difficult one that the Pittsburg Steamship Company, which owns the boat, has offered to donate her to anyone who will agree to remove her from the channel at once, and will furnish a bond to that effect satisfactory to the government. The Joliet is 282 feet long, and is loaded with iron ore. If the steamship company's offer is not accepted the Joliet will be blown up with dynamite as she lies.

The Springfield Republican emphasizes the need of popular education on fire hazards and fire prevention by the following, taking as its text this item: "A woman poured a quart of gasoline into the marble wash bowl of the toilet room and placed a silk waist in it. She closed the door and returned in about ten minutes. She rubbed the silk between her hands. This generated sufficient electricity to make a spark. The gasoline exploded, the house burned and the woman lost her life. If the woman had known that gasoline evaporates rapidly, that the gas it makes is seven times more dangerous than gunpowder, that a single spark would cause a terrible explosion and that one may generate an electrical spark by rubbing silk cloth—if the woman had known all this there would have been no fire in the house and she would probably be alive to-day."

Chartered Banks' Statement to the

T. C. BOVILLE,

Deputy Minister of Finance

FIRE MARSHALS.

Their Qualifications and Duties—Expense of Fire Protection—Cities Should Maintain Adequate Fire Protection.

By Fire Chief Finch, Guelph.

The fire losses on the continent of America, being as they are, ten times that of the European countries, has raised the question on all sides, "Where is the responsibility?" "Why is it that American losses should be greater?" and again, "Is there a remedy?"

It is a tendency of a great many people to look upon the insurance companies as being the people responsible for the loss. After studying the situation for a time, this belief appears ridiculous as the property insured is not the property of the insurance companies, but is the people's property, and they pay a tax to these companies, who, in return for the same, guarantee them against loss by fire. That tax must be such as to be equal to the losses by fire, the operating expenses of the companies, and also the percentage for dividends on the money invested. This being the case, it is immaterial to what extent the people protect their property, in so far as the insurance people are concerned, for the higher the losses, the greater must be the tax.

Then it follows that the people must create a good standard of fire protection or pay a high insurance rate for the privilege of not doing so.

The fire protection of the different municipalities is entirely in the hands of the councils of the same, and, as a rule, these councils are composed of people who may have little at stake directly in the matter of fire losses, possessing, as they may, residential property, the rates on which being practically nil as compared with the rates on the great stocks of goods carried in the congested mercantile and manufacturing areas.

Expense of Fire Protection.

The expenses in connection with fire protection seem to be levied on assessable property, whereas the stocks in the stores, warehouses and the manufacturing areas practically escape the tax for municipal fire protection.

Let us use for an instance a common condition: A store in the mercantile area of a city is being assessed for $5,000 and has a stock valued at $80,000. The store building is assessed in the municipal tax, while the stock is not, there being but a business tax to represent the stock, and this business tax is 30 per cent. of the store building. Then it shows that a value of $85,000 is being protected by a tax on $6,500.

Everything that is subject to destruction by fire should be subject to a direct taxation for the expenses of fire protection, and every municipality should be required to furnish protection facilities in accordance with the value therein represented. This may, in part, be responsible for conditions creating the necessity for government supervision where the fire hazards are concerned, that the causes of fire may be gathered to that office, and there studied by practical men in that work.

It is in the causes of fire wherein the remedy for the prevention may be discovered, and these causes are numerous, but of them all the one to be most dreaded is that of incendiarism. When the motive for incendiarism is burning for the insurance, the chances for success are studied by the person setting the fire. As a result the losses are heavy from such sources.

The sources through which the causes of fire are being investigated are generally the insurance companies involved, and they, owing to the bad feeling created towards them on account of the investigation, will hesitate before ordering a fire inquest, and the feeling locally under such conditions may be such as to cause the inquest to be a farce, and the wrong in this way may never be rectified. If these investigations were conducted by a party from the outside of the municipality, the fear of local influence would be removed, thus overcoming that difficulty.

City Should Maintain Adequate Fire Protection.

When the causes of all fires are collected into one office the tendency will be to create a general condition of safety by the use of suggestion from a practical standpoint. Better fire by-laws may be made and applied universally, as fires have a universal influence. For instance, we may find one city that takes the greatest care in having adequate fire protection, spending a suitable amount annually to maintain an efficient service, and there may exist in the same province another city that will scrimp the fire protection system to the last dollar. Is not the city that is providing good protection influenced in its insurance rates by the neglect of the city not doing so? Yes; it is the universal tax that pays the universal losses, and to offset the injustice done the careful city it will be necessary to create a universal influence, that the careless city be forced to be not a menace to the insurance rating of that area. There is a view other than that relative to financial losses, that of danger to life in public buildings. There are many buildings in this province that are veritable death-traps; and the provincial government is directly responsible for some terrible conditions, no doubt unthinkingly; nevertheless they exist.

We have schools that are under the supervision of an inspector, who may not realize the necessity for a fire-escape, thinking they mar the architectural beauty of the building. We have fire-escapes on schools that are unpractical for the purpose they are meant for, and the same may be applied to hotels and factories.

With the hotels of the province, matters relative to fire are in the hands of the license commissions. With the schools of the province it is in the hands of school boards. With the factories it is in the hands of a factory inspector, who may previously have been a clerk or a machinist. He may be a person who has not spent one hour of his life studying matters of fire prevention engineering. With the opera houses, lodge rooms, public auditoriums, etc., matters relative to fire protection are left in the hands of city councils, who create municipal by-laws never to be enforced, owing to local influence. We have the man whose life is busy in channels other than the one he is given the authority to act as judge. You find where the man who studies these conditions, having authority, and whose judgment may be tolerated, but not necessarily acted upon, must give way for the man having the influence to get these jobs. The public must be subjected to the hazard that as a result must exist, has existed and does exist, a monument of incompetency, and engraven thereon as an epitaph the story of our fire losses.

Duties of Fire Chief.

Let us take a peep at the inside works of the present-day municipal fire department regarding matters of conditions for the safety of the public in public buildings. I will quote a sample of a part of a certain by-law relative to the duties of the chief: "Visit all schools, churches, theatres, factories, hotels, and all public buildings in the city where a large number of people are accustomed to assemble for the purpose of ascertaining the means of ingress and egress, and generally to make investigation regarding the construction thereof, in order that in case of fire he shall know in what manner to direct the work of extinguishing such fire." Thus it is that by-laws are made making it the duty of the chief to simply look at fire-traps, that he may know how to extinguish a fire that might occur in them.

The chief may find conditions that are extremely dangerous to the public. For instance, he may find in a theatre a middle gallery having a seating capacity of several hundred, having for a fire-escape exit an outside flimsy iron stair of three feet width, this being the only emergency exit from this part of the house. There may exist numerous other dangerous conditions that might be mentioned, and, while it may be his duty to report on such conditions to his committee, there the matter may stop after his reports have been distributed to the respective parties concerned. These few points, of the many that could be mentioned, are sufficient to demonstrate the necessity of a commission in the provincial legislative offices composed of practical men in this work. We have in this province that element of practical men—men who have spent whole lives in this work, and who study the results of experiments in the arts of coping with fires and conflagrations, receiving as they do a report of all the principal ones, in addition to the experience acquired in their own work. Then is it not reasonable that from this element competent judges in matters relative to fire conditions may be found?

Duties of a Fire Marshal.

The duties of the office of fire marshal are to receive reports of all fires occurring in the province from chiefs of fire departments; where none exist, from the county constables of the respective counties, and to investigate, or cause to be investigated, the causes of fire should they be known. It should be his privilege to conduct an inquest, if such should be deemed by him to be necessary, and be given the authority to call witnesses for the same, having the same power in this matter as the existing coroner. To receive reports as to the conditions of all public buildings relative to their safety in the event of fire, and to create a standard of fire escapes suitable for the class of respective purposes as to strength, capacity and practicability. To receive reports from fire chiefs as to the safety of public buildings, and where it is impossible to have them made safe through

(Continued on Page 1437.)

BENEFITS OF GOOD LIFE INSURANCE.

Some True Stories Told by a Life Insurance Manager of Forty-five Years' Standing—Some Talking Points for the Agent.

By William H. Orr.

Thomas Wilson, one of my subsequently most successful writers, came in early one morning, at the beginning of his life insurance experience, slapped down his rate-book and exclaimed:—

"I cannot do anything with those people. They had a meeting last evening at which a special lecturer showed them some most captivating figures as to how much cheaper it would be for them to pay $8 entrance fee for a certificate in the Grand Order of Successful Relief, and 40 cents for monthly dues, and at age 37, a monthly assessment of $1.50, thus making the yearly cost after entry only $22. Our lowest is $23.72."

"And did they all conclude to go in like a flock of sheep, without looking at what you could do for them in our company?"

"Yes, most of them, to help start a new hive or court, but I am satisfied quite a number of them will be declined."

"Well, we don't want any left-overs. But what did he show them as an equivalent for the stability of a regular company, and the cash return in case of lapse, or the borrowing privilege?"

What Was Offered.

"Oh, well now, he did not dwell on those points except to say they could put the overplus which an old line company would charge, into a savings bank, and in that way have a good 'pocket reserve' to fall back upon in case the lodge, or the society, broke up. A savings bank would give them 3 per cent. interest on all the money the G.O.S.R. would save them, in comparison, and they would make their payments in easy monthly instalments. Several of them offered to take a twenty-year endowment with me if I would guarantee to return, at any time it was called for, 3 per cent. on the whole premiums that would have been paid."

"Of course you could not do that, either for yourself or the company; because, the carrying of the insurance in our company, though costing less, probably, than in any assessment association, would absorb a good part of any premium, whether life or endowment."

"But could we not give them life insurance, and guarantee them more than what 3 per cent. per annum on the difference in cost would be, and with better security thrown in, supposing a man should desire to withdraw from the one or the other society after five, ten, or more years?"

"Certainly. For instance: the difference on a straight life contract, age 37, as between $22 and $23.72, is only $1.72 per year, which is $8.60 in five years or $17.20 in ten years. Accumulate the $1.72 per year in a savings bank, and it becomes $9.40 and $20.30. But look at what our cheapest life policy guarantees, viz., $40 in five years, or $122 in ten years."

"Yes," said Wilson, delighted with that showing, "and I now see that in 15 years our policy guarantees $213, and in 20 years $312. An assessment society's pocket reserve of $1.72, improved in a savings bank, comes to only $33.00 and $47.60. The guaranteed $213 and $312 which would be over six times as good a result."

When Assessment is Unpaid.

"And then look what happens if an assessment is unpaid in any month; or a whole court gets suspended, as occasionally happens. There is then no insurance left—nothing but the $1.72 which may or may not have been laid aside, regularly, in a savings bank. But in a regular company, the insurance is non-forfeitable. It runs after five years, for about four years longer without any payment of premium; after ten years, it runs for about ten years more, free of any cost, and, after 20 payments, will be held good for $1,000 to the family for about thirteen years more, or 33 years in all."

"These, certainly," said Wilson, "are great advantages, and no admission fee or medical fee is asked, nor waste of time attending lodge or committee meetings. And if a man wants to pay in smaller figures, he can take the quarterly premium plan from the beginning, or change to it at any time, can he not?"

"Well, yes," I replied, "but I do not recommend you to work the quarterly payment plan. All companies charge a higher rate for quarterlies, and the universal experience is that such policies lapse before the end of the first year in surprising numbers. The efforts of all companies and agents to help those who can only pay about five dollars at a time, have been very unsatisfactory. Hence the line of success in your work leads towards cultivating a class of people who are able to pay anywhere from $20 a year up to ten, twenty or forty times as much. As a matter of fact the premiums received by all the regular companies in Canada, average about $60 per member, apart from the industrial policies issued by three or four companies. The latter are very small policies, averaging a cost of only about $5 per year, by expensive weekly instalments."

Interested in Endowment Insurance.

The next day Wilson turned up with some figures he had made for a prospect whom he had interested in endowment insurance. He said: "That lecturer persuaded many of his hearers that it was wasteful to pay money to old liners for endowments, because they could themselves keep the money and use it to better advantage than anything a company could afford to give them. That is, keep the difference and perhaps pay off a 6 per cent. mortgage with it. But I find that any company can give a man far more than 6 per cent. per annum for all the overplus he pays."

"You are probably quite correct, Wilson," said I. "Let us see how it looks in black and white."

"Here is the statement I gave to a man who was about to join the Grand Order of Successful Relief, at a yearly cost of $22, but without knowing whether he might not have to pay extra relief assessments, such as all old members of some societies have already had to meet. I offered him a 20 Pay Life at $31.55, so the yearly difference was only $9.55, for which he would have a cash guaranteed value of $569, if he surrendered the policy at the 20 years' end. Or, instead, if then in poor health, could borrow $500 against it, and thus keep the policy in force to the end of life. He saw the advantage of this form of contract as a combined life insurance and savings bank, and though he also joined the society, to make up the number needed for a charter, he has promised to take an endowment before the month runs out, after which he would be a year older."

Misfortunes Never Come Singly.

A few weeks later Wilson was canvassing in a certain city street, and noticed a child's funeral procession forming in front of a house. Halting a few minutes, he noticed his prospective endowment as the chief mourner. Meeting him some days afterward, hoping to write him up, he was sorry to learn that the funeral expenses had consumed the money he had intended putting into the endowment. It is an old adage that "misfortunes never come singly." Of course there is no truth in that, any more than that "lightning never strikes twice in the same place." But Wilson had his labor for nothing, all the same. Shortly after the funeral of the child (one of six) the father met with a long siege of rheumatic fever, by which his savings were further depleted, and all chance of acceptance for insurance postponed for many a day, if not for good and all.

The experience here related is only one variety of what every life insurance agent of any lengthy experience has been up against, in his work. In one very recent case, my agent travelled some thirty miles to keep an appointment to the day, made by a man to take $5,000; and, on reaching the town, found the party had died somewhat suddenly and been buried that very day.

Took a "Five Thousand" Policy.

The late Hart A. Massey, in 1866, then doing a comparatively small but prosperous business at Newcastle, Ont., took a $5,000 policy on the life plan, and an agency. But instead of sending in any new business, he soon afterward moved to Cleveland. When he returned, and erected large premises in Parkdale (now part of Toronto), he had four insurable sons, three of whom subsequently died in early manhood. On their lives, as helpers in the rapidly-expanding business, not less than $50,000 each should have been placed. But though I canvassed several of them again and again, they were deterred from action by their father having once made the rather thoughtless statement, that if he had his life to live over, he would not pay out money for life insurance. He changed his mind, however, in two instances, to my knowledge. One was when he decided, but too late, to have another policy on his own life; and again, when he consented to his eldest son, Charles, taking $5,000 with me, though I strongly urged the young man to let me make it a much larger sum. I well remember taking up the new policy to the office, when issued, where the old gentleman and his son, Charles, his then chief business assistant, sat side by side at his desk.

Was Not Adequate.

I told my old friend that this $5,000 was not at all adequate to cover the financial loss to his business, should Charles, his right hand man, be called away from it by early death, and that five or ten times as much would more nearly suit the emergency. I strongly urged him to at least make the cheque for double that policy's cheap premium,

(Continued on Page 1437.)

LOCAL INVESTMENTS FOR LIFE INSURANCE COMPANIES.

This Plan is Advocated by State Insurance Commissioner of South Carolina—Would Not Work in Canada.

There is no other single agency in the United States comparable to life insurance making for the concentration of wealth in certain centres. This is the statement of Mr. F. H. MacMaster, insurance commissioner of South Carolina, in a communication to The Monetary Times, advocating local investments by life insurance companies.

"The whole wealth of the people of the United States," he says, "is relatively about one hundred and twenty-five billions of dollars. The life insurance accumulations of the people of the United States are relatively about four billions of dollars.

Accumulations in New York.

"The first form of wealth is equitably distributed throughout the length and breadth of the 3,000,000 square miles of our country, as the people labor profitably, and as the natural resources yield their increase. But of the other form of savings, we find that in the City of New York alone, one-half of the entire accumulations are controlled, and over one-half of the annual contributions to it are received. If, with New York, we include four other nearby cities—Philadelphia, Pa., Newark, N.J., Hartford, Conn., and Boston, Mass.,—we find that in these five cities about $3,000,000,000 of the $4,000,000,000 of life insurance assets are controlled, and that annually there are poured into these five cities contributions for life insurance purposes of over $600,000,000, or about three-quarters the annual revenues of the Unted States Government, and about six-sevenths of the total income of all life insurance companies in the United States.

Invest Where Money is Drawn.

"If the life insurance funds were invested in the securities of the localities from which they are drawn, the centralization of the money power would be greatly lessened, if not wholly destroyed. Certainly very many of the evils growing out of the power of a few financiers to use these immense funds for their own selfish ends would be cured.

"The attitude of many of the managers in respect to the proposition to require the investment of reserves within a State is somewhat surprising. In the first place, they issue the dictum that in case of such legislation 'they' will withdraw from the State. Truly, they are now vested with the power of withdrawing from a State, but it is entirely within possibility for the policyholders to replace an entire management, or wholly to change the policy of a company. I do not now undertake to say that it would be within the power of policyholders in one State to have a court of equity to intervene and prevent the management of a company, especially a mutual company, from withdrawing from a State because legislation requiring the investment of reserves in securities within the State. But the matter is worthy of consideration.

Where Charter is Obtained.

"If the State which creates the life insurance corporation says to it, as most of them do, that it shall invest its assets in real estate, first mortgage bonds of real estate, State, county or municipal bonds and first mortgage bonds of solvent and dividend paying corporations, it certainly is no discourtesy for another State to say to that corporation, when it seeks to do business within its bounds, that it must invest the pro-rata accumulations of the policyholders in this State in securities of this State similar in character to those named by the State from which it gets its charter.

Will Derive Larger Benefits.

"The State in which the home office of the life insurance corporation is located will derive larger benefits from the operation of such a corporation than any other State. Then, when this corporation, voracious in its energetic seeking for the people's money, knocks at the door of another State and asks permission to solicit the life insurance savings of the people of that State, is it unwise for that State to say, 'after taking your toll for expenses you must invest that portion of the money which you take from this State, which represents the savings and is known as the reserve in the securities of this State, similar in character to those prescribed by the laws of your own State?' When it is recalled that the toll for expenses is about four-fifths of the first year's contribution, and about one-fifth of each subsequent year's, the demand for the investment of the reserve is moderate.

"New York recognizes this principle in her laws. Part of her statute relating to investments, section 16, reads as follows: 'Every such domestic corporation doing business in other States of the United States or in foreign countries may invest the funds required to meet its obligations incurred in such other States or foreign countries in conformity to the laws thereof in the same kind of securities in such other States or foreign countries that such corporation is by law allowed to invest in this State.'

"That the need for such legislation is not more keenly realized by the public is because of the mystery surrounding life insurance, its principles and practices. The natural channel for the investment of the savings of the people of South Carolina is in South Carolina securities. The same is true of every other State in the Union. How will these investments find their natural channels if they are controlled by men in Boston, Mass., New York City, or Newark, New Jersey, or other points 1,000 miles away from South Carolina, and by men who know little of and care less for the particular interest of such distant States

Securities on the Spot.

"Nearby securities of even less interest rates will be exhausted first before securities of more distant localities are sought, regardless of the locus of the policyholders. The securities on the spot will be taken as a general rule, unless legislation compels otherwise.

"This is strikingly shown by the following figures: The Equitable Life Assurance Society has in New York State about 21 per cent. of its insurance in force, in New York State is 57 per cent. of its real estate holdings and 75 per cent. of its real estate mortgages. The Mutual Life has only 14 per cent. of its insurance in New York State, 77 per cent. of its real estate holdings and 88 per cent. of its real estate mortgages are there. The New York Life has 14 per cent. of its insurance in New York State, 56 per cent. of its real estate is there and 82 per cent. of its real estate mortgages."

A Canadian Example.

In Canada we are not worrying as to which provinces receive the investments of the life insurance companies. According to the plan outlined by Mr. MacMaster, the South Carolina insurance commissioner, some of our provinces would suffer. For instance, the premiums received by life insurance companies in Saskatchewan in 1910 amounted to $946,044. Their investments in the same province totalled $13,749,439. If insurance companies incorporated in Saskatchewan only, invested money raised there in that province, Saskatchewan would have a much smaller sum invested than is at present the case.

◆

BANK RATES IN GERMANY.

In connection with the increase in the discount rate of the Imperial Bank of Germany from 4 to 5 per cent. last week it is interesting to note that the average bank rate in Germany for 1910, was 4.35 per cent., as against the average of 3.93 per cent. in 1909. The high average was due to the rises in the rate during the second half of 1910; in the first half the rate had been twice reduced. If the financial resources of Germany are too readily under-rated abroad, they are too readily over-rated at home. The accumulation of capital, though stupendous in recent years, is not in keeping with the expansion of German trade and industry. During the last thirty years an increase of 20,000,000 in the population had to be "financed." This increase in the population has itself necessitated the provision of enormous capitals for food, clothing, housing, etc., which cannot be "saved." In 1910 the available capitals were too quickly absorbed by the revival of trade, for not only has the standard of living improved, not only have the necessaries of life risen in price, but industry needs larger capitals, because the cost of raw materials has been raised, because wages have risen, because increased amounts are necessary for any extension of works and workshops. In 1910, moreover, there continued the wave of speculation which had begun in 1909. It made such large demands upon the money market that the board of the Imperial Bank issued a manifesto of warning. The bank rate of 5 per cent. during the second half of 1910 was higher than the rate which the commercial revival could assimilate, and so it retarded for the time being the pace of the industrial progress.

◆

The annual meeting of the Grand Trunk Pacific Railway has been adjourned on account of the absence of the president, Mr. Charles M. Hays, who is touring the West.

HOW GASOLINE SHOULD BE HANDLED.

Underground Storage the Best—Methods of Drawing Gasoline—Modern Methods Reduce Insurance Rate.

Gasoline will generate 8,000 cubic feet of gas, which if ignited will expand 4,000 times this space, and one gallon of gasoline properly mixed with air,—sixteen parts air to one of gasoline—and compressed has an explosive power of 83⅓ pounds of dynamite. The above facts were stated at the recent convention of Western Canada Firemen's Association Convention held in Calgary, Alta., recently.

Gasoline in itself is as harmless as water, and when properly confined, is not an explosive. The explosive resulting from gasolene is created by the exposure of gasolene to air. A gasolene vapor is heavier than air, so that when gasolene is exposed in a building, the vapor has a tendency to constantly drop, and to lie very close to the floor, under any obstruction, or in corners, settling in the lowest point possible, remaining there until a current of air strong enough removes it. Therefore, the vapors from gasolene may be present in great quantities in a building, but, because of their being so close to the floor, it is impossible to detect their presence by the odor.

Gasolene Should be Stored Underground.

Gas from gasolene being heavier than air is no doubt the cause of the recent disastrous fire in the Winnipeg garage. While it cannot be authentically stated, it is believed that because of the gasolene being transferred inside the garage in open buckets, and the atmospheric conditions being most favorable to gasolene forming a vapor quickly, the entire lower strata of air in the garage became permeated with gaseous vapor, and one of the horses which had been driven to the garage, striking its shoe on the cement floor, made a spark, which ignited quickly the gaseous vapors, causing immense property loss of over $250,000.

Gasolene, as well as other volatile liquids, should be stored underground, in a well-made tank designed for the purpose. The tank should be so constructed as to prevent evaporation, and all flanges or openings should be on the top. Under no consideration should there be openings on the side or bottom of the tank, which would in any way permit the liquid to flow from the tank by means of gravity. The quantity of gasolene which is stored should regulate the thickness of steel of which the tank is constructed. Naturally, a large storage tank, say about 1,500 or 2,000 gallons, should be manufactured of 3-16 inch to ¼ inch plate, thus eliminating any possible chance of the weight of the tank itself causing it to buckle, and thus spring a leak. A plan which is followed with tanks of say 500 or 600 gallon capacity or less, is to have the material manufactured of 12 or 14 gauge thickness.

A Low Uniform Temperature Should be Maintained.

Gasolene, if maintained at a low uniform temperature, not only retains its quality, but the possibility of evaporation is reduced to the minimum. Gasolene tanks should never be placed in vaults or pits, as they simply provide a hiding place for the gasolene vapors which may result from leakage or accident, and the tank buried in the ground, simply covered by the earth, has never been known to explode if properly vented. While it is conceded that the only method of storing gasolene is in underground tanks, it is absolutely vital to the success of handling this liquid with the minimum amount of danger to have them properly vented. The vent pipe from the tank should extend at least sixteen feet above the top of the tank. This will insure no evaporation, inasmuch as gas will never rise sixteen feet unless under pressure. The vent pipe should be protected by a fine wire gauze mesh, and where the vent pipe enters the flange on the tank, another wire gauze should be provided, so that if the walls of the building fall, and the vent pipe be broken, there is no possible chance of the gasolene in the tank becoming ignited. Fine wire gauze mesh is used for the same reason that it is used on the miner's safety lamp.

Methods of Drawing Gasolene.

There are several methods of drawing gasolene from the tank, but that which is the most commonly used, and which seems to be the most successful, is by means of an approved self-measuring pump, which should be located higher than the tank. All pipe lines for suction or vent should be made absolutely tight by cement which is not affected by the action of gasolene. No point in the suction line must ever be below the top of the tank, as it is necessary to guard against any accident that may happen to the pipe line in case of fire, and, as a result, the gasolene be forced into the building by gravity.

Gasolene, or any other inflammable liquids, should never be handled by pressure system, as such an arrangement does not permit the control of the gasolene, for if the discharge line becomes broken, the liquid will automatically discharge itself into the building, and, as a result, is very dangerous, especially in case of fire, as it will help to increase same. If a pump is used to draw the liquid from the tank, it is obvious that when the operator ceases the operation of the pump, the flow of liquid stops immediately, and there can be no further disturbance of the liquid in the storage tank without the operator again working the pump.

While the use and application of gasolene is continually broadening in various ways, it is now principally used in automobile garages, paint oil stores, and what is commonly known as the dry-cleaning establishments.

Dry-Cleaning Establishments are Grave Hazard.

In addition to the safe storage of gasolene in garages, there is another grave hazard which confronts the the fire department of every city,—i.e., what is known as the dry-cleaning establishment. It is not an uncommon thing for gasolene to be stored in these places in common open tubs, and frequently in a room where there is an open fire. Shringent by-laws should be passed by all municipalities, which will compel this class of business to either handle the naptha by the modern method, or to be compelled to discontinue business at once, for this method of handling gasolene in dry-cleaning establishments is no longer necessary. There are mechanical devices to be had, which will reduce the danger in dry-cleaning establishments equally as much as now provided for garages, as mentioned above. Modern naptha storage and control equipments can be had at a minimum cost, which will enable the dry-cleaners to use their gasolene over and over, if desired, and yet store it with safety.

The modern methods of oil storage should receive most serious attention, is the handling of paint oils, such as raw, boiled, turpentine, etc., in hardware stores. It is well-known that waste or saw-dust, saturated with linseed oil, will take fire spontaneously in a temperature of about 70 degrees. Now, while these oils may be considered inflammable, they can be safely stored in above-ground tanks, provided they are substantially built, and evaporation proof, and there is to be had a modern system which will eliminate this hazard in hardware stores, factories and mills, not only reducing the hazard to the minimum, but effecting a great saving in room, and being otherwise of value to the user.

Modern Methods Reduce Insurance Rate.

Insurance companies are loath to give reductions in insurance where any appliance is installed, unless there is absolutely no question as to the merit of the equipment. If insurance companies do recognize a system, it should certainly be an evidence of its worth. The board of underwriters throughout Canada have not only acknowledged the value of modern systems of oil and gasolene storage, but are giving material reductions in rates, wherever these systems are installed, not only in public and private garages, but in hardware stores, mills and factories, for handling various paint and lubricating oils. Insurance companies would evidently not give reductions in rates if reduction in the hazard is not effected.

If modern methods of gasolene and oil storage are adopted, the danger of life and property from this source can be reduced to the minimum.

AUGUST BANK STATEMENT.

The details of the August bank statement appear in the current issue of The Monetary Times. Its figures were analyzed in last week's issue.

FARMERS BANK RELIEF COMMITTEE.

The first step toward the formation of a Farmers Bank Relief Committee for the purpose of securing, if possible, one hundred cents on the dollar, were taken at a meeting held in Toronto this week. The personnel of the relief committee is as follows: Chairman, Rev. George Gilmore of Fingal, Ont.; secretary, Rev. C. F. Clarke of Kerwood; treasurer, Mr. A. S. Minthorne of Lindsay; and Messrs. W. H. Pollard of Pontypool and J. G. Ashmore of Dunsford.

The chairman made the following statement regarding the aims of the committee: "All necessary steps are being taken to secure for the depositors their money. The matter will be presented to the new Government."

LLOYDS SYSTEM OF UNDERWRITING.

"No Such Thing as Insurance at Lloyds, Except for Marine Risks," Says a Writer in London Truth.

A recent copy of London Truth contained an article under the heading, "The Threatened Scandal of Lloyds." It reads in part as follows:—

"There are two ways of looking at this question of insurance with Lloyds. The first is the uncertainty of the security afforded in consequence of the absence of any knowledge of the financial standing of the individual underwriters who alone are responsible for making payments in the event of claims arising. The second aspect of the matter is the inability of particular underwriters to meet their liabilities.

"The more general aspect is an old-standing, permanent, obsolete condition of things which no one would countenance for a moment in connection with other financial transactions; for example, I constantly have to criticize bogus philanthropic societies or individuals for not publishing accounts of their receipts and expenditure, and it is now a recognized rule among all sane people to give no money to philanthropic bodies which do not publish accounts.

No Financial Statement.

"It seems a trifle absurd for people to trust their financial security to underwriters at Lloyds who vouchsafe no information of any sort or kind about their financial position. It is true that the committee at Lloyds have done a little to shut the stable door after the horse has been stolen by providing for the discontinuance of business by underwriters who have become insolvent. It is further true that legislation has been, or is being, obtained which may or may not be of value according to the steps taken by the committee of Lloyds.

"In any case, if insurance means 'making sure,' there is no such thing as insurance at Lloyds except, possibly, for marine risks. Holders of Lloyds policies may be, and sometimes are, perfectly secure, but there is no means that I can discover of making sure that they are really safe.

"The whole system seems to me essentially wrong in principle, and a recent case illustrates how it may work out disastrously to every one. An underwriter at Lloyds, whose name I prefer to leave unmentioned, conducted a small and sound business successfully for many years. He then met with an accident which almost incapacitated him from attending to the business, and entirely precluded him from any effective supervision of his affairs. His business was conducted by a manager, who very quickly increased it to about ten times its former magnitude. The result was a hopeless failure and bankruptcy proceedings. Among other things he received from one insurance company some thousands of pounds for premiums. He reinsured the whole of the risks with another company at a lower rate of premium, taking 5 per cent. for himself. From the second company he received payment for claims, but the money so received was not paid over to the first company by whom he had been paid the premiums.

"This first company obtained judgment against him for some thousands of pounds, including £1,000 for interest and costs. The insurance just referred to was not under marine policies, the claimants under which successfully asserted their right to the whole of the deposit of £5,000 with Lloyds to cover marine risks, and the marine policy-holders claim as unsecured creditors for the balance which is due to them. This particular underwriter had for years done a prudent and satisfactory business. He was an able and experienced man, and his reputation was high. If it is prudent to insure with Lloyds at all for anything but marine risks, it was right to do so with this particular underwriter. These considerations, however, in no way alter the ultimate fact that when the policies he issued became claims he was unable to meet his liabilities.

Signed by Group of Underwriters.

"A Lloyds policy is signed by a group of underwriters, each of whom is responsible for his own share and in no way liable for his co-underwriters. There have been cases of late where one or some of the members of the group have been unable to pay, and the others, who are supposed to be solvent, have made the excuse that they would pay when the rest of the group paid, but not before

"In other instances, after the amounts of the claims have been agreed upon, underwriters have offered 12s. 6d. or 15s. in the £ or even less, proclaiming their inability to pay in full, and suggesting that the refusal of these terms might result in less or nothing being obtained.

"Sometimes it is doubtful whether or not it would be worth while to take proceedings against underwriters for the recovery of the amount due. People are naturally averse to throwing good money after bad, and if there is little probability of obtaining the debt and costs people prefer to cut their losses. This is the position of affairs in regard to eighty-two underwriters at Lloyds at the present time. It is not pretended that the whole of the eighty-two are insolvent, and there is little or no dispute about the amount of the claims. There is some difficulty in the way of legal proceedings because of an arbitration clause in the treaty. Certain it is that the money due amounts to a very large sum, and cannot be obtained, and it may be necessary to issue eighty-two writs for its recovery.

"If people doing business on a large scale with Lloyds underwriters, and who may be supposed to have some sort of information about the standing of the group with whom they deal, meet with experiences of this kind, what fate can individual policy-holders expect to meet with who trust to unknown gentlemen for payment of claims when they arise? Such people may be perfectly safe, but these contracts cannot legitimately be called insurance, since there is no means of making sure of the ability of the underwriter to pay.

CASUALTY, FIDELITY AND SURETY INSURANCE.

New York Report Shows a Large Amount of Business Written.

Superintendent of Insurance Hotchkiss has made public Volume III. of the Annual Department Report, covering the business of casualty, fidelity and surety, credit, real estate title and mortgage guarantee companies for the year ended December 31, 1910.

This report carries the audited statement of these companies and accompanying statistical tables, fixing the valuation of their bonds and stocks owned in accordance with the allowed appraisal of the department, as arrived at by its expert appraiser, thus placing the valuations of these holdings on a uniform basis. In auditing these statements the department has gone into great detail as to the valuation and allowance of the various asset items returned by the companies and has also, so far as possible, made a proper readjustment of their liabilities where deemed necessary.

This report indicates that the audit of the statements has in a number of instances changed the figures from those published in the preliminary tables issued by the department in April last, when for the early information of the public the returns of all companies, other than fire, reporting to the department were published in tabular form without audit.

General Summary of Report.

A general summary of the report is shown by a comparison of the results of the business of 1909 and 1910, as follows:—

Casualty, Fidelity, Surety and Credit Companies.

	1909	1910
Number of Companies	54	54
Assets	$117,818,570	$129,387,972
Reserves for unpaid losses	20,231,482	22,058,028
Unearned premium reserve	34,970,472	38,897,480
All other liabilities	6,847,515	7,738,248
Total liabilities except capital	$ 62,049,469	$ 68,693,756
Capital stock	$ 26,179,225	$ 28,669,000
Surplus	29,589,876	32,025,216
	1909	1910
Premiums	$ 84,118,227	$ 85,382,910
Other income	6,826,797	6,918,797
Total income	$ 90,945,024	$ 92,301,707
Claims paid	$ 26,422,262	$ 30,900,595
Dividends to stockholders	3,005,066	4,086,410
Expenses	42,064,386	46,903,819
Total disbursements	$ 71,491,714	$ 81,890,824

Real Estate Title and Mortgage Guarantee Companies.

	1909	1910
Number of companies	10	10
Assets	$ 46,543,165	$ 48,206,312
Liabilities except capital	$ 14,655,665	$ 15,854,693
Capital stock	17,710,000	17,085,000
Surplus	14,177,500	15,266,619
Income	$ 7,657,826	$ 6,086,567
Disbursements	$ 6,331,142	$ 5,301,699

The annual report of the Dominion Department of Insurance for 1910 has not yet been issued.

FOR FIRE INSURANCE MEN.

The following articles will be of special interest to fire insurance men this week:—

Need for Fire Marshals in Canada. Page 1420.

How Gasoline Should be Handled. Page 1423.

Lloyds System of Underwriting. Page 1424.

Monetary Times Register of Recent Fires. Page 1425.

Additional Information Concerning Recent Fires. Page 1425.

New Electric Wiring Rules. Page 1426.

RECENT FIRES.

Monetary Times' Weekly Register of Fire Losses and Insurance.

The following particulars are gathered from first Press reports of conflagrations. Upon these are instituted further inquiries which appear under heading "Additional Information."

Chatham, Ont.—September 21st.—Barnes' livery stable destroyed. Loss and origin unknown.

Lindsay, Ont.—September 26th.—Cottage of Mr. A. F. McMichael, destroyed. Loss and origin unknown.

Galt, Ont.—September 26th.—Farm house and barn of Mr. H. Zimmerman, destroyed. Loss and origin unknown.

Peterboro, Ont.—September 26th.—House of Mr. Edward Webb, destroyed. Loss, about $1,000. Origin, defective stove.

Wynyard, Sask.—September 23rd.—Dancing hall owned by Mr. G. Johnson, destroyed. Loss, about $2,000. Origin unknown.

Harriston, Ont.—September 24th.—Barn owned by Mr. Pritchard destroyed. Loss unknown. Origin, careless with matches.

Picton, Ont.—September 24th.—Coal sheds of Mr. Nelson Ostrander, destroyed. Loss, about $3,000. Origin, careless with matches.

Davidson, Sask.—September 20th.—Barn of Mr. A. B. McGregor, destroyed. Loss about $1,300. Insurance, $350. Origin unknown.

Winnipeg, Man.—September 22nd.—Store of Mr. W. J. Pengelley, 321 Donald Street, destroyed. Loss about $500. Origin unknown.

Stanley, Ont.—September 23rd.—Saw mill and blacksmith's shop owned by Mr. T. P. Kelly, destroyed. Loss and origin unknown.

Sherbrooke, Que.—September 19th.—Sheds of Stanstead Granite Quarry Company, Beebe Junction, destroyed. Loss and origin unknown.

Brantford, Ont.—September 21st.—Waterloo skating rink, frame house and two barns destroyed. Loss about $15,000. Origin unknown.

London, Ont.—September 25th.—Evaporator, owned by Mr. Blosdale, Delaware, destroyed. Loss, about $3,000, no insurance. Origin unknown.

Morden, Man.—September 20th.—Barns of Mr. Peter Patterson, destroyed, also 3,000 bushels of oats. Loss unknown. Origin, lamp explosion.

Howe Island, Ont.—September 25th.—Barn owned by Mr. Henry Beautain, destroyed, also two horses, 18 tons hay, and farm implements. Loss and origin unknown.

Vancouver, B.C.—September 18th.—Frame building of the Hoffar Motor Boat Company, 1933 Georgia Street, destroyed. Loss about $1,500. Origin unknown.

Melbourne, Ont.—September 26th.—Barn of Mr. J. C. Fletcher, including season's crops, destroyed. Loss unknown. Origin, supposed, tramps careless with matches.

Montreal, Que.—September 21st.—Two barns, stable and hot house belonging to Mr. Joseph Quevillion, St. James Street, destroyed. Loss and origin unknown. Premises of Mr. Bernard Bernstein, 9 East Dorchester Street, destroyed. Loss unknown. Origin, careless with matches. September 24th.—Tanks in Canadian Oil Company yards, St. Etienne Street, destroyed, also 8,000 gallons of oil. Loss, about $15,000. Origin, live coal from passing engine.

Toronto, Ont.—September 23rd.—Stable of Mr. Alex. Holland, 19 Jones Avenue, destroyed, also seven horses. Loss about $2,000. Origin unknown. September 27th.—Premises of Mr. J. Brass, Yonge Street, damaged. Loss about $1,000. Origin, supposed defective furnace. September 27th.—Stables of Canadian Transfer Company, damaged. Loss about $2,800. Origin, spark from hay cutting machine. September 27th.—Stable of Connell Coal & Wood Company, 324 King Street West, damaged. Loss about $1,000. Origin unknown. September 27th.—Shed, rear of Messrs. Smith Brothers, Berkeley and Duke Streets, damaged. Loss about $500. Origin unknown.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

Walkerville, Ont.—The loss sustained by Messrs. Hiram Walker & Sons, Limited, was $712 on buildings. Insurance in the Royal, $3,000.

Montreal, Que.—The Merchants Awning Company's loss was $4,500 on stock and $2,000 on buildings. Insured in the following companies:—United London & Scottish Company, £307; Missiquoi & Rouville, $2,500; North America, $5,000; The Provincial, $1,500; The Acadia, $3,500; Atlas, $3,500; Fidelity Phenix, $4,000; Hartford, $2,500; Economical, $2,000; Ottawa, $2,500. The loss sustained by the Canadian Rubber Company was $120, fully insured. The property destroyed belonged to the contractor who is erecting the new factory, and one of his workmen was responsible for the fire which was caused by a plumber's torch.

THE TRAVELERS' INSURANCE COMPANY'S HOUSEWARMING.

The removal of the provincial headquarters in Toronto of the Travelers Insurance Company of Hartford, Conn., and its auxiliary, the Travellers Indemnity Company of Canada, to the new Standard Bank Building, Toronto, was made the occasion on Monday of a convention of representatives from the head office, the local staff, and the agency force from all parts of Ontario. The convention, which took place at the King Edward Hotel, was presided over by Mr. John B. Lunger, first vice-president of the company. Mr. Lunger in welcoming the gathering expressed his regret that President Sylvester C. Dunham had found it impossible to be present.

Mr. Lunger was followed by Mr. B. A. Page, secretary of the Accident Department, who gave some interesting statistics regarding the growth of the company's business throughout Canada but more especially of Ontario. So encouraging had this growth been that the company, in addition to securing larger quarters, had been obliged to add to its life and accident department several new departments, such as the liability department, the adjustment of claims department, at the head of each of which had been placed a superintendent. In tracing the growth of the company's business from its small beginning in Canada about fifty years ago to its present large volume, he did not fail to pay a just tribute to the managers who had preceded Mr. H. A. Laurence, their present manager, under whose buoyant and aggressive regime the company was leaving all previous records far behind. The company's general manager for Canada, Mr. Frank F. Parkins, of Montreal, joined in the general congratulations and gave a brief sketch of the founding of the Travellers Indemnity Company of Canada—of which he is vice-president. Mr. D. A. Dunham, assistant secretary, assured them that the largely increased expenditure of the company in providing new facilities for the conduct of its business in Toronto was fully warranted. The remainder of the sessions was devoted to a discussion of the company's field work in all its various operations: Life, personal accident, health, employers' liabiliy, automobile insurance, steam boiler, etc., etc., and the various plans in connection therewith. The evening session took the form of a banquet at McConkey's, provided by the company, at which Mr. Lunger again presided. Two pleasant features of the occasion were the presentation by Captain George C. Coles, of Collingwood, to Mr. Laurence on behalf of the agency staff, of a cabinet of silver as an expression of their personal regard for him; and the passing of the Loving Cup, a large handsome silver amphora presented to the Toronto branch office as a trophy won in a successful contest with a large number of competitors across the line.

The Monetary Times learns that the board of investigation appointed to investigate the combine complaint against the United States Shoe Machinery Company, of Canada, met on Thursday. Justice Laurendeau is chairman of the board and Messrs. W. J. White, K.C., and J. C. Walsh, the other members.

NEW ELECTRIC WIRING RULES.

Better Grade to be Used—Contractors May Use Old Stock First—Position of Our Fire Underwriters' Associations.

At the end of the present year new rules for electric wiring will come into force. Under these the wire to be used will be of a much better character and similar to that used in England. The cheap grade of what has been known as rubber insulated wire will be barred by the wiring inspectors.

May Use Old Stock First.

Mr. H. F. Strickland, chief electrical inspector of the Canadian Fire Underwriters' Association, states that a limited time will be given contractors to use up what stock they may have on hand of the old wire, but he advises against any purchase of stock of the kind of wire that has been used in the past.

Rule 50 of the requirements of the National Board of Fire Underwriters for electric wiring and apparatus applies to rubber covered wire.

National Fire Protection Association.

The Canadian Fire Underwriters' Association is an active member of the National Fire Protection Association of Boston. The objects of the National Fire Protection Association are stated in the articles of association to be the promotion of the science and improvement of the methods of fire protection and prevention, the obtention and circulation of information on these subjects and the co-operation of its members in establishing proper safeguards against loss of life and property by fire. The following clauses, extracted from the articles of association, show the composition of the membership of the National Fire Protection Association:—

"Article 3. Membership shall consist of (a) Active, (b) Associate, (c) Subscribing, and (d) Honorary. It is understood that through membership none is pledged to any course of action.

"a. Active members.—National Institutes, Societies and Associations interested in the protection of life and property against loss by fire; State Associations whose principal object is the reduction of fire waste; Insurance Boards and Insurance Associations having primary jurisdiction shall be eligible for active membership. Annual dues shall be $15.

"b. Associate Members.—National, State and Municipal Departments and Bureaus, Board of Trade, Chambers of Commerce and similar business men's associations; Insurance Boards and Insurance Associations not eligible for active membership; Individual members of the organizations represented in the active or associate membership; Individuals engaged in the fire insurance business shall be eligible for associate membership. Annual dues shall be $5.

Subscribing and Honorary Members.

"c. Subscribing Members.—Individuals, firms and corporations interested in the protection of life and property against loss by fire shall be eligible for subscribing membership. Annual dues shall be $5.

"d. Honorary Members.—Honorary life membership may be conferred upon ex-members prominent in the promotion of the objects of this Association, provided they are not identified with fire protection from a commercial standpoint. A favorable report by the Executive Committee and a majority vote of the Association at any regularly called meeting are necessary to elect. This membership carries all the privileges of associate membership without dues, including eligibility to serve upon any committees of the Association."

Canadian Members.

Among the Canadian active members of the National Fire Protection Association are:—

Canadian Fire Underwriters' Association, Montreal; Canadian Fire Underwriters' Association, Toronto; Canadian Manufacturers Association, Toronto; Mainland Fire Underwriters' Association of Vancouver, B.C.; New Brunswick Board of Fire Underwriters, St. John, N.B.; Nova Scotia Board of Fire Underwriters, Halifax, N.S.; Royal Architectural Institute of Canada, Montreal; Western Canada Fire Underwriters' Association, Winnipeg.

Many members of Canadian fire insurance companies are also associate or subscribing members of the National Fire Protection Association.

National Electrical Code.

The National Electrical Code was originally drawn in 1897 as the result of the united efforts of the various Insurance, Electrical, Architectural and allied interests which through the National Conference on Standard Electrical Rules, composed of delegates from various National Associations, unanimously voted to recommend it to their respective associations for approval or adoption; and is here presented by the National Board of Fire Underwriters with the various amendments and additions which have been made since that time by them.

The National Conference has disbanded, the work of the Underwriters' National Electric Association and of the National Conference having been taken over by the National Fire Protection Association.

The following associations, formerly members of the National Conference, are represented on the Electrical Committee of the National Fire Protection Association:—

American Electric Railway Association; American Institute of Electrical Engineers; Associated Factory Mutual Fire Insurance Companies; National Board of Fire Underwriters; National Electric Light Association; National Electrical Contractors Association; National Electrical Inspectors Association.

BOND TENDERS INVITED.

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials.

Brantford, Ont.—The ratepayers will vote on a by-law to raise $85,000 for enlargement of hospital.

Luseland, Sask.—Until October 15 for $8,000 15-year debentures. Mr. J. H. Wilson, secretary-treasurer.

Ridgetown, Ont.—Until October 20th for $35,000 30-year 4¾ per cent. debentures. Mr. D. Cochrane, clerk.

Mapleton S.D., No. 5, Man.—A by-law to raise $3,000 will be voted on on October 10th. Mr. J. MacDougall, clerk, St. Andrews.

Govan, Sask.—Bond tenders invited for $5,000 15-year 6 per cent. fire debentures. Mr. A. Graham, secretary-treasurer.

Deloraine, Man.—Until October 26th for $6,000 20-year local improvement debentures. Mr. D. L. Livingston, secretary-treasurer.

Wilkie, Sask.—Tenders are invited for the $35,000 waterworks and electric light debentures. Mr. T. A. Dinsley, secretary-treasurer.

Outremont, Que.—Until October 2nd for $250,000 4½ per cent. town bonds, due November 1st, 1953. Mr. J. Kruse, secretary-treasurer.

Calgary R.C. S.D., No. 1, Alta.—Until October 23rd for $60,000 30-year 4½ per cent. debentures. Mr. J. McCaffary, secretary-treasurer.

Donald S.D., No. 1094, Man.—On October 7th the ratepayers will vote on a by-law to raise $1,500. Mr. T. Bunn, secretary-treasurer, St. Clements.

Fergus, Ont.—Until October 23rd for $25,000 5 per cent. 15-year debentures. Mr. J. Beattie, clerk. (Official advertisement appears on another page).

Union S.D. of Friedensfelt, No. 1572, Man.—On October 10th a by-law to issue $1,800 debentures will be voted on. Mr. J. O. Beaupre, secretary-treasurer, La Broquerie.

Melita, Man.—The electors will vote, on October 7th, on a by-law to issue $4,000 20-year 6 per cent. debentures to establish public wells. Mr. J. Robertson, town clerk.

St. Mary's, Ont.—Until October 2nd for $135,000 "Consolidated" 4½ per cent. 30-year, and $5,000 4½ per cent. 20-year cement bridge debentures. Mr. T. M. Clark, clerk, St. Mary's.

Regina, Sask.—Until October 16th for $1,032,800 4½ per cent. 20 and 40-year debentures. Mr. A. J. McPherson, city commissioner. (Official advertisement appears on another page.)

Hardisty, Alta.—Until October 31st for $3,000 6 per cent. 7-year sidewalk and street debentures. Mr. A. Mursell, secretary-treasurer. (Official advertisement appears on another page.)

ENGLISH ENGINEER FINDING CANADIAN SCHEMES.

Several Tramway and Radial Proposals for Canada Are to be Placed Before Financial House.

The Monetary Times has had an interview with Mr. J. Edward Waller, M. Inst. C.E. of Messrs. Kincaid, Waller, Manville & Dawson, consulting engineers, of London, England, following on a tour of investigation made by Mr. Waller of the Dominion.

Mr. Waller's visit to Canada was at the instance of several financial groups, which evinces a growing interest in the Old Country in the opportunities which Canada offers for legitimate and sound investments. Some of the financial firms by whom Mr. Waller has been retained are, it is understood, for the first time turning their attention to this country; but in one case Mr. Waller is acting in connection with a firm in England, Messrs. Matthews, Wrightson & Company, Limited, who have already shown their belief in Canadian prospects by the establishment of offices in Montreal and Winnipeg.

Has Submitted a Report.

Our enquiries elicited from Mr. Waller that he was particularly impressed with the growth of Winnipeg, Calgary, and Vancouver. Mr. Waller has submitted to Messrs. Matthews, Wrightson & Company, his report on a proposed radial line from Calgary to Chestermere Lake, a distance of about ten miles in an easterly direction. The Chestermere Lake is the storage reservoir of the Canadian Pacific Railway for the irrigation belt. It is about four miles in length and a mile wide. Mr. Waller believes that this will become a favorite summer resort for the inhabitants of Calgary when proper traffic facilities are provided. The numerous purchases of land sites round the lake for residential purposes; the reservation of a township site by the Canadian Pacific Railway Company, and the presentation of a park site by the same company, give color to these anticipations.

Mr. Waller's journey included a visit to Nanaimo, in British Columbia, at the instance of Messrs. Heaton's Agency, of Toronto, who have interested themselves on behalf of a British syndicate in connection with a franchise for a street car system proposed by the city. While the population of the city is only about 5,000, Mr. Waller informs us that the city limits are very restricted, and that for the purpose of a commercial enterprise of this character, it is probably to be reckoned more in the neighborhood of 12,000. Mr. Waller thinks it more than probable that his friends will be prepared to take up the Nanaimo concession, provided the city authorities are prepared to accept reasonable conditions.

Inter-urban Electric Line May be Constructed.

Amongst the other propositions Mr. Waller is taking home to his friends is the construction of an inter-urban electric line between London, Ontario, St. Mary's and Stratford, a length of about forty miles, with a branch to Lucan, about six miles in length. The charter is in the hands of the North Midland Railway Company, and it is proposed to be financed by an English group whom Mr. Waller represents.

In connection with hydro-electric undertakings, a water power at Waddington, on the St. Lawrence, has been investigated. Waddington is in the United States, almost directly opposite Morrisburg, and there are many towns in Canada urgently requiring a supply of electrical energy situated within easy reach of Waddington, while at considerable distance from the Niagara Falls installation, and, as a consequence, the Hydro-Electric Commission have, we understand, entered into a contract with the Waddington Company for the supply of electricity over transmission lines to be erected by the Commission, to such towns as Kingston, Brockville, Lynn, Morrisburg, Cardinal, and Prescott. The charter under which the company holds the property emanates from the United States, but it is understood that a Canadian or English company will probably hold the entire stock, and make a fresh bond issue in order to facilitate English finance.

Mr. Waller's firm are well known as consulting engineers in England. Amongst the numerous undertakings for which they are responsible, probably a work which they are at present carrying out in the electrification of the London, Brighton & South Coast Railway in England, and the large system of electric tramways in Buenos Ayres, in respect of which they are consulting engineers, will be most likely to be known; but their sphere of action embraces many countries.

BRITISH COLUMBIA.

Scheme for Colonizing Canada with British-Born—New Electric Line for Okanagan District.

(Staff Correspondence.)

Vancouver, September 23rd, 1911.

If Americans have found it profitable to come into British Columbia in the past they will doubtless come in the future when there is good opportunities for making money. The Borden government, with a policy of declared protection, will probably place a duty on lumber similar to that imposed by the United States. It is reasonable that a duty on any product into the United States should be met with a duty on the same product coming into Canada, other things being equal. Lumbermen have asked for it, and a duty would mean much business for British Columbia mills. It is an old story how rough lumber is dumped into the Canadian West, even into Vancouver, by American mills. The policy of giving what we get is applicable in this instance.

It might be termed an opportune coincidence that the party of prominent British investors should be in the West at a time when increased inter-imperial trade was a subject of discussion. The party consisted of the Duke of Sutherland, Viscount Castlereagh, Lord Charles Beresford, Lord Desborough, with Mr. Sangster, chief tenant farmer of the Duke, accompanied by Capt. C. E. Hutton, London, representative of the North Coast Land Company, Limited, and Mr. C. S. Edwards, president of the company. The Duke of Sutherland has purchased a tract of land near Fort George, which it is the intention to colonize. When it was seen how good the land was more was bought.

Colonization of Canada by British-Born.

This is corroboration of the statement made by a surveyor returned from the north that some of the best land in the province is found away beyond the present settled strip of civilization along the main line of the Canadian Pacific Railway. The Duke of Sutherland is interested in the colonization of Canada by the British-born, not from the standpoint of profitable returns, but from a desire to encourage the emigration to Canada of a class of British workmen that has confidence and ambition but little or no opportunity to prove its worth in the agricultural districts of Great Britain.

There is a prospect of at last having a satisfactory treatment of the low-grade zinc ores of southeastern British Columbia. The announcement is made that Dr. Gordon French's experiments looking towards a commercial process of the reduction of the refractory zinc ores of the Kootenay have been successful. These experiments have been conducted for a year at Nelson. If everything works out all right on a large scale it will mean much for mining in the Kootenay and Boundary districts.

New Electric Line for Okanagan District.

Mention has been made in these columns of the project of the Coteau Power Company to construct an electric line in the Okanagan district, with branches, the power to be obtained from Shuswap Falls. This was proposed first some years ago, and recently the charter of the company has been acquired by Sir William Mackenzie, Sir Donald Mann and associates. When in the West, they visited the district to inspect the possibilities, and also to consider in a general way the route for a line which will link up the Okanagan with the Canadian Northern, thus giving the railway a feeder for a large fruit producing section of the province. Rapid transportation throughout the Okanagan would mean much to the people on the land.

British capital is interested in the purchase of thirty acres on the north of the Fraser River, immediately south of Vancouver. The city is extending out there, and it is thought some institution may be established. Not many years ago the land was bought by the vendors for $1,000 an acre, and it sold for approximately $300,000.

◆

The directors of the Spanish River Pulp and Paper Mills have declared the half-yearly dividend of three and one-half per cent. on the preferred stock for the six months ending August 31st. The dividend will be payable October 15th next. Reports submitted to the directors, it is said, were of a satisfactory character, showing earnings for the six months in excess of those of the same period last year, and this notwithstanding the fact that the company's mill was shut down for practically the whole of April, owing to the improvements that were being carried out.

DEBENTURES AWARDED.

Amaranth Township, Ont.—$3,500 5 per cent., to Bank of Hamilton, Orangeville, Ont.

Brandon S.D., Man.—$45,000 5 per cent. 30-years, to Messrs. Nay & James, Regina.

Small Schools, Alberta and Saskatchewan.—$8,000, to Messrs. Alloway & Champion, Winnipeg.

Lemburg S.D., Sask.—$2,000 30-year 6 per cent. debentures, to Messrs. Nay & James, Regina.

Small Schools, Alberta and Saskatchewan.—$10,500 6 to 7 per cent. 10-years, to Messrs. Nay & James, Regina.

North Edmonton S.D.—$6,500 5 per cent., 20 instalments, to Messrs. Æmilius Jarvis & Company, Toronto.

Smith's Falls, Ont.—$43,964.33 5 per cent. 20-years, to Messrs. Æmilius Jarvis & Company, Toronto. School purposes accounted for $12,500 of the total, and local improvements for $31,464.33. Smith's Falls is a divisional point on the Toronto-Montreal line of the Canadian Pacific Railway; has a population of 6,000, with total assessment of $1,854,319.

◆

MONTREAL WATER AND POWER COMPANY.

The question of the purchase of the Montreal Water & Power Company by the City of Montreal is again being discussed. The Montreal Water and Power Company supplies Westmount and many of the suburbs, some of which have recently been taken into the city. It will become necessary to operate all the water supply under the one department, and consequently it is believed that Montreal will shortly close with the Montreal Water & Power Company.

Hitherto the city and the company have not been able to get together owing, so it is claimed by the city, to the extravagant price demanded by the company. Alderman Lapointe at the recent meeting said that it would be shown by the company that it was willing to take $6,500,000 for its plant, being a reduction of half a million dollars on its former price. He intimated that unless the matter were fixed up it would go before the Legislature at the next session, after which, in his opinion, the city would have to pay even more than the $6,500,000 now demanded.

MATURING BONDS

—And Reinvestment of Funds

During the remaining months of the year there will come to maturity many Corporation and Municipal bonds. Funds will require to be reinvested.

Of the $20,000,000 and more, Canadian Northern Railway Equipment bonds which The Dominion Securities Corporation, Limited, has placed on the market—since series "A" of 1902—nearly $8,000,000 have been retired by the operation of the serial form of issue. In October and November $700,000 fall due—the proceeds will be seeking investment—and we can recommend no better security than these same Equipment bonds.

Canadian Northern Railway Equipment bonds of a later series and of various maturities—five to eight years—may be had to return from 4¾% to 5. And not only will we make proposals for exchange of the shortly to mature Equipment bonds, but for any bonds or debentures falling due within a period of one year.

Some Municipal debentures will yield 4¾ % to 5¼ %.
Some Railroad and Public Utility Bonds will yield 5 %.
Some Industrial Bonds will yield 5½ % to 6 %.

A new sawmill may be established on the banks of the Fraser River, B.C., at a cost of about $500,000. The plant will be run by electricity, and every modern appliance known to lumber men will be installed. There will also be a large box factory in connection with the sawmill.

The Governor of Minnesota, in issuing his official proclamation of Fire Prevention Day, cites the fire waste of the country and of the State, showing that most fires are due to carelessness or criminality, and pointing out the causes of fire that may be most easily corrected. He closes thus: "Taking into account these vital considerations for the welfare of our State, I hereby do proclaim the 8th day of November, 1911, to be known as Minnesota Fire Prevention Day, and urge that it be so recognized and observed in all the departments of the State, in all public and private institutions of learning, and by all organizations and persons interested in the social and economic uplift of our people. It is urged that the press, as the strongest factor in the development of public sentiment, impress the importance of this movement upon our people."

British Columbia Mortgages

In placing any surplus funds your first thought should be—security. The careful investor is wary of mining and oil shares, because no security is usually given.

No safer form of investment exists to-day than first mortgages. Ours are placed on improved city properties in Vancouver and farms in Saskatchewan and Alberta. Our valuations are made by experts and are very conservative.

No loan is placed for more than 50% of appraised value. All loans are approved by board of directors. The company insists on the payment of a portion of principal at end of third year, interest payable half-yearly. Titles are searched and certified by our solicitors.

We guarantee to net you SIX PER CENT., making all collections and attending to minor details without charge. Let us tell you more about our Guaranteed First Mortgages.

Conservatism in Investments

Ever since it was established in 1873 it has been the endeavor of this house to be, if anything, ultra-conservative in all investments. Before buying any bonds or securities it has endeavored after investigation to select the ones that would come nearest affording absolute safety and at the same time give a fair return on the investment.

In afterwards selling these bonds or securities to the public, we have always placed at the disposal of the buyer all data and information we may have secured in making our investigation.

The services of our Statistical Department are always at the disposal of our clients, whether buying or selling.

Weekly Circular mailed free on request.

FIRE MARSHALS.

(Continued from Page 1420.)

local efforts. To inspect municipal fire protection systems, and report to the government the efficiency of each, including building laws, storage restrictions and waterworks capacity and efficiency of construction of the same.

The Qualifications of a Fire Marshal.

He should be a qualified fire chief, having good experience with waterworks systems, electrical installations, electrolysis and its causes, fire combustions, and successful fire department discipline. An examination should be prepared for this official by competent engineers of the Underwriters' Association in the matter of building constructions, etc., and all other matters in connection with his work. He should be of mechanical turn, that he may be enabled to test out devices associated with fire prevention engineering.

The appointments of fire marshals in some of the States of the United States has met with marked success in the matter of reducing fire losses. This province should adhere to the principles of its law in this matter, as its duties in this office seem to be confined to the matter of ferreting out incendiarism. While this matter may be of importance, it is better practice to remedy conditions. In conjunction with the investigation of incendiarism have a board of examiners appointed from among the fire chiefs of the province to deliberate on these dangerous conditions, and submit a remedy to be applied, in order that the property and the lives of the public may be safeguarded against a conflagration, and particularly what is worse, a holocaust.

◆

It is announced that the Sao Paulo Tramway, Light & Power Company has arranged to dispose of a further £150,000 of perpetual consolidated debenture stock.

The following companies holding Ontario charters, have increased their capital stock: Thelma Gold Mines Company, Limited, from $1,000,000 to $6,000,000; Port Credit Brick Company, Limited, from $500,000 to $1,000,000; Williams, Greene and Rome Company of Berlin, Limited, from $400,000 to $750,000.

BENEFITS OF GOOD LIFE INSURANCE.

(Continued from Page 1421.)

and let me have the policy re-written for $10,000. "No," he said, "this will do for the present."

It was but a very few years afterwards that the $5,000 was called for through Charles A. Massey's death. He was taken ill on a train, returning from a business trip to Winnipeg, and the trouble developed into typhoid fever, which disease, some years later, also carried off the third son, Walter. The younger of the three, Victor, after whom the Victor Mission on the corner of Queen and Jarvis Street, is named, fell a victim to consumption. His early death from that cause led his father to join Mr. W. J. Gage in founding that splendid institution, the Muskoka Consumptive Hospital, which has been the means of saving many lives from destruction by "the great white plague."

◆

A company has been formed, with a capital of $100,000, to manufacture beds in Vancouver. The Okim patent for a locked rail will be utilized.

Eight bids were received for the $3,500 5 per cent. bridge debentures of Amaranth Township, Ont. The offer of the Bank of Hamilton, Orangeville, was accepted.

Two million dollars common stock, $1,500,000 preferred, and $1,500,000 bonds of the Canadian Locomotive Company, Limited, have been listed on the Toronto Exchange.

A factory for the manufacture of automatic gas producing machines, will be erected at Vancouver, B.C., at an early date. The company will give employment to about 250 men and $500,000 will be expended on the plant.

Such a wide difference of opinion exists in the Winnipeg city council over the terms of purchase of the Street Railway and allied interests of the city for $24,000,000 that there is now serious question as to the scheme being carried through. The chief opposition to the purchase on $24,000,000 valuation is based on the fact that the present large earnings, which have forced the stock up to $250, are the result of present high prices, which are excessive, and cannot be sustained in competition with the street railway plant when it is placed in operation.

DIVIDEND NOTICES.

THE SHAWINIGAN WATER AND POWER COMPANY.

Dividend Notice.

Notice is hereby given that a dividend of one and one-quarter per cent. (1¼%) has been declared upon the Common Stock of the Shawinigan Water & Power Company, for the quarter ending September 30th, 1911, payable on October 20th, 1911, to shareholders of record at the close of business on October 7th.

By order of the Board,

W. S. HART,
Montreal, September 11th, 1911. Secretary.

WELDING BUSINESS ARMOR.

It is just as necessary to receive proper training for business life as it is for any particular trade. This function, which may be termed the educational finish, is well performed by business colleges. In Winnipeg, the Dominion School of Accountancy and Finance is catering to the need. A glance at the syllabus of the courses instituted by this progressive institution shows that the various subjects are dealt with in a complete manner. With average ability and hard work, the student should find himself thoroughly trained for the business world after a course at this or any similar school. There are courses in bookkeeping and business practice, the theory of accounts and practical accounting, business mathematics, auditing, political economy, grain merchants' accounts (an important matter for Western Canadians especially), advanced accounting in theory and practice, and business law.

This last named course covers the following subjects: Contracts, bills of exchange, partnership law, banking, company law, chattel mortgages, mortgages, wills, mechanics' and wage earners' liens, assignments and insolvency. The section on banking deals with the incorporation and organization of banks, business and powers, loans, security, collateral security, security for noteholders and depositors, double liability, circulation redemption fund, cheques, deposits, receipts, letter of credit, warehouse receipts, bills of lading and letter of hypothecation.

The fees of the Dominion School of Accountancy and Finance are moderate and, with the school properly conducted, there is no better way for the young man or woman to train for business spheres.

◆

The Crescent Creamery Company, of Winnipeg, Man., will erect a new plant at a cost of about $250,000.

During August, 1911, there were 119 steamers called at the port of Prince Rupert, British Columbia, and 93 departures. For a new city, not yet five years old, this is somewhat remarkable.

Rates of marine insurance were for years so low that the business got into a bad way; but now that rates have been revised upward, it would seem that the business is being put upon a paying basis. The extent of marine losses in a year is thus given by the French Bureau Veritas: Nine hundred and eighty-six vessels of the world's merchant marine—steam and sail—totally lost in the year 1908, say these careful French statisticians; and this tally recognizes only steam vessels of over 100 tons burden. Such the record of complete destruction, and the following the count of damage not irreparable: 4,273 steamers injured by fire, collision, stranding, stress of weather, and other causes. The destruction varies from year to year; in 1907 there were 1,104 total losses among merchant ships; in 1905, there were 1,038 steamships and sailing vessels gripped by the sea.

A commendable step has been taken by the Equitable Life in founding a publication to be called, "The Human Factor." Its first number devotes much space to instances of saving life in the face of almost certain death. How to help in the prevention of life waste, will be explained. The prospectus number says: "Policyholders are especially concerned in this loss because every unnecessary or premature death among their number adds to the ultimate cost of life insurance. For it is clear that to prolong the average years of life of our members is to increase the annual savings from mortality which go into the surplus from which dividends are paid to policyholders. . . . The action of the Equitable management in undertaking to assist in spreading knowledge of the science of disease prevention among its members and others is prompted primarily by a desire to render direct personal and financial service to its membership, and indirectly to the public."

The Prudential Investment Co., Ltd.

Head Office - VANCOUVER, B.C.

Authorized Capital	**$2,000,000.**
Subscribed Capital	**$1,090,000.**

Assets of over a Million Dollars.

Paid-up Capital	**$780,000.00.**
Reserve	**$250,000.00.**

Owing to the fact that the ordinary stock of the company has all been subscribed, the $1,000,000 of 7 per cent. cumulative first preference stock is now being placed at par $100. The ordinary stock now changes hands at $160 per share.

The 7 per cent. preference stock will yield an income 50 per cent. greater than equally secure stocks or other financial securities usually listed on the exchanges, and is available on very favorable terms. Full particulars may be obtained by addressing Dept. 1, National Finance Co., Ltd., Vancouver, B.C.; or at Toronto, Ont.; Ottawa, Ont.; Halifax, N.S.; St. John, N.B.; Winnipeg, Man.; Regina, Sask.; or Calgary, Alta.

The Saskatchewan Mortgage Corporation

We are in a position to handle the idle funds of non-resident investors and give them as security some of the choicest Loans to be had in Saskatchewan.

BANKERS	SOLICITORS
The Royal Bank of Canada	Messrs. Allan, Gordon, Bryant & Gordon

C. V. SMITH, Manager and Secretary.

WHEN YOU INVEST YOUR MONEY

In our short term debentures bearing 5 per cent. you secure the benefits of first mortgage security and in addition a larger margin of security than you could hope to obtain in loaning your own funds, we depositing with a trustee mortgages on PRODUCTIVE REAL ESTATE WORTH THREE TIMES THE AMOUNT OF YOUR INVESTMENT; you can get your money back in a year or five years as you arrange, and you have no bother with collections.

Head Office - WINNIPEG, Man.

Branches: Vancouver, Victoria, Calgary, Edmonton, Regina, Fort William

Paid-up Capital	$1,825,000
Assets	4,000,000
Reserve	520.000

MONEY TO LOAN ON IMPROVED CITY AND TOWN PROPERTY

4% allowed on deposits of $1 and upwards

5% allowed on debentures of $100 or over, issued for terms of from 3 to ten years

CAPITAL STOCK 7% INVESTMENT

The Company, having disposed of its Capital-Stock some years ago, has, therefore, none for sale, but the stock may be purchased through the Toronto, Winnipeg and Vancouver Stock Exchanges, at prices ranging from $128 to $130 per share.

The last seven half-yearly dividends have been at the rate of **9 per cent. per annum**, so that, at the current prices, the **Investment** will **net 7 per cent.**

The Company will be pleased to furnish prospective purchasers with its Financial Statement or other information bearing on the Company, and, if so desired, the Company will purchase the Stock for the investor through the Stock Exchange, or privately, at the current prices.

Since its inception the Company has enjoyed uninterrupted prosperity, and has taken a very active part in the development of the West. With the rapid growth of Western Canada, the demand for money is so great that the present profitable rates of interest will be maintained for years to come; and with such a desirable field for loaning operations, combined with a progressive management, the price of the Company's Stock should continue to advance, and with the prevailing high dividends, the Stock of this Company will undoubtedly be in great demand by those who desire a safe and profitable investment.

BOARD OF DIRECTORS: W. T. Alexander, Esq., Managing Director The Canada National Fire Insurance Company, President and Manager; E. S. Popham, Esq., M.D., Director Standard Trusts Company, Vice-President; Nicholas Bawlf, Esq., President Bawlf Grain Company, Director Bank of Toronto, Director Standard Trusts Company, Second Vice-President; Sir Gilbert Parker, M.P., London, England; E. THE
WATEROUS
ROAD ROLLER

Is built essentially to suit Canadian road-building conditions. With over 100 Rollers in use in every part of the Dominion, the Waterous Roller is daily more firmly establishing its right to the title—

"The Canadian Good Roads Pioneer"

Built in three sizes—10, 12 and 15 ton. Carries a double cylinder, double crank engine, a quick-steaming locomotive type boiler of large capacity, has two speeds for fast and slow work, and all gearing cut from the solid steel. Supplied with all standard engine and boiler fittings.

If there is no Waterous Roller in your vicinity, write for our twenty-page catalogue, No. 301, or better still, visit the Brantford Works and see the Roller being built and tested—a practical demonstration that is its best selling argument.

LEGAL NOTICES

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 12th day of September, 1911, incorporating James Steller Lovell, accountant; Robert Gowans, William George Flood and Robert Musgrave Coates, solicitors' clerks; Samuel Goodman Crowell, George Hamilton Cassels, John Francis Lash and Robert Cecil Hamilton Cassels, barristers-at-law, and Samuel Maximilian Mehr, student-at-law, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To purchase, lease or acquire lands and interests therein and water powers and water privileges and to develop therefrom any power, electrical or any energy and to use the same in connection with their business and to transmit the same, and sell. lease or dispose of lands or interests therein or power and to enter into working arrangements with other companies, persons, firms or corporations for the use thereof and to establish, operate and maintain any electric, gas or other lighting. heating or other plant and to sell and dispose of electric, gas or power light, heat and power; provided always that the rights and privileges hereby conferred upon the company to generate, sell and dispose of electrical energy for light, heat and power when exercised outside of the property of the company shall be subject to all provincial and municipal laws and regulations in that behalf; (b) To sink wells and shafts, and to make, build, construct, erect, lay down and maintain reservoirs, water works, cisterns, dams, culverts, main and other pipes and appliances and to execute and do all other works and things necessary or convenient for obtaining, storing, selling, delivering, measuring and distributing water for the purpose of irrigation and for the creation, maintenance or development of hydraulic, electrical or other mechanical power or for any other purpose of the company; (c) To construct, maintain, alter, make, work and operate on the property of the company, and for the purposes of the company, or on property controlled by the company, reservoirs, dams, flumes, race and other ways, water powers, aqueducts, wells, roads, piers, wharves, buildings, shops, stamping mills, and other works and machinery, plant and electrical and other appliances of every description; (d) To acquire by purchase or otherwise and hold lands, timber limits or licenses, water lots, water falls, water privileges or concessions, and powers and rights and interests therein, and to build upon, develop, irrigate, cultivate, farm, settle and otherwise improve and utilize the same, and to lease, sell or otherwise deal with or dispose of the same, and generally to carry on the business of a land and land improvement and irrigation company; (e) To aid and assist by way of bonus, advances of money or otherwise, with or without security, settlers and intending settlers, upon any lands belonging to or sold by the company, and generally to promote the settlement of said lands; (f) To establish stores for the sale of groceries, provisions and general merchandise to settlers and intending settlers and others upon lands belonging to or sold by the company, or in the neighborhood of such lands, and generally to carry on the business of general storekeepers and merchants; (g) To construct, execute, own and carry on all descriptions of works which may be necessary or useful for the purposes of the company; (h) To manufacture and deal in logs, lumber, timber, wood, metal and all articles into the manufacture of which wood or metal enters, and all kinds of natural products and by-products thereof; (i) To purchase or otherwise acquire, hold, pledge, sell or otherwise dispose of shares or stock, bonds, debentures or other securities in any other corporation, notwithstanding the provisions of Section 44 of the said Act; (j) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the business or objects of the company and necessary to enable the company to profitably carry on its undertaking; (k) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on, or any business similar thereto, or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, rights or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered shares of the company's capital stock, whether subscribed for or not as fully paid and non-assessable, or the company's bonds; (l) From time to time to apply for, purchase or acquire by assignment, transfer or otherwise, and to exercise, carry out and enjoy any statute, ordinance, order, license, power, authority, franchise, concession, right or privilege which any Government or authorities, supreme, municipal or local, or any corporation or other public body, may be empowered to enact, make or grant. and to pay for, aid in and contribute towards carrying the same into effect. and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses thereof; (m) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (n) To raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise, any corporation in the capital stock of which the company holds shares, or with which it may have business relations, and to act as employee, agent or manager of any such corporation or to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (o) To procure the company to be registered and recognized in any foreign country, and to designate persons therein, according to the laws of such foreign country, to represent this company and to accept service for and on behalf of this company of any process or suit; (p) To lease, sell or otherwise dispose of the property and assets of the company or any part thereof for such consideration as the company may deem fit, including shares, debentures or securities of any company; (q) To amalgamate with any other company having objects similar to those of this company; (r) To do all acts and exercise powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking; (s) To do all or any of the above things and as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Barcelona Traction Light and Power Company, Limited," with a capital stock of forty million dollars divided into 400,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 15th day of September, 1911.

THOMAS MULVEY,
12-2 Under-Secretary of State.

Dated at Toronto this 19th day of September, A.D. 1911.

Blake, Lash, Anglin & Cassels,
Solicitors for
BARCELONA TRACTION LIGHT AND POWER COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the seal of the Secretary of State of Canada, bearing date the 12th day of September, 1911, incorporating James Steller Lovell, accountant; Robert Gowans, William George Flood, Robert Musgrave Coates, solicitors' clerks; Samuel Maximilian Mehr, student-at-law; Samuel Goodman Crowell, and George Hamilton Cassels, solicitors, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To purchase, lease or acquire lands and interests therein, and water powers and water privileges, and to develop therefrom any power, electrical or other energy, and to use the same in connection with their business, and to transmit the same, and sell, lease or dispose of lands or interests therein or power, and to enter into working arrangements with other companies, persons, firms, or corporations for the use thereof, and to establish, operate and maintain any electric, gas or other lighting, heating or power plant, and to sell and dispose of electric gas or other light, heat and power; Provided always that the rights and privileges hereby conferred upon the company to generate, sell and dispose of electrical energy for light, heat and power when exercised outside of the property of the company, shall be subject to all provincial and municipal laws and regulations in that behalf; (b) To acquire by purchase or otherwise and hold lands, timber limits or licenses, water lots, water falls, water privileges or concessions, and powers and rights and interests therein, and to build upon, develop, irrigate, cultivate, farm, settle and otherwise improve and utilize the same, and to lease, sell or otherwise deal with or dispose of the same; and generally to carry on the business of a land and land improvement and irrigation company; (c) To sink wells and shafts, and to make, build, construct, erect, lay down and maintain reservoirs, waterworks, cisterns, dams, culverts, main and other pipes and appliances, and to execute and do all other works and things necessary or convenient for obtaining, storing, selling, delivering, measuring and distributing water for the purposes of irrigation and for the creation, maintenance or development of hydraulic, electrical or other mechanical power, or for any other purpose of the company; (d) To construct, maintain, alter, make, work and operate on the property of the company, and for the purposes of the company, or on property controlled by the company, reservoirs, dams, flumes, race and other ways, water powers, aqueducts, wells,

Brandon, Manitoba

and surrounding territory presents to **Intending Investors** large and small, the best possible opportunity at the present time (now) to realize large returns quickly.

Brandon Real Estate has never been boomed as other Western cities have, consequently prices are low comparatively.

With hundreds of thousands of dollars being spent in paving and other civic improvements.

With a million dollars' worth of contracts already let for private enterprises this year, Brandon is sure to forge ahead and increase greatly.

Brandon is the place for the conservative investor.

SIX PER CENT. BONDS

REAL ESTATE SECURITY

CANADIAN REAL ESTATE BOND CORPORATION SIX PER CENT BONDS

The Canadian Real Estate Bond Corporation offers for sale its ten-year six per cent. bonds. The bonds are offered and issued at par in denominations of $100, $500, and $1,000.

They are a first lien upon all real estate and all other assets of the corporation.

The bonds, as well as all other assets of the corporation, are secured by the absolute ownership in fee of approved real estate in the city of Winnipeg and other Western Canadian cities, or by first mortgage upon such real estate.

The bonds mature in ten years. They have interest coupons attached payable semi-annually.

Send for prospectus and other information.

LEGAL NOTICE

(Continued from Page 1451.)

roads, piers, wharves, buildings, shops, stamping mills, and other works and machinery, plant and electrical and other appliances of every description; (e) To carry on the business of treating, smelting and refining mineral ores or other substances by means of electrolytic process or the application of electric power in any manner or form, and for such purpose to install all necessary plant, machinery and apparatus and to purchase, sell and otherwise deal in ores of various kinds, or other substances capable of being treated by electrolytic process, and to buy, sell and deal in any products or by-products of such ores or substances; (f) To carry on business as a manufacturer of and dealer in all kinds of chemicals and chemical products and by-products thereof; (g) To aid and assist by way of bonus, advances of money or otherwise with or without security, settlers and intending settlers upon any lands belonging to or sold by the company, and generally to promote the settlement of said lands; (h) To establish stores for the sale of groceries, provisions and general merchandise to settlers and intending settlers and others upon lands belonging to or sold by the company, or in the neighborhood of such lands, and generally to carry on the business of general storekeepers and merchants; (i) To construct, execute, own and carry on all descriptions of works which may be necessary or useful for the purposes of the company; (j) To manufacture and deal in logs, lumber, timber, wood, metal and all articles into the manufacture of which wood or metal enters, and all kinds of natural products and by-products thereof; (k) To purchase or otherwise acquire, hold, pledge, sell or otherwise dispose of shares or stock, bonds, debentures or other securities in any other corporation, notwithstanding the provisions of section 44 of the said Act; (l) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the business or objects of the company and necessary to enable the company to profitably carry on its undertaking; (m) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on, or any business similar thereto, or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, right or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered, shares of the company's capital stock, whether subscribed for or not as fully paid and non-assessable, or the company's bonds; (n) From time to time to apply for, purchase or acquire by assignment, transfer or otherwise, and to exercise, carry out, and enjoy any statute, ordinance, order, license, power, authority, franchise, concessions, right, or privilege which any government or authorities, supreme, municipal or local, or any corporation or other public body, may be empowered to enact, make or grant, and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses thereof; (o) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (p) To raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise, any corporation in the capital stock of which the company holds shares, or with which it may have business relations, and to act as employee, agent or manager of any such corporation, and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (q) To procure the company to be registered and recognized in any foreign country, and to designate persons therein, according to the laws of such foreign country to represent this company and to accept services for and on behalf of this company of any process or suit; (r) To lease, sell or otherwise dispose of the property and assets or any part thereof for such consideration as the company may deem fit, including shares, debentures or securities of any company; (s) To amalgamate with any other company having objects similar to those of this company; (t) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking; (u) To do all or any of the above things as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Ebro Irrigation and Power Company, Limited," with a capital stock of two million five hundred thousand dollars divided into 25,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Intrinsic Value of Investments

When considering investments one should study closely the intrinsic value. When the intrinsic value is much greater than the price one can be sure of profit. When the intrinsic value is less than the price then speculation may increase the selling value, but there is no assurance.

British Columbia wild lands, which under cultivation will return from $50 to $500 per acre in crops, may now be bought from $10 to $15 per acre, depending on quality and amount of purchase. Some of our clients have coal and timber licenses which are worth considering on the above theory regarding intrinsic value

This company acts solely as agent—buys and sells for customers but has nothing of its own to dispose of.

ATLANTIC STEAMSHIP RATES.

A London cable says that the increase of 10 per cent. in North Atlantic fares announced this week is only the beginning of greater changes in connection with the shipping trade between the United Kingdom and the United States and Canada. Far more important is the renewal of the pooling arrangement which expired by effluxion of time on June 30 last and was the subject of a conference in London about two months ago. The conference was adjourned to October without any satisfactory result being reached. Several companies claim, and are entitled to a larger participation in the pool than they have hitherto enjoyed, but any alteration is opposed by those lines which would stand to suffer by a rearrangement. The latter are mainly Continental lines, as the Atlantic passenger has recently tended to travel by the non-Continental lines. A further difficulty is introduced by the desire of the Canadian companies not to have anything to do with the pool, but it is thought that if the rate of participation of the Dominion lines is increased they may be induced to co-operate.

◆

Two practical engineers have stated during the last week that when the projected works at St. John are completed it will be the best equipped port on the Atlantic sea board. The gentlemen referred to are Mr. H. A. Woods, assistant chief engineer of the Grand Trunk Pacific Railway, and Mr. A. M. Bouillon, the district engineer of the company in New Brunswick. Mr. Woods visited St. John to make with his associate a practical study of the site of the company's terminals at St. John Harbor East. The company have some eighty acres on the shores of the harbor and their plans are to be so made as that they shall fit in with those of the Federal Government for a dry dock, ship repair plant, wharves, breakwater and possibly a ship-building plant. The contract for the dry dock, etc., may be awarded to Messrs. Norton Griffiths & Company, who are the lowest tenderers, and the work to be done will involve eventually an expenditure of $12,000,000 or $14,000,000.

POLICIES ISSUED ON ALL APPROVED PLANS

A RUN OF RECORD MONTHS

has characterized the business of the Great-West Life Assurance Company this year.

June was—to that time—the best month known. July was better still. August was considerably higher. September promises to be an excellent month.

The significance of this success is obvious—both to the applicant for Life Insurance and the Agent. It shows that to an increasing extent the public realize that there are no better Policies than those of

INVESTMENT AND LOAN COMPANIES

"INVESTMENTS."

A MUCH MISUSED TERM.

Many who should be, and think they are, laying up money for their old age, are misled into so-called "investments," where their hard-earned money is jeopardized and frequently lost, though it is of the utmost importance to them and to those who may be dependent upon them that its absolute safety should be beyond peradventure.

To those who should invest safely and with caution, not speculate, the Bonds of the Canada Permanent Mortgage Corporation can be confidently recommended. This Corporation is most conservative in the investment of the funds entrusted to it. For considerably more than half a century it has held a leading position among Canada's strongest financial institutions, and its Bonds are a

LEGAL INVESTMENT FOR TRUST FUNDS

They are issued for one hundred dollars and upwards.

TRUST LEGISLATION.

One of the advantages of being the younger of two nations on the same continent is that it is possible to learn by the experience of the elder. In Canada, the foundations of the trust or combine problem are being laid. In the United States the fabric is fashioned, and legislators are now endeavoring to remodel the structure. Our industrial combine movement is in its infancy, but it is growing stronger and extending its influence. Canadian legislation, framed to curb possible wrongful tendencies in this direction, is inexperienced, for it has not been tested. It is to be put to the fight in the case of alleged restraint of trade by the United Shoe Machinery Company of Canada, after having successfully run the gauntlet of all the courts to prove that the investigating board appointed under the act had a right to investigate.

One of the most disturbing elements in business and financial spheres of the United States is the attitude of the government toward industrial combinations. President Taft and his advisers insist upon their dissolution. Work is being undertaken in earnest to accomplish that purpose. Not only has this course upset business in connection with the companies indicted and their stocks in Wall Street, but the fear of procedure against other companies makes the general situation still worse.

President Taft is not mincing matters. His predecessor, Mr. Roosevelt, undoubtedly acquired a reputation for aggressiveness largely from the manner in which he assailed industrial combinations. Mr. Taft has lost considerable prestige during recent months in connection with tariff matters. If we are looking for political significance in the present activity against the trusts, it may be that it is for the purpose of regaining that prestige. Aside from the political viewpoint, the fact remains that the American trust has become a power in the business and financial world of the United States. The extent of that power was perhaps not anticipated when the amalgamation movement was in its beginning. With the cognizance of the United States people, their senate, their house of representatives, and their courts, the trust idea grew into a practical working factor. Now it is a complex problem.

Here is the way in which President Taft has decided to deal with that problem. Speaking at Waterloo, Iowa, last week, and referring to the Supreme Court's trust decisions, he said: "The court declines to hold that competition is impossible under modern business conditions, but it insists that it must be given full opportunity for operation, and that any combined effort affecting interstate trade looking to its suppression is contrary to law. In other words, business must face the necessity of throwing away the crutch of combination against competition in its further progress.

"When this rule is recognized, when the corporations that have offended the law are disintegrated sufficiently to enable competition to have full play, then there is no reason why business should not go on unhampered.

"It is the sworn duty of the Executive to enforce the law, and so long as such combinations exist, and are known to exist to the law officers of the government in any way, they would be lacking in their duty if they did not prosecute them.

"They (the law officers) are under my orders to treat the prosecution of trusts like the bringing of any other suits which are within the scope and duty of the Department of Justice, and I must decline to admit that there is any discretion which would enable the Attorney-General and his assistants to stay the hand of the government in respect to such violations of law.

"I do not think it need be long continued, because I believe that the business community itself is rapidly taking in the effect of the decisions of the Supreme Court, and that we may expect a revolution of feeling on the attitude of business men toward this step.

"Some men seem to think that there ought to be some measure making legal the control of competition and limiting monopoly; some statute enacted which shall establish a line between those monopolies that are reasonable and those that are not—those that are benevolent and those that are unconscionable.

"No such line is possible, and the Supreme Court has expressly so decided. Mourning over a condition which is inevitable is useless, and until they realize that their views in this regard must be radically changed their complaints must fall upon deaf ears."

The two important points in these remarks are that business must face the necessity of throwing away the crutch of combination against competition, and that there can be no distinguishing line between the good monopoly and the bad monopoly. This is as good as saying that various companies have been allowed, willingly or unwillingly, according to opinion, to try the trust cure for economic evils, imaginary and real, that the trial has failed, and that the United States government intend to place those companies in their individual spheres again.

What can we in Canada learn from the experience of the United States? The lesson appears to be that we should regulate with great care the formation of industrial combinations, for we are in the early stages of the combine movement. Such regulation should prevent the building of an economic structure which later governments will find necessary to demolish, as is the case to-day in the United States. President Taft's remarks suggest another question. Do the theoretical advantages of industrial combination, really materialize in actual practice? The chief executive of the neighboring republic says that competition is not impossible under modern business conditions, and that the crutch of combination must be thrown away.

CREDIT, CROPS AND COMMERCE.

September was a month during which the chartered banks of Canada recalled considerable loans. This is one of the annual preliminaries to the crop movement. The withdrawal of bank funds from certain quarters in order to concentrate financial strength upon crop purposes is sometimes resented by manufacturers, who dislike the curtailment of credit for proposed expansion. The September bank statement, which will be published about the middle of next month, will probably show a reduction in the current loans and call loans in Canada. The August statement, however, was very satisfactory. There was a surprisingly large extension in commercial discounts, the increase in domestic current loans during the month being $11,000,000 and the gain over the figures of the previous year $77,000,000. Call loans showed a slight decrease. In view of the amount of bank capital available to cope with the normal and active business conditions and the extra stress of crop financing, there is little room for complaint.

PULP AND PAPER INDUSTRY.

The outlook in Canada for the pulp and paper industry is good. The American manufacturers are regarding with some apprehension the excellent prospects of this rapidly growing industry in the Dominion. The New York view of the position, and one with which we must naturally agree, is that the future development of the paper industry will be in Canada. This theory is supported by the fact that we have ample raw materials and water power. United States authorities think that it will be four or five years yet at least before conditions are greatly changed and Canada takes the lead.

An optimistic, though perhaps not exaggerated view of the situation, is taken by Mr. E. B. Biggar, of Toronto, in this matter. "There is probably no single industry in Canada," he says, "which he developed so rapidly in the last ten or fifteen years as that of pulp and paper manufacturing. Its development has been based less upon the stimulus of a tariff than the great natural advantages Canada has: first, in the possession of vast areas of forest producing timbers best adapted to wood pulp; second, in the possession of more water power than any other country in the world; and, third, in having a population whose skill in woodcraft is proverbial.

"There are only two things that can prevent Canada from becoming in time the greatest paper manufacturing country in the world. One of these is the maladministration of our great forest reserves leading to their devastation by forest fires, and the other is the needless alienation of timber tracts into private hands, whether for the export of raw timber or otherwise." stripping of wood lands over the large areas of other country in the world."

We have vast timber wealth, as is seen in the following figures quoted by a forestry expert in the employ of the Dominion government:—

Province.	Total acreage.	Publicly owned.
British Columbia	50,000,000	49,200,000
Manitoba, Alberta, Saskatchewan and Territories	100,000,000	94,000,000
Ontario	70,000,000	52,400,000
Quebec	100,000,000	43,800,000
New Brunswick	12,000,000	2,400,000
Nova Scotia	4,000,000	None
Prince Edward Island.......	100,000	None
Total	336,100,000	241,800,000

Canada has several advantages over the United States in the manufacture of pulp and paper. The most important deduction from figures compiled by the United States tariff board on this question is that the difference in cost of wood per ton of pulp is practically the difference in the total cost. For instance, in ground-wood pulp the total cost is $14.59 for the United States and $9.56 for Canada, a difference of $5.03. The cost of the wood as raw material per ton of product is $10.23 for the United States and $5.07 for Canada, a difference of $4.53, which, deducted from the total difference of $5.03, leaves a difference of 50 cents per ton in favor of Canada, 44 cents of this being in the item of manufacturing labor cost.

The Canadian average cost for sulphite was $26.47, the average for the United States mills reporting was $31.99, a difference of $5.52, of which $5.45 is absorbed by the difference in cost of wood as a raw material, leaving a net difference of but six cents per ton, although the difference in labor cost is 63 cents per ton in favor of Canada.

In news-print paper the effect of wood cost is not so clear, because here the raw material is pulp and not wood, but if we take 80 per cent. of the difference we find in the wood cost in ground-wood pulp, and 20 per cent. of the difference in case of sulphite pulp, we have $4.71 as the amount of the difference in the cost of news-print paper in the two countries, which is due to the difference in wood costs.

The average cost of production of news-print in Canada is $27.53 per ton, in the United States $32.88. The difference is $5.35, of which $4.71 is accounted for by difference in cost of wood as raw material in the pulp, leaving a difference of 64 cents, only eight cents of which is covered by the difference in manufacturing labor.

NEED OF SKILLED LABOR.

Canadian industrial progress is hampered by the lack of skilled labor. The efficient artisan, as he is known more especially in European countries, is not plentiful in the Dominion. Elsewhere, we have discussed briefly the prospects of the pulp and paper industry. As an example of Canada's deficiency in skilled labor, we may take the same industry. Canadian paper and pulp mills are equipped, as a rule, with the latest and most improved machines made by American manufacturers in the United States. The general managers and superintendents are, for the most part, Americans of wide experience. Those who are Canadians by birth are men who, like the Americans, have had long years of training in American paper and pulp mills. The skilled men, the machine tenders, and other hands who operate the paper machines are, as a rule, Americans brought from the United States for the purpose. They are paid American rates of wages, although in several instances the rates are for a 12-hour shift, instead of for an 8-hour shift, as in Eastern United States. Excepting for the comparatively small number of skilled men necessary to operate the paper machines and the mechanics employed on repairs, the great majority of the men employed in the paper and pulp mills are classed as unskilled, and receive the pay of unskilled laborers.

These conditions will be remedied in the course of time. In the meantime, the dearth of men properly trained for certain work in particular industries is acting as a drawback upon our industrial growth.

POSITION OF THE BRITISH PREFERENCE.

The tariff as a protection to the growing industries of a comparatively new country is usually a complex affair. As the Dominion makes greater industrial progress, there is a tendency in the legislative chambers to reduce protection. This is illustrated by the cessation of government bounties to certain industries, aside from the tariff, and by the downward grading from time to time in the tariff itself. With the defeat of the proposed reciprocity agreement between Canada and the United States, it is unlikely that the Canadian tariff on manufactures from the country will be lowered to any considerable extent in the next few years. In that connection we may examine the recent trade statistics of the United States.

For the nine months ended September, 1910, the United States exports of domestic merchandise of every kind were $1,193,321,512, of which $210,490,966 were manufactures for further use in manufacturing, and $401,684,694 were manufactures ready for consumption. The sum of these two, $612,625,660, accounts for 51 per cent. of all of their exports put together. But this is not crediting the exports of manufactures with a class known as "foodstuffs, partly manufactured," which are valued at $180,159,193. If we regard this also as legitimately forming part of the exports of manufactured goods, it means that of everything the United States exported for the nine months ending September last manufactured goods amounted to over 66 per cent.

Applying the average for the first nine months to the last three, the figures for which were not available when this statement was prepared, it indicates that the exports for the year of manufactures ready for consumption and manufactures for further use in manufacturing will pass the $800,000,000 mark. There is, therefore a large amount of American manufactures looking for a surplus market, and the lowering of our tariff in a considerable number of manufacturing lines would undoubtedly work harm to our industries in view of the comparative export and industrial strength of the two countries.

The three most strenuous competitors for Canada's trade are Great Britain, the United States and Germany. The last-named country will probably seek better trade relations in the near future. Their business with Canada is increasing rapidly. In the case of Great Britain, the British preference is an important factor. Through all the discussions which were waged for and against the proposed American reciprocity agreement, this question of British preference was examined and exhibited in a dozen different lights. Only three important suggestions were made: one, that the British preference should be maintained; two, that it should be increased to fifty per cent., and three, that it should be abolished until Great Britain's legislators considered practically the question of trade within the Empire and Impereial preference.

Of the three alternatives, The Monetary Times believes that the maintenance of the British preference is the only one which has been given serious thought. The Canadian manufacturers realize that an increase in the preference to fifty per cent. would mean, in their present position, an important factor in the domestic manufacturing situation. It is of little use blinking the fact that, as a body, the manufacturers would be opposed to any increase. On the other hand, it seems most improbable that any movement to reduce or abolish the tariff privilege extended to Great Britain, as hinted by Mr. W. F. Maclean, M.P., would gain influential support or impetus. For the present, therefore, it is reasonable to assume that the British preference will remain as it is.

MISUNDERSTOOD.

It is amusing to note the grave advice and paternal head-shaking by many of the American papers regarding the defeat of reciprocity by Canada. A New York paper seriously suggests that we are becoming far too "bumptious" in our prosperity, while another "fears the youthful egotism of that infant Canada." A further comment is that our electorate kept as a pretty good secret the way is was going to vote, and can, therefore, be accused of "duplicity." These remarks and similar are a little hard, and possibly our unbounded and justifiable faith in the future of Canada has been mistaken for egotism. Our energy and gratefulness for things as they are may have been misunderstood as bumptiousness and the quiet upholding of a fixed purpose as duplicity.

SMALL CHANGE FOR MANUFACTURERS.

The Monetary Times wishes the convention of the manufacturers' parliament of Canada every success.

* * * *

The two areas which now demand the attention of the far-sighted commercial man are Northern Ontario and the Peace River region of Alberta.

* * * *

Canadians will learn with pleasure of the appointment of Sir H. W. Just, C.B., C.M.G., as head of the Dominion Department of the Colonial Office in succession to Sir Charles Lucas, who retired on Monday. Sir Hartmann Wolfgang Just has been assistant to the Secretary of State for the colonies since 1907, as well as secretary to the Imperial Conference. For ten years prior to that, he was principal clerk in the Colonial Office. He has had a brilliant career, although his quiet personality has made it unobtrusive. Sir Hartmann was a visitor to Canada last year and made an extensive tour throughout the country. He is unusually well fitted for the new office, having had considerable experience in colonial affairs. We hope he will pay Canada visits as frequently as his onerous duties will permit.

* * * *

The annual trip next year of the business men of Winnipeg, and among them are many manufacturers, will be to Great Britain. Such an excursion a few years ago was one of the most notable and successful of the Canadian Manufacturers' Association. The Edmonton business men recently concluded an examination of the trade prospects and natural resources of Alberta. These commercial jaunts are typical of the North American, who throws in a few journeys of hundreds or thousands of miles as a part of the year's routine. The men to whom the captain of industry has been writing is brought into direct touch with his customer. That is a good thing. Personal impressions have won many business battles. The world is too large for the enterprising trader to stay at home always. It is through the medium of good, commercial, intelligent departments, official or otherwise, and travel with a purpose, that the trading map can be drawn with ease and profit upon one page.

* * * *

To some people, statistics are as annoying as is the multiplication table to the average schoolboy. We have known a manufacturer who declined to bother with them, even in connection with his business, but invariably left them to his partner, who, he said, "seemed to believe in them." There are not a few manufacturers to-day whose acquaintance with statistics of the output, even of their own mills or of their competitors, is slight. Such inattention seems to us a mistake. It is one of the qualities of a well-informed merchant to know all about the production, imports and exports of the merchandise he makes or buys. The Monetary Times has, therefore, taken pains to keep its readers well informed from time to time upon the country's outward and inward trade by extracts from the Trade and Navigation Returns. A man may not disturb himself when told that Canada's imports of all merchandise increased from $369,000,000 in 1910 to $451,000,000 in 1911. But if one shows him that the imports of the particular goods he makes exhibits a marked increase, his interest in the subject is at once aroused, because the fact is likely to affect his pocket.

* * * *

Some enterprising firms are again tickling the bonusing weakness of certain Canadian municipalities. The Universal Motor Truck Company, of Warren, Ohio, have decided to establish a branch in Fort William, Ont., it is said. The plant is to cost about $350,000, and the company expect to have a site comprising ten acres. The city is to guarantee the bonds of the company to the extent of $100,000 for the first $150,000 invested by the company, and a scale of guarantee has been arranged for the development after that point. In return, the company agrees to form a corporation with capital of $1,000,000, and of this the city will hold capital stock to the extent of $100,000. The company is to receive exemption from taxes, excepting that they are to pay school, library and hospital levies. A despatch from London, Ont., states that if the sum of $50,000 can be subscribed towards an automobile factory, a plant will be established in that city. The sum of $150,000 is needed to commence operations. Of this amount $100,000 can be obtained elsewhere, and all that is necessary is that Londoners subscribe $50,000 towards the capital of the concern. They will manufacture autos, motor trucks, etc. If the cities of London and Fort William could arrange to supply the employees of the proposed factories, pay their wages and be responsible for the salaries of the departmental heads of the two companies, little would be lacking in the proposed schemes. But is there any need to bonus new industries? We have the raw materials, the labor, the markets and a country with prospects of value. Any American firm may establish a factory in Canada, but we should not offer other than the natural bait.

CANADIAN MANUFACTURERS' ASSOCIATION CONVENTION.

The annual meeting of the Canadian Manufacturers' Association will be held at Toronto on Tuesday, Wednesday and Thursday. The following is the programme:—

Tuesday, October 10th.—9.00 a.m. Registration office opens. 10.30 a.m. First business session. Reports of officers: Secretary, treasurer. Reports of committees: Reception and Membership, Industrial Canada. 2.30 p.m. Second business session. Reports of committees: Commercial Intelligence, Insurance, president's annual address. 8.15 p.m. Illustrated lecture: "Accident Prevention and Relief." 9.45 p.m. Smoker.

Wednesday, October 11th.—9.00 a.m. Registration and validation of certificates. 10.00 a.m. Third business session. Reports of committees: Tariff. 2.30 p.m. Fourth business session. Reports of committees: Technical education, parliamentary. 5.00 p.m. Meeting of committee on nominations and resolutions. 6.00 p.m. Poll closes.

Thursday, October 12th.—10.00 a.m. Fifth business session. Reports of committees: Railway and transportation, resolutions, election of officers. 2.30. Drive for ladies, visit to Canada Foundry Company. 8.00 p.m. Banquet, theatre party for ladies.

NAY & JAMES TO REPRESENT THE ÆTNA.

The Ætna Insurance Company of Hartford, Conn., one of the largest and oldest of the tariff fire Insurance companies doing business in Canada, has made Regina the headquarters for their business in Saskatchewan. Following arrangements made by Mr. W. H. Breeding, special representative of the Company, when in Regina a few days ago, Messrs. Nay & James who have, heretofore, acted as city agents of the company will have entire charge of all the Saskatchewan business. The Ætna is practically the first of the larger tariff companies to recognize in this way the development of that province.

It is expected that in the near future a separate office of the Canadian Fire Underwriters' Association will be established in Regina, for adjusting premium rates on fire insurance throughout Saskatchewan; at the present time the Winnipeg office has charge of this territory.

The Ætna commenced business in Canada in 1821 being the second oldest company writing insurance in the Dominion. For some years they have had agencies in the principal towns and cities in Saskatchewan ,and it is a distinct tribute to Regina that the provincial headquarters should be established there.

WESTERN CANADA.

Business Situation is Good—Weather Might be Better —Municipal Power Plant—In the Wheat Markets.

Monetary Times Office,
Winnipeg, October 3rd.

Western weather continues to be rainy and none too good for threshing. Customarily ,subject to long spells of hot, dry weather, Winnipeg has had rain every week since May. Notwithstanding the unfavorable weather, the season is one of the busiest Winnipeg has ever seen. The city is growing, and business of all kinds is good. Whatever might have been the influence of reciprocity in Winnipeg, it seems certain that the rejection of the pact will not have any deterrent effect.

Wholesale houses report an active movement of fall and winter merchandise, showing that retail merchants are stocking up liberally, and the prosperous outlook in all the western provinces bespeaks a satisfactory amount of business between now and the end of the year.

Loan companies report a good demand for money on farm lands during the last two or three weeks, but as soon as the farmers have finished their threshing operations, there will be a much larger demand than at present. Demand for money on city property is also fairly active.

The railroads are busy on construction work in different parts of the West. The three principal roads, the Canadian Pacific Railway, the Canadian Northern Railway, and the Grand Trunk Pacific, seem to be vying with each other in the matter of branch extensions, and they are keeping up with the expansion of the country.

Weather Not Very Good for Threshing.

The weather during the past week has not been at all favorable for threshing, and on the whole, September was unusual in this regard. The work of threshing in Manitoba is considerably ahead of Alberta and Saskatchewan, and the latter provinces may suffer more from damaged grain. The injury is not more than has been allowed for in the estimates of the total output given in this column before.

A report issued by the Saskatchewan Department of Agriculture last week, indicates that a comparatively small proportion of the threshing for the whole province had been done, and more favorable weather is urgently needed. It looks now as if the bulk, or at any rate a large percentage of this year's wheat would be in the lower contract grades, and there will be considerable of it that will be more suitable for feed than anything else. It is not to be thought that there is not any good grain. The yield of good wheat, will undoubtedly be ahead of last year, and a high price for even the lower grades seems assured.

The movement of wheat is steadily increasing, although it is not yet as large as at the corresponding time last year. Inspections at Winnipeg average about 400 cars per day at the present. The shipping to the head of the lakes is a little later than last year but the difference is not likely to result in any serious consequences. Nearly half of the wheat inspected so far has been No. 2 Northern, and most of the other half is No. 3 Northern, but there is a good deal of No. 1 Northern.

Municipal Power Plant Ready.

The water is expected to be turned on this week, to the big civic Hydro-electric plant, and Winnipeg will be the only city in the West properly equipped with cheap power, a good labor supply and ample transportation facilities, for the reception of industries of any size or sort.

Our wheat market quickly returned to a normal condition after the feeling generated by the result of the election had subsided, and values had a downward tendency until the declaration of war by Italy last week brought a new element into the situation, and prices reacted with a bound.

Mr. Justice Middleton has issued an order in Osgoode Hall, Toronto, assenting to the sale of the business carried on, until his death, of the late Mr. C. E. Goad, civil engineer, to Messrs. C. E. Goad, Jr., V. A. E. Goad, and J. L. Goad, for the amount of $151,000. Since the death of Mr. Goad the business has been looked after by the executor, the Toronto Trusts and Guarantee Company. In order to dispose of the business the company brought an amicable action against the heirs of the estate, they being Mrs. Agnes Goad, Mrs. Christabel Edith Rolph, C. E. Goad, Caroline Mabel Goad, Ada Hazel Goad, V. A. E. Goad, L. Goad, Emily Marion Goad, and Beatrice May Goad, all of Toronto.

NEWS AND NOTES.

Messrs. Lever Bros, soap manufacturers, may erect a million dollar factory near Vancouver, B.C.

The Canadian Bank of Commerce has opened a branch at Grouaid, Alta., in charge of Mr. H. S. Bruce. Grouaid is at the west end of Lesser Slave Lake.

"The great resources of Canada and the character of the Canadian people make it certain that the Dominion will one day be the greatest factor in the British Empire, even exceeding in importance and influence the United Kingdom itself."—Earl Grey at Ottawa.

A special general meeting of the shareholders of the London Street Railway Company will be held in London on October 24th, to authorize the increase of the capital stock of the company to $750,000 or less; and also to authorize the issue of debentures of the company to $750,000 or less.

Directors of the Diamond Vale Coal and Iron Mines, Limited, elected at a recent meeting were: Messrs. W. E. Huston, F. J. Lumsden, T. J. Smith, J. D. Mather, Vancouver; George S. May and Dr. J. E. Hanna, Ottawa; and Dr. Stephen H. Murphy, Renfrew, Ont.

The Dominion Trust Company has sold its building in Vancouver for nearly a million dollars to the Vancouver Estates, Limited, composed of Mr. John Kendall, of Messrs. Kendall, Sewall & Company, Mr. J. S. Heyler, of Messrs. Heyler & Son, architects of the building, and other Vancouver men.

This is how an enterprising Ottawa newspaper man analyses the composition of Canada's new parliament:—76 lawyers, 36 farmers, 32 merchants, 21 doctors, 17 manufacturers, 10 lumbermen, 8 journalists, 7 notaries public, 2 canners, 1 pharmacist, 1 stockbroker, 1 professional labor leader, 1 licensed victualer, 1 cattle dealer.

Mayor Mitchell, of Calgary, Alta., would like to have the city's debentures extended from 30 to 50 years on bylaws on land and property controlled by the city. "The city hall, fire hall, power house and other similar institutions are assets of a more or less permanent character," stated the mayor, "and I do not see any reason why the citizens of the next generation should not contribute to their upkeep as well as the citizens of the present one." City Solicitor Moffatt will say whether it would be legal to adopt the plan suggested by the mayor.

The annual adjourned meeting of the Quebec Railway, Light & Power Company was held this week, with Mr. Rodolphe Forget, M.P., in the chair. The important announcement was made that in view of the heavy holdings by French investors it was decided to elect three Paris men as directors, and at the same time the resignation of Mr. J. W. McConnell of Montreal as director was accepted. The regular dividend of 1 per cent. has been declared on the common stock of Quebec Railway payable October 16 to holders of September 30. Gross earnings for the year ended June 30 are formally reported at $1,380,126, operating expenses $661,907, leaving a net balance of $718,219. Fixed charges amounted to $445,219, with a surplus of $273,000.

The commission which will deal with navigable conditions on the St. Lawrence River is composed of:—Professor C. H. McLeod, of McGill University, and Messrs. W. I. Gear, and Arthur Surveyor, of Montreal. The appointment was made by an order-in-council dated August 29th, and will be known as the St. Lawrence River Commission. The duties of the new organization will be to examine conditions prevailing in the river and to report upon the many power schemes now before the federal authorities and the effect of such works upon the navigation of the river. Its jurisdiction will extend from the head of Lake St. Francis to the port of Montreal. The commission will also study the improvement of the river channel and the feasibility of deepening the water highway to the sea to a depth of 22 or 25 feet.

The agreement between the Burrard Inlet Tunnel and Bridge Company and Vancouver in regard to the building of the Second Narrows bridge, which the electors endorsed at plebiscite held last January, has been signed by the directors of the company and by the Mayor and City Clerk. By the agreement the city will take stock in the company to the extent of $200,000, and will, with other municipalities interested, control the company. The company was incorporated by a private act of the Dominion Parliament in February of 1910 for three million dollars. The provisional directors then appointed were Messrs. E. W. MacLean, Edward Mahon, James P. Fell and P. Lambert Band, all of the city of Vancouver, and Mr. John Y. McNaught, reeve of the municipality of North Vancouver, and Mr. J. C. Keith of North Vancouver.

THIS YEAR'S INDUSTRIAL CENSUS

Will Show Great Strides—Notes of Previous Figures—Heavy Production.

With adding machines and mental arithmetic working overtime, in the statistical and census bureau at Ottawa, we may expect to hear soon the preliminary results of Canada's census which was taken this summer. It is anticipated that the industrial development of the Dominion will be shown to have made remarkable strides since the last census was taken. Mr. Archibald Blue, who is in charge of this work, informs The Monetary Times that while the figures are not yet available, those relating to the manufacturing industries exhibit large gains.

According to the manufacturing census of 1905, the industries, with products of $200,000 to under $500,000 per establishment numbered 479 with an aggregate value of $145,587,183, an average product per establishment of $303,940. This compared with the figures of 1900 of 323, $94,531,698 and $292,668.

Six Years Ago.

There were, six years ago, 138 industries with products of $500,000 to under $1,000,000 per establishment. The total value of their production was $91,552,655 and the average product per establishment was $663,425. This compared as follows with the figures of 1900: 68, $46,729,825 and $687,203. Industries with products of $1,000,000 and over per establishment number 81 in 1906, with a value of products amounting to $177,273,913 and an average product per establishment of $2,188,567. The figures for 1900 were 39, $71,051,834 and $1,821,242, respectively.

A list of the classes of industries with products of $1,000,000 and over per establishment is interesting:—

Name or kind of Industry	Establishments	Value of Products	Average Product per Establishment
	No.	$	$
Agricultural implements	3	5,177,211	1,725,737
Car repairs	3	5,168,623	1,722,874
Cars and car works	3	12,177,947	4,059,316
Cottons	4	6,861,330	1,715,333
Electrical apparatus & supplies	3	7,408,805	2,469,602
Flouring & grist mill products	6	19,909,454	3,318,242
Log products	5	6,938,061	1,387,612
Slaughtering & meat packing	12	20,249,772	1,687,481
Smelting	9	26,097,361	2,899,707
Sugar, refined	4	17,152,260	4,288,065
All others	29	50,133,089	1,728,727
Total, 1905	81	177,273,913	2,188,567
Total, 1900	39	71,051,834	1,821,242

The total value of manufactured products in Canada for the calendar year 1095 was $715,035,965 compared with $481,053,375 in 1900.

Capital Employed in Manufactures.

The capital employed in manufacturing industries increased from 1900 to 1905 by $397,000,000. or about 90 per cent., while production increased by $234,000,000 or about 50 per cent. The apparent disparity in these ratios of increases is no doubt owing to the inability of recently established works to produce to their full capacity. In cars and car works, for example, the ratio of production to capital in 1900 was 151, and in 1905 it was 101; in Portland cement works it was 86 and 15; in smelting works it was 67.5 and 32.5; and in electric light works it was 17 and 9 for each year respectively. The five years were a growing period in industrial investments.

The number of wage earners and amount paid for salaries to all classes of employees in the manufacturing establishments of Canada in the calendar years 1900 and 1905 were as follows:—

Year.	No. of Wage Earners	Salaries and Wages
1900	344,035	$113,249,350
1905	391,487	164,394,490

The number of employees includes officers, clerks, workers, etc., who are paid salaries or wages for service. In five years the number of employees increased by 47,452, the amount of wages by $51,145,140 and the average wage per employee by $90.74.

Employees increased in the five years by 12 per cent., total wages by 45 per cent., and the average wage per employee by 27 per cent. The value of products per employee in 1900 was $1,398 and in 1905 it was $1,832, an increase of $434 or 31 per cent. For 1890 the average wage per employee was less than in 1905 by $128.66 and the average product less by $477.

EXPORTS OF CANADIAN MANUFACTURES.

Some Interesting Statistics—Only Twice in Twenty-two Years Did Foreign Manufactures Sent from Canada Exceed a Value of a Million Dollars.

The official returns show that of the manufactures exported by Canada, by far the greater proportion has been of Canadian origin from as far back as 1868. Only twice in the twenty-two years, from 1876 to 1897, did foreign manufactures exported from Canada exceed $1,000,000. This occurred in 1880 and in 1895 and the Canadian figures in those years compared as follows:

Year.	Canadian manufactures exported.	Foreign manufactures exported.
1880............	$3,242,617	$1,241,594
1895............	7,768,875	1,090,727

Large Volume of Canadian Exports.

Analyzing the figures between the years 1876 and 1911, it is seen that the exports of Canadian manufactures increased in the thirty-five years from $5,148,201 to $35,283,118, a gain of approximately 600 per cent. In the same period, the exports of foreign manufactures from Canada changed from $619,546 in 1876 to $5,149,408, or roughly 730 per cent. While this is a larger percentage gain on the part of foreign products, the increase is more than counterbalanced by the larger volume of Canadian manufactures.

The following table shows the exports of Canadian and foreign manufactures from Canada for a series of years:

Year.	Canadian.	Foreign.
1876...............	$ 4,105,422	$ 576,337
1896...............	9,522,014	778,330
1906...............	24,561,112	3,089,166
1908...............	28,507,124	4,562,344
1909...............	28,957,050	3,997,139
1910...............	31,494,916	4,458,445
1911...............	35,283,118	5,149,408

Where the Merchandise Originated.

In this connection the total exports of all Canadian produce for the fiscal year ended March, 1911, were valued at $274,316,553, and of foreign produce $15,683,657. Forty-three years ago, the amounts respectively were $45,543,177 and $4,196,821. The exports by groups of the merchandise making up the total for 1911, noted above, may be tabulated as follows:

Group.	Canadian produce.	Foreign produce.
The mine	$42,787,561	$ 290,879
The fisheries	15,675,544	114,315
The forest	45,439,057	158,542
Animal produce	52,244,174	809,663
Agricultural products	82,601,284	7,457,829
Manufactures	35,283,118	5,149,408
Miscellaneous	285,815	1,703,021
Total	$274,316,553	$15,683,657

The only case in which the export of foreign produce was greater than that of Canadian was under the miscellaneous heading. These figures are a further example of the industrial and commercial expansion of the Dominion.

◆

CLERICAL ERROR IN LIFE INSURANCE POLICY.

The Court of Appeal, Toronto, has dismissed the appeal of Edmund E. Harley, Clerk of Records and Writs, from the decision of Mr. Justice Teetzel in favor of the Canada Life Assurance Company.

Mr. Harley had a policy on which he was to pay $96.47 for 27 years, in return for which he was to receive $3,000 and accrued profits. The policy was changed after it had been in force some time, and the term was changed from 27 to 17 years. The clerk making the change neglected to change the sum which Mr. Harley was to receive. The company refused to pay the sum on the face of the policy, and offered a smaller amount in settlement. The Court of Appeal holds that Mr. Harley is not entitled to the greater sum.

Mr. Justice Meredith, in writing the judgment of the court, says: "If he could recover, it would be, not by virtue of any contract, but solely by reason of a pure clerical error, which rose through the slovenliness of him whose duty it was to make the necessary changes in the policy or to issue a new one, when the change was made in the 'tontine period' of the assurance from 27 to 17 years."

WINNIPEG ELECTRIC RAILWAY NEGOTIATIONS.

Mayor Evans Analyses Basis of Sale—Estimated Gross Earnings.

Several statements respecting the negotiations between Sir William Mackenzie and the City of Winnipeg as to the purchase by the city of the Winnipeg Electric Railway, have been issued by Mayor Evans of Western Canada's metropolis. One of these deals with the basis upon which he thinks the city should purchase the electric undertaking. During the past nine years, he says, the City of Winnipeg has audited the accounts, showing the gross earnings of the Winnipeg Electric Railway Company derived from street car business in order to determine the amount of percentage due from the company under the agreement. The figures for gross earnings as shown by the city's audit are as follows:—

Year	Gross Earnings
1902	$ 199,728.00
1903	287,279.20
1904	407,542.20
1905	551,650.60
1906	727,726.00
1907	861,857.42
1908	899,632.60
1909	1,009,782.86
1910	1,205,874.00

Winnipeg Faster Than Toronto.

"Winnipeg has been developing proportionately faster than Toronto and Montreal during the past nine years, and the rate at which the street railway earnings have increased in this city, is an index of that development.

"What are the figures of gross earnings of the Winnipeg street car system likely to be between the years 1910 and 1927, when under the franchise, the city would have the option of purchasing this system at its actual value? Will the rate of development for the next sixteen years be as high as that of the past nine years? I have had the figures worked out on that basis, but the result would be too favorable to merit such consideration. Such a rate of increase would allow for charging up the whole cost of the company's properties to the street railway department and wiping out the entire debit in 1927 and also all the other present debts of the city and would leave a substantial capital account in addition. It would carry the whole proposition and allow for giving gas and electric light and power free and for cutting street car fares in half. There are few people, however, who would not be confident that the development of Winnipeg during the next sixteen years will be at a rate not less than one-half the rate of the past nine years.

Estimated Gross Earnings.

"The figures for the next sixteen years extended on the basis of a percentage, of increase of one-half the average percentage of the past nine years, are as follows:—

Year	Estimated Gross Earnings.
1911	$1,434,070.67
1912	1,624,615.86
1913	1,840,478.56
1914	2,085,022.94
1915	2,362,059.93
1916	2,675,906.13
1917	3,031,454.57
1918	3,434,743.93
1919	3,890,551.92
1920	4,407,489.55
1921	4,993,112.68
1922	5,656,547.56
1923	6,408,133.03
1924	7,259,581.66
1925	8,224,062.27
1926	9,316,793.42
1927	10,554,715.76
Total	$79,198,841.14

Operating Expenses.

"Opinions differ as to the percentage which should be charged to operating expenses. Toronto Railway Company's operating expenses are about 52 per cent. of its total receipts. Montreal's are somewhat higher, but in both these cities only the street railway is managed by the one company. In Winnipeg, with several utilities under one management, there should be a considerable saving, particularly in management expenses, and I would say that 55 per cent. would be ample to allow for operating expenses here, but I am willing to go enirely beyond what I think would be reasonable and set the probable operating expenses at 60 per cent. This would leave 40 per cent. of net income. Now 40 per cent. of $79,198,841.14 is $31,679,539.45. So that in sixteen years the City of Winnipeg would receive over $31,000,000 of net income for the street cars alone, which is a large amount of money.

Provide for Capital Charges.

"What could the city do with that money? In the first place it could provide for all the capital charges on the total undertaking proposed to be purchased, including the gas and electric light and power business as well as street cars. If $15,000,000 is the price paid for the stock and there are some $7,500,000 of debentures, the annual interest charges would be $300,000 a year, or $4,800,000 in sixteen years. The sinking fund on the total capital would require about $300,000 a year, or $4,800,000. Then there would be an additional capital investment during the period in rolling stock and extension of street car lines. If a total of $6,000,000 was thus invested, spread equally over the period, the interest charges would total about $2,000,000. The account would then stand thus:—

Net income		$31,679,536.45
Interest	$15,360,000	
Sinking fund	4,800,000	
Interest on new investments	2,000,000	
	$22,160,000	$22,160,000.00
Balance on hand		$9,519,536.45

"To this must be added the sinking fund that would be on hand at that date, which would amount to $6,750,000, making a total cash on hand in 1927, from street cars alone, of $16,269,536 subject to some deduction for taxes and percentages, which however, would be largely offset by interest on the various surpluses. Whatever was set aside for sinking fund on the new investments would amount to more at the end of the period than the amount set aside.

Cars Pay Whole Proposition.

"Thus we see that at half the rate of increase of the past nine years, the street cars would carry the whole proposition and at the end of 16 years would accumulate a sum of about $16,000,000, which would leave the city with gas, electric light and power plants and street railway system at much less than the physical value of these properties.

"If that rate of increase of business is considered too high, cut it down one-quarter. This would make the rate only 87 per cent. of the actual rate in Toronto during the past eleven years. Any citizen of Winnipeg would be prepared to speculate that Winnipeg's development would proceed at least that fast. The figures extended on that basis would show a total earnings of $56,456,249 and a net of $22,582,499, which is still ample to carry the whole proposition and to leave more than the sinking fund requirements."

◆

SUGGESTIONS TO CANADIAN COTTON DUCK MANUFACTURERS.

Canadian manufacturers, writes Mr. D. H. Ross, Canadian Trade Commissioner at Melbourne, might be disposed to send sufficient cotton duck to the chief storekeeper of the Victorian railways, Melbourne, and the chief storekeeper of the New South Wales railway, Sydney (the principal systems), for the purpose of having it made up into a tarpaulin with local waterproofing applied to it. At the same time a finished tarpaulin (23 feet x 14 feet or 29 feet x 14 feet, the sizes in chief use) of the same material coated with the most improved Canadian waterproofing, should also be sent because the Australian dressing for hemp canvas may be entirely unsuitable for cotton duck. Particulars of the Canadian waterproof composition should accompany the samples so that the authorities could readily compute the cost of making a similar preparation in Australia. In this way a practical test could be made, which is the only way of overcoming the existing prejudice against cotton.

The Victorian railways have not hitherto used cotton tarpaulin and the chief storekeeper is attracted by the wide widths of ducks which in labor, would effect a considerable saving in making waterproof covers. Local representation is necessary, as tenders are placed in Melbourne (&c.), and also because the tests would require to be carefully followed on the spot in the interests of manufacturers.

BRITISH COLUMBIA.

Better Harbor Facilities for Vancouver—Railway Commission May be Reorganized—Life Insurance Now a Science.

(Staff Correspondence.)

Vancouver, September 30th.

More than the British Columbia coast cities should be interested in the movement to create extensive harbor facilities in the vicinity of Vancouver. Both Portland and Seattle are preparing for the increased trade which will rapidly accrue on the Pacific, and it is felt here that prompt action should be taken to so improve existing waterways that adequate accommodation will be provided shipping. With Burrard Inlet, False Creek and the Fraser River, provision can be made with a reasonable expenditure for all classes and amount of trade and industries. Securing the trade will mean much for the West and British Columbia.

Some time ago the movement for greater harbor facilities was begun, and this week another meeting was held. With frontage on Burrard Inlet high in price, and False Creek land taken up, short leases only being granted, attention is being turned toward the Fraser River. With the dredging of the north arm of the river miles of frontage will be made available for industrial purposes, with both rail and water transportation facilities.

Engineer Will Lay Out Plan.

It will have the advantage of being practically in Vancouver, with labor handy, in fact South Vancouver, now being peopled by those who have to pay rent, will be as close to the north arm of the river as to Burrard Inlet. The Liberal Government promised $1,250,000 for this dredging, and it is believed confidently that the Borden administration will implement this promise since the work is such that it will benefit the whole of the West. The dredging of the river also means much for the industries being located at and near New Westminster, sixteen miles from the sea, as a fresh water channel will be provided for shipping.

The meeting held this week took action in deciding to employ an engineer to lay out a plan as a suggestion to the government at Ottawa which can be improved upon if seen fit. This will start the matter going. Action should not be delayed, for the scheme is a large one, and will take a few seasons to consummate.

Cities in the mountain districts have an abundance of fine water, and with the growth of Vancouver, the requirements of the future must be looked after. With two sources of supply, it is proposed to spend $700,000 in the purchase of crown-granted timber land, so that the watershed of Seymour Creek will not be depleted of the trees which retain the snow until the hot summer months. It is a proposal worthy of all support.

The mention of such a scheme needs no amplification, since everyone knows how the cutting of trees affects the water supply. There is no supply in the proper sense of the word, simply a freshet in the spring, doing damage probably, and a lack of water in the hot months when it is most needed. Seven hundred thousand dollars is not a large sum when it is considered that the safety of the water supply will be assured for years. Five thousand acres of land will be purchased. The timber is of such good quality that speculative Americans are seeking it. Two advantages appeal to these men. First, it is close at hand, and second, it is Crown-granted and may be exported, the embargo against export applying only to leased and licensed lands.

Railway Commission May Be Reorganized.

A reorganization of the Railway Commission is again suggested. Business men in the West will appreciate the formation of a western section of the Commission. Many matters come before the Board at its sitting on the coast, and these are long-delayed by having sittings here so far apart. A western section could deal with applications promptly, resulting in a saving of time, trouble and expense to those interested.

The Powell River Paper Company has completed its plant at Powell River, and expects to manufacture paper in about three weeks. The expenditure has been in the neighborhood of two million dollars. Mr. D. F. Brooks is president; Mr. M. J. Scanlon, vice-president; Mr. P. R. Brooks, secretary, and Mr. N. R. Lang, manager. The officers are Minneapolis men.

The financing of the company which will provide for the expansion of the lumber business of Messrs. E. H. Heaps & Company, has been successful. This firm has a large manufacturing plant in Vancouver, with a mill at Ruskin, 30 miles east on the Canadian Pacific Railway, and extensive timber holdings.

Life Insurance Now a Science.

Perhaps the first banquet of its kind given in Vancouver was that tendered Mr. George T. Wilson, vice-president, and Mr. Henry L. Rosenfeld, assistant to the president of the Equitable Life Assurance Company of New York, by the Vancouver Life Underwriters' Association on the 27th instant. The local men who attended were Messrs. J. J. Roberts, Dr. Weld, Major Barwis, J. H. Poff, W. W. Dresser, J. T. Wilkinson, Brenton Brown, Deacon, McFadyn, Wainwright, Huntingdon, Watson, Elkins, Harvie, Colwell, Slack, Kerr, Brownlee, Ramsay, Callander, Hoseason, Watson, Claxton and Welsh.

The remarks by the guests of honor showed that there was something besides mere dollars and cents behind the life insurance proposition. Mr. Rosenfeld pointed out that the greatest asset of any country was its manhood, and the aim of life insurance companies was to reduce the mortality and the premiums on policies. This was becoming a science. Life insurance is coming to be regarded as the chief and most important part of the estate of the average man.

Mr. Wilson eulogized life insurance salesmen as the advance agents for the protection of future widows and orphans. He declared that life insurance companies were doing much for the betterment of the world, for the saving necessary to pay premiums resulted in large amounts of money for beneficiaries. One company alone had paid $750,000,000 to its policyholders.

MONTREAL'S FINANCES.

Tax Exemption Has Become a Surprisingly Large Item—Debt of the City.

The annual report of city treasurer Robb, of Montreal, shows that the value of property exempted from taxation in the city has arisen from $68,000,000 at the end of 1909 to $109,000,000 at the end of 1910. This is made up of the labor valuation of $19,000,000, a general augmentation in value of $16,000,000 and farm lands placed at $6,000,000.

The debt of the city increased from $36,278,025 at the first of 1910 to $46,808,533, less redemptions of $240,000, making the net total $46,568,853. Added to this is the $2,000,000 of working capital, making the grand total, $48,568,853. The annual cost of interest and sinking fund is $2,163,000.

The total transactions for the year, including a balance of $580,782.46 brought over from 1909, show a total of $16,223,393.04, including revenue of $6,615,701.58 for 1910, and loans and floating debts of $9,026,909.06 for the same period on the debit side of the ledger. On the credit side are disbursements of $6,840,480.83, from the revenue, and of $8,890,505.97 for loan and floating debts. The cash balance carried to 1911 was $492,406.24.

Unused Borrowing Power.

The unused borrowing power of the city on last year's statement is $9,045,000, and this will be considerably increased when the new assessment rolls are compiled.

"I have again to emphasize the necessity for more accommodation in order to facilitate the workings of the department." This statement is made by Mr. Robb in the report. He says that the annexations to the city, with the separate assessment rolls of each district have rendered the long room, which was not any too large before, entirely inadequate to its requirements. The arrears department is alone crowded into a corner that is at present far too small. In it, in addition to the annual reports in it, are no less than a hundred and twenty-five street improvement, three hundred sewer, and one thousand sidewalk special rolls, each item of which is payable by instalments spread over ten years.

Office of Assessor.

The office of the assessor is congested to a greater degree. The exposure of most valuable bonds and records, says the treasurer, to danger from fire by the overcrowding, calls for the most serious consideration. The original blotters, he says, should be kept in a fireproof room and access to them should be obtained only in the department, and under proper surveillance. "It is impossible," he says in conclusion, "to over-estimate the importance of this."

INTEREST WHICH CANADA PAYS

On Its Borrowings—Abundant Wealth to Sustain the Load—Notes of a New Book.

The fact that British, American and foreign capital amounting to $2,416,732,871 has been invested in Canada, of which $1,860,000,000 was British capital, has been received by the press of Canada, Great Britain and the United States with interest. These figures are contained in a new volume, "Capital Investments in Canada," just issued by The Monetary Times, a book that has been extensively reviewed throughout North America and Europe. Commenting on the heavy borrowing record of Canada, as recorded in this volume, the Canadian Courier says: "We talk about Canada being a prosperous and wealthy nation, and about the Canadian being richer per capita than any other nation, but is it true? If we owe twenty-five hundred millions to British and foreign capitalists, are we not really poor? At four per cent. the annual interest charge comes to one hundred million. At five per cent it would be $125,000,000. Should any nation consider itself wealthy when its pays to foreign investors for money to run its business, such an enormous annual toll?"

Statistical Volume of Value.

That there is much of the historical element in the volume, is the opinion of Toronto Saturday Night, which says in reviewing the publication, "Commonly, when an individual thrusts a book of statistics upon an unoffending public, the newspapers give it a complimentary paragraph or so, and the recipients of it allow the pages of the volume to fly through their fingers, whereupon it is consigned to a shelf in the dust zone. Not that works of statistical reference lack value, but as a rule they are so very dry that unless in case of dire necessity, one hesitates to approach them. There has just been published in book form a statistical volume of quite another character under the title, 'Capital Investments in Canada,' being a collection of articles which have appeared in The Monetary Times from time to time. The matter therein is of interest to everyone who calls himself a Canadian. One does not have to wade through masses of uninterestingly connected figures in this book."

Americans and Canada's Industries.

Mr. T. Kelly Dickinson, financial editor of The Montreal Herald, thinks that the volume is an excellent guide for the financial world to the important matter of capital investments in this country and that it will be of exceptional interest to a multitude of financial people at home and abroad. "The Americans," says Mr. Dickinson, "have had a much keener appreciation of our industrial possibilities than the money lenders of the old country," and he ascribed the fact to geographical conditions.

Reviewing the pages of the book, the Toronto Globe thinks it a valuable compendium of information for business men, financiers and promoters in all lines. "It is also of value to the Dominion at large," says our contemporary, "in bringing prominently before the investing public the openings and opportunities presented for profitable enterprise. Great as our borrowings have been and are likely to be, there is abundant natural wealth in the Dominion to sustain the load and insure a prosperous era during the process of liquidation. The investments are not an unhealthy boom, but a development based on sound business principles. There will be abundant business for all the railways, public service corporations, and private enterprises. The phenomenal railway expansion has not even kept pace with the country's needs. Under such conditions the borrowing era can be regarded in Canada with the free confidence which it attests elsewhere."

The volume is handsomely bound in red cloth, contains 232 pages, three indexes and a list of Canadian flotations in London from January, 1905, to August, 1911.

The Montreal Shareholder and Insurance Gazette notes that the book contains a wealth of valuable information which should appeal to every up-to-date business man in the country.

Considerations for the Investor.

The Cambridge Independent Press likes the manner in which the volume takes in detail the classes of borrowing for which outside capital is mainly sought in connection with the development of Canada, shows the conditions under which it is applied and the considerations which should weigh with investors in judging as to the soundness and desirability or otherwise of the undertaking.

PERSONAL.

Mr. H. R. Safford has been appointed chief engineer of the Grand Trunk, with headquarters at Montreal.

Mr. W. E. Rundle, the new general manager of the National Trust Company, Toronto, has assumed his duties.

Mr. E. E. Newman, manager of the Traders Bank of Canada, Owen Sound, has been appointed manager of the Ottawa branch.

Mr. E. A. Brand, manager of the Canadian Express Company at Berlin, Ont., has been appointed manager of the Hamilton branch.

Mr. Norman Ross, manager of Traders Bank of Canada, Ottawa, has resigned. He will accept another position with headquarters in Winnipeg.

Mr. W. J. Finucan, inspector of Western Ontario branches of the Merchants Bank, has been appointed manager of the Winnipeg branch.

Mr. A. Homer Vipond, the new president of the Life Underwriters' Association of Canada, will be the guest of the Toronto Association at their meeting to-night.

Mr. George Munro, manager of the Merchants Bank, Winnipeg, has been appointed superintendent of the Western branches with headquarters in Winnipeg, Man.

Mr. George Weston, of the Canada Bread Company, Toronto, accompanied by Mr. Hilton, recently visited Calgary, Alta., with the object of locating a bread factory in that city.

Mr. R. S. Logan, who for some years has been assistant to President Hays, has been promoted to vice-president of the Grand Trunk Railway, in charge of land, tax, claims, and mail departments.

Mr. Howard G. Kelley, chief engineer of the Grand Trunk Railway, has been appointed vice-president in charge of construction, transportation and maintenance departments on the Grand Trunk.

Mr. J. E. Dalrymple, who was assistant freight traffic manager of the Grand Trunk Pacific, has been appointed vice-president of the Grand Trunk, in charge of traffic, both passenger and freight.

Mr. William Wainwright, formerly second vice-president of the Grand Trunk Railway and Grand Trunk Pacific, has been appointed senior vice-president of the Grand Trunk Railway and second vice-president of the Grand Trunk Pacific.

Mr. Stephen Furness, M.P., representing the Furness-Withy Company, sailed from London on Saturday for Montreal for the purpose of negotiating for the purchase of an important interest in connection with the great lakes in Canada.

Mr. C. H. Carpenter, of the New York Life Insurance Company at Columbus, O., has been appointed to the management of the Great West Life of Canada for Ontario, with head office at Toronto. He has been a member of the $200,000 club for the past three years.

Mr. M. M. Reynolds, formerly third vice-president of the Grand Trunk Railway and the Grand Trunk Pacific, has been appointed vice-president of the Grand Trunk, in charge of financial and accounting departments, and third vice-president of the Grand Trunk Pacific.

Mr. Walter Henry Harris, C.M.G., formerly Sheriff of the city of London, England, and a member of the firm of Messrs. Soloman & Company, one of the oldest on the London Stock Exchange, is in Toronto for a few days looking for investments for the clients of his firm.

Mr. M. G. Murphy has been appointed district passenger agent of the Canadian Pacific Railway, the position having become vacant by the resignation of Mr. R. L. Thompson from the company's services, to go into the real estate business. Mr. Murphy has been connected with the Canadian Pacific Railway for twelve years. He entered their employ as a telegraph operator. For the past eleven months he has been general travelling passenger agent. His new duties will give him jurisdiction over all the Canadian Pacific Railway agencies in the province, together with the Buffalo office and the agencies in New York State adjoining the Niagara River.

MARKETS OF WEST INDIES.

Offer Many Opportunities to the Canadian Manufacturer—Horses, Carriages, Furniture, Boots and Shoes are in Demand.

Statistics of trade with the West Indies for 1910 have been supplied by the Customs department to Mr. E. H. S. Flood, the Canadian Trade Commissioner at Bridgetown, Barbados. The imports show considerable increase each year since 1905. In 1906 the imports, exclusive of coin and bullion, dropped nearly one-third below the average due to the withdrawal of the British troops. The figures for that year were under £400,000. Next year there was a slight increase, in 1900 the amount had risen to about £430,000, and then began a very greatly increased demand for imported goods, chiefly foodstuffs, to meet the requirements of the large number of tourists visiting the island from the United States, which raised the imports for 1910 to £504,253.

Trade With Canada Increasing.

The following table shows the growth in the imports from Canada during the last few years:—

1906	£55,451
1907	72,388
1908	75,055
1909	83,885
1910	83,429

This growth is all the more remarkable, seeing there is no general increase in the imports in the decennial period, and considering the fact that there is only one steamship line between Canada and Bermuda, with a 12 day service, whereas there are three competing lines from New York, making weekly and fortnightly trips, and one with large cold storage facilities.

The principal items of import from Canada are.—

	1909	1910
Box material	£ 3,616	£ 3,261
Butter	11,784	11,861
Fish—Preserved	3,652	5,906
Flour	14,464	....
Horses	1,165	1,902
Bran	4,611	2,839
Cheese	2,223	3,975
Hay	2,879	4,447
Oats	8,569	7,881
Potatoes	3,367	4,273
Oxen and cows	8,799	...
Fruit—Fresh	1,133	1,117

Imports from United States.

From the following table it will be noticed that the imports from the United States have declined in about the proportion of the general drop in trade referred to above, and have begun to rise again in the last two years with the better times on the island. Half the total imports for many years past have been derived from the United States, and this is still maintained largely through the very efficient steamship service from that country:—

1903-4	average	£292,054
1905-6	"	241,500
1907-8	"	211,190
1909		233,982
1910		266,981

The year 1906 was an unusually trying one for the colony. The revenue fell off, due to the reduction in the military and naval establishments, and to the completion of the dockyard works. A deficit of £15,851 had to be met, and no visible outlook for the improvement of trade to justify expectation of increased returns from customs. The tourists trade had not yet developed, and prices for the products of the island were low in the United States market. To meet the shortage in the finances and quadrate revenues and expenditure for the future the customs duties were advanced from 5 to 10 per cent. ad valorem, which has since proved adequate.

Openings for Canadian Manufacturers.

The largest item is lumber, and the import chiefly in pitch pine from the United States. Canada supplies white pine and spruce. Building material, such as lime and cement, are the next in importance, of which half comes from Great Britain, the balance being equally divided between Canada and the United States. Box material of the value of £3,261 came from Canada. New empty barrels and returned empties were imported, amounting to £1,499, supplied by the United States, and were probably for the potato and arrowroot trade.

A large quantity of furniture has been required in the last few years for furnishing the new hotels which there is a considerable number in the island. The value of last year's import of furniture was over £9,000 but the previous year the amount was over £11,000. This is of course an abnormal condition, but as the hotels will continue to increase in number or be enlarged, the demand will keep up for some time to come. Canadian furniture manufacturers would do well to get in touch with the importers. To communicate directly with the hotels, offering special inducements, would probably be the best method.

Horses and Carriages in Demand.

Due to the demand created by the tourist trade, requiring the general stock of horses and carriages kept by the hotels and livery stables, and the necessary repair material, to be large, the import has nearly doubled in the last five years. Canadian manufacturers of carriages and supplies should communicate with the owners of livery firms. During the last two years the value of horses, carriages and carriage material imported reached about £13,000. The bulk of the supply at present comes from the United States. Incident on the large number of horses in use on the island, the quantity of feed imported has materially increased, and has now risen to £20,000. Nearly all the hay and oats come from Canada and about half the bran.

The average importation of butter and cheese over a period of ten years amounted to £8,355, and £2,430 respectively. The demand, however, has largely increased, and last year the United Kingdom supplied butter to the extent of £2,617, the United States, £2,403, while Canada supplied £11,860. The cheese import has about doubled and nearly the whole comes from Canada.

More Fish Being Taken.

The demand for this commodity has also nearly doubled in the last five years. Last year Canada supplied nearly the whole import, amounting to £7,863.

Beef, together with poultry and live sheep and pigs, are imported to the value of over £20,000, and came chiefly from the United States. In these articles there is an opportunity for Canadian enterprise in supplying part of the demand.

The present requirements for flour are about £20,000 annually, of which three-fourths come from Canada. Bread and biscuits of the value of between £3,000 and £4,000 are also being imported, the greater part from the United States, Canada getting only a small part of this trade. The quantity of flour required has greatly increased during the last decade, due to the demand from the hotels, as the official average struck for that period was of the yearly value of £6,324.

Potatoes and other vegetables, as well as peas and beans, are imported to the value of upwards of £10,000. The bulk of these, as in the case of other food stuffs, comes from Canada. In these, as in many other lines, there has been a considerable increase in the last two or three years. Of provisions, which may be considered as including all unenumerated food stuffs, the amount imported is about double the foregoing, and is principally supplied through the United States commission houses. These may be considered as general groceries.

Jewellery and Fancy Goods from Canada.

Over £35,000 in jewellery and fancy goods were imported in the last two years, chiefly in souvenir and characteristic jewellery to tempt the pockets of the visitors to the island. A fair portion of this trade in jewellery, chiefly in the enamels, is with Canada, where some very beautiful work is being done in this art line and at reasonable prices. The more expensive lines in enamels are made in Sweden, and are shown in all the jewellery establishments.

Earthenware and glassware are also being stocked in larger quantities to supply the hotels, and articles in these lines are also offered with suitable designs as souvenirs of the island.

Boots and shoes are not in classification in the returns of customs, so that no definite information can be given as to the amount imported. Judging from the large and well assorted stocks shown in the stores, the sale must be considerable. The styles appear to be all American, and the stock imported from that country.

On inquiring it was found that English and Canadian makes were not in demand and that public taste had been influenced in the direction of Unit ed States patterns. No Canadian samples, it was stated, have been shown in Bermuda for some time.

◆

By big majorities the ratepayers of Edmonton and Strathcona have both decided in favor of amalgamation. The name of the city will be Edmonton, and the final step in amalgamation will be brought about by Act of legislation during the coming session in November. The combined population will be about 35,000.

CHANGES AMONG JEWELLERY HOUSES.

Proposed Amalgamation Will Include More Firms Than at First Intended—Birks Purchase the Rosenthal Business.

The amalgamation of Canadian jewellery companies, or the jewellery merger as it is popularly known, will include more companies than was originally intended. The matter had practically been arranged when a new complexion was given it by the possible inclusion of several big corporations which perhaps changed their opinion at the last moment regarding the desirability of combination.

Canadian Jewellers, Limited, was incorporated in August with a capital stock of $5,000,000, divided into 50,000 shares of $100 each. The company's head office is at Montreal, and the firms participating are understood to be of Montreal and Toronto both. The provisional directors are members of a legal firm at Montreal.

Powers of the Company.

The company's Dominion charter gives it authority to carry on the business of goldsmiths, silversmiths and manufacturing jewellers generally, and to transact a general jewellery, watches, leather goods, glass, art wares, stationery, small wares and fancy goods business. The charter also gives authority to purchase or otherwise acquire firms carrying on business which Canadian Jewellers, Limited, is empowered to transact. The corporation may also amalgamate with any other company having objects altogether or in part similar to those enumerated in the company's charter.

That the companies participating in the combination will likely take merger securities as part payment at least for their good will and assets is indicated by the following clause in the charter of Canadian Jewellers, Limited: "To issue and allot as fully paid up shares of the company hereby incorporated or in payment or part payment of any business, franchise, undertaking, property, rights, powers, privileges, contracts, real estate, stocks, bonds, or debentures or other property or rights which it may lawfully acquire by virtue of the powers hereby granted; to issue and allot as fully paid-up, shares of the company in payment of any property, movable or immovable, rights or things acquired by or for the company and for services rendered to the company.

Mr. Henry Timmis is the promoter of the consolidation and Messrs. Mackay & Company have underwritten the securities. It is understood that the merger will effect economy in reducing the stock-in-trade.

Rosenthal's Ottawa Store Sold.

While this deal is being arranged the announcement has been made that the new Rosenthal building and stock, goodwill, plant and equipment of the A. Rosenthal & Sons, jewellery store, Ottawa, have been sold to Messrs. Henry Birks & Sons, Montreal. The price is said to have been $500,000. Messrs. Birks & Sons have closed their present Ottawa store and now occupy the new building.

The Birks store is managed by Mr. C. A. Olmsted, and Mr. Adolphe Rosenthal joins in the management of the enlarged business in which they will also have the assistance of Mr. Herbert A. Pinch and the combined staffs of the two stores. The famous house of Birks will accordingly have three Ottawa men who have taken an active part in the jewellery business of that city, connected with it. Mr. Rosenthal is president of A. Rosenthal & Sons, Mr. Olmsted is the former head of Olmsted & Hurdman, and Mr. Pinch was manager of the old jewellery business of John Leslie. This completes the chain of Birks buildings in Montreal, Ottawa, Winnipeg and Vancouver. Mr. Adolphe Rosenthal is the only one of the Rosenthal brothers to remain in the new business.

SOAP MAKING MACHINERY WANTED.

The acting Trade Commissioner at Havana writes to the Department of Trade and Commerce that one of the largest importers of machinery in Havana has applied to the Canadian office to secure the names of exporters of machinery for soap making. The firm requests that it be furnished at the earliest possible moment with catalogues and quotations, either c.i.f. Havana or f.o.b. port of shipment, and if prices are right and the information is received in time, a large order can be placed. Canadian firms interested will receive the name of the firm by wire upon application to the Department of Trade and Commerce, Ottawa.

WHAT IS A MANUFACTORY?

Sir William Priestley, a Prominent English Manufacturer, Defines the Term and Its Relation to Canada.

An interesting phase of the Dominion's industrial development was recently discussed by Sir William Priestley, a prominent British manufacturer, during a visit to Canada. He was asked many times if he would justify the establishment of manufactories in Canada, and invariably responded by asking, "What do you mean by the word 'manufactory'?" In Great Britain, it is understood the men who take hold of the raw material are making it into the finished article. In Canada, it is spoken of as taking the finished article in bulk from Great Britain or the continental power of Europe and simply transforming it into a commodity for the individual.

Purchasing Power of Canada.

Sir William would not advocate the establishment of factories in Canada as he understands them in Great Britain, because the purchasing power of Canada to-day is not great enough to justify anyone connected with most of the industries to establish a concern where he has to take hold of the raw material and turn out the finished article, with only 8,000,000 people—which is about the population to-day of the City of London, and not equal to that of Lancashire.

"For example, in British Columbia," said Sir William, "I was asked why I, in the worsted trade, could not establish a concern in that province. I replied that their area was as great as France, Prussia and Bavaria together, but that their population, for purchasing power, was only a little greater than my City of Bradford, in England. Therefore, it would be foolish for me to think of establishing a manufacturing concern in British Columbia, or even for the consumers in British Columbia to think that such a concern could sell to them economically. The demand upon variety in Vancouver and Victoria is just as great with respect to men's wear and women's wear as it is in any great city in England; and no manufacturer of men's wear and women's wear could possibly make a profit of the consumption of the people of British Columbia, because the cost of production would be so tremendous, to meet all the varied demands.

Centralization of Industries.

"Besides, if politicians in Canada look into the question seriously of the upbuilding of manufactories, they will find there is some natural cause why certain industries have centred in certain districts and in certain countries; and before any English manufacturer in any branch of industry could say he could establish an industry in any part of Canada, he would have first to go very deeply into the natural conditions, water, humidity, and many other qualities that are necessary to different industries."

STATE IRONWORKS FOR NEW SOUTH WALES.

In pursuance of its policy for the establishment of industries for the requirements of the state, instead of purchasing the materials from local manufacturers or importing from abroad, the government of New South Wales has formulated a proposal for the erection of state ironworks. At present the government has in operation several brick and lime works. A state coal mine (like that in Victoria) is proposed and negotiations have been commenced for the establishment of a timber depot and building yards. All these services are intended for state requirements only (railways, public works, etc.), and not to compete with private enterprises for public demand. One of the leading British experts in iron and steel is now in New South Wales, under engagement to the government, to report upon the following matters:

(a) the suitability of Australian ores for the manufacture of iron and steel, and

(b) the cost at which the various sections of iron and steel required by the state could be produced from local ores.

(c) Whether the existing arrangement with the Lithgow, N.S.W. ironworks is a beneficial one in the public interest.

(d) The approximate cost of a plant capable of producing the iron and steel likely to be required by the Commonwealth and state governments, including rails and bridges for the Transcontinental Railway, plates for vessels, &c.

It is understood that in view of the high status of the British expert, it was found necessary to pay him a large fee for making the necessary exhaustive investigations.

FIFTY-NINE NEW COMPANIES.

Six Have Capitals of a Million Dollars and Over—British Columbia Grants the Most Charters.

The total capitalization of the fifty-nine companies incorporated last week was $16,850,000. Six of the companies have capitals of a million dollars and over, the largest being the Northern Gold Reef, with capital of $3,500,000, and head office in Toronto. Other large concerns granted charters are Franco-Canadian Trust & Mortgage Company, Vancouver, B.C., $2,000,000. Dominion Lands & Mines Development Company, Toronto, $1,000,000. Peace River Trading & Land Company, Edmonton, Alta., $1,000,000. Cascade Falls Mining Company, Victoria, B.C., $1,000,000. Harris Mines, Hazelton, B.C., $1,000,000.

There were 39 industrial, 9 land, 6 mining and 5 investment companies incorporated. The number by provinces is 29 British Columbia, 19 Ontario, 8 Quebec, 2 Alberta, 1 Manitoba.

The following is a list of charters granted during the past week. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Hazelton, B.C.—Harris Mines, $1,000,000.

Athalmer, B.C.—Columbia Valley Supply Company, $10,000.

New Westminster, B.C.—A. L. Clark Investment Company, $100,000.

Galt, Ont.—Hunter's Garage, $40,000. H. W. D. Brown, L. C. Howell, W. M. Hunter.

London, Ont.—Dominion Chicle Company, $40,000. G. Kelly, L. S. Olmsted, J. E. Fawkes.

Berthier, Que.—Papeterie de Berthier, $50,000. O. Lavallee, M. A. L. Aubin, J. O. Daviault.

Mansewood P.O., Ont.—Boston Cemetery Association, J. Murray, P. Campbell, W. Hampshire.

Winnipeg, Man.—Presbyterian Recreation Association, $60,000. S. H. Smith, D. J. Black, W. McLandress.

Fort William, Ont.—Copp Stove Company, $300,000. J. A. Kilpatrick, C. L. Jobb, Montreal; F. W. King, Fort William.

Edmonton, Alta.—Peace River Trading & Land Company, $1,000,000. W. W. Skinner, W. G. Pugsley, G. G. Hyde, Montreal.

Medicine Hat, Alta.—Humphrey Pump and Power Company, $500,000. J. M. Rae, H. W. Ireland, Medicine Hat; N. Ritchie, Lethbridge.

Ottawa, Ont.—Elgin Realty Company, $300,000. J. F. Orde, M. G. Powell, N. W. Lyle. Ottawa Valley Driving Club, $40,000. P. Salter, J. Galarneau, J. K. Paisley.

Victoria, B.C.—Western Canadian Development Syndicate, £100,000. Knott Brothers & Brown, $50,000. Cascade Falls Mining Company, $1,000,000. Lands and Homes of Canada, $25,000.

Montreal.—Western Park Company, $50,000. J. C. Barlow, A. Labreche, G. A. Terrault. Bellerive Lumber Company, $50,000. L. Morin, J. Kennedy, A. E. Lamalice. Franco-Canadian Corporation, $50,000. G. Porteous, R. C. McMichael, G. R. Drennan. Canadian Investment Company, $500,000. G. Porteous, R. C. McMichael, R. McMurtry. Provincial Realty Company, $100,000. H. Baigne, J. A. L. Gagnon, A. Fortier. Pickering Patent Wheel Company, of Canada, $500,000. H. C. Organ, J. T. Ewart, J. Wechselberger. Dunning's, $20,000. J. P. Dunning, S. J. Dunning, Westmount; J. S. Fraser, Montreal.

Vancouver, B.C.—Renell Sound Development Company, $250,000. A. S. French Auto Company, $100,000. Franco-Canadian Trust & Mortgage Company, $2,000,000. Selwyn Investment Company, $10,000. Canadian North Eastern Power Company, $50,000. Metropole Transportation Company, $25,000. Societe Immobiliere de Vancouver, $750,000. Angevine Lumber Company, $50,000. Heaps & Stewart, $100,000. Burrard Construction Company, $25,000. Lock-Rail Bed Manufacturing Company, $100,000. Stump Brothers, $25,000. Sheep Creek Land Company, $50,000. Metropolitan Press, $25,000. Royal Theatre Company, $25,000. Kitsilano-Point Grey Market Company, $30,000. Pelton Garter Company, $50,000. National Lands Company of Mexico, $800,000. Similkameen Power Company, $10,000. Imperial Confection Company, $25,000. Vancouver Marble & Tile Company, $50,000. Vancouver Estates, $600,000.

Toronto.—M. J. Haney Realty Company, $50,000. S. W. C. Scott, W. McNally, E. W. Wright. Investment Brokers, $50,000. W. O. Menger, H. E. Race, W. P. Cloney. Dominion Lands & Mines Development Company, $1,000,000. J. R. Roaf, T. E. McCracken, C. W. Evans. Crouse-Hinds Company of Canada, $100,000. H. B. Crouse, W. L. Hinds, Syracuse; E. G. Mack, Toronto. Northern Gold Reef, $3,500,000. R. McKay, A. Dods, D. I. Grant. Dominion Toy Manufacturing Company, $40,000. H. W. Maw, G. S. Hodgson, E. C. Paterson. La Mode Garments, $40,000. F. Alsop, N. Sommervile, T. A. Rowan. Comet Oil Company, $20,000. W. J. Hohlstein, J. E. Collingburne, T. J. W. O'Connor. Aberdeen Porcupine Exploration Company, $25,000. R. W. Hart, G. M. Miller, C. H. C. Leggott. Thomsons', $40,000. W. Douglas, R. J. Gibson, R. Armstrong, Jr. Dominion Properties, $50,000. W. O. Menger, W. P. Cloney, H. S. Cooper. Coals Transportation, $200,000. J. R. Corkery, J. M. Forgie, E. G. McMillan. Ware Manufacturing Company, $200,000. C. F. Hopkins, J. A. Cline, H. H. Speare.

FARMERS BANK AFFAIRS.

Tenders Invited for Purchase of Keeley Mine—Question of Double Liability.

A number of events have occurred in recent days in respect to the winding up of the Farmers Bank. Clark H. Smith, the former secretary of the board of directors of the bank, has been brought by the police from Vancouver on a warrant accusing him of conspiracy in connection with the obtention of the bank's charter. He was committed by Magistrate Denison, Toronto, for trial at the court of the next assizes.

Tenders are to be invited for the purchase of the Keeley mine property, an asset of problematical value controlled by the bank. The sale, if any, will be made in the name of the company and not in the name of the bank, in order to avoid legal entanglements.

Bank Has Won Suits.

The Farmers Bank has won its action in the non-jury assize court, Toronto, against George Wishart, a New York stockbroker and company promoter, who appeared to be well financed by W. R. Travers, the late general manager of the bank. The bank sued Wishart on three counts. The first was for the recovery of $43,500, together with interest at six per cent. on a promissory note, made on December 31, 1909. The note was drawn for six months, and fell due in July, 1910, but was not met.

The second claim was for $5,000 and interest on a note drawn six months on February 1st, 1910, which matured August 4th, 1910.

The third claim was for $818.66 on an overdrawn account. According to the statement of the bank, Wishart had on March 14th, 1910, a balance to his credit of $187.29. He made a request, on that date, for a draft on the bank's agent in New York, for $1,000, which was issued.? This left an overdraft of $812, which, together with interest, now amounts to the sum sued for. There was no defence.

Double Liability Call.

It is thought that a hard fight will be waged in order to induce the government to relieve the shareholders of the burden of the double liability clause. We fear that if any candidates for parliament during the recent elections, promised relief in that direction they will find it difficult to fulfil their promise. It is most unlikely that any such dangerous precedent would be taken by our government, of whatever political color. In the meantime, the double liability call is being made and we understand in some cases has been paid.

GRAIN ELEVATORS IN CANADA.

The following is a summary of the number of grain elevators, with capacity, throughout Canada.

	Number.	Capacity bush.
British Columbia	6	444,000
Alberta	249	8,764,500
Saskatchewan	904	26,465,000
Manitoba	707	21,813,800
Ontario (mills)	4	1,740,000
Ontario (terminals)	15	25,700,400
Eastern transfer	24	20,535,000
Totals	1909	106,462,700

REVIEW OF THE MONTH

CANADIAN FLOTATIONS IN LONDON (SEPTEMBER).

The following flotation of interest to Canadians was made in London during September:

Kamloops Land and Development Company, Limited.—20,000 shares of £1 each at par.

◆

SPECULATIVE AND INVESTMENT OFFERINGS.

The following speculative and investment offerings were among those made in Canada during September:

Lucky Jim Zinc Mines, Limited.—Offering of shares.

American-Canadian Coal Company, Limited.—Offering of shares at 20 cents.

Porcupine Southern Mining Company.—150,000 shares of underwritten treasury stock at 60 cents per share.

Siemon Company, Limited, Toronto.—Offering of 7 per cent. cumulative preferred and profit-sharing stock at $100 per share.

Calgary Collieries, Limited, Calgary.—$60,000 preferred stock. Capital stock, $300,000, divided into 300,000 shares, par value $1,000, $250,000 8 per cent. preferred and $50,000 common.

◆

NEW STOCK LISTINGS.

The Bank of Toronto has listed $1,000,000 additional stock on the Montreal Exchange.

Two hundred and fifty thousand pounds additional second mortgage bonds of Rio de Janeiro has been listed on the Montreal Exchange.

The following securities of the Canadian Locomotive Company, Limited, have been listed on the Toronto Exchange: Common, $2,000,000; preferred, $1,500,000; bonds, $1,500,000.

◆

BANK BRANCHES OPENED AND CLOSED DURING SEPTEMBER.

Nineteen branches of Canadian chartered banks were opened during September and two closed. During August, 16 were opened and 5 closed; during July, 18 were opened and 3 closed; during June, 25 were opened and 3 closed; during May, 29 were opened and 3 closed; during April, 17 were opened and 3 closed; during March, 18 were opened and 3 closed; during February, 17 were opened and 10 closed; during January, 37 were opened and 3 closed. Houston's Bank Directory gives the following particulars for September:

Branches Opened.

Calgary, Alta. Hillhurst Branch.	Dominion Bank.
Edmonton, Alta. Norwood Branch.	Dominion Bank.
Chauvin, Alta.	Merchants Bank of Canada.
Hartney, Man.	Merchants Bank of Canada.
Montreal, Que. St. Lawrence Boulevard Branch.	Molsons Bank.
Montreal, Que. Cote St. Paul.	Molsons Bank.
St. Stanislas, Que.	La Banque Nationale.
La Tuque, Que.	La Banque Nationale.
Sudbury, Ont.	Bank of Ottawa.
Pelly, Sask.	Bank of Toronto.
Preeceville, Sask.	Bank of Toronto.
Stenen, Sask.	Bank of Toronto.
Eglinton, Ont.	Union Bank of Canada.
Orillia, Ont.	Union Bank of Canada.
Peterboro, Ont.	Union Bank of Canada.
Cut Knife, Sask.	Union Bank of Canada.
Consort, Alta.	Union Bank of Canada.
Fisherville, Ont.	Union Bank of Canada.
Chateau Richer, Que.	La Banque Nationale.

Branches Closed.

Kelso Mines, Ont.	Bank of Ottawa.
Roxton Pond, Que.	Eastern Townships Bank.

DIVIDEND CHANGES.

A half-yearly dividend of 6 per cent. has been declared by the Canadian Northern Prairie Lands Company, Limited, as compared with 5 per cent. a year ago.

Toronto Railway directors have declared a quarterly dividend of 2 per cent., being at the rate of 8 per cent. per annum. This is an increase from 7 per cent.

The Temiskaming and Hudson Bay Company has declared one of its dividends of 300 per cent., payable August 31st. This is the fourth of the kind this year, and the third in three months. The dividend makes the 32nd that the company has declared since its inception, and means a total of 18,400 per cent., or a total of $1,428,024. Shareholders have received $184 a share in dividends to date.

◆

THE COPPER HANDBOOK.

The tenth annual edition of the Copper Handbook has been received by The Monetary Times. The new issue of this work, which is considered a standard authority on the subject of copper and copper mines for the entire globe, has 1,902 pages, containing nearly 1,500,000 words, and, in addition to the miscellaneous chapters, lists and describes 8,130 copper mines and copper mining companies, in all parts of the world, this being the largest number of titles ever listed by any work on mining. The descriptions range from two or three lines, in case of dead companies, wherein reference is made to detailed descriptions in past volumes at the period of their activity, up to twenty-one pages in the case of the Anaconda mine, which yields one-eighth of all the copper made in the world.

The miscellaneous chapters of the book, twenty-four in number, treat the subject of copper from all possible viewpoints, there being chapters on the history, chemistry, mineralogy, metallurgy, brands and grades, alloys and substitutes for copper, with a copious glossary, and a chapter of statistics ending the book that contains 40 odd tables, thoroughly covering copper production, consumption, movements, prices, dividends, etc. The Copper Handbook is sold on the unique plan adopted nine years ago, the publisher sending the book by mail, prepaid, to any address ordered, without advance payment of any sort, and subject to return after a week's inspection. The price is $5 in a strong, green buckram binding with silk headband and gilt top, or $7.50 in full library morocco. Anyone interested in copper, as a producer, consumer or investor in shares, would do well to write the author and publisher, Mr. Horace J. Stevens, Houghton, Michigan, ordering a copy of the new Copper Handbook sent prepaid, subject to approval.

We anticipate with pleasure every year to the receipt of this excellent and valuable book.

◆

INDUSTRIAL ACCIDENTS DURING AUGUST.

Industrial accidents occurring to 237 individual work people in Canada during August, were reported to the Department of Labor. Of these 104 were fatal and 133 resulted in serious injuries. In addition six fatal accidents were reported as having taken place prior to the beginnin of the month, information not having been received by Department before August, 1911.

In the preceding month there were ninety-two fatal and 195 non-fatal accidents reported, a total of 287, and in August, 1910, there were eighty-two fatal and 140 non-fatal accidents, a total of 222. The number of fatal accidents reported in August, 1911, was, therefore, twelve more than in the preceding month and twenty-two more than in August, 1910. The number of non-fatal accidents reported in August, 1911, was sixty-two less than in the preceding month and seven less than in August, 1910. Altogether there were fifty industrial accidents reported in August, 1911, less than in the preceding month and fifteen more than in the same month of the preceding year.

Of 237 returns received during the month giving the ages of the victims of industrial accidents, thirteen referred to persons under twenty-one years of age, fifty-six to persons between twenty-one and forty-five, and twenty-four to persons over forty-five. One hundred and forty-four persons were over twenty-one years of age, but their exact ages were not specified.

Mr. E. H. Fitzhugh, formerly vice-president of the Grand Trunk, has been appointed president of the Central Vermont Railway, Central Vermont Transportation Company, Southern New England Railway Corporation, Southern New England Railway Company, and Montreal and Southern Counties Railway.

BRITISH CAPITAL IN CANADIAN INDUSTRIES.

There is a Tendency Towards Greater Interest in this Direction—Americans Have Led the Way.

Until recently, British capital has shown comparatively little interest in the development of Canadian industries. During the past two years particularly, a notable change has occurred in this direction, and British capitalists are devoting considerable attention to industrial development in the Dominion.

Considerable British capital has been devoted to the development of our coal mines, our iron and steel industries, our lumber, pulp and paper industries, our fisheries, our milling industries, our various lines of manufacture, and other more or less local and domestic enterprises.

Canadian government, municipal and railway securities have long been regarded with favor by British investors. A general survey of the Canadian outlook and the progress of Canadian development, notes "Capital Investments in Canada," a new volume published by The Monetary Times, gave satisfactory assurance of returns from investments of this nature. But large investments in miscellaneous securities show a more intimate and detailed knowledge of Canada's commercial and industrial activities. The British investors are becoming familiar with Canada's more localized undertakings. They are finding it advantageous to consider the outlook of the various industries affording openings for profitable investments.

American is Interested.

The American is closely allied with Canada's industrial development and has placed large amounts of money therein. If the present tendency in Great Britain continues, it is likely that within a few years we may find the Britisher and the American not only keen rivals for the import trade of Canada, but also for shares in the financing of its industrial growth.

It is stated that $1,000,000 of English capital will be invested in a new whitewear company with a factory at Three Rivers, Quebec. British manufacturers of high grade ammunition are contemplating the establishment of an assembling plant at Fort William, while a Scotch syndicate was recently considering the manufacture of fertilizers at Sydney, C.B. An English and New Brunswick syndicate was organized in January with capital stock of $5,000,000, for the purpose of developing the mineral oil industry in connection with the shale deposits of Alberta and Westmoreland counties, New Brunswick. Other proposed British enterprises in the industrial line are an electric smelting plant on the Ottawa River, a steel plant on the Fraser River, British Columbia, a lace factory, a perforated music factory, and a furniture factory.

British Capital in These.

British capital also became interested this year in a power street railway scheme at Saskatoon, while an English salt firm had under consideration the establishment of a branch factory in Ontario. The stockholders of the Canadian Locomotive Works, Limited, of Kingston, Ont., in June accepted the offer of an English syndicate for the sale of the works. The company was reorganized, the capital stock increased, and the capacity of the works doubled.

COMMERCIAL FAILURES ARE FEW.

Canadian Record of Financial Breakdowns in Commerce is Good in View of the Great Industrial Expansion in the Dominion.

Despite the large increase in manufactured products in Canada and the extension of business in every way throughout the country, it is gratifying to know that the number of commercial failures is smaller than it was eighteen years ago. The total number of failures in 1893 was 1,344. The figures have changed during the various years reaching their highest point in 1896, when the total was 2,118.

Since then, there has been a gradual decline until last year the number had decreased to 1,262. The lowest number of commercial failures was reported in 1903, when the figures were 978. The liabilities involved in the commercial failures during the period under review have varied but little in comparison with the Dominion's industrial and commercial activity.

This and other features are shown in the following table:

Year.	Number.	Assets.	Liabilities.
1893	1,344	$ 8,321,570	$12,689,794
1894	1,856	13,510,056	17,616,215
1895	1,891	11,500,242	15,802,989
1896	2,118	12,656,837	17,169,683
1897	1,809	10,574,529	14,157,498
1898	1,300	7,692,094	9,821,323
1899	1,287	7,674,673	10,658,675
1900	1,355	8,202,898	11,613,208
1901	1,341	7,686,823	10,811,671
1902	1,101	7,772,418	10,934,777
1903	978	4,872,422	7,552,724
1904	1,246	8,555,875	11,394,117
1905	1,347	6,822,005	9,854,659
1906	1,184	6,449,052	9,085,773
1907	1,278	9,443,327	13,221,259
1908	1,640	12,008,113	14,931,790
1909	1,442	10,348,511	12,982,800
1910	1,262	11,013,396	14,514,650

Liabilities were at their highest point in 1894, when the amount was $17,616,215, and at their lowest point in 1903, the sum then being $7,552,724. The highest amount of assets available in the aggregate failures for any one year was $13,510,056 in 1894, and the lowest, $4,872,422, in 1903. The biggest difference between assets and liabilities was in 1896, when liabilities exceeded assets by $4,512,846. Altogether this is a very creditable record in view of the great commercial expansion during the past two decades and the last one especially.

INSURANCE DEPARTMENT SHOULD NOT SANCTION DEAL.

Proposal to Reinsure Canadian Guardian Life Insurance Policies—History of the International.

The Monetary Times has not learned yet whether the shareholders and policyholders of the Canadian Guardian Life Assurance Company have taken stock in and reinsured in the International Insurance Company, of Edmonton. It will be recalled that this was the gist of the proposal made by Mr. J. M. Spence, president of the Canadian Guardian Life Assurance Company, and now managing director of the International Insurance Company. The charter of the Canadian Guardian Life was not renewed by the Dominion Department of Insurance, for very good reasons which have been detailed in these columns. A limited charter was granted in order that the company might dispose of its policies. The Monetary Times in discussing this matter asked whether the passengers of a sinking ship, captained by J. M. Spence, were likely to gain anything by transfering to another vessel, likewise captained by J. M. Spence.

The certificate of incorporation was issued to the International Insurance Company, Limited, Edmonton, on May 22nd, 1907, by the then registrar of companies, Mr. Harold W. Riley. The subscribers to the memorandum of association were as follows:—William Short, advocate, Edmonton, 10 shares; Harold W. Riley, deputy provincial secretary, and registrar of companies, Edmonton, 10 shares; Thomas Boles, insurance manager, Edmonton, 10 shares; A. Butchart, real estate dealer, Edmonton, 10 shares; A. E. May, postmaster, Edmonton, 10 shares; L. E. W. Irving, physician, Edmonton, 10 shares; Richard Secord, gentleman, Edmonton, 10 shares.

These gentlemen were subsequently elected directors of the company, and the returns of the company registered for the years 1908, 1909 and 1910, the above persons were reported as directors.

The capital of the company is $250,000, divided into five thousand shares of $50 each. A prospectus was filed with the department August 25th last, the document being signed by Wm. Short, Edmonton; Geo. B. Smith, Edmonton; J. A. Fife, Edmonton; Edward F. Evans, Toronto; E. L. Hill, Strathcona; L. L. Merrifield, Toronto; John Park, Edmonton; W. Younger, Toronto; J. M. Spence, Edmonton, as directors.

Unfortunately the Province of Alberta has no insurance act, and we are informed by the Provincial Secretary's Department at Edmonton that they are not aware that an insurance act will be framed for presentation at the next session of the Alberta Legislature, which may be called in November. The only safeguard against the consummation of what The Monetary Times thinks is an altogether undesirable transaction—the reinsurance of Canadian Guardian Life Policies in the International Insurance Company, managing director J. M. Spence—is the refusal of the Department of Insurance at Ottawa to sanction the deal.

SEPTEMBER FIRE LOSSES.

Incendiarism on the Increase—Decrease in Deaths from Fire—London Wants Lower Insurance Rate.

The Monetary Times' estimate of Canada's fire losses during September amounted to $1,123,550, compared with $920,000 for August and $894,125 for the corresponding period last year.

The following is an estimate of the September losses:

Fires exceeding $10,000	$887,000
Small fires	90,000
Fifteen per cent. for unreported fires	146,550
Total	$1,123,550

The following are the monthly totals compared with 1909 and 1910:

	1909.	1910.	1911.
January	$1,500,000	$1,275,246	$2,250,550
February	1,263,005	750,625	941,045
March	851,690	1,076,253	852,380
April	720,650	1,717,237	1,317,900
May	3,358,276	2,735,536	2,564,500
June	1,300,275	1,500,000	1,151,150
July	1,075,600	6,386,674	5,384,300
August	2,582,915	1,667,270	920,000
September	1,615,405	894,125	1,123,550
October	2,208,718	2,195,781	....
November	935,191	1,943,708	....
December	1,433,813	1,444,860	....
Total	$18,905,538	$23,593,315	$16,505,375

Incendiarism on the Increase.

There were eight fires at which the damage done amounted to $10,000 and over, the largest being at Nelson, B.C., where a smelter was destroyed, the loss being estimated at $750,000. A very noticeable feature of last month's fire losses is the increase in incendiarism, there being no fewer than eleven fires of incendiary origin reported.

The Hall Mines smelter was one of the largest plants of its kind in Canada. The fire was the work of an incendiary who started about a dozen fires within two weeks, three of which entailed considerable loss.

The plant destroyed was conservatively estimated to have cost $750,000. The incendiary showed the utmost persistency. At noon the watchman discovered the fire in the smelter and he thoroughly quenched it and arranged for extra guards. At nine o'clock, just after he had made the rounds of the building, fire broke out and within a few minutes the plant was a blazing furnace. By midnight the entire plant was practically consumed. A reward of $500 is offered for information leading to the apprehension of the culprit.

Peter Mali has been found guilty of arson at Winnipeg, Man. He was arrested early on the morning of September 11th, just after he had run from a vacant stable on Manitoba avenue as it was bursting into flames. Police officers, firemen and several civilians gave evidence against him.

What Were Destroyed and Presumed Causes.

The fires at which damage to the extent of $10,000 and over occurred, were as follows:

Nelson, B.C.	Smelter	$750,000
do.	Brewery	50,000
Montreal, Que.	Restaurant	10,000
Orangeville, Ont.	Factory	10,000
Granton, Ont.	do.	10,000
Brantford, Ont.	Skating rink, etc.	15,000
Montreal, Que.	Oil yards	15,000
East Toronto, Ont.	Hardware store	27,000
		$887,000

The following structures were destroyed and damaged:—39 barns, 18 residences, 9 factories, 9 stores, 4 sawmills, 2 planing mills, and one each of the following: Telephone exchange, engine room, restaurant, railway station, smelter, brewery, paper room, shipyard, oil vats, cheese box factory, schoolhouse, box car, farm house, dining hall, coal sheds, blacksmith shop, skating rink, evaporator, oil tanks.

The presumed causes of fires were:—11, lightning; 11, incendiarism; 7, careless with matches; 3, defective stoves; 3, lamp explosions; 2, sparks from engine; 2, rats nibbling matches; and one each of the following: Blower caught fire, overheated retort, hot pulley, live coal from passing engine, sparks from hay cutting machines.

Of the animals destroyed by fire 49 were hogs, 23 horses, 3 dogs and one calf. There were also destroyed, 2 automobiles, 2 carriages, 8,000 gallons oil, 3,400 bushels oats, 38 tons hay, 175 bushels wheat and four farmers lost their season's crops.

Decrease in Death Rate.

There was an appreciable decrease in the number of deaths from fire last month, there being reported only 13, as compared with 22 last month and 10 for the corresponding period last year.

Unfortunately the deaths from carelessness with matches do not show any signs of lessening, there being 5 deaths from this cause during September. In many cases the victims are children, which leads to the conclusion that the only remedy for reducing this death rate is for parents to keep matches out of the way of their children. In any case the safety match should be used instead of the ordinary lucifer.

The following fatalities occurred during September:—

Chilliwack, B.C.	Playing with matches	1
Chatham, Ont.	Playing with matches	1
Brantford, Ont.	Clothes caught fire	1
St. John, N.B.	Clothes caught fire	1
do.	Burning boat	2
Esquimalt, B.C.	Burning building	1
Montreal, Que.	Clothes caught fire	1
Coles Island, N.B.	Burning boat	1
Halifax, N.S.	Playing with matches	1
New Hamburg, Ont.	Playing with matches	1
Essex, Ont.	Playing with matches	1
Brockville, Ont.	Burning building	1
		13

The following are the monthly totals compared with the two previous years:—

	1909.	1910.	1911.
January	16	27	27
February	8	15	12
March	16	29	18
April	18	37	20
May	21	15	28
June	16	52	13
July	4	15	110
August	17	11	22
September	10	10	13
October	26	16	..
November	34	19	..
December	33	19	..
Total	219	256	263

The fire committee of the City Council of London, Ont., will ask fire insurance underwriters to make a reduction in the key rate for the city.

London Wants Lower Fire Insurance.

Evidence in the enquiry into the recent fire at the Canadian Oil Company's premises, 123 St. Etienne Street, bore out that an engine of the Grand Trunk Railway was responsible.

British Columbia has suffered less from forest fires this year than ever before in its history, according to a statement recently made by Mr. W. C. Gladwin, Chief Provincial Fire Warden. The comparatively light loss is attributed to the extra precautions taken this year by the department, over 125 men having been at work patrolling the different districts throughout the province, and to the fact that in nearly every instance when the outbreaks threatened to spread beyond control, heavy rainfalls occurred.

◆

CANNED GOODS FROM CANADA.

Certain lines of canned goods put up by Canadian firms are coming more into evidence on the Leeds, Eng., market. In fruits, a progressive trade is being done in canned apples in tins holding approximately one gallon. These are supplied mainly to restaurants, hotels and boarding houses, and at present three Canadian brands are on sale. Canned "Bartlett" pears of Canadian origin have also been introduced on to this market.

In fish, British Columbia canned salmon is largely sold under various labels, but the demand for canned lobster among the public is now a limited one, owing to the enhanced price ruling. Canada continues to do the largest trade with the British market in this class of goods, and last year contributed 84 per cent. of the imports.

LOWER INSURANCE RATES WANTED

On the St. Lawrence River—Major Stephens Issues a Strong Plea.

A plea for readjustment of marine insurance rates on the St. Lawrence river has been issued by Major G. W. Stephens, president of the Harbor Commissioners of Montreal. He gives many reasons as to why the rates should be materially lowered. It is pointed out that representations have been made repeatedly to the large insurance companies and marine underwriters in an effort to bring about a re-adjustment of rates on cargoes and hulls in the St. Lawrence trade, with a view to strengthening the prestige of Canada's great waterway as a common carrier for water-borne goods to and from America. The answer to these representations has always been that the rates would automatically adjust themselves as soon as the loss experience warranted.

Adjustment is being Delayed.

"This automatic adjustment is taking a long time to assert itself, and if the patient premium-payer is content to wait," writes Major Stephens, "the day of adjustment will, no doubt, long be delayed."

The high marine insurance rates for many years prevailing in the St. Lawrence have attracted the attention of the Marine Department at Ottawa, and have been the subject of many conferences and discussions among shipowners and merchants.

The present insurance rates were fixed in 1900, but since then conditions on the St. Lawrence have changed materially. Mr. Stephens thinks that the British North America Act clause in marine policies should be removed. This clause excludes all steamers except regular liners from trading with Canada, without paying an extra premium for so doing and acts as such a powerful restriction that no outside tonnage can be chartered for single voyages, as the extra insurance premium demanded is prohibitive.

No Outside Tonnage Allowed.

Previous to 1900 outside tonnage was allowed unrestricted navigation in Canadian waters between 1st April and 31st October, without extra charge. Since 1900 outside tonnage has been barred from doing business with St. Lawrence ports.

In a summary of what has been done towards improving the navigation in the St. Lawrence River from 1900 to 1910 inclusive, it is shown that there were installed 90 new lighthouses with modern high-power lights, nine new fog alarm stations, 28 pole lights, and between Montreal and Quebec 99 lighted buoys and 195 unlighted buoys were set. Below Quebec the improvements comprise, three new lightships, 80 acetylene gas buoys, a whistling buoy, 75 unlighted buoys and four submarine bell ships.

Heavy Cost of Maintenance.

These with their maintenance cost to date $7,277,000, while the dredging of the channel from 27½ to 30 feet at low water, with widening and straightening cost $14,000,000. In the harbor and terminal improvement, $15,680,000 has been expended. Wireless and other telegraphic systems and lines cost $431,000. Surveys cost $222,000, and the re-organizing of the pilotage system necessitated the expenditure of $140,000. For Marine Hospitals, $93,000 was expended; tidal surveys $87,000, and for lightships $78,000.

These improvements along with others mentioned in the statement bring the total cost of improvements to $38,155,000.

The St. Lawrence of To-Day.

The St. Lawrence of to-day, in its narrowest parts, has a channel 450 feet wide and 30 feet deep, so that ships of 15,000 tons now safely navigate day or night, where ten years ago ships of only 5,000 tons could go.

Grain merchants in Chicago, Duluth, Winnipeg, Toronto or Montreal, before making cable offers of grain, enquire through brokers in New York, Baltimore, Boston or Montreal for the lowest ocean rates to English and Continental ports. They accept the lowest rate from the port which can make the best terms, including terminal charges and marine insurance. The rates of freight and insurance are invariably higher from Canadian ports, and unless lower rates from inland points can be obtained through Montreal, the cargo is diverted through American ports, a very small fraction being sufficient to divert Canadian grain to American ports.

Through Canadian Ports.

Every Canadian is interested in maintaining Canadian exports via Canadian ports, and with the immense increase in the production of Canadian grain in the near future, it is imperative that every effort shall be made to develop the trade in British steamers from Canadian ports.

Steamship owners are able to insure their steamers for less than 1½ per cent. per annum to the East.

For as low as 2½ per cent. per annum to the United States, while it costs from 4 to 6 per cent. per annum for regular lines to Canada.

RAILROAD AND COMPANY EARNINGS.

Railroad earnings for week ended September 14:—

	1910	1911	Increase or decrease
C. P. R.	$2,195,000	$2,325,000	+ $130,000
G. T. R.	951,950	1,026,449	+ 74,499
C. N. R.	257,800	360,300	+ 102,500
T. & N. O.	24,426	40,020	+ 15,594
Halifax Electric	4,521	5,046	+ 524

Railroad earnings for week ended September 21st:—

	1910	1911	Increase or decrease
C. P. R.	$2,029,000	$2,218,000	+ $189,000
G. T. R.	949,506	1,018,506	+ 69,000
C. N. R.	282,300	373,600	+ 91,300
T. & N. O.	26,736	45,421	+ 18,684
Halifax Electric	4,480	5,090	+ 610

The Mexico Tramway Company has net earning of $266,731 in August, an increase of $12,999. Eight months net was $1,920,809, an increase of $158,067.

The Sao Paulo Tramway net for August was $189,759, an increase of $24,425. Eight months' net was $1,423,281, an increase of $219,518.

The Detroit United Railway on September 3 showed a gain for the day of $7,660. This is one of the largest gains on record.

The Rio de Janeiro net earnings for eight months were $4,361,257, an increase over last year of $951,574. For August the net gain was $87,576.

For year ended June 30, 1911, Granby Consolidated Mining, Smelting & Power Company showed a decrease in net profits of $348,421. Net profits for year 1910 were $564,946, the decline being equal to about 38 per cent.

The Montreal Street Railway bas issued its statement of earnings for August. The following are the comparisons for August:—

	1911	1910	Increase
Total earnings	$443,107	$398,828	$ 44,273
Net earnings	210,597	182,514	28,064
Total charges	73,633	65,743	7,890
Surplus	136,944	116,771	20,173

The following are the figures for 11 months, ending August 31:—

	1911	1910	Increase
Total earnings	$4,319,819	$3,889,475	$430,344
Net earnings	1,841,094	1,658,644	189,449
Surplus	1,291,487	1,166,354	125,132

The balance sheet of the Kerr Lake Mining Company at August 31 shows cash on hand amounting to $413,755, mining property $55.000 and total assets and liabilities of $588,978. The Kerr Lake Mining Company of New York reports for fiscal year ended August 31 total income amounting to $1,344,545 and a surplus over charges and dividends of $111,489. The profit and loss account showed a surplus on August 31 of $134,428. Cash on hand on the same date amounted to $5,570.

◆

The Canadian Bank of Commerce has made arrangements to open a branch at Sherbrooke, Que., in the near future.

The Manitoba Life Underwriters' Association held a meeting recently at which there were about thirty present. Ex-President McBride of the Dominion Association gave notice that at the next meeting of the association he would move to have the name of the association changed from Manitoba Life Underwriters' Association to the Winnipeg Life Underwriters' Association. Mr. F. D. Macorquodale, A.A.S., actuary of the Prudential Life Insurance Company, delivered an expert address on lapsed business, from the standpoint of the home office.

RECENT FIRES.

Monetary Times' Weekly Register of Fire Losses and Insurance.

Keene, Ont.—September 29th.—Dwelling of Mr. James Levasseur, Jr., destroyed. Loss and origin unknown.

Park Head, Ont.—September 29th.—Barn of Mr. Wesley Amey destroyed. Loss unknown. Origin, lamp explosion.

Vancouver, B.C.—September 25th.—Warehouse of Mr. Henry Darling badly damaged. Loss and origin unknown.

North Dorchester, Ont.—September 28th.—Barn and contents of Mr. W. H. Johnston destroyed. Loss and origin unknown.

Milverton, Ont.—September 29th.—Barn of Mr. George Gropp destroyed, also contents and 37 pigs. Loss estimated at $4,000. Origin unknown.

Brockville, Ont.—September 29th.—Barn of Mr. Albert Tackaberry destroyed. Mr. Tackaberry burned to death. Loss and origin unknown.

East Toronto, Ont.—September 29th.—Hardware store of Mr. A. F. Carnegie, 166 Main Street, destroyed. Loss estimated at $27,000. Origin unknown.

Montreal, Que.—September 29th.—Premises occupied by Star Shoe Company, 1466 East St. Catherine Street, badly damaged. Loss about $5,000. Origin, supposed careless with matches.

Kelowna, B.C.—October 1st.—Cameron's blacksmith shop destroyed. Loss about $7,000. Origin unknown.

Hamilton, Ont.—October 2nd.—Cranston pottery, Garth Street, badly damaged. Loss about $1,500. Origin unknown.

Strathroy, Ont.—October 1st.—Baptist Church destroyed. Loss about $8,000. Origin, supposed careless with matches.

Stratford, Ont.—October 2nd.—House and contents of Mr. John Waldie destroyed. Loss unknown. Origin, spark from chimney.

Carlton Place, Ont.—October 2nd.—Frame dwelling of Mr. Wesley Spare on William Street destroyed. Loss about $800. Origin unknown.

Belleville, Ont.—October 1st.—House occupied by Mr. Wm. Donohue, Grove Street, badly damaged. Loss about $600. Origin, defective stove.

Toronto, Ont.—October 3rd.—Premises of Elegante Costume Company badly damaged. Loss about $12,000. Origin, careless with matches.

Guelph, Ont.—October 2nd.—Shoe repairing store of Mr. A. Hoffman, 65 Quebec Street West, badly damaged. Loss about $600. Origin, lamp explosion.

Brantford, Ont.—October 1st.—Planing mill of Avey O'Laughlin Lumber Company, Grey Street, destroyed. Loss about $2,000. Origin, supposed incendiarism.

Quebec, P.Q.—October 3rd.—No. 5 fire station destroyed. One man burned to death and four injured. Loss and origin unknown. October 2nd.—Business section of St. Roch destroyed. Loss about $60,000. Origin unknown.

Montreal, Que.—October 3rd.—Several houses on Esplanade Avenue badly damaged. Loss about $7,000. Origin unknown. October 2nd.—Residence of Mr. T. H. Skelcher, 5 Gladstone Avenue, Westmount, badly damaged. Loss unknown. Origin, live coal from open grate.

◆

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

Prince Rupert, B.C.—The loss sustained by Mr. C. R. Anderson was $1,000 on stock and $900 on buildings. Insured with Glasgow Assurance Corporation, Limited, for $2,000, and National General Insurance Company, $1,200.

Montreal, Que.—La Societe de Pompes Funebres sustained loss of $10,000 on stock and $3,500 on buildings. Insured in following companies: London, Liverpool, $5,500; Guardian, $2,500; North British and Mercantile, $500; total, $8,500.

◆

The Canadian Accountants' Association opened its session of 1911-1912 recently at Montreal, Que. Mr. H. R. Mallison, president, occupied the chair and outlined the work the executive hopes to accomplish during the winter. Mr. F. C. Lariviere, president of Lariviere Incorporee, read an able and interesting paper on the methods of accounting adopted by his company. Accountants and office men generally will no doubt reap benefit from the discussion provided by the Association.

FOR THE CANADIAN MANUFACTURER.

The following articles in this issue of The Monetary Times will be of interest to Canadian manufacturers.

Markets of the West Indies. Page 1518.

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY.

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required and name of secretary-treasurer:—

Saskatchewan.

Albion, No. 84, $800. J. M. Roberts, Rex.
Sedley, No. 1035, $1,500. H. J. Martin, Sedley.
Troitzke, No. 2404, $1,200. J. Megas, Rosthern.
Briarcliffe, No. 302, $2,000. E. D. Wall, Regina.
Brock, No. 2700, $9,000. W. J. Gordan, Brock.
Hewson, No. 2743, $1,500. J. Fraser, Gorkendon.
Bench, No. 2807, $1,800. M. Kroetch, Gull Lake.
Royton, No. 75, $1,500. A. A. Tomkins, Viscount.
Fernbank, No. 1282, $1,500. F. R. Bolin, Neidpath.
Two Creeks, No. 2718, $1,200. H. G. Thies, Togo.
Spring, No. 2820, $1,300. W. Gamman, Swift Current.
Linden Valley, No. 102, $1,500. A. W. Rear, Kamsack.
Wilhelmina, No. 168, $1,500. J. Sparrow, Box 41, Webb.
Kindersley, No. 2628, $30,000. G. Jackson, Kindersley.
Melrose, No. 2635, $1,000. J. A. Hollingsworth, Sturgis.
Mountain Ash, No. 2741, $1,800. J. S. Devitt, Strongfield.
Bainesville, No. 2124, $1,350. W. J. Hopkins, Patience Lake.
Pinto Valley, No. 2573, $1,800. S. P. Rondeau, McCarter.

Alberta.

Taber, No. 933, $4,000. H. P. Munro, Taber.
MacRae, No. 2432, $1,200. G. E. Scott, Ray.
Jarrow, No. 2450, $1,600. J. W. Wyatt, Jarrow.
Lenox, No. 2368, $1,500. T. A. Walker, Carbon.
Redcliff, No. 2283, $6,000. W. A. Dodge, Redcliff.
Verburg, No. 2439, $1,500. W. Blackman, Coutts.
Harwood, No. 2248, $2,000. R. Thomson, Namaka.
Zora, No. 2487, $1,400. K. A. Maughan, Maughan.
Pleasant Prairie, No. 401, $1,500. J. Klatt, Wetaskiwin.
West Side, No. 2401, $1,100. N. E. Eby, Alsask, Sask.
Hyssop, No. 2447, $4.000. W. A. Hamilton, Lethbridge.
Fettig, No. 2455, $1,800. J. R. Swelander, Grassy Lake.
Bassano, No. 2131, $5,000. H. Buckingham, Bassano.
Antonio, No. 2460, $2,200. C. M. Scadden, Purple Springs.
Lake Thelma, No. 2427, $1,500. H. Thompson, Lake Thelma.
Diamond City, No. 1861, $6,000. R. Loughton, Diamond City.

◆

Application has been made to transfer a seat of Capt. Reginald Pellatt to Mr. E. D. Warren. This is one of the two seats taken by Sir Henry Pellatt in part payment when he sold the Bay Street site to the Stock Exchange for its new building. The Stock Exchange has only two unissued seats in its treasury, and both were turned over in the real estate deal.

CANADIAN PACIFIC RAILWAY ANNUAL MEETING.

Monetary Times Office,
Montreal, October 4th.

The thirtieth annual general meeting of the Canadian Pacific Railway was held at the head office, Montreal, this week. It was announced that the Western shops would be located at Calgary, providing satisfactory arrangements could be made. This item will cause great rejoicing in Calgary where there has been much anxiety as to the decision. The sum of £800,000 sterling of debenture stock will be set aside to provide a fund for the erection of this vessel and other steamship repairs necessary.

Sir Thomas Shaughnessy made reference to the prevalence of land speculation in certain sections but allowed that there was room for an error in this matter, as the incoming population and rapidly increasing business might justify present prices. He regretted that the condition of the crop in the west had showed some deterioration but added that the crop was large and the financial returns would be likewise. He made the forecast that ere long there would have to be further double tracking in the west and that it was the opinion of the management that the double tracking, which had been done from Winnipeg westward, should be continued.

The outcome of the first season's work on the irrigation of the Eastern block was gratifying, the dam at Horse Shoe Bend on the Bow River being almost finished. The work would be finished in a couple of years and some of the land could be served with water before that time.

A note of criticism of the government was contained in a reference to the Dominion and Provincial Governments having pledged their credit almost beyond prudence to assist railways which, instead of building lines into new territory, went into sections where transportation facilities were already ample. The retiring directors were re-elected.

◆

COBALT ORE SHIPMENTS.

The following are the shipments of Cobalt ore, in pounds, for the week ended September 29th:—La Rose, 279,380; Cobalt Lake, 183,450; McKinley-Darragh, 120,600; Drummond, 120,000; Cobalt Townsite, 65,100; Hudson Bay, 63,000; Chambers-Ferland, 63,900; Right of Way, 61,500; Coniagas, 58,500; Nipissing, 63,980; Kerr Lake, 60,930. Beaver, 60,785; total, 1,253,125 pounds, or 626.5 tons. The total shipments since January 1st are now 38,561,578 pounds or 19,780 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144 tons, valued at $1,437,196; in 1906, 5,129 tons, valued at $3,900,000; in 1907, 14,040 tons; in 1908, 25,700 tons; in 1909, 29,751 tons; in 1910, 34,041 tons.

◆

The People's Loan and Savings Corporation, of London, Ont., are arranging for the appointment of debenture agents in Great Britain. From that source the company expect soon to obtain a steady supply of funds for investment on first mortgages on real estate. If the supply is ample, the company will commence to transact business in the Western provinces.

Mr. George King, F.I.A., F.F.A., of London, England, is at present on a visit to Winnipeg, Man. Mr. King is one of the most prominent figures in the life insurance world. He was formerly connected with the Atlas Assurance company, being actuary from 1885 to 1896, and subsequently actuary of the London Assurance society from 1896 to 1901. He has written many important articles on life insurance topics, and is the author of the textbook on actuarial science, recognized as the standard work. Amongst his recent publications is a brochure on "Policies with Deferred Participation in Profits, and Policies with Contingent Bonuses," an authoritative statement concerning a subject upon which little has heretofore been written. He is now completing an extensive tour round the world, visiting this country on his way from Australia, where he has completed an investigation for the Australian Mutual Provident society —the largest life insurance company operating under the British flag. Mr. King is also consulting actuary to the New Zealand government department of insurance. In addition to his long connection with the British Institute of Actuaries, Mr. King has since 1892 been a member of the Actuarial Society of America, and will attend the meetings of the society, to be held next month in Hartford, Conn.

CANADA'S TRADE.

During August Canada's trade increased by no less than $18,303,133, or nearly thirty per cent., as compared with August of last year. The total trade for the month was $81,490,654, of which $47,405,591 was in imports, a gain of nine millions. In exports the principal gain was in agricultural products, which totalled $7,238,394, an increase of nearly five millions over the preceding August.

For the first five months of the fiscal year trade has totalled $330,522,426, an increase of $34,705,645, of which $22,629,971 was in imports entered for consumption.

Coin and bullion were imported during the five months to the value of $10,694,959, as compared with $2,859,965 for the corresponding five months of last year.

Customs revenue for the month just closed indicates that the rapid growth of imports is being maintained. The total Customs receipts for the month were $7,710,181, an increase of $1,252,241 over September of last year. For the first half of the fiscal year Customs revenue has totalled $41,306,326, an increase of $5,746,784, or nearly one million dollars per month.

Details of Canada's trade will be found tabulated on another page in this issue.

◆

CLEARING HOUSE RETURNS.

The following are the figures for the Canadian Clearing Houses for the weeks ended October 6th, 1910; September 21st, and October 5th, 1911, with percentage change:—

	Oct. 6, '10.	Sept. 21, '11.	Oct. 5, '11.	Chg. %
Montreal ..	$46,999,087	$42,632,253	$48,818,954	+ 3.8

FINANCIAL AGENT FOR MONTREAL.

Thee total indebtedness of the city of Montreal for the current year is estimated by City Treasurer Robb at $58,000,000, an increase of more than $10,000,000 over the previous year. At least half of the increase is due to the obligations assumed with eight municipalities, which became part of Montreal last year. In the meantime the municipality desires to sell $7,000,000 worth of its securities. The city treasurer in his annual report states that the definite appointment of a bank in London as the city's financial agent and the issue of the civic sterling debentures through that agency alone would strengthen the municipal financial position. This, we believe, is the opinion of many financiers, although it may not have the approval of all the municipal bond houses. In connection with the failure of Montreal the other week to sell its bonds a banking authority in London was quoted as saying: "A state of congestion continues in the Canadian municipal and provincial government market, which is one and the same. This congestion is accentuated by the political and the financial situation, and the failure of London to tender for the Montreal loan is partially the outcome of the general disapproval in the London market of the method of offering securities by public auction to the highest bidder. This practice is adopted by practically no other important borrowers the world over."

THE ENGLISH INVESTOR.

Some remarks of Mr. Waller, an English engineer, who proposes to become interested with others in several Canadian tramway and radial schemes, are of interest to Canadian financiers. To The Monetary Times he admitted that there were certain difficulties to be overcome, mainly owing to the fact that the Canadian and English methods of finance are so different, and the consequent difficulty of reconciling the two. In Canada there is a great tendency, not unjustified by the rapid development of the country, to undertake enterprises a trifle in advance of sufficient visible business existing. The English investor is naturally not prepared to speculate in future developments in regard to which he has not the same facilities of forming an opinion as a Canadian resident, and it must also be remembered that, to a large extent, the Canadian investor takes ordinary stock, and has probably outside interests in the development of his district, while the English investor is asked to take bonds. Mr. Waller's view is that it should be possible to strike a happy mean between these conditions, and that an immediate reasonable return should be available to the bondholders before any attempt is made to introduce such business in England. It also appears to him that it is hardly reasonable to expect English capital to come in on a merely moderately secured bond issue without giving the subscribers some share in the future prosperity which it is hoped will arise from the utilization of capital so introduced.

Mr. Waller has endeavored to put on one side any proposals brought to him which do not offer immediate security to the bondholders, and his greatest fear is that questionable Canadian undertakings may possibly be successfully floated in England. The financial failure of such undertakings would necessarily result in closing the market to really genuine, well-considered propositions. One thing in regard to Canadian finance with which Mr. Waller expressed great satisfaction was the fact that the chartered banks were able to place a check upon speculation in real estate, and that consequently there appears to be no fear of a financial crisis arising from the failure of banks due to inflated values being placed on real estate, as occurred with disastrous results in Australia some sixteen years ago.

POLSON IRON WORKS BOND ISSUE.

Half a Million Dollars Will Be Floated to Finance Drydock—Bond and Security Notes.

A bond issue of $500,000 or $600,000 will be made shortly by the Polson Iron Works, Toronto. This new financing is in connection with the drydock to be erected by the company. The Dominion Government have granted a cash bonus to the company of 3 per cent. on $900,000. This should take care of the interest on the bond issue. The dock will be of the third classification, and will be big enough to accommodate the largest vessels on Lake Ontario.

The drydock will be built in three sections, which, when coupled together, will be 600 feet long by 100 feet wide. Two of the sections will be completed by the beginning of next year, and the company will be able to dock vessels next spring. The lifting capacity of the two sections will be 4,500 tons, and when the third section is built the capacity will be 9,000 tons. Dredging, piling and concreting will be done to furnish a basin of sufficient depth of water to operate the docks. The dock being built in three sections, each section can be used as a separate dock, and when larger boats are to be accommodated either two or all three sections can be joined together.

Decline in Securities.

A further decline of £52,771,000, or 1.5 per cent. (following a decrease of £73,163,000, or 2 per cent. in August), is shown for September by the usual monthly compilation of the London Bankers' Magazine of the aggregate value of 387 securities dealt in on the London Stock Exchange. British and Indian funds decreased £13,008,000, or 1.8 per cent. Foreign Government stocks are £4,872,000, or 6 per cent. lower. British railroads declined £9,059,000, or 3.1 per cent.; Americans are £9,110,000, or 2.4 per cent. lower; and South Africans declined £893,000, or 1.2 per cent. The comparisons follow:—

Aggregate value of 387 representative securities on September 21st, 1911	£3,558,797,000
Aggregate value of 387 representative securities on August 21st, 1911	3,611,568,000
Decrease	£52,771,000

Money at Home.

The mayor of Durban, in an official minute, refers to the success of the municipality in raising a loan of $500,000 in August last, and another of a similar amount in March last, and adds: "On each occasion the loans were oversubscribed many days prior to the closing of the lists, and consequently many intending investors were disappointed. I am convinced of the wisdom of obtaining our money in South Africa as occasion arises. Not only do we retain the interest on the money borrowed in our own country, to the benefit of South Africa as a whole, but we afford home investors tangible proof of our financial stability, for unless our credit were unassailable, we could not float loans so successfully amongst our own people, who are so intimately acquainted with our true position."

Real Estate Bonds.

The Canadian Real Estate Bond Corporation with fully paid capital of $100,000 has issued the following financial statement dated July 31st, 1911:—

Assets.—Real Estate investments, series "A," $55,765.76; investments, series "B," $29,484.30; investments, series "C," $1,600; land contracts, $25,977.43; cash on hand, $1,575.61; accounts receivable, $10,590.56; furniture, $829; total, $125,822.66.

Liabilities.—Trust funds, $6,550.19; accounts payable, $3,180.43; total, $9,730.62; surplus for security to the bondholders, $116,092.04.

This company sells bonds secured by first mortgages upon improved rent-bearing real estate, or upon the ownership of real estate itself, which constitute in reality a mortgage investment. The owner of the bond has the guarantee of the corporation that its proceeds are invested in bona fide approved first mortgages or in the purchase of high class revenue-bearing real estate. The company's head office is at Winnipeg.

SEPTEMBER MUNICIPAL BOND SALES.

Five Provinces in the Market—Majority of Sales Were Small.

The municipal bond sales for September as compiled by The Monetary Times amounted to $1,748,778 compared with $1,493,507 for August and $2,841,486 for the corresponding period last year.

Five provinces were on the market and the majority of the sales were small, the largest being Ottawa which sold $589,000 5 per cent.

The summary of the September sales is as follows:—

Manitoba	45,000
Ontario	835,478
Quebec	294,500
Alberta	$201,400
Saskatchewan	372,400
	$1,748,778

The following are the monthly totals as compared with 1909 and 1910:—

	1909.	1910.	1911.
January	$2,540,862	$ 881,838	$ 420,337
February	4,074,125	1,272,977	1,037,287
March	1,615,368	1,169,730	6,271,925
April	4,033,988	6,805,078	3,910,288
May	5,185,530	5,964,896	3,946,047
June	2,243,569	2,187,588	3,983,670
July	1,989,442	1,536,424	1,594,566
August	3,011,242	1,312,953	1,493,507

BOND TENDERS INVITED.

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials.

Oak Bay, B.C.—The ratepayers will vote on a by-law to raise $20,000 for school purposes.

Luseland, Sask.—Until October 15 for $8,000 15-year debentures. Mr. J. H. Wilson, secretary-treasurer.

Ridgetown, Ont.—Until October 20th for $35,000 30-year 4¾ per cent. debentures. Mr. D. Cochrane, clerk.

Maisonneuve, Que.—The ratepayers will vote on a by-law to borrow $30,000 for purchase of land for public baths.

Deloraine, Man.—Until October 26th for $6,000 20-year local improvement debentures. Mr. D. L. Livingston, secretary-treasurer.

Richmond Municipality.—Until 14th October tenders are invited for $75,000 4½ per cent. 50-year debentures. Mr. C. L. Blight, C.M.C.

Calgary R.C. S.D., No. 1, Alta.—Until October 23rd for $60,000 30-year 4½ per cent. debentures. Mr. J. McCaffary, secretary-treasurer.

Rapid City, Man.—Until October 9th for $2,650 5 per cent. 7-year local improvement debentures. C. G. Murray, secretary-treasurer, P.O. Box 146.

Fergus, Ont.—Until October 23rd for $25,000 5 per cent. 15-year debentures. Mr. J. Beattie, clerk. (Official advertisement appears on another page).

Vancouver, B.C.—It is proposed to spend $1,000,000 in the purchase of new parks. A by-law will probably be submitted to the ratepayers in January next.

Melville, Sask.—Until November 15th for $19,000 5 per cent. 30-year debentures. J. Crow, secretary-treasurer. (Official advertisement appears on another page).

Regina, Sask.—Until October 16th for $1,032,800 4½ per cent. 20 and 40-year debentures. Mr. A. J. McPherson, city commissioner. (Official advertisement appears on another page.)

Hardisty, Alta.—Until October 31st for $3,000 6 per cent. 7-year sidewalk and street debentures. Mr. A. Mursell, secretary-treasurer. (Official advertisement appears on another page.)

Bathurst, N.B.—Until October 30th for $5,000 5 per cent. 25-year, and $5,500 5 per cent. 40-year school debentures. B. C. Mullins, secretary-treasurer. (Official advertisement appears on another page).

Outremont, Que.—The term for opening tenders for the purchase of the $250,000 4½ per cent. town bonds, advertised to take place on October 2nd, has been extended to October 11th. J. Kruse, secretary-treasurer.

Rural Municipality of Assiniboia, Man.—On October 21st the ratepayers will vote on a by-law to raise $300,000 5 per cent. in 20 equal annual instalments; also $12,000 5 per cent. in 10 equal instalments. Mr. Frank Ness, Kirkfield Park P.O., Man., clerk.

Guelph, Ont.—The ratepayers may vote on a by-law to loan the Dominion Casket Company $25,000 on a first mortgage on the entire plant and grant a fixed assessment of $5,000 per annum for 10 years, the loan to bear interest at 4½ per cent. per annum, payable half-yearly, and the principal thereof to be repaid in twenty equal annual instalments.

◆

The Monetary Times estimates the Western wheat crop at 165,500,000 bushels.

The town of Galt, Ont., has decided not to accept any of the tenders submitted for the purchase of $10,000 waterworks debentures, the prices quoted being deemed unsatisfactory. Further tenders will probably be called for within the next two months.

TORONTO - - Ont.

Immigrant settlers to the number of 212,854 arrived in Canada during the first five months of the current fiscal year, April 1st to September 1st. Of these 141,021 arrived at ocean ports and 71,833 were from the United States. These figures show an increase of 18 per cent. as compared with the figures for the corresponding months of the last fiscal year, which were 115,159 at ocean ports and 65,189 from the United States, making a total for the five months, April 1st to September 1st, 1910, of 180,348 persons. During the month of August this year there were 30,115 arrivals, 13,096 of them being at ocean ports, and 17,019 from the United States, as against 24,777 for August last year, 14,287 of whom were at ocean ports, and 10,490 from the United States.

Growers of Wheat and Makers of Manufactures

NOW that the country is resuming the normal course after election strife, there is time for reflection upon the common interests of the agricultural producers and the captains of industry. When there is a good crop in Western Canada, the financial results accruing to the wheatgrower spread throughout the country in the natural course of business and are reflected in general prosperity. A wheat crop of 175,000,000 bushels at, say, $1 a bushel, circulates $175,000,000. The farmers therewith provide for themselves and the balance goes into trade, the manufacturer naturally getting a considerable share. It is in the common interest. When the crop is poor, the needs of the agriculturalist are curtailed to some extent. The circulation of money is slow and spasmodic. Not infrequently the industrial captain has to carry the farmers' debts longer than he cares, but it is in the common interest.

To build a big nation there must be internal harmony. Provincial governments fencing with the Dominion authorities, the West taunting the East, the East making wroth the West, are not factors conducing to nation building of value. The manufacturer must realize that there is something more for consideration than the growth of his own industry, that tariffs must be stretched or slackened for the nation's and not the individual's benefit. The Western farmer must realize that there is something more for consideration than his own prosperity, that he must regard the tariff as an intermediary between the captain of industry and the agriculturist, not as his own toy. The selfish view should be eliminated when considering the nation's good.

sociation.

Two Opinions but Common Prosperity

A DEPUTATION of manufacturers, representing interests from coast to coast, presented a petition to the Dominion Government early this year against the proposed tariff agreement with the United States. The manufacturers represented approximately $1,200,000,000 of invested capital, $1,000,000,000 of annual output, furnishing direct employment to 435,000 artisans and workpeople, and distributing annually $250,000,000 in wages. The manufacturers were convinced that any reduction in tariff would prove injurious to the industries directly affected, and indirectly detrimental to the interests of Canada and consequently to the Empire as a whole.

A deputation of Western farmers waited upon the Dominion Government early this year with a long list of needs. Many of these will be granted by the Government. Sir Wilfrid Laurier, speaking to the delegates, said: "One of the members of the delegation, in the memorial he read, said that the agricultural wealth in the Western Provinces represented by the delegation was at least three hundred million dollars. If we reflect that the men have been in the West on an average of not more than twenty years and have accumulated wealth to the extent of $300,000,000, that does not argue a very bad condition of things. It was also said that the delegates represented a total wealth invested by all the farmers of Western Canada of $1,500,000,000." They wanted free trade.

ESTERN CANADA.

"The farmer's trade
is one of worth; He's
partner with the sky
and earth; He's partner with the sun and
rain, And no man
loses for his gain. So
men may rise and
men may fall, But the
farmer has to feed
them all."

◆

The annual statement of the Lake of the Woods Milling Company, presented at Montreal this week, showed a slight decrease over the figures for 1910. The profits for 1910 amounted to $475,226, while for the present year they reached $412,153. The amount at credit of surplus account on August 31st, 1910, was $1,074,357, while for the year just closed it was $857,457. During the year the company added to their plant, expending the sum of $31,690 on improvements and wrote off as depreciation in value the sum of $143,150. The old board of directors was re-elected and at a subsequent meeting Col. S. F. Meighen was re-elected president and W. W. Hutchison vice-president and general manager.

MUNICIPAL ASSESSMENT NOTES.

Kingston, Ont., has a population of 18,837 persons; and property is valued at $9,836,162.

The population of Woodstock, Ont., is now 10,090, and the assessment of property has been increased by $50,000.

The census of Sherbrooke, Que., for 1911, as taken by the city valuators, shows a population of 16,700 as compared with 16,018 for 1910.

The value of the property, when the properties newly exempt from taxation have been considered, has been increased approximately $300,000.

The population of St. Catharines, according to the assessor's returns, is 13,413, an increase of 741. The assessment has been increased by $902,644 and now totals $7,781,905.

Official figures for Brantford's population show an increase of 2,102 over last year, the population being 24,084. The assessment is given at $15,551,000, an increase of $865,000 over the preceding year.

A statement submitted by Assessment Commissioner Harris, Winnipeg, shows in tabulated form, the totals of the various levies for the current year, which amount in all to $3,428,507.06.

This amount includes $5,219.19, which is the total of charges for special surveys made by the provincial government and for which according to cap. 62, 10 Ed. vii. collection has been made by the city.

The ordinary rate is 13.25 mills, made up as follows: Municipal, 9.064 mills; public library, .191 mills; public schools, 3.448; municipal commissioner, .047; public parks, .500. The total business tax for 1911 is estimated at $269,165.00, and a large portion of it has already been paid in.

Toronto's population will be over 700,000 in ten years if the proportionate increase of the past five years is maintained, according to the figures of a city official, who states that the increase in the past five years has been 47.67 per cent., and the population is now placed by the Assessment Department at 374,667.

The assessment returns for 1912 and the population figures for Hamilton, Ont., were given, and show increases. The population has increased from 73,538 to 82,095, a gain of 8,557 over last year, while the assessment increase is $5,105,895, the total assessment being $52,818,854. The population increase is the largest in the city's history, and, with the exception of last year, the assessment increase is the largest that has been made.

◆

Bermuda has a funded indebtedness of £55,000. Against this there is a sinking fund of £18,150, with accumulated interest, which it is estimated would increase the fund to £23,000. At the close of the last financial year there were in the treasury in fluid assets £53,255, made up of cash £47,104, and advances to banks, £6,153. The total assets, therefore, on hand at the end of the year, including the sinking fund, would be approximately £75,000. This would leave a balance in favor of the colony, deducting the public debt, of about £20,000; an exceptionally good showing.

WANTED

THE SHAWINIGAN WATER AND POWER COMPANY.

Dividend Notice.

Notice is hereby given that a dividend of one and one-quarter per cent. (1¼%) has been declared upon the Common Stock of the Shawinigan Water & Power Company, for the quarter ending September 30th, 1911, payable on October 20th, 1911, to shareholders of record at the close of business on October 7th.

By order of the Board,
W. S. HART,
Montreal, September 11th, 1911. Secretary.

TORONTO INSURANCE INSTITUTE'S PROGRAMME.

The following is the programme of the coming session of the Insurance Institute of Toronto. All regular meetings will be held in the palm room of McConkey's restaurant at 5.30 p.m.

October 16th.—President's inaugural address, Mr. Alfred Wright; address, the honorable Mr. Justice Riddell.

November 16th.—Approved central station signal systems, as a factor in fire prevention, by Mr. S. V. L. Willmot; New National Insurance Bill of England, by Mr. R. H. Stephenson.

December 14th.—Forest Fire Waste, by Mr. P. E. Robertson; Some points on life insurance from an actuary's standpoint, by Mr. A. F. Hall.

January 25th, 1912.—Motor insurance, by Mr. Earl F. Hussey; the hazards of paint, color and varnish factories, by Mr. F. E. Roberts.

February 22nd.—The re-instatement of Life policies, by Mr. W. A. Hynes; the adjustment of liability claims, by Mr. W. Valentine Blissett.

March 28th.—Investments, by Mr. T. Bradshaw, F.I.A.; talk on electoral hazards, by Mr. H. F. Strickland.

May 12th.— Annual meeting; results of annual examinations; election of officers.

◆

At the annual meeting of the stockholders of the Lake Superior Corporation held at its head office, Camden, New Jersey, the report of the directors was unanimously adopted, and the old board re-elected, with the exception of Mr. L. N. Lovell, who resigned previous to the meeting, his place being filled by Capt. D. C. Newton of Montreal, Que. At a meeting of the new board, following the shareholders' meeting, the old officers were re-elected as follows:—President, T. J. Drummond, Montreal, Que.; vice-presidents, J. Tatnall Lea, Philadelphia, Pa.; W. K. Whigham, London, Eng.; J. Frater Taylor, Sault Ste. Marie, Ont; secretary, T. Gibson, Traders Bank building, Toronto, Can.; treasurer, A. H. Chitty, Sault Ste. Marie, Ont.

A High Yield Bond with Ample Security

The cost of living has been increasing so rapidly that the average investor has been forced to try to secure a larger yield on his money and at the same time have a sound investment.

The 6% First Mortgage Sinking Fund Gold Bonds of the
Canadian Cereal and Milling Co., Ltd.
represent such a class of investment, because the bonds form the first and only lien on all the real estate, buildings, equipment and water powers of the company.

We are offering a limited amount of them subject to prior sale at par and interest to yield the full 6% on the investment.

Full particulars regarding the company mailed on request.

Application will be made under the Loan Corporations Act for the incorporation of the General Investment and Loan Company of Canada. The head office of the company is to be at Toronto, and the permanent capital stock for which authorization is asked is $1,000,000 in shares of $100 each. Messrs. Bicknell, Bain, Strathy & MacKelcan, Toronto, are solicitors for the applicants.

The annual convention of the National Association of Life Underwriters of the United States, in which the Canadian Life Underwriters' Association is represented, will be held at Chicago on Tuesday, Wednesday and Thursday next week. The programme is a long and interesting one. Greetings from the Dominion Association will be conveyed by Mr. A. Homer Vipond, its president.

The Great Northern Railway Company has let a contract to Messrs. Chase & Co. of Vancouver, for the building of two wharves 700 feet in length. It is understood that Messrs. Balfour, Guthrie & Co. will lease one of the wharves for the use of the Harrison line, which operates between Europe, Vancouver and Puget Sound.

Canada Machinery Corporation, Ltd.

Annual Report for Year Ended June 30, 1911

Galt, September 6th, 1911.

The Shareholders,
Canada Machinery Corporation, Limited,
Galt, Ontario.

Gentlemen:—

On behalf of your board of directors, I submit you herewith the company's balance sheet as at June 30th, 1911, duly approved by the company's auditor, from which you will notice that the company is in a satisfactory condition.

Your board have every reason to feel pleased with the operations for the year. A considerable delay was occasioned in starting the organization of the company, owing to the inability of your board to secure the services of a capable general manager. They were able, however, to secure the services of Mr. T. F. Kenny, who took charge on September 1st.

The profits for the period have been satisfactory, and have enabled your board to pay the interest on the first mortgage bonds, and, at the same time, provide for a dividend on the preferred stock for the period. For the first five months, the company just earned the bond interest and preferred dividend, but the latter period shows a surplus over and above the bond interest and preferred dividend, at the rate of approximately 5 per cent. on the common stock, which your directors have considered advisable to utilize for the purpose of providing for any possible depreciation in partly finished machinery on hand.

Business during the past year has been good, and indications point to considerable increase for the ensuing year.

During the year, by-laws Nos. 7 to 12 inclusive have been enacted by your directors. These by-laws are now submitted for your approval.

In conclusion, your directors desire to voice their appreciation of the efforts of the general manager and the staff.

GEORGE D. FORBES,
President.

Elevator Liability and Industrial Insurance

OUR MOTTO: Prompt and Just Treatment of Claims.

PROPOSED ELECTRIC TRAMWAY.

A bill was introduced last year to give a company composed chiefly of Canadian capitalists certain rights and concessions in Bermuda to lay and operate an electric tram railway. The proposed road was to extend 30 miles, and was to be efficient for handling light freight, together with its passenger service.

The bill met some opposition locally and was defeated, the causes assigned being that the concessions were too extensive and that a local company had in view a similar project on a smaller scale. It is stated on very good authority that a road of more limited and cheaper construction will be laid in the island either by the government or by local capital. There are two banks in Hamilton, the Bank of Bermuda and the bank of N. T. Butterfield & Son.

The census of 1901 gives the population as 17,535, of which the whites number 6,383 and the colored 11,152. The estimate of population on December 31, 1909, amounted to 21,784, made up of 9,127 whites and 12,657 colored. The area of the island is about 20 square miles.

◆

Mr. Alexander Laird, the general manager of the Canadian Bank of Commerce, who has been in Winnipeg, says that the financial condition of the country at present is excellent.

Mr. John Ferguson, of the National Bank of Scotland, Mr. Alfred Gilbert, of the London agency, and Mr. J. J. Shallcross, Imperial Trade correspondent at Victoria, B.C., were visitors to The Monetary Times head office this week.

MONEY TO LOAN ON IMPROVED CITY AND TOWN PROPERTY

4% allowed on deposits of $1 and upwards

5% allowed on debentures of $100 or over, issued for terms of from 3 to ten years

CAPITAL STOCK 7% INVESTMENT

The Company, having disposed of its Capital Stock some years ago, has therefore, none for sale, but the stock may be purchased through the Toronto, Winnipeg and Vancouver Stock Exchanges, at prices ranging from $122 to $125 per share.

The last seven half-yearly dividends have been at the rate of **9 per cent. per annum**, so that, at the current prices, the **Investment** will **net 7 per cent.**

The Company will be pleased to furnish prospective purchasers with its Financial Statement or other information bearing on the Company, and, if so desired, the Company will purchase the Stock for the investor through the Stock Exchange, or privately, at the current prices.

Since its inception the Company has enjoyed uninterrupted prosperity, and has taken a very active part in the development of the West. With the rapid growth of Western Canada, the demand for money is so great that the present profitable rates of interest will be maintained for years to come; and with such a desirable field for loaning operations, combined with a progressive management, the price of the Company's Stock should continue to advance, and with the prevailing high dividends, the Stock of this Company will undoubtedly be in great demand by those who desire a safe and profitable investment.

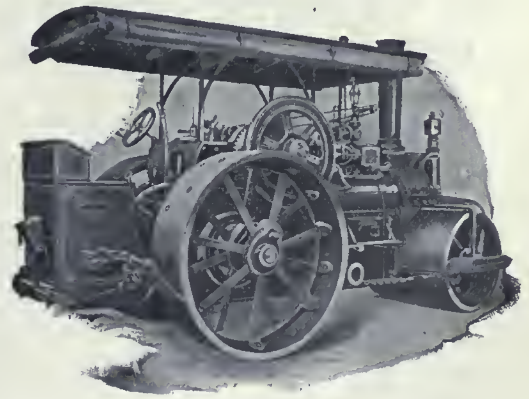
The Waterous
Double Cylinder
Steam Roller



Why we have sold more than thirty of these machines since January 1st.

The Waterous Roller is a road builder in every sense of the word. It can be used in every operation from driving the rock crusher, hauling road material, picking and plowing the old road, to the light, fast, finishing roll.

The twin-cylinder engine, with cranks set on the quarter, runs like a watch. No dead centres, no hanging up in a soft spot, no bucking on the reverse.

It is backed by a steady-steaming boiler, locomotive type, that produces more than enough steam for every working test. Throw off the governor and set it at a hill, and watch it take a 30% grade like an automobile.

Two speeds are supplied, which means fast and slow work under full steam pressure.

Outfit includes:—Rear draw bar, front clevis, driving pulley for rock crusher, full set of road picks, cylinder oil pump, and engine and boiler fittings second to nune.

Ask the man on the machine.

LEGAL NOTICES

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 12th day of September, 1911, incorporating James Steller Lovell, accountant; Robert Gowans, William George Flood and Robert Musgrave Coates, solicitors' clerks; Samuel Goodman Crowell, George Hamilton Cassels, John Francis Lash and Robert Cecil Hamilton Cassels, barristers-at-law, and Samuel Maximilian Mehr, student-at-law, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To purchase, lease or acquire lands and interests therein and water powers and water privileges and to develop therefrom any power, electrical or any energy and to use the same in connection with their business and to transmit the same, and sell. lease or dispose of lands or interests therein or power and to enter into working arrangements with other companies, persons, firms or corporations for the use thereof and to establish, operate and maintain any electric, gas or other lighting. heating or other plant and to sell and dispose of electric, gas or power light, heat and power; provided always that the rights and privileges hereby conferred upon the company to generate, sell and dispose of electrical energy for light, heat and power when exercised outside of the property of the company shall be subject to all provincial and municipal laws and regulations in that behalf; (b) To sink wells and shafts, and to make, build, construct, erect, lay down and maintain reservoirs, water works, cisterns, dams, culverts, main and other pipes and appliances and to execute and do all other works and things necessary or convenient for obtaining, storing, selling, delivering, measuring and distributing water for the purpose of irrigation and for the creation, maintenance or development of hydraulic, electrical or other mechanical power or for any other purpose of the company; (c) To construct, maintain, alter, make, work and operate on the property of the company, and for the purposes of the company, or on property controlled by the company, reservoirs, dams, flumes, race and other ways, water powers, aqueducts, wells, roads, piers, wharves, buildings, shops, stamping mills, and other works and machinery, plant and electrical and other appliances of every description; (d) To acquire by purchase or otherwise and hold lands, timber limits or licenses, water lots, water falls, water privileges or concessions, and powers and rights and interests therein, and to build upon, develop, irrigate, cultivate, farm, settle and otherwise improve and utilize the same, and to lease, sell or otherwise deal with or dispose of the same, and generally to carry on the business of a land and land improvement and irrigation company; (e) To aid and assist by way of bonus, advances of money or otherwise, with or without security, settlers and intending settlers, upon any lands belonging to or sold by the company, and generally to promote the settlement of said lands; (f) To establish stores for the sale of groceries, provisions and general merchandise to settlers and intending settlers and others upon lands belonging to or sold by the company, or in the neighborhood of such lands, and generally to carry on the business of general storekeepers and merchants; (g) To construct, execute, own and carry on all descriptions of works which may be necessary or useful for the purposes of the company; (h) To manufacture and deal in logs, lumber, timber, wood, metal and all articles into the manufacture of which wood or metal enters, and all kinds of natural products and by-products thereof; (i) To purchase or otherwise acquire, hold, pledge, sell or otherwise dispose of shares or stock, bonds, debentures or other securities in any other corporation, notwithstanding the provisions of Section 44 of the said Act; (j) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the business or objects of the company and necessary to enable the company to profitably carry on its undertaking; (k) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on, or any business similar thereto, or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, rights or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered shares of the company's capital stock, whether subscribed for or not as fully paid and non-assessable, or the company's bonds; (l) From time to time to apply for, purchase or acquire by assignment, transfer or otherwise, and to exercise, carry out and enjoy any statute, ordinance, order, license, power, authority, franchise, concession, right or privilege which any Government or authorities, supreme, municipal or local, or any corporation or other public body, may be empowered to enact, make or grant, and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses thereof; (m) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (n) To raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise, any corporation in the capital stock of which the company holds shares, or with which it may have business relations, and to act as employee, agent or manager of any such corporation or to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (o) To procure the company to be registered and recognized in any foreign country, and to designate persons therein, according to the laws of such foreign country, to represent this company and to accept service for and on behalf of this company of any process or suit; (p) To lease, sell or otherwise dispose of the property and assets of the company or any part thereof for such consideration as the company may deem fit, including shares, debentures or securities of any company; (q) To amalgamate with any other company having objects similar to those of this company; (r) To do all acts and exercise powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking; (s) To do all or any of the above things and as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Barcelona Traction Light and Power Company, Limited," with a capital stock of forty million dollars divided into 400,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 15th day of September, 1911.

THOMAS MULVEY,
Under-Secretary of State.

LIFE ASSURANCE COMPANIES

YOU are in the insurance business to make money; but if you are doing a GENERAL insurance business are you earning as much as you might if you devoted your entire time to Life underwriting? Many representatives of the Equitable who formerly transacted a "fire" or "miscellaneous" insurance business have tripled their incomes by devoting their entire time to life insurance work. In the life insurance field, every man and woman is a possible customer and if you become identified with the Equitable you can offer the most truly liberal policies coupled with the utmost security.

2nd Vice-President,
120 Broadway, New York.

TREATING THE FOREST AS A CROP.

The progress of the conservation policy of Canada, as applied to forest resources, depends more upon the Forestry Branch of the Department of the Interior than upon any other organization. Upon the technical knowledge and executive ability of the officers of the Forestry Branch depends the future of the forest on 16,000,000 acres of Dominion Forest Reserves, as well as upon the large area of non-agricultural forest land in Western Canada, which for the good of the country may yet be set aside as permanent forest reserves. In addition to looking after Dominion lands the Forestry Branch is now being asked by Eastern land owners to furnish advice as to the best means of securing at the earliest date a profitable crop of timber on waste land or wood lots. The proper administration of forest lands requires a special knowledge of the trees best adapted to each region, of their uses, and of the markets. Further, there is needed knowledge of the habits of all trees, especially of the merchantable species, so that it may be known how rapidly they grow, how they produce their seed, when and under what conditions the seed germinates, and in what way the seedlings and young trees are affected by their surroundings. Such knowledge is gained only by long study and experience. In order that the new Rocky Mountain forest reserves may be administered according to the latest scientific knowledge and the best experience, the Forestry Branch is now making detailed studies of the habits of the merchantable species of trees on the eastern slope of the Rockies in Alberta, and has sent one of the men in charge of the work to study the systems of forest management practised during the past few years by the highly developed United States Forest Service in the national forests of Montana. The United States foresters have spent large sums of money and availed themselves of the experience of many men in developing plans of lumbering which do not inconvenience the lumbermen, but which ensure the protection and reproduction of the forest, and the Canadian Forestry Branch intends to benefit largely by their experience.

◆

Mr. Charles T. Stark has been elected a member of the Toronto Stock Exchange.

The Chief Difficulty

that confronts the new man entering the Life Insurance Field is the securing of GOOD PROSPECTS. This difficulty is eliminated when you write for an INDUSTRIAL COMPANY, the debits of which are an inexhaustible mine for both ordinary and industrial business.

More Policyholders in Canada than any other Canadian company.

THE UNION LIFE ASSURANCE COMPANY
Head Office, TORONTO, Canada

FINANCIAL AND REAL ESTATE

TO INVESTORS

Brandon, Manitoba

and surrounding territory presents to Intending Investors large and small, the best possible opportunity at the present time (now) to realize large returns quickly.

Brandon Real Estate has never been boomed as other Western cities have, consequently prices are low comparatively.

With hundreds of thousands of dollars being spent in paving and other civic improvements.

With a million dollars' worth of contracts already let for private enterprises this year, Brandon is sure to forge ahead and increase greatly.

Brandon is the place for the conservative investor.

Correspondence solicited.

J. W. FLEMING, 735 Rosser Avenue, Brandon, Man.

SIX PER CENT. BONDS

REAL ESTATE SECURITY

CANADIAN REAL ESTATE BOND CORPORATION SIX PER CENT BONDS

The Canadian Real Estate Bond Corporation offers for sale its ten-year six per cent. bonds.
The bonds are offered and issued at par in denominations of $100, $500, and $1,000
They are a first lien upon all real estate and all other assets of the corporation.
The bonds, as well as all other assets of the corporation, are secured by the absolute ownership in fee of approved real estate in the city of Winnipeg and other Western Canadian cities, or by first mortgage upon such real estate.
The bonds mature in ten years. They have interest coupons attached payable semi-annually.

Send for prospectus and other information.

LEGAL NOTICE

(Continued from Page 1551.)

roads, piers, wharves, buildings, shops, stamping mills, and other works and machinery, plant and electrical and other appliances of every description; (e) To carry on the business of treating, smelting and refining mineral ores or other substances by means of electrolytic process or the application of electric power in any manner or form, and for such purpose to install all necessary plant, machinery and apparatus and to purchase, sell and otherwise deal in ores of various kinds, or other substances capable of being treated by electrolytic process, and to buy, sell and deal in any products or by-products of such ores or substances; (f) To carry on business as a manufacturer of and dealer in all kinds of chemicals and chemical products and by-products thereof; (g) To aid and assist by way of bonus, advances ot money or otherwise with or without security, settlers and intending settlers upon any lands belonging to or sold by the company, and generally to promote the settlement of said lands; (h) To establish stores for the sale of groceries, provisions and general merchandise to settlers and intending settlers and others upon lands belonging to or sold by the company, or in the neighborhood of such lands, and generally to carry on the business of general storekeepers and merchants; (i) To construct, execute, own and carry on all descriptions of works which may be necessary or useful for the purposes of the company; (j) To manufacture and deal in logs, lumber, timber, wood, metal and all articles into the manufacture of which wood or metal enters, and all kinds of natural products and by-products thereof; (k) To purchase or otherwise acquire, hold, pledge, sell or otherwise dispose of shares or stock, bonds, debentures or other securities in any other corporation, notwithstanding the provisions of section 44 of the said Act; (l) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the business or objects of the company and necessary to enable the company to profitably carry on its undertaking; (m) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on, or any business similar thereto, or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, right or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered, shares of the company's capital stock, whether subscribed for or not as fully paid and non-assessable, or the company's bonds; (n) From time to time to apply for, purchase or acquire by assignment, transfer or otherwise, and to exercise, carry out, and enjoy any statute, ordinance, order, license, power, authority, franchise, concessions, right, or privilege which any government or authorities, supreme, municipal or local, or any corporation or other public body, may be empowered to enact, make or grant, and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses thereof; (o) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (p) To raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise, any corporation in the capital stock of which the company holds shares, or with which it may have business relations, and to act as employee, agent or manager of any such corporation, and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (q) To procure the company to be registered and recognized in any foreign country, and to designate persons therein, according to the laws of such foreign country to represent this company and to accept services for and on behalf of this company of any process or suit; (r) To lease, sell or otherwise dispose of the property and assets or any part thereof for such consideration as the company may deem fit, including shares, debentures or securities of any company; (s) To amalgamate with any other company having objects similar to those of this company; (t) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking; (u) To do all or any of the above things as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Ebro Irrigation and Power Company, Limited," with a capital stock of two million five hundred thousand dollars divided into 25,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Intrinsic Value of Investments

When considering investments one should study closely the intrinsic value. When the intrinsic value is much greater than the price one can be sure of profit. When the intrinsic value is less than the price then speculation may increase the selling value, but there is no assurance.

British Columbia wild lands, which under cultivation will return from $50 to $500 per acre in crops, may now be bought from $10 to $15 per acre, depending on quality and amount of purchase. Some of our clients have coal and timber licenses which are worth considering on the above theory regarding intrinsic value.

This company acts solely as agent—buys and sells for customers but has nothing of its own to dispose of.

Canadian Branch, 94 Notre Dame St. W., Montreal.
Manager for Canada, Maurice Ferrand.
Toronto Office, 18 Wellington St. East.
J. H. Ewart, Chief Agent.

An inquiry will be held by Fire Commissioner Ritchie, Montreal, into the circumstances attending the destructive fire on the premises of the Canadian Oil Company, causing damage to the extent of $15,000. The investigation may have some bearing on the question of responsibility, as there was some understanding between the company and the Grand Trunk Railway in regard to the passing of engines.

The annual general meeting of the shareholders of the Great Northwestern Telegraph Company was held recently, when the following directors were elected and officials appointed:—Mr. H. P. Dwight, president; Mr. Adam Brown, vice-president. Other directors: Messrs. W. C. Matthews, James Hedley, Hon. J. K. Ker, K.C., Æmilius Jarvis, F. B. Hayes, Toronto; J. B. Van Every, Newcomb Carlton, New York. Mr. George D. Perry, general manager; Mr. A. C. McConnell, secretary and auditor; Mr. D. E. Henry, treasurer.

Interest is displayed in Montreal, not only in financial circles, but amongst householders, concerning the report that the Public Utilities Commission will meet on October 10th in Montreal, when the matter of prices charged for gas by the Montreal Light, Heat & Power Company will be investigated. Although the Montreal Light, Heat & Power Company has reduced the price of gas considerably in Montreal during the past few years, it is still charging $1.00 a thousand.

Owing to the immediate necessity for extension of the Canadian Pacific Railway hotel accommodation at Banff, the Banff Springs hotel is closed and work on the construction of a huge central building to unite the two wings will be started very soon. The increase in the number of guests at this hotel this summer, over the number accommodated last year, was 6,452, or 41 per cent., and the increase in receipts was $4,490.50. At least 308 guests were relegated to sleeping cars on the track during the month of July and August. The total number of guests at the C.P.R. hotel from May 15th to August 31st, was 22,083.

INVESTMENT AND LOAN COMPANIES

"INVESTMENTS."

A MUCH MISUSED TERM.

Many who should be, and think they are, laying up money for their old age, are misled into so-called "investments," where their hard-earned money is jeopardized and frequently lost, though it is of the utmost importance to them and to those who may he dependent upon them that its absolute safety should be beyond peradventure.

To those who should invest safely and with caution, not speculate, the Bonds of the Canada Permanent Mortgage Corporation can be confidently recommended. This Corporation is most conservative in the investment of the funds entrusted to it. For considerably more than half a century it has held a leading position among Canada's strongest financial institutions, and its Bonds are a

SOME CABINET CONSIDERATIONS.

Mr. Borden's difficulty in forming his Cabinet appears to have been an over-supply of parliamentary mahogany. When the Opposition becomes Government and its leader the Premier, there accrue two invariable results. Every Tom, Dick and Harry sincerely believes himself responsible for the political victory, and there arise a band of prophets silent prior to election returns, but noisy after. The popular idea of Cabinet making is that the Ministers are chosen as reward to parties and factions for services rendered. To a great extent, that is correct, and it is natural. But a glance at the names on the Premier's cabinet slate indicates that, while trying to please as many political factors as possible, he has also pleased himself.

The cabinet ministers of the Dominion Government shoulder immense responsibility when taking office. They are the men who are to run the country on behalf of its people. That country, Canada, has a wealth of natural resources and great possibilities for expansion in every direction. It is a borrowing country of the first order, its obligations to British, American and foreign investors being heavy. It has attained excellent credit in the world's money markets, but the fight for the maintenance of that credit cannot be slackened for one instant without working considerable harm upon the nation's general welfare.

The foundation of Canadian credit is made of the apparently simple incidents of the Dominion's daily life. Every transaction conducted honorably is a tribute to Canadian business methods, and consequently to Canadian credit. Human nature being a business phase, it is necessary sometimes to regulate wrongful tendencies by legislation. There is room for improvement in our company legislation. There is scope for the blocking of loopholes which enable unscrupulous promoters to gamble in charters, to steal the savings of the small investor and to play the part of financial brigand. There is insufficient co-operation between the provinces and the Federal Government in the matter of company promotion. They should help one another to stamp out the undesirable company promoter. If a scallawag, because he is one, cannot obtain a federal charter, it should be impossible for him to get one in any province of the Dominion. What is moral and legal in the case of the Dominion as a whole, should be moral and legal in each province as a unit.

There is need for friendly conferences in the matter of insurance law. We have a Dominion Insurance Department and one or two provincial departments. Other provinces have none, and are practically at the mercy of the lawless underwriter.

These things are some of many matters for a cabinet, because they are among the component parts of Canadian credit, without which Canada would seek business and borrowed money unsuccessfully.

The dual office of Minister of Inland Revenue and of Mines is held by Mr. Nantel. We had hoped that Mr. Borden and his advisers would have deemed it necessary to have appointed a Minister of Inland Revenue and a Minister of Mines, rather than one gentleman to hold what obviously should be two offices. The mineral production of Canada in 1910 amounted to a value of $105,040,958. Immense sums of capital have been sunk into the mines of this country, which is rich in minerals, many discovered and perhaps more undiscovered. The province of Ontario has set a good example along this line. Our mineral resources have not had their proper due. A few government experts and reputable mining engineers have been doing the work which should be handled by a staff twice the size, and which should have a cabinet minister to preside over its destinies.

As Minister of Trade and Commerce, Mr. Foster will direct the commercial intelligence department of a growing young nation, whose total trade last year amounted to $769,443,905. There are few portfolios which give such scope for effective work. It is the easiest and at the same time the most difficult thing to enlarge the national and international trade horizon. Sir Richard Cartwright, the former minister, and his assistants have done exceedingly well. Our commercial progress is remarkably rapid, and it is necessary for the government department not only to keep in touch with developments, but to be able to see the inevitable coming around the corner. One of Mr. Foster's first important deputations will probably be from the German Government. Germany is competing strenuously with Great Britain and the United States for a big part of Canada's import trade. Seven years were largely fruitless in the matter of our import trade, so far as Germany was concerned, because of its tariff action levelled against us. This obstacle was created by Germany, and after nearly a decade was removed by Germany. Having disappeared, the way is being paved by the Kaiser's financial and commercial missionaries for better tariff relations.

One of the most important, and in this case unusually interesting appointments, is that of Mr. W. T. White as Minister of Finance. All look to a country's chancellor of the exchequer for many of the things that count in this life. He is expected to raise bulky revenue without unduly offending susceptibilities. He is maker of the budget, and the budget interests every man. Mr. White succeeds a Finance Minister who presented almost a score of annual budgets, a record of which Mr. Fielding may well feel proud. The former minister was in close touch with money market developments abroad, and usually gauged the psychological moment for the flotation of the Dominion Government's loans. Mr. White is modest and unassuming, an excellent and logical debater, with considerable financial experience, tinctured with a little of the work of the newspaperman. He is without parliamentary experience, and, while that fact may cause him worry at times, it may perhaps ultimately help rather than hinder him. He has for guidance Mr. Fielding's precedents, which were mostly excellent ones. As a cabinet colleague, he will have access to the counsel of Mr. Foster, another former Finance Minister. And Mr. White has also ideas of his own.

The new Minister of Finance will have important matters for consideration almost immediately upon assuming office. The charters of the banks expired on July 1st, 1911, and were extended until July 1st, 1912. The ten-year renewal of these charters will, therefore, be one of the early and consequential questions of the coming parliamentary session. The expenditure of the Dominion will require considerable attention. There are a number of large public enterprises in hand, many promised, and more for early consideration, and probably consummation. Mr. White's entry as Finance Minister into the financial spheres of London, comes at a period when Canadian finance generally is being analysed minutely by critics, great and small. A man of no mean ability will be required to minister to this delicate situation. We believe Mr. White is worthy and capable of that position.

His first budget and its relation to the tariff is another vital matter. There are a thousand considerations to be sorted and given their right place. There are the consumer and the cost of living, the trend of the industrial amalgamation, the position of the Western farmer in respect to the purchase of commodities, the proper protection of the manufacturer—these are only a few.

Mr. Borden as premier, has succeeded a worthy statesman and comes into office at a time when political color can make little difference to the country's general prosperity. We appear to be on the eve of another wave of prosperous times. Largely upon the government's proper action during that prosperity will much of the nation's future depend.

INDIANS AND THEIR PLACE IN CANADA.

Something for consideration is provided by Archdeacon Renison, of Moose Fort, James Bay, who has charge of Anglican mission work in the Moosonee district with 6,000 scattered population. He tells it briefly, not to say bluntly, and deserves sincere attention. Why, he asks, should our government desire to teach the red man a trade, and "civilize" him according to the civilization of the whites, when they can with less trouble and more success train him for what he can do infinitely better than he can on a farm or in a factory? The fact is overlooked that Indians are already skilled workmen of the highest type, fitted for their work by heredity and centuries of environment. "The Government is bringing white men into the northland for the purposes of surveying, prospecting and geological work, very often university men, who barely know the difference between a frying-pan and an axe, and by so doing ousting the Indian from the country which is his very life, and for which he and none other is specially adapted."

Employ these skilful woodmen, he urges, in all surveying and like pioneer work. Employ them, too, in fire-ranging and game wardenship. Speaking of conservation in the north country, he says: "No man can assist in and, indeed, carry out the work of conservation as well as the Indian, for the woods are his home, and conservation is work in which he has no equal."

Portages should be cut between the vast band of lakes which fills New Ontario, and an Indian should be settled by every lake. The Government might allow him to erect a home and to cultivate what land he liked. His work should be the keeping open of the portage routes, and the guidance of such white men as should pass through his territory. In addition, he could hunt within his limits, and, in fact, live his own life and at the same time be of immense use to Canada.

Testimony comes from Port Arthur and other parts of Ontario as to the successful employment of Indians in directions like those indicated. At a mission on Lake Nepigon is a group of temperate, trustworthy Indians whose great services to the railways, to settlers, and explorers have been testified to most strongly. Where the lily-fingered work of clerking and other indoor avocations has been tried in vain, the Indian has been found trusty as guide, motor-boat man, chain-man—all occupations appealing to his nature and keeping him out of doors. He has been found to be a good boat-builder as well.

AN INSURANCE DEAL OF NOTE.

It would be interesting to know how many shareholders of the Canadian Guardian Life Insurance Company have taken stock in the International Insurance Company and how many policyholders of the former company have reinsured their policies in the latter. This is the proposal made by Mr. J. M. Spence, president of the Canadian Guardian Life Insurance Company, and now managing director of the International Insurance Company. The charter of the Canadian Guardian Life was not renewed by the Dominion Department of Insurance for excellent reasons, which have previously been noted in these columns. The Canadian Guardian, under the presidency of Mr. Spence, managed to show an operating loss for seventy-two months of $61,223. Mr. Spence now proposes to wind up his old company by inducing shareholders and policyholders to take stock and reinsure in his new company.

The charter of the International Insurance Company of Edmonton was dormant until Mr. Spence apparently conceived the idea of tickling it to wakefulness. The provincial secretary's department at Edmonton duly received notice of a change in the company's directorate. Had Mr. Spence applied for registration of the Canadian Guardian Life in Alberta he would probably have been refused. Instead, he evidently got into touch with the owners of the International charter, the result being the filing of a notice of change in the directorate and of a prospectus.

Obviously Mr. J. M. Spence should not be allowed to consummate the deal he proposes. A man who presides over the destinies of a company as he did those of the Canadian Guardian Life, with the result that the Dominion Insurance Department was obliged to step in and examine the company's position, withdraw its charter after discovering that the corporation had sustained a large operating loss apart from the liability to the then existing policyholders, that many of the dividends declared were contributed by the specific surrender of shareholders' subscriptions, and that a very extraordinary method was adopted by the board of the Canadian Guardian Life to avoid showing an operating deficit—such a man, The Monetary Times contends, should not be permitted to take into his new fold his old shareholders and policyholders.

Why is he being permitted to do this? First of all, were he to submit a proposal to the Dominion Department of Insurance at Ottawa, that all the policyholders of the Canadian Guardian should be reinsured in the International, we feel reasonably sure that the Department would refuse to countenance the deal. But Mr. Spence is submitting his proposal to the individual shareholders and policyholders. We have no hesitation in advising policyholders, of their two alternatives, to choose an application to the Dominion Department of Insurance for the net surrender value of their policies, rather than to reinsure in the International, a company managed by a man, Mr. J. M. Spence, who mismanaged to the extreme, the affairs of the Canadian Guardian Life.

The Department of Insurance at Ottawa is evidently powerless to prevent the scheme of Mr. Spence becoming effective, should he be lucky enough to obtain the applications from his former policyholders for reinsurance. The Provincial Secretary's Department at Edmonton is also powerless, for they have no insurance department and no insurance law. While there is on file at Ottawa a list of the shareholders of the Canadian Guardian there is no list of policyholders, who will, therefore, have to lend both ears to the proposal of Mr. Spence. If it had been necessary to file a policyholders' as well as a shareholders' list at the Ottawa Department, the actual geography of the attractive scheme of Mr. Spence could be submitted to the policyholders by the reputable press or others interested in the proper conduct of life insurance in Canada. This is a matter worth the consideration of the Department and of insurance companies conducting an honorable business.

We believe that the registrar of companies at Edmonton has more than once refused to issue a certificate of insurance to companies for the transaction of insurance business in Alberta. The provincial law says: "Any three or more persons associated for any lawful purpose to which the authority of the Legislative Assembly extends may, by subscribing their names to a memorandum of association and otherwise complying with the requirements of this ordinance in respect to registration, form an incorporated company with or without limited liability."

It would appear that the provincial secretary's department at Edmonton is doing what is morally right, but which could scarcely be supported in the courts. All that is necessary before a foreign company can transact business in Alberta, is to register in that province. This refers to insurance companies as well as to others. During the past year a number of applicants on behalf of companies in the United States were informed by the provincial secretary's department of Alberta that if they would first obtain a federal license to transact insurance, the provincial department would then consider the matter of their registration in that province. These are proper precautions, and we hope to see them embodied in Alberta's company law in the near future. If a province feels unable to support an insurance department, it can at least see that the public are given the protection of the federal department, and the fact that the protection given by the federal department needs strengthening, is surely demonstrated in the case of the Canadian Guardian Life and Mr. Spence.

THE BANK'S POSITION IN FAMOUS SUIT.

Seldom is it that a Canadian chartered bank becomes involved in an important lawsuit. The action of the province of Alberta against the Royal Bank for the surrender of the portion of the proceeds of the Alberta and Great Railways Company bond sale on deposit with that bank, therefore, needs some explanation. The deposit made with the bank was, by the instruction of the Provincial Government and with the consent of the railway company, opened in the Royal Bank's books in the name of the "Provincial Treasurer, Province of Alberta, Alberta and Great Waterways Railway Company, special account." The province of Alberta entered into a contract with the railway company to build a line of railroad and guarantee the company's bonds to the extent of $7,400,000.

The railway company sold the bonds in England in advance of construction and deposited the proceeds in three different banks, of which the Royal Bank was one. Before accepting this deposit the Royal Bank required, and the government passed, an order-in-council undertaking that the funds would not be withdrawn except for the purpose of the construction of the railway. Subsequently the government of Alberta, having decided it was inadvisable to proceed with the contract, passed legislation cancelling the same, and to appropriate the amounts on deposit for other government purposes. Whereupon the railway company notified the Royal Bank not to surrender the funds standing in their joint name, under penalty of damages. The Royal Bank, therefore, was compelled to decline to surrender the money on the demand of the government, as the ownership can only be determined by the highest court. Obviously the Royal Bank took the only course which could be followed by any chartered bank worthy of the name.

With regard to the other two banks concerned, an order was made in the Supreme Court in Edmonton in February, allowing them to pay their share of the proceeds of the bond sale into court, pending the decision in the case noted above.

PROGRESS OF THE GRAND TRUNK PACIFIC.

Western Lines Nearing Completion—Dry Dock at Prince Rupert.

It was not stated at the adjourned annual meeting of the shareholders of the Grand Trunk Pacific Railway at Montreal this week when the new transcontinental would be completed from coast to coast. Mr. Charles M. Hays, president, told, however, of the progress of construction and stated that during the year the track laying on the main line of the western division had been extended from Wolf Creek to Fitzhugh, west of the Athabaska River in the Rocky Mountains, which is 1,027 miles west of Winnipeg and will be the divisional point for that section; that the construction work is under full headway, with night and day forces to Tete Jaune Cache, on the Fraser River, beyond Yellow Head Pass, on the western slope of the Rocky Mountains, and it is expected that the track laying will reach this point, which is 1,094 miles west of Winnipeg, before the close of the year.

Trains in Operation.

On all portions of the line which have been sufficiently completed trains are at present in operation, and a daily through freight and passenger service is established on the line between Winnipeg, Edmonton and Edson. From the stage to which construction has advanced, we should judge that the line should be completed at least by the end of 1914.

For the purpose of establishing suitable hotel accommodations throughout the country, which will be traversed by the company's lines, it is proposed to construct a chain of first-class modern hotels.

Dry-dock at Prince Rupert.

The company has been granted a subsidy by the Canadian Government for the construction of a floating dry-dock at Prince Rupert, at an approximate cost of $2,200,000, on which work has already been commenced, and tenders have also been called for the construction of terminals and a station in that city.

The steamer Prince John has been added to the company's fleet on the Pacific Coast, and placed in service between Prince Rupert and the Queen Charlotte Islands.

Good progress has been made in the construction work on the eastern division and the present condition of that work shows a total of 1,223.45 miles of main line track, and 136.50 miles of side track laid, and the remaining portions of this section are all under contract.

Officers Re-elected.

The names of the following directors were proposed for re-election—Mr. Hugh A. Allan, retired; Alfred W. Smithers, Sir Henry Mather Ackson, Geo. Von Chauvin, Col. Frederick Firebrace, Chas. M. Hays, E. J. Chamberlin, Wm. Wainwright, E. H. Fitzhugh, W. H. Biggar, E. B. Greenshields, the Hon. R. Dandurand, the Hon. Geo. A. Cox, E. R. Wood, and J. R. Booth.

◆

NORTHERN EXPLORATION COMPANY'S REPORT.

Between January 17th and June 30th the Northern Exploration Company made a profit on trading in shares of $336,000. The company received $507,000 in stock subscriptions. This is according to the company's financial statement just received. The corporation has shares in other companies which, in the balance-sheet, stand (at cost) $430,000. It has, in addition, $404,000 in cash, about 60 per cent. of which is on call and the remaining 40 per cent. in banks here and abroad. One item of the balance sheet is $280,000, held as a contingent liability on shares held. This seems to be the reserve for possible depreciation in the company's security holdings. There is also a sum of about $45,000, which represents the arrears on the issued shares, and which is not included in the balance sheet.

[illegible] the charges for formation and other expenses are taken out, the company's profits are set down at $315,105, or at the rate of something like 120 per cent. per annum.

In all, 110,325 shares have been subscribed and fully called up. A notice which accompanies the company's statement says that since it was prepared options to subscribe at par for 9,100 shares have been exercised, and the balance of the unissued capital, namely, 280,575 shares of £1 each, is under option to the subscribers of the original working capital at par until January 31st, 1913, in accordance with the terms of an agreement entered into at the time of the incorporation of the company. Since the date of the balance sheet also an interest of $25,000 has been taken in the Porcupine Veterans' Exploration Company, Limited, and the company has under negotiation several other business propositions.

PERSONAL.

Mr. F. H. Marsh, of the Sterling Bank of Canada, has been appointed superintendent of agencies.

Mr. David Burke has been appointed one of the special agents of the North British and Mercantile Insurance Company, with office in Montreal.

Mr. Geo. A. Balfour has been appointed secretary to general superintendent Guttelius of the eastern division of the Canadian Pacific Railway.

Mr. B. S. Walker, superintendent of Western Ontario branches of the Sterling Bank of Canada, has been appointed manager of the Montreal branch.

Mr. Wm. Farrell, president, and Mr. James MacKinnon, general manager, of the Eastern Townships Bank, are at present on a trip to Western Canada.

The Duke of Sutherland, who with a party recently made a trip through western Canada, is to purchase thirty square miles of agricultural land near Kamloops, on which Scotch and English farmers will be settled.

Mr. J. H. Welsford, of Liverpool, who recently secured a controlling interest in the Union Steamship Company, has acquired a large interest in the Boscowitz Steamship Company. Both companies operate on the Canadian Pacific coast.

Mr. W. G. Weatherstone, who until recently was manager of the Bank of Hamilton at Brandon, Man., has been presented with a purse containing $500 in gold by his business associates, on his appointment as inspector for Western Canada.

Captain D. C. Newton, of Messrs. C. Meredith & Company, Montreal, has been elected a director of the Lake Superior Corporation, to represent the Canadian Agency of London, England, and other English interests. He takes the place of Mr. L. Lovell, of New Jersey, who retired.

Mr. Geo. J. Cuthbertson, who recently was appointed manager of the Board of Trade branch at Montreal of the Bank of Toronto, was tendered a banquet at the National Club, Toronto, by his former business associates. He was also the recipient of a handsome gold watch and chain.

Mr. G. B. Bruce Paton, of the Phoenix Assurance Company, Limited, has been appointed a special agent of the fire department, with offices in Montreal. Mr. Paton, who was formerly associated with the Northern Assurance Company, has just completed organization of the British-Canadian Venture Syndicate, Limited, and will conduct business as a financial and insurance broker.

◆

SHAREHOLDERS ARE DISSATISFIED.

At the adjourned meeting of the Dominion of Canada Trust Corporation last week a cable message states, the shareholders expressed extreme dissatisfaction, and a motion to reject the directors' report was carried by a show of hands. The chairman ruled the demand for a poll irregular, and adjourned the meeting until such time as the directors give notice.

This company has a share capital of £500,000, and issued in April, 1910, 400,000 ordinary shares of £1 each. The company was formed to carry on business in Canada, and to facilitate the placing of Canadian investments on the British and Continental markets. It proposed to act as trustee for bond and debenture issues and as agents for the payment of coupons, etc., and to engage in the business of an investment and trust company generally. At the time of the public issue in the London market it was stated that an arrangement had been entered into with prominent Canadians who had agreed to sub-underwrite 25,000 ordinary shares of the issue.

The qualification of each director is the holding of shares of the company of the nominal amount of £500. The directors' remuneration is £250 per annum, and of the chairman and deputy chairman of the board, £400 and £350, respectively. The company entered into several contracts, one of which was an agreement between Mr. J. B. Bartram, of Toronto, and G. Newington, of London, England, whereby, in consideration of the expenses incurred by Mr. Bartram in connection with the company's formation and of his agreeing to transfer to the company certain reports, information and material in his possession, he was entitled to have allotted to him 50,000 fully paid 1s. shares in the company. The preliminary expenses were estimated at £500, a pretty heavy sum.

The directors of the company are Messrs. E. M. Rovocanachi, C. T. Part, J.P., J. Howard, Hon. A. K. Maclean, Earl of Denbigh, G. H. Raw, all of London, England; J. Radine, Paris, France; and Sir Frederick Borden.

DOUBLE LIABILITY CLAUSE CAN BE ENFORCED ABROAD

Large Amount of Canadian Bank Stock is Held in Foreign Countries—Practically No Loophole Exists for Evasion of Payment.

With the large amounts of foreign capital now being invested in Canadian bank shares, there has arisen some misgivings as to the enforcement of the double liability clause of the Bank Act, in the event of a failure, upon shareholders resident in foreign countries. Until the past few years only small blocks of our bank stock were held abroad. The sum has increased considerably.

The most important foreign holding of Canada's bank stock is that of French investors in the Banque Internationale of which Mr. Rodolphe Forget, M.P., is president. The French backing amounts to $7,000,000. French interests have also acquired $250,000 shares of the Bank of Vancouver, and have taken an option on another block of the bank's stock.

German and British Money.

The Dresdner Bank had $1,000,000 in Sovereign Bank stock. Its investment remains in the country as the Dresdner Bank agreed to turn over its Canadian interests to the new company formed to take over the Sovereign Bank's assets after failure. American capital is considerably interested in the Weyburn Security Bank which commenced business in January, 1911.

Large and numerous purchases have been made in Great Britain of Canadian chartered bank shares. These investments extend over a greater period than five years, in which time the investment was approximately $1,125,000. This sum represents but a small percentage of the total British investment in bank shares. As is known, The Molsons Bank sold $2,000,000 worth of its stock to a London syndicate.

According to a recent compilation of Canadian bank stockholders, the following amounts were held abroad:—

Germany	$1,096,150
France	284,750
Italy	32,700
Spain	12,350
Sweden	3,300
Japan	2,100
Belgium	1,650
Servia	1,500
Austria	1,250
China	1,200
Russia	800
Turkey	750
Brazil	600
Holland	400
Cuba	100
Mexico	50
Total	$1,439,650

A part of these amounts may be held by Canadians resident abroad.

Farmers Bank Shareholders.

There were numerous United States shareholders of the defunct Farmers Bank and a large amount of stock was held in the neighboring republic. Mr. Clarkson, the liquidator of the bank, stated that the amount of the double liability would be obtained from these shareholders "if they were worth it."

The double liability clause, section 125 of the Bank Act of Canada, reads as follows:—"In the event of the property and assets of the bank being insufficient to pay its debts and liabilities, each shareholder of the bank shall be liable for the deficiency, to an amount equal to the par value of the shares held by him, in addition to any amount not paid up on such shares."

Enforcement of Act Abroad.

The enforcement of this clause in foreign countries in the event of failure, has been frequently discussed of late, but there appears to be only a very remote possibility of evasion of the double liability call under those circumstances. By virtue of its jurisdiction over insolvency the Dominion Parliament passed the winding-up act for the winding up of all incorporated companies. This act, with some alterations, is made applicable to the winding up of banks which are insolvent or in course of liquidation. Section 125 of the Bank Act passed in 1871 provided that in the event of the property and assets of the bank being insufficient to pay its debts and liabilities, each shareholder of the bank shall be liable for the deficiency to an amount equal to the par value of shares held by him in addition to any amount not paid up on such shares. This is generally known as the Double Liability Clause.

As to Foreign Shareholders.

Under the procedure of the winding-up act a list is prepared by an official referee of all those shareholders liable as such contributories. It is open to any shareholder to contest his liability to be placed on the said list and the referee's finding, subject to appeal to the higher courts, is equivalent to a judgment of the court and is final.

A foreign shareholder, however, who had not appeared before the referee to defend and thereby submitted to the jurisdiction of the Canadian Court, would still have the right to contest his liability in the courts of his own country but the grounds of defence there would be somewhat restricted as under the rules of the international law the question should be decided in accordance with the Canadian law. Under our law a contributory is not allowed to set up all defences against the liquidator which he might have been allowed to set up against the bank itself in an action for calls, and, generally speaking, after a winding-up order is made a shareholder cannot evade liability by setting up misrepresentations and fraud in the purchase or acquiring of his shares.

◆

INSURANCE COMPANIES AND THE INSURANCE DEPARTMENT.

At the sixth annual convention of the American Life Underwriters' Convention, held recently at Pittsburg, Mr. Guildford A. Deitch, of Indianapolis, read a paper on "The Life Insurance Company and the Insurance Department." Dealing with the question of departmental interference and questionable methods, Mr. Deitch said that the management of a successful life insurance company is a difficult problem. The expense of securing business—salaries of officers and employees and all expenditures of moneys—might well be left to the untrammelled action of the directors of the companies. They are meeting the competition, and they should, and do, know better than the average insurance department official, what is best for the company.

The matter of commissions to agents has been for many years a matter with which the insurance departments have interfered. The managers of the companies have to decide which is the better plan: (1) To pay a high initial commission to the general agents with no cash allowance for expenses, or (2) to pay a low first year commission with a money allowance for expenses. Advocates will be found among able and successful managers of each of these plans. So long as there is this disparity of opinion among successful insurance managers, the insurance departments are not warranted in their criticism of the higher commission, no-cash-advance advocates.

One of the greatest sources of complaint against insurance departments is that any criticism they have to make of the management of companies is given out to the press to be heralded broadcast over the country before the management has an opportunity to either answer the criticism or take steps to remove the ground therefor.

Such action on the part of the commissioners does no good to the public, and can result only in injury to the company involved and its policyholders.

◆

TORONTO LIFE UNDERWRITERS' ASSOCIATION.

The Toronto Life Underwriters' Association held its first meeting of the season last Saturday when there was a good attendance. Mr. A. Homer Vipond, president of the Dominion Association, was the guest of the evening and delivered an inspiring address to the fieldman. Mr. Vipond related some of his own personal experiences and stated that he believed there was a psychological moment in the obtaining of all applications. His address was replete with good advice and was appreciated by the members. Several other well known insurance men addressed the meeting.

CANADA'S CABINET MINISTERS.

Mr. Borden Has Chosen the Men Who Will Help Him to Run for the People the Nation of Twentieth Century.

Mr. R. L. Borden, after hearing many petitions and sifting much advice, has formed his Cabinet, the members of which were sworn in on Tuesday. Here is the list:—

R. L. Borden—premier and president of the council.
Martin Burrell, British Columbia—minister of agriculture.
Dr. J. D. Reid, Ontario—minister of customs.
W. T. White, Ontario—minister of finance.
W. B. Nantel, Quebec—minister of inland revenue.
Robert Rogers, Manitoba—minister of interior.
J. C. Doherty, Quebec—minister of justice.
T. W. Crothers, Ontario—minister of labor.
Hon. J. D. Hazen, New Brunswick—minister of marine and fisheries.
Col. Sam Hughes, Ontario—minister of militia.
F. D. Monk, Quebec—minister of public works.
Hon. Frank Cochrane, Ontario—minister of railways.
Hon. George E. Foster, Ontario—minister of trade and commerce.
L. Pelletier, Quebec—postmaster-general.
Dr. W. J. Roche, Manitoba—secretary of state.
Without portfolio—A. E. Kemp, Ontario; George Perley, Quebec; Senator Lougheed, Alberta.

Mr. Borden, Premier, celebrated his fifty-seventh birthday on June 26 last. He was born at Grand Pre, N.S., and educated at Acadia Villa Academy, Horton. At first he entered the teaching profession, but later studied law, like so many other men who have succeeded in public life in Canada. He was called to the bar in 1878. He was elected to Parliament in Halifax in 1896 and 1900, but was defeated there in 1904. He secured a seat in Parliament through the resignation of Mr. Edward Kidd, M.P., of Carleton. He returned to Halifax at the succeeding general election in 1908 and has since represented that city in the Commons.

Ministers of Revenue and Customs.

Hon. Wilfrid Bruno Nantel, Minister of Inland Revenue and of Mines, was born at St. Jerome, Que., in 1857, and educated at the Seminary of Ste. Therese de Blainville. He is an advocate and a Doctor of Laws of Laval University. Having been an alderman of St. Jerome since 1894 and mayor of the town for six years, he contested Terrebonne at the general elections of 1904. He was defeated by Dr. Samuel Desjardins, but in 1908 succeeded in winning the seat. He is an eloquent speaker in the French language, and during the last session of the House of Commons showed himself to be an adept in the English language as well.

Hon. J. D. Reid, the new Minister of Customs, was born on Jan. 1st, 1859, at Prescott, Ont., and was educated at Queen's University, Kingston. He holds the degree of Dr. of Medicine, conferred upon him by Queen's and the University of Toronto. He has represented Grenville in the House of Commons continuously since 1891, and has distinguished himself as a speaker.

Minister of Railways.

Honorable Frank Cochrane, Minister of Railways and Canals, takes up that Dominion portfolio, releasing the Ontario Provincial portfolio of Lands, Forests and Mines. Mr. Cochrane has been in the political arena since 1905. During his regime the mining law of Ontario has been considerably improved. The titles of holders of mining claims have been made more secure; an independent tribunal for the hearing of disputes respecting applications for mining lands has been created, an inspection system to prevent fraud in the staking of claims has been inaugurated; equitable terms for the acquisition of mining lands have been established, legislation to encourage the refining of ore in Ontario has been adopted and the revenue of the province from its mineral resources has been very greatly increased. Although Mr. Cochrane now resides in Toronto, he is a native of the province of Quebec. He was born in Clarenceville, Que., in 1852, and was educated in the parish of St. Thomas, Que.

Minister of Trade.

Honorable George E. Foster takes the reins of office as Minister of Trade and Commerce, with the experience of twenty-five years as a member of the House of Commons and eleven years as a Minister of the Crown. Mr. Foster was born in Carleton County, N.B., in 1847, and is a member of a United Empire Loyalist family. He was educated at the University of New Brunswick and was a few years after his graduation appointed professor of classics and physics in that institution. From this position he retired in 1879. He made his first appearance in Parliament as the member for King's County, N.B., in 1882, and three years later was appointed Minister of Marine and Fisheries in Sir John Macdonald's government. Mr. Foster prepared Canada's case for the Joint High Commission which sat in Washington in 1888, and which framed the Tupper-Chamberlain-Bayard treaty relating to the deep sea fisheries off the Atlantic coast. He also had the pleasure of seeing the views expressed in his diplomatic despatches to Washington sustained by the Paris tribunal, which settled the controversy between the United States and Canada respecting the former nation's claim to ownership of the seals in Behring Sea. He was also called upon to oppose the proposed Bond-Blaine treaty between Newfoundland and the United States on the ground that it would prejudicially affect Canada's interests in the Atlantic fisheries. Mr. Foster succeeded Sir Charles Tupper as Minister of Finance in 1888 and retained that portfolio practically continuously until the defeat of his party in 1896.

Minister of Finance.

Honorable W. T. White, who will act as Minister of Finance, was born near Bronte in Halton County in 1866, and attended the Bronte Public School and the Brampton High School before entering the University of Toronto as a student in classics and political science. He remained for two years at the university and then joined the staff of a Toronto evening newspaper as a reporter. He resumed his studies and then dropped them again to accept a position in the city assessment department. Finally he completed his university course, winning a gold medal at graduation. He then entered the law school, and in 1899 was graduated with a second gold medal. In August of that year the directors of the National Trust Company, then in course of organization, were seeking a manager. They selected Mr. White, and he accepted the appointment. Since that time he has risen first to the position of general manager and more recently to that of vice-president of that corporation. He will retain the latter title upon entering the Cabinet.

HONORABLE W. T. WHITE,

The Minister of Finance in the new Cabinet, is described as follows by a man who has known Mr. White since, as a boy, he ran around his father's farm near Bronte, Ontario, forty years ago:—

"Mr. White is a man of great force of character and absolute independence of action. He glories in his trust and is in love with his work. He is indefatigable in his efforts to master every detail of the work at hand, and it is a safe prediction that he will have intimate knowledge of the duties of every clerk in the Finance Department at Ottawa. My estimate of his connection with Federal politics is that he will be vastly more valuable to the Conservative party than that party will be to him."

Ministers of Justice and Agriculture.

Honorable Charles Doherty, K.C., D.C.L., LL.D., Montreal, St. Anne, Minister of Justice, was born May 11, 1855, at Montreal, and educated at the Christian Brothers School, St. Mary (Jesuit) College, McGill University, all at Montreal. Mr. Doherty is an advocate and a director of the

Montreal and District Savings Bank. He was captain in the 65th Mount Royal Rifles and retired, retaining rank, in 1889. He was judge of the Superior Court, P.Q., from October, 1891 to November, 1906, when he retired. Mr. Doherty is a Roman Catholic and resides at Montreal.

Honorable Martin Burrell (Yale-Cariboo), Minister of Agriculture, was born October 15th, 1858, at Farindon, Berks., England, and educated at St. John College, Hurtspier Point. Mr. Burrell came to Canada in 1883 and was fruit farming in Niagara Peninsula till 1889, afterwards going to British Columbia, in which province he lives at Grand Forks, of which city he was mayor in 1903. He was a member of the Board of Horticulture in British Columbia, 1904-1908, and is connected with the Grand Forks Orchard Company and Gazette Publishing Company.

HON. GEORGE E. FOSTER,

Minister of Trade and Commerce, who has had twenty-five years' parliamentary experience, and fifteen as a Minister of the Crown.

Ministers of Labor and Militia.

Mr. Crothers, B.A., K.C., (Elgin W.), Minister of Labor, was born January 1st, 1850, at Northport, Prince Edward County (Ont.), and educated at Public School, Northport and Olbert College, Belleville, Ont. Mr. Crothers studied law in the offices of Messrs. Foy, Tupper and Macdonnell and Messrs. Bethune, Osler and Moss, Toronto. He was headmaster of the Wardsville High School for years 1874-5-6. He began the practice of law at St. Thomas in 1880 and has practised there ever since, being now the partner of Mr. Samuel Price, Mining Commissioner for Ontario, in the firm of Messrs. Crothers and Price. He was chairman of the Text Book Commission appointed by the Ontario government two years ago, to enquire into the price of Public and High School text books. He was first elected to the House of Commons in 1908. Mr. Crothers resides at St. Thomas, Ontario.

Honorable Colonel Samuel Hughes, Minister of Militia, was born in Darlington, Durham county, on January 8th, 1853, and educated at Toronto Model and Normal schools, also at Toronto University. Colonel Hughes was lecturer in English Language, Literature and History in Toronto Collegiate Institute till 1885, when he purchased The Lindsay Warder, which he edited till 1897. In early life he was prominently identified with amateur athletics, and has been a volunteer since he was 14 years of age. He declined the position of Deputy Minister of Militia in 1891, and of Adjutant General for Canada in 1895. He took part in the celebration of the Queen's Diamond Jubilee in 1897, and served in the Fenian Raid of 1870, for which he was awarded a medal. Since 1872 he has personally advocated and offered colonial military assistance to the Empire in several Imperial wars. He served and held various positions in the Boer War in 1899-1900, and was several times mentioned in despatches. He is a member of the Orange, Foresters and Masonic orders, and resides at Lindsay, Ont.

Postmaster and Secretary of State.

Honorable Louis Phillippe Pelletier, B.A., L.L. L., LL.D., (Laval University), Postmaster General, was born at Trois Pistoles, Que., in 1857. He was educated at St. Anne College and Laval graduating with the Marquis of Lorne medal in 1880, when he was called to the bar and has since practised in Quebec. He was called to the Legislative Council in May, 1888, resigned, but was returned to the Legislature Assembly by acclamation for Dorchester County and was appointed Provincial Secretary, December, 1891, on the formation of the De Boucherville government. He acted as Attorney-General in 1896-7, and was selected for Dorchester until 1904, when he retired.

Honorable William James Roche, M.D., Secretary of State, was first elected to the House of Commons in 1906 for Marquette. Born at Clandeboye, Ont., November 30th, 1859, he was educated at Lucan, Ont., London High School and Trinity Medical School, Toronto, taking first-class honors in 1883, removing the same year to Minnedosa, Man.

Ministers of Interior and Public Works.

Honorable Robert Rogers, Minister of the Interior, is still another Quebec-born, his father being the late Colonel G. Rogers, of Argenteuil County. He is forty-seven years of age, and was educated in Montreal, and for fifteen years was a general merchant at Charlevoix, P.Q. Moving to Manitoba he engaged in store keeping, the grain business, and also did some mining at Kenora. He first entered politics in 1896. In 1899 he was elected to the Legislature for Manitoba, and in 1900 when Premier Roblin formed his cabinet he was given the portfolio of Public Works, an office which he has held up to now.

Honorable F. D. Monk, K.C., B.C.L., D.C.L., Minister of Public Works, comes of old Devonshire stock on his father's side, the family having settled in New France under the French regime. On his mother's side he is French. He was born in Montreal in 1856. He occupied the position of recognized representative of the French Conservatives in the House of Commons up to the time the Nationalist movement became strong in Quebec, when he formed an alliance with Henri Bourassa. He broke with the English-speaking Conservatives on the autonomy bill and on the naval question. Mr. Monk is a lawyer and a professor of constitutional law in the Montreal branch of Laval University.

Minister of Marine.

Honorable J. D. Hazen, Minister of Marine, who represents New Brunswick in the new government, was a member of the House of Commons in the session of 1891, but was beaten in 1896. Three years later he entered the New Brunswick Legislature and in 1908 on the fall of the Robinson ministry became premier of the province. Mr. Hazen has practised law in Fredericton and St. John since 1883. He is a member of the Senate of the University of New Brunswick. He was born at Oromocto, N.B., in 1860.

HON. FRANK COCHRANE,

Minister of Railways and Canals. Mr. Cochrane will keep an eye on Canada's twenty-five thousand miles of railways.

Of the eighteen ministers forming the new Cabinet thirteen are elected members of the House of Commons, one is a Senator, and four are yet without seats in Parliament. The Senator and two of the members-elect are Ministers without portfolio. Their membership of Parliament is, therefore, not affected by their entering the Cabinet. The other fifteen Ministers will have to submit themselves to the electors of the ridings they represent or wish to represent.

Previous Ministries.

The names of the Ministries since Confederation, and the length of their existence are as follows:—

1—Right Honorable Sir J. A. Macdonald, Premier. From July 1st, 1867, to November 6th, 1873 (6 years, 96 days).

2—Honorable A. Mackenzie, Premier. From November 7th, 1873, to October 16th, 1879 (5 years, 312 days).

3—Right Honorable Sir J. A. Macdonald, Premier. From October 17th, 1879, to June 6th, 1891 (11 years, 229 days).

4—Honorable Sir J. J. C. Abbott, Premier. From June 16th, 1891, to December 5th, 1892 (1 year, 71 days).

5—Honorable Sir J. Thompson, Premier. From December 5th, 1892, to December 12th, 1894 (2 years, 7 days).

6—Honorable Sir M. Bowell, Premier. From December 21st, 1894, to April 27th, 1896 (1 year, 127 days).

7—Honorable Sir C. Tupper, Bart., Premier. From May 1st, 1896, to July 8th, 1896 (69 days).

8—Right Honorable Sir Wilfrid Laurier, Premier. From July 11th, 1896, to October 3rd, 1911 (15 years, 77 days).

9—Honorable R. L. Borden, Premier, October 6, 1911.

BRITISH COLUMBIA.

Taxation Commission Hear Protests—High Tax on Lumber Does Not Permit of Conservation—The Companies Act Condemned.

(Staff Correspondence.)

Vancouver, October 7th.

Representatives of investors have figured largely among the witnesses who have appeared before the Taxation Commission to protest against existing forms of taxation. Apart from the poll-tax, all other protests come from those interested in some way in the development of the country. It is pointed out to the commission that if taxation were more equable, not only would natural resources be conserved, but manufacturing would be encouraged and greater industrial activity would result.

Messrs. E. J. Palmer, manager of the Victoria Lumber Manufacturing Company, the name under which the Weyerhauser-Humbird interests operate at Chemainus, Vancouver Island, and Mr. A. D. McRae, of the Canadian Western Lumber Company, argued for the reduction of the tax on timber limits. It is two per cent. of half the value of the stumpage, and Mr. Palmer suggested that it should be three-fourths of one per cent. of the full value of the stumpage, while Mr. McRae was of the opinion that it should be one-half of one per cent. Mr. Palmer contended that the existing rate was radically wrong and tended to hasten the depletion of the limits, for a high tax made it essential that the lumbermen get their timber to market as soon as possible, allowing no opportunity for conservation. He suggested a fire protection system of limits, similar to that followed in Idaho, the cost of which was borne jointly by owners and the government. Because of the prohibition of export of telegraph poles, a ready market for which existed in California and South America, small timber was left in the woods, and this became an added menace during the forest fire period.

Taxation on Debentures Should be Abolished.

Mr. McRae makes frequent trips to Great Britain and having successfully financed several companies there is familiar with the requirements of the market. He said that lumber was doubly taxed inasmuch as there was an additional tax of $2 per thousand feet of merchantable timber to ensure the manufacture of the timber in this province. Of this $1.99 was returned where the law was complied with, but there was difficulty in getting foreign investors to understand the reason and the procedure.

Mr. F. W. Hartley, manager of the Royal Trust Company, suggested the abolition of taxation on debentures of all kinds as a means to further attract foreign capital. He said when interest on foreign capital invested here is remitted to the lenders through local agents an assessment is placed upon the remittance. This militates against the local agent and in favor of the transaction of business outside city financial circles, for there is no assessment when remittance is made direct from the borrower to the lender.

Resolutions passed by the Vancouver board of trade were presented by the president, Mr. A. G. McCandless. These proposed the abolition of the personal property tax; the assessment of the income tax on net income only, and the exemption from income tax for the first two years of operating to all factories established to manufacture articles which at the time of starting are not manufactured in this province. Mr. McCandless expressed the hope that a Commission would be appointed to investigate the price of coal which was so high as to be out of all reason.

The Companies' Act Condemned.

The Companies' Act, objected to by various bodies on previous occasions, came in for a general scoring from several witnesses representing brokers and manufacturers' agents. It was contended that the present method of taxation was in restraint of trade and schemes were resorted to to legally evade the act. In the case of brokers, it was suggested that a smaller registration fee and an annual fee would be much better than the present exorbitant charges. The ideal method, in the opinion of Mr. Robert Robertson, would be a reciprocity of registration between the provinces whereby all but the registration fee would be abolished. Another witness stated that he had lost the business of three British companies, since they refused to pay the charges required by the act.

In giving his evidence, Mr. Palmer made mention of the test made by a Norwegian expert for by-products from timber refuse. Two cords of mill tailings were taken from the Chemainus plant, 90 per cent. of which was fir and the rest cedar and hemlock, and alcohol and other by-products were recovered to the value of $27.80 per cord. At different times, the establishment of a plant to recover by-products from mill refuse has been mooted, but none seem to develop to the stage of activity. The object of sawmill operators is to cut the lumber and clear themselves, and little attention is paid to any side-line. It was hinted that the high rate of taxation is mainly responsible for this. There is plenty of raw material for any recovery plant, and it may be had at no cost from any large mill, which at present maintains a huge burner for its consumption. Timber, too, is getting much more valuable. A well-known timber cruiser told The Monetary Times this week that it is surprising how the smaller trees are being taken into account when cruising limits. Time was, and not long since, when only the larger growths were looked at, but now trees down to eighteen inches in diameter were always counted in.

WOODLOT INSPECTION BY GOVERNMENT.

Increasing difficulty is being found in obtaining an adequate supply of hardwood lumber for the industries of Canada. The hardwood tracts of the eastern provinces for a long time have not been able to meet the demand, and in 1910, 60 per cent. of the hardwood used in Canada was imported from the United States. The United States, although with a much larger supply of hardwood on hand is also seeing that the annual consumption far exceeds the annual growth and that the virgin supply is being rapidly reduced. By practical demonstration it has been proven that waste land if planted in young hardwoods will prove a profitable investment at the end of twenty-five years or more, and will improve the productiveness of the surrounding farm land. In the eastern provinces of Canada and in Ontario, particularly, are large tracts of such land, covered at present with an unprofitable tree growth, which through being sandy, rocky, or low lying, cannot be treated as agricultural lands. The Forestry Branch of the Department of the Interior is taking a practical interest in the farmers' woodlots of Ontario, in an effort to make otherwise useless land supply hardwood lumber to an eager market, with profitable returns to the woodlot owner. Parties interested in this matter should correspond with the Department at Ottawa, which is already giving practical assistance on important tracts. Foresters will be supplied by the Department to look over tracts of timbered land, estimate the quantity of timber, advise as to what species to encourage or plant according to the locality and general conditions, and suggest a general worknig plan. Such scientific knowledge, the result of former investigations, will be of great benefit to private owners and should be sought after at once.

At the annual meeting of the Life Underwriters of the Eastern Townships recently held at Sherbrooke, Que., the following officers were elected:—President, Mr. Thomas J. Parkes; vice-president, Mr. G. J. Alexander, of Richmond; secretary, Mr. J. N. Matte; executive committee, Messrs. U. Leveque, W. S. Dresser, H. A. Short and Prentice.

WESTERN CANADA.

Improved Weather for Threshing—Winnipeg Power Plant Ready—In the Wheat Markets.

Monetary Times Office,
Winnipeg, Oct. 10th.

Bright, sunny weather has succeeded an unwonted period of clouds and rain, and threshing will go forward after more delay from unfavorable weather than the West has known in many years.

The biggest irrigation project on the continent is that half completed in this province by the Canadian Pacific. It includes three great stretches of land termed the western, central and eastern blocks. In the western are 1,039,620 acres to be reclaimed; in the central are about a million, and in the eastern are 1,156,224.

The western section is the nearest completed, and it alone forms a project as large as any in the United States, and the largest yet attempted in Canada.

Already there have been completed seventeen miles of main canal; two hundred and fifty-four miles of secondary canals, and one thousand three hundred and twenty-nine miles of distributing ditches.

Winnipeg's Power Plant Ready.

Water was turned on at the big civic power plant last week and current transmitted over the line. It will take some time yet to get the plant in thoroughly reliable working order, but the civic light and power department is confident of delivering current by the first of the year, and probably earlier than that.

The plant is by far the biggest in the West, exceeding that of the Winnipeg Electric Street Railway, and Winnipeg is bound to be even a more inviting field for new people and industries than ever before.

In the Wheat Markets.

There is a continuation of dull and easy markets, which continue to be unmoved by war scares abroad and weather developments at home. Fluctuations in values are only fractional, the market at the moment being in a rut and responding slowly to either bullish or bearish advices. The whole situation is difficult to estimate, and it is generally agreed that the market is a puzzling one. Although all markets are in a more or less sluggish condition, it is not considered they are weak, as the grain situation all over the world is held to be strong.

Outside of the American available supply, which is 12 million bushels ahead of a year ago, the world's statistics are bullish. World's shipments and the amount on ocean passage show considerable decreases as compared with this period last year, while the world's visible supply also shows a large reduction.

A Bearish View.

The other point of view is that the wheat situation has not developed as the bulls thought it would, and that world's stocks are sufficient to provide against any immediate danger of serious dearth in our wheat supplies. Europe is content to wait for developments on the Argentine crop, and until they develop importers are likely to go slow, and only contract for immediate requirements. The fact that the war news has fallen flat is held in that view to justify the belief that wheat is high enough for the time being.

Cash Demand Active.

On our Winnipeg market there was again an active demand for cash wheat, but little demand for future delivery. The movement from the country is fairly liberal, running to 700 cars a day, but less than it would be had the weather been ordinarily favorable The receipts from now on, however, should show a substantial increase. The quantity of high-grade milling wheat will be comparatively small, and a large portion of this year's crop will only be fit for feed grain.

◆

Exhibits from every part of British Columbia were displayed at the New Westminster fair. This is one of the events of the season on the coast, and the interest taken in it is shown by the fact that every available foot of space was utilized by exhibitors.

Mr. A. E. Bolton, of Kelliher, who was charged at Regina, Sask., recently with arson, has been acquitted, and the chief witness for the prosecution, Detective Crispen, of the special agency, has been arrested. The crime with which Mr. Bolton was accused was that of setting fire to a grain warehouse at Kelliher, Sask., on April 26 at 1.30 in the morning.

◆

Canada extends a hearty welcome to the Governor-General.

NEWS AND NOTES.

The capital stock of the Canada Pipe and Steel Company, Limited, has been increased from $100,000 to $300,000.

The name of the Reciprocity Mines of Porcupine, Limited, has been changed to that of Broken Hill Mines of Porcupine, Limited.

The capital stock of the Alberta Sugar Company, Limited, has been increased from $1,000,000 to $1,500,000, by the creation of 5,000 new shares at a par value of $100 each.

The Canadian Birkbeck Investment and Savings Company, of Toronto, will apply to parliament for an act changing the name of the company to the Canadian Mortgage Investment Company.

Officers elected by the North Vancouver Board of Trade for the ensuing year are: Hon. president, Mayor McNeish; president, Mr. Alex. Smith; first vice-president, Mr. E. H. Bridgeman; second vice-president, Mr. A. E. Kealy; secretary, Mr. J. W. Donaldson; treasurer, Mr. H. A. Shaw.

About a year ago, Controller James Davidson, of Ottawa, who died recently, took out an insurance policy of $100,000. At that time he was in perfect health, and regarded this rather as an investment than any other way. Mr. Davidson had only paid one full premium on the policy, which now reverts to his estate.

Mr. Jacob Switzer and his wife have been arrested at Toronto on a charge of arson. The charge that they "wilfully set fire to their premises, 470 Richmond Street," was laid by the Equity Fire Insurance Company, from which the accused tried to collect a $1,000 policy. In a sworn statement, Mr. Jacob Brennan declared that he noticed smoke issuing from the store, and on warning Mrs. Switzer, she replied not to extinguish it, for it would "make her unlucky." Bail was fixed at $2,000.

The British Columbia branch of the National Industrial Peace Association, the chief aim of which is to endeavor to peacefully adjust industrial disputes, has elected officers as follows for its first term: Honorary president, the governor-general of Canada; vice-presidents, the lieutenant-governors of the various provinces; president, Mr. F. C. Wade, K.C., Vancouver; first vice-president, Mr. F. L. Buckley, Vancouver; second vice-president, Mr. J. Wilson, junior, Victoria; third vice-president, Mr. D. Curtis, New Westminster; secretary-manager, Mr. P. H. Scullin, Vancouver. An executive committee consists of five members from each city at present represented in the association.

The prevention and cure of tuberculosis were discussed at the opening of the Dominion Convention of the Metropolitan Insurance Company, recently held in Montreal. Mr. Haley Fiske, the vice-president, in his speech, pointed out that every five minutes during the year marked the death of a policyholder and that the death rate of policyholders from tuberculosis was at the rate of one every half-hour. "And the doctors say," he added, "that this dread disease is both preventable and curable." There were also present Mr. F. O. Ayres, fourth vice-president; Mr. F. F. Taylor, fifth vice-president. Dr. Augustus P. Knight, medical director; Senator Wm. J. Tully, general solicitor; Dr. George J. Megargee, medical director; Col. John Tilton, chief agent for Canada; Mr. A. G. B. Claxton, K.C., counsel and chief agent for the province of Quebec; Mr. T. R. Ker, advocate; Mr. James E. Kavanagh, superintendent of agencies.

The Bureau of Colonization of the Department of Agriculture of the Province of Ontario is sending through the Province a demonstration car exhibiting samples of grains, roots, vegetables, etc., grown in the Great Northland—the Temiskaming Land. The car will be at the following points on the dates mentioned:—October 12, North Bay; October 13-14, Pembroke; October 16, Cobden; October 17-18, Renfrew; October 19, Arnprior; October 20, Carp; October 21, Kinburn; October 23, Galetta; October 24, Almonte; October 25, Carleton Junction; October 26, Stittsville; October 27-28, Smith's Falls; October 30, Winchester; October 31, Cornwall; November 1, Brockville; November 2-3, Perth; November 4, Sharbot Lake; November 6, Sydenham; November 7-8, Kingston; November 9, Napanee; November 10, Belleville; November 11-13, Peterboro'; November 14, Port Hope; November 15, Cobourg; November 16, Bowmanville; November 17, Sunderland; November 18, Cannington; November 20, Beaverton; November 21, Woodville; November 22, Lindsay; November 23, Kinmount; November 24, Gelert; November 25, Uxbridge; November 27, Stouffville Junction; November 28-29, Markham; November 30, Unionville. The car is in charge of two attendants who will supply all information, and the farmers of old Ontario should make it a point to visit the car and see for themselves the resources of this Land of Promise.

PROGRESS OF LAKE SUPERIOR CORPORATION.

President's Address Tells of Large Expenditures—Algoma Central Railway.

In addressing the shareholders of the Lake Superior Corporation, Mr. T. J. Drummond, president, stated that the corporation income account shows the sum of $10,000 carried to reserve. "You will find in the balance sheet," said Mr. Drummond, "under the heading suspense account, the sum of $295,163. This item has been carried in suspense pending the completion of matters pertaining to the old Pulp Company, and will later on be placed to reserve.

"The subsidiary companies earned $1,200,216 net during the past year, all of which has been applied as set out in the report. There is only one item in connection with the applications in question that might be referred to, namely, $79,787 for extraordinary repairs and additional provisions therefor.

Efficiency of Steel Department.

"We indicated in our previous report that we would endeavor to increase the efficiency of our steel department by thoroughly overhauling the then existing plant, and during the year we have made considerable progress in this respect. I am also pleased to say that about one-third of the sum in question (which has been taken from earnings) is in respect of additional provision in the nature of reserves to take care of prospective abnormal repairs to rail mill, merchant mills, etc. This policy has been commended by your auditors, and we purpose following it in the future.

"As stated in the report, owing to unforseen delays on the part of our contractors, practically no benefit was obtained during the past year from the new and extensive installations.

Some Large Expenditures.

"To remind you of what we have been doing in this connection during the last two years, I may say that to the 30th of June, 1911, over $11,000,000 has been spent on new construction and expenditure of a capital nature. You already know what our programme is, both in connection with the industries and railways, and it will interest you to hear how the $11,000,000 referred to has been expended. In round figures the items are as follows:—

Algoma Central Railway	$2,350,000
Algoma Eastern Railway	800,000
Steel industry	7,300,000
Limestone property and on account of coal properties	300,000
Helen mine, street railways, water, light and power departments, etc.	450,000

Work on Algoma Central Railway.

"The Algoma Central will connect with the Canadian Pacific by the end of this year, and work is being pushed on from the Canadian Pacific Railway north to connect with the Grand Trunk Pacific crossing the Canadian Northern Railway en route, thus giving us a direct connection over our own lines, with the three great Canadian transcontinental railways.

"Work is progressing satisfactorily on the Algoma Eastern, and we expect to have the line completed from Sudbury to Little Current by July, 1912.

"On account of the delay in completion already referred to, no benefit was obtained during the year from the heavy expenditure made in connection with our most important industry, the steel plant; but I am pleased to say that these benefits are coming to us now, and that since the opening of the present fiscal year our output has been increased and our costs reduced, and, in a word, we are now beginning to reap the benefits we have been working for during the past two years, and we have no doubt of obtaining the results aimed for.

Supply of Raw Materials.

"To an industry such as ours an independent supply of raw materials is of the greatest importance. Our limestone was made certain by the purchase of the Fiborn quarries, and our fuel by the acquisition of the Cannelton collieries and the installation of a coking plant, and now we know that our iron ore supplies, both basic and bessemer, are also assured. Mention was made in last year's report of the Magpie iron mine then under lease. During the year we have purchased this mine outright, and we have further good reports from several of our ore properties in the same district. We expect to commence shipments to the Soo from the Magpie in the early spring, and later on we look for a profitable outside market for these and other ores."

MONTREAL TRAMWAYS COMPANY

Takes Over Many Properties—Some Objections to the Deal Were Raised.

All the properties of the Montreal Street Railway Company, the Park and Island Railway Company, the Montreal Terminal Railway Company and the Public Service Corporation, will be conveyed to the Montreal Tramways Company on terms that the holder of one share of the Montreal Street Railway Company shall receive $87.50 in cash and $160 in five per cent. debenture stock and $20 in common stock of the Montreal Tramways Company. This was decided at a shareholders' meeting held last week by a vote of 61,391 shares against 3,627 shares.

Alternative for Shareholders.

Mr. J. W. McConnell stated in reply to inquiries of Honorable Mr. Ouimet and Senator Beique that arrangements would be made in the alternative to give to shareholders $250 in five per cent. debenture stock and $20 in common stock of the Montreal Tramways Company in case any shareholder desired to take the full consideration in securities of the Montreal Tramways Company.

A circular will be sent to the shareholders of the Montreal Street Railway Company giving them a certain time within which to apply for securities instead of cash on the basis above mentioned.

Opposition to Transaction.

At the meeting the opposition to the transaction was headed by Senator Beique and ex-Judge Ouimet. The latter declared he did not see why the Montreal Street Railway property should be sold to the Montreal Tramways in order to effect the consolidation and could see no advantage to the old shareholders in such an arrangement. "There is a danger," he said, "of the directors being considered by the public to have acted both for the vendors and the purchasers."

Ex-Judge Ouimet wanted to consider the proposition from two aspects: First, was the amount given in cash, debenture and common stock enough? As far as the interests he represented were concerned he would rather the company kept the money and allow the shareholders to have debentures. If the shareholders wanted to realize they could sell out. Secondly, if 20 per cent. of the common stock was distributed among the shareholders, who was going to get the other 80 per cent?

Wanted to Adjourn Matter.

"We cannot dispose of a property," he exclaimed, "worth, as I believe, from thirty-three to fifty million dollars, in five minutes or even an hour. I therefore ask that this meeting be adjourned for a fortnight, and that in the meantime a printed copy of the proposition and contracts involved be sent out to every shareholder. We have been kept in the dark, and this is the first we have heard of its nature."

In explaining the motion involving the main issue, Mr. Robert stated that the new charter obtained by the Montreal Tramways Company gave the right to make 42 year contracts with the city of Montreal and other municipalities on the island.

Consideration of Franchise Questions.

The new authority with its attendant privileges would greatly simplify the dealings between the company and the municipalities, when franchise questions were being considered, and would also enable the directors to finance the concern on a more economical basis. "There would be," he said, "no difference in the relation of the shareholders of the company to what already existed; there was no watering of the stock, and in fact, the re-organization was simply a matter of internal economy and was calculated to relieve the directors of many undesirable conditions that prevail at the present time. He pointed out that the return to shareholders would be increased from 10 per cent., as at present, to 12½ per cent. It is an absolutely square deal," concluded the president, "and as much in the interests of the shareholders as it is of the directors."

◆

The Saturday Press, of Saskatoon has turned out a new wall map of the city showing the street-car route approved by the council, and all new subdivisions up-to-date. Circles show the distance of all blocks from the post-office as centre. The Press will mail single copies of this map for fifty cents, three for one dollar. Address, Saturday Press, Saskatoon.

NEW BRUNSWICK.

Agricultural Department Issues Good Report—Alfalfa Can be Cultivated in Province—Delay in Sale of Cotton Mill.

(Staff Correspondence.)

Saint John, N.B.,
October 2nd.

The agricultural department of the province of New Brunswick reports that the crops of 1911 are a good average, and the quality of everything very high. In some parts of the province hay and grain were better than in others; but the average was good and they were harvested in excellent condition. There is a fair yield of potatoes with an increased acreage, and the crop is moving quickly at good prices. Montreal and Toronto are again a good potato market. There was a good yield of small fruits, and the apple crop both in quality and quantity is the best for years. Visitors from other provinces at the recent exhibition in Fredericton were astonished at the display and at the apple growing possibilities of New Brunswick. The farmers are getting excellent prices for everything they have to sell.

Lumber Cut May be Reduced.

The lumber cut in New Brunswick during the coming winter will not be up to the average. One large operator on the St. John River states that his cuts will be reduced to one-half. It is still uncertain what effect the imposition of a duty by the United States on lumber cut from State of Maine logs in mills at St. John will have upon that branch of the industry. It has been said that the mills would probably be removed to Maine and thus save the duty. This, would only effect the logs cut in Maine and floated to St. John; but as there are perhaps 30,000,000 feet of such logs each year, the removal of the American mills would be quite a blow to the industry at St. John.

The city council of Saint John has prepared a map asked for by the Board of Trade, showing lands owned by the city, which would be available as sites for new industries. The board has been pressing for a long time for such a map in connection with its campaign to secure new industries. Leading business men think that the city should take another step and get power to expropriate suitably located land for an industrial centre, to be sold on reasonable terms to companies or firms establishing new industries.

Delay in Sale of Cotton Mill.

The Franklin Baker Company of Philadelphia, makers of shredded cocoanut and canners of tropical fruits, may establish a branch factory at Saint John. A member of the company was recently in the city and is expected to return. While here he asked Secretary Anderson of the Board of Trade, to send him information relative to a possible site and a site is offered by the city council.

The Union of New Brunswick Municipalities will meet at Newcastle on October 11. Among other subjects the following will be brought up for discussion—"that the Union of New Brunswick Municipalities prepare a bill for the next session of the legislature, providing that taxation in the province of New Brunswick shall be raised by the means of a land tax, poll-tax and a system of business licenses." Other questions to be discussed will be civic and industrial development, bonuses or loans in aid of industrial enterprises and a Provincial school for juvenile delinquents.

There is a delay in the negotiations over the sale of the cotton mills at St. John to the Canadian Cottons, Limited. After the deal was thought to be concluded the purchasers declared the property was not as presented and decline to complete the purchase. One of the large shareholders expresses the opinion that a satisfactory settlement of the difference will be made.

Alfalfa Cultivated in New Brunswick.

The winter port season of 1911-12 will open in a few weeks, and already the city and the Canadian Pacific Railway are beginning to make arrangements at West St. John for the coming of the steamships. Last year the lines coming here were; The Canadian Pacific Railway, Allan, Donaldson, Manchester, Head Line for Irish ports, South African, Australian and Holland American. It is not yet stated whether there will be any additional lines during the coming winter. The Manchester Line will increase its sailings this season.

Sir Thomas Tait expects to have the short branch of railway from Fredericton to the Queens County Coal Fields completed within a year. He and the engineers of the company which expects to build the line were over the route last week, and development work will begin at an early date. When this branch is completed the coal fields will be connected at Fredericton with the whole Canadian Pacific Railway system.

There was a hope that the Canadian Pacific Railway would inaugurate their West India service from St. John during the coming winter, but there is still no evidence, that the company will do so. St. John merchants are much dissatisfied with the reduced service given by the present company.

At the St. John agricultural exhibition last week, there were among the exhibits five samples of alfalfa, grown from the seed with great success. A number of farmers in Kings County have been growing alfalfa for several years, and it has now been proven beyond question, that this unrivalled food for cattle can be successfully cultivated in New Brunswick. If taken up in earnest by the farmers it would enormously increase the dairying industry.—W. E. A.

A PROGRESSIVE TOWN.

Hardisty, Alta., is inviting tenders for $3,000 6 per cent. 7-year sidewalk and street debentures.

The town is an important divisional point on the Canadian Pacific Railway Edmonton-Winnipeg line, and had a population at May 31st of 523. This has since been largely increased. They have a municipal town hall and fire apparatus, which were paid for out of current expenditure, and as a village kept free of debt. The town is issuing first debentures for $3,000 for grading and small quantity of plank sidewalk, and $7,000 for cement sidewalk. The nature of the site and material is such that cement walks can be laid very cheaply.

The surrounding country is good mixed farming and the grain yield this year was particularly good. Mr. A. Mursell is the secretary-treasurer.

MUNICIPAL AND CORPORATION BONDS.

The continued demand for an earlier work of the author of "Bonds," the previous work being entitled "Money and Investments," which treated more exhaustively upon financial matters in general, encouraged the thought that smaller books, separately covering the main branches of finance, might be welcomed both by the banker and the investing public. Hence the little volume relating to bonds, their purchase and sale, and other matters of interest to all concerned in that investment field is offered as the first of a set of such books; it being the intention to follow with one treating of stocks, another of commercial paper, and so on. The contents of each will include more or less material from the former book, "Money and Investments," but abridged or extended, according to the necessities of the subjects and space available. This book is written by Mr. Montgomery Hollins and is published by the Colonial Press, of Boston. Its price is 75 cents. Copies can be ordered from the Book Department of The Monetary Times.

MR. BURY'S NEW POSITION.

Mr. George Bury, general manager of Western lines of the Canadian Pacific Railway, has been appointed vice-president and general manager of Western lines in succession to Sir William Whyte, recently retired. Mr. Bury, who has been twenty-eight years in the service of the Canadian Pacific Railway, started his railway career as a clerk in the purchasing department of that company. In 1883 he entered the railway service, and has since been successively clerk in the general manager's office and secretary to the vice-president. Following this, Mr. Bury was acting superintendent of the parlor, sleeping and dining car service of the Canadian Pacific Railway. In September, 1889, Mr. Bury was appointed superintendent at North Bay, holding that position until February 1st, 1901, when he was promoted to be superintendent at Fort William, remaining there until February 1st, 1902, when he was further promoted to the superintendency at Cranbrook, B.C.

In May, 1902, the new general manager was appointed as the general superintendent of the Lake Superior Division of the railway, holding that post until February, 1904, when he was appointed general superintendent of the same division. From February, 1904, to March, 1908, Mr. Bury was general superintendent of the Central Division at Winnipeg, and in March, 1908, was made general manager the Western lines.

CANADIAN MANUFACTURERS' ASSOCIATION

Holds Successful Convention—Retiring President Discusses Tariff Matters.

The annual convention of the Canadian Manufacturers' Association at Toronto this week was very successful. The entertainment features were largely deleted with the result that this year's gathering was perhaps the most businesslike ever held. Mr. Rowley, the retiring president, in his address discussed tariff questions and pointed out that he did not advocate a higher tariff. The association and the individual members who composed it would be ill-advised to ask for material increases in the rate of duty. The vote of the people could not be distorted into a building permit to heighten the tariff wall. It endorsed the principle of resonable protection.

MR. N. CURRY,

Elected President of the Canadian Manufacturers' Association this week.

"Other industries need protection just as manufacturing needs protection, and we should see to it tnat they get it," said the speaker. "In using the word 'protection' I mean far more than mere tariff protection. The protection the ordinary tariff affords is well enough so far as it goes, but like a cofferdam, it is intended only as a temporary aid to permit the solid work of construction to go forward. We need to study German methods to know what practical protection really means.

Notes of Practical Protection.

"Reforestation, conservation of all our natural resources, experimental farms, seed inspection, elevators, cold-storage, transportation, biological stations, fish hatcheries, geological surveys, fire ranging and research of every kind, are as essentially a part of a comprehensive, practical protective policy as the tariff ever was or ever will be. These are the kinds of practical protection we should strive most earnestly to secure and to extend, because these afford the only safe and sane basis upon which to build for the future. Our competitors to the south are realizing this, and have already outdistanced us in progressiveness of this practical policy, we must speedily follow their example or suffer the consequences of our inaction."

Favors a Tariff Commission.

The Canadian Manufacturers' Association was pleased with the prospect of the early appointment of a permanent tariff commission. Tariff-making was a science, and could be mastered only after long and patient study. In appointing a commission he thought Mr. Borden would insure a "square deal" to merchants, manufacturers and consumers. "No matter what the cost may be, no matter whose toes may be trodden upon, let us first get our tariff right and fair, then let us insure its stability, making from time to time only such slight modifications as the changing conditions of the country demand."

On the subject of transportation Mr. Rowley pointed to importance of extending and improving east and west communication, and to keep as far as possible the movement of all business in Canadian channels. Every ton of freight carried over a Canadian railway or in a Canadian vessel gave work to Canadian crews. The sight of nineteen United States feeders stretched along and across the border confirmed this view, and the rapid construction of new lines and double-tracking of old ones was necessary to keep Canadian tonnage on this side of the border. Great as the expenditure on subsidies had been, none could regret it, for that policy had brought the provinces together and had opened up the fertile plains of the west for settlement.

Want More Distributing Centres.

Winnipeg could not always expect to be the great distributing centre of the west. Other centres were springing up to challenge its supremacy. With the building of the Hudson Bay Railway, Georgian Bay Canal and Panama Canal the growth of other centres would be hastened, and a readjustment of freight rates would follow as a matter of absolute necessity.

Referring to interprovincial trade, Mr. Rowley protested against the system of licensing extra-provincial corporations now in vogue. It was contrary to the spirit of Confederation. It was disintegrating in its effect and would engender a policy of exclusion and isolation.

Discussing the British preference, Mr. Cyrus S. Birge, of Hamilton, after quoting the clause of the Grain-growers' resolution in which they asked for an increase in the preference to 50 per cent. from 33 1-3 per cent., said.—"I favor preference, but I contend that the British preference as it stands to-day is the extreme limit to which any Canadian Government should go. Any increase in existing preference with Great Britain would be an evil to the industries of Canada."

MR. R. S. COURLAY,

Elected Vice-President of the Canadian Manufacturers' Association this week. Mr. Courlay is also President of the Toronto Board of Trade.

◆

ELOQUENT OF CANADIAN PROGRESS.

In commenting upon the new volume, "Capital Investments in Canada," published by The Monetary Times, the London Financial News, which has devoted considerable space in its columns to Canadian matters, states that with some books dealing primarily with statistical matters, it is found that when the most important statistics have been abstracted the reading matter is merely a trimming for the figures. "This emphatically is not the case with 'Capital Investments in Canada.' On the contrary, you may take away the statistics (ignore them if you dislike figures) and you will still have a book brimful of interest and eloquent of Canadian progress. The value of an authoritative work on Canadian capital to bankers, financiers, investors, and industrial and commercial interests, cannot be over-estimated." The Monetary Times is glad to record the success which has met this volume, the first edition being almost exhausted.

NEW INCORPORATIONS.

Sixty-eight New Companies Were Granted Charters—Many Small Concerns.

Sixty-eight companies were incorporated last week, the total capitalization of which amounts to $11,851,000.

Only three companies have capital of a million dollars and over, as follows:—Patricia Porcupine Mines, Toronto, $3,000,000; Porcupine Angus Mining Company, Windsor, $1,500,000; and The Canadian Inland Loan & Savings Company, Winnipeg, $1,000,000.

Of the companies granted charters during the week, 52 were industrial, 6 mining, 6 land and 4 financial.

The following is a list of charters granted during the past week. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Macleod, Alta.—Macleod Flouring Mills, $100,000.

Laura, Sask.—Laura Telephone Company, $1,000.

Elstow, Sask.—Elstow Telephone Company, $1,500.

Nanaimo, B.C.—Nanaimo Theatre Company, $15,000.

Drumheller, Alta.—Newcastle Coal Company, $250,000.

Halbrite, Sask.—Halbrite Telephone Company, $4,000.

Humboldt, Sask.—Humboldt Realty Company, $50,000.

Fort William.—Kwong Tong Club; L. Soon, W. Ben, W. Mee.

Medicine Hat, Alta.—Alberta Foundry & Machine Company, $50,000.

New Westminster, B.C.—Fraser Valley Investment Company, $25,000.

Saskatoon, Sask.—Saskatoon Sand and Gravel Supply Company, $50,000.

Falding, Ont.—Rankins, $30,000; M. Rankin, F. P. Rankin, A. A. Rankin.

Regina, Sask.—City Cold Storage Company, $100,000. Industrial Centre, $60,000.

St. John, N.B.—Smith's Fish Market, $10,000; J. E. Smith, C. W. Smith, A. D. Smith.

Stoney Creek, Ont.—J. W. Dalton, $150,000; T. H. Burcher, W. J. Quirmbach, H. T. Canniff.

Orillia, Ont.—Kane and Kane, $40,000; W. Kane, J. J. Reardon, Orillia; J. Harris, Toronto.

Sombra, Ont.—Lambton Telephone Company, $40,000; R. A. Stokes, J. Workman, W. R. Stokes.

Sudbury, Ont.—Balmoral Hotel Company of Sudbury, $150,000; G. J. Valin, A. J. Manley, H. R. Day.

Yorkton, Sask.—Western Canada Foundry Company, $100,000. Great West Realty Company, $250,000.

London, Ont.—Fireproof Warehousing Company, $40,000; A. J. Clark, R. J. Webster, A. Harvey, Jr.

Kingston, Ont.—Plevna Mica and Mining Company, $800,000; T. W. Milo, C. J. Graham, R. Crawford.

Windsor, Ont.—Porcupine Angus Mining Company, $1,500,000; N. L. Griswold, A. C. Balden, G. C. Clark.

Moose Jaw, Sask.—City Construction Company, $20,000. York & Carey Agencies, $25,000. International Lumber Company, $250,000.

Edmonton, Alta.—Great Northern Land Company, $100,000. Canadian Dairies & Farm Produce Company, $45,000. Jumbo Company, $10,000. C. C. Markham Company, $10,000.

Victoria, B.C.—Victoria Shingle Mills, $10,000. Victoria Hotel Company, $10,000. Gillespie, Hart & Todd, $60,000. Victoria Home Construction & Investment Company, $50,000.

Sarnia, Ont.—Sarnia Curling Club, $40,000; A. I. McKinley, R. V. LeSueur, P. S. Robinson. Western Development Company, $100,000; R. V. LeSueur, A. I. McKinley, P. S. Robinson.

Calgary, Alta.—Maple Leaf Club, $5,000. Workmen's Co-operative Company, $10,000. L'Immobiliere du Canada, $200,000. Battleford Investment Company, $50,000. Land Traction Company, $500,000.

Winnipeg, Man. — Canadian Inland Loan and Savings Company, $1,000,000; A. Haggart, A. Sullivan, E. J. Tarr. United Electric Light and Power Works, $50,000; W. Petschel, J. A. Hamberg, H. D. Cutler.

Vancouver, B.C.—Boswell Egg and Poultry Farm, $60,000. Hotel Red Book Company, $25,000. Johnston & Thompson Company, $25,000. Tudhope Motors, $15,000. Technical Manufacturing & Supply Company, $25,000. Law Financial Company, $10,000.

Montreal, Que.—Empire Coal Company, $500,000; G. R. Drennan, F. G. Bush, H. W. Jackson. Asphalt and Supply Company, $50,000; D. W. Campbell, A. Kelly, C. G. Heward. Caledonian Realties, $400,000; E. G. T. Penny, A. H. Elder, S. T. Mains. Fit Rite Tailoring, $20,000; A. W. Murray, F. L. Martel, F. R. Chabot. Frisco Soda Water Company, $20,000; J. Durand, C. Jacob, M. Bessette. Nationoscope, $99,500; A. Demers, B. Montesand, Montreal; T. R. Perrault, Ste. Rose.

Toronto.—Porcupine Hotel Company, $200,000; W. N. Gray, W. T. Dowle, J. D. Graham. Crescent Mining Company, $100,000; H. E. Sturcke, Brooklyn; W. Hughes, New York; L. V. McBrady, Toronto. Patricia Porcupine Mines, $3,000,000; C. N. Daly, New York; E. O. Taylor, D. Henderson. Seneca-Superior Silver Mines, $500,000; R. F. Segsworth, E. M. Carleton, T. J. R. Cook. Automobile Publishing Company, $40,000; C. T. Penton, A. F. Penton, Toronto; R. F. Penton, Buffalo. Riverside Land Company, $100,000; R. Gowans, R. M. Coates, W. G. Flood. Toronto Electrotype and Stereotype Company, $40,000; R. C. Elder, J. S. Elder, J. H. Huddleston. Pemco, $100,000; R. McKay, A. Dods, M. MacDonald. Canada Hardware, $50,000; J. F. MacGregor, E. G. McMillan, H. Riley. Automobile Sales, $60,000; J. A. Moffatt, T. Orrell, A. E. Noice. McGrum-Howell Company of Canada, $40,000; G. M. Willoughby, O. H. King, A. J. Wise. Co-operative Fruit Growers of Ontario, $10,000; E. Lick, Whitby Township; R. Thompson, Grantham Township; R. A. Carey, Hamilton.

◆

KEEPING BUSINESS ON THE BOOKS.

The question of how best to keep business on the books was discussed at the recent American Life Underwriters' Convention by Mr. H. L. Sears, who for six years was secretary of the Colorado National Life Insurance Company.

Mr. Sears dealt with the causes which underly the heavy lapsation experienced by young companies. The fundamental cause, he said, is that much business is improperly written on account of hot competition and high-pressure methods, like banner months and big year-end finishes. Then the acceptance of long-time notes for first-year premiums is another factor. After going into great detail concerning his own experience with instances of abnormal lapsation and the methods employed to check it, Mr. Sears said that the keeping of business on the books depends, first, upon its being properly written, which means that it shall not be the product of high-pressure methods, which are devised for quantity rather than quality, and which encourage unscrupulous agents to misrepresent policies placed in their hands to sell or to foist upon the company's rebated business, or policies for larger amounts than the circumstances of the applicants warrant; second, the employment of only such agents as can present a clean bill of health as to character and previous record, whose representation of the company in the field will be of a sort to enhance the company's reputation and standing and create a sentiment favorable to it; third, to regulate the practice of accepting first-year premium notes by careful discrimination, based upon a sufficient investigation to determine their true work, and likewise the value of the business they are tendered in settlement of; fourth, the discouragement of the mortgaging of policies for their full loan values, or for any other purpose than to pay premiums in renewal of policies; and fifth, keeping in constant touch by publicity or other effective methods with business on the books, so that policyholders may be made to appreciate that the interest of the company in them individually did not cease or diminish after their business had been secured.

◆

Negotiations for the purchase of the Winnipeg Electric Railway by the city have been deferred. This was the decision of the special committee appointed to consider the deal.

The assessment of Waterloo, Ont., will be shown to have increased during the past year to the extent of $557,023, almost 25 per cent. of the total, and the population figures show a gain of 180, bringing the number of residents to 4,800.

Application will be made to the Dominion Parliament, at its next session, for an act to amend the act incorporating the Alberta Electric Railway Company, passed at the last session, by changing the name of the company to the Alberta Inter-urban Railway Company, and by substituting the following for the first sentence of section 3: "The capital stock of the company shall be $10,000 per mile of the total mileage of the section of its railway actually constructed, or under contract to be constructed, as such sections are defined in section 7 hereof, the total capital not to exceed $10,000,000."

LAPSES FROM A HEAD OFFICE STANDPOINT.

Ratios for Past Ten Years—Who Stands the Resultant Loss?—Some Agents Allow Their Own Policies to Lapse.

BY F. D. MACORQUODALE,

Actuary and Assistant Manager, Prudential Life Insurance Company, of Winnipeg.

While looking into the matter of filing cards, applications and other forms used in a large American company's office, I noticed a large cabinet with many compartments, and each compartment filled with policy cards. On enquiry as to what agency these cards belonged, I was told that they were the cancellations. This cabinet was almost half as large as the cabinet in which they held their in-force cards.

This same state of affairs exists in all the companies in Canada and the States. A review of the exhibitive policies, as given by the Dominion Insurance report, reveals some very interesting facts. The form in which the exhibitive policies is given shows first:—Insurance in force at first of year, to which is added:—New policies issued; old policies revived; and old policies changed and increased.

If we add together the last three columns, i.e., new business issued, revivals and increases, we get the total new business. From these figures we deduct the amount of terminations, excluding policies falling in by death and by maturity. We then find the ratio of the amount of lapses to the amount of new business issued.

Ratios for Past Ten Years.

I have made up these ratios for the past ten years, the figures given being for Canadian business done by Canadian, British and American companies. These figures are as follows:—

	Total New Business Issued:	Terminations, excluding "death" and "maturity":	%
1901	$ 73,899,228	$ 33,055,153	44.73
1902	80,552,966	37,822,772	46.96
1903	98,897,479	50,778,657	51.34
1904	105,777,418	57,673,658	54.52
1905	116,068,848	63,354,352	54.59
1906	103,193,295	68,393,912	66.27
1907	110,232,071	63,968,248	58.03
1908	116,952,374	72,435,176	61.93
1909	149,517,492	77,821,331	52.05
1910	173,869,876	89,375,591	51.40
	$1,120,961,047	$614,678,850	54.83

It might be interesting to note that the highest ratio is for the year 1901. The figures for that year are as follows:—

Total business issued	$73,899,228
Total business lapsed	33,055,153
Ratio	44.73%

and the lowest ration is for the year 1906. The figures being as follows:—

Total business issued	$103,193,295
Total business lapsed	68,393,912
Ratio	66.27%

The average for the whole period is 54.83%.

Lapsed Policy Represents Lost Money.

This enormous waste, for waste it is conceded to be, is the worry of all insurance managers. In nearly every company there is sufficient lapsed business which, if held in force, would make a company half as big as the parent concern. The great majority of the lapses are on comparatively new policies, i.e., policies on which only one or two years' premiums have been paid, and each policy lapsed represents a certain amount of actual money lost to the company. It is only when a policy has been a number of years in force that any profit accrues to the company by its surrender. This is to some extent due to the fact that during the last twenty years we have gradually increased the cash surrender values on all regular plans and policies. While the cash surrender value is increased, the commissions paid to agents, the medical fees and the premiums charged have remained relatively the same.

Here is a waste representing millions of dollars each year to the insurance companies, and in this field there is scope for some genius to solve the difficulty, and by holding these policies in force, make for himself and the insurance business generally, a name that will be carried down through all the ages.

The effect of such a large amount of lapses is shown in many departments of life insurance work. It is felt in all branches at head office, and it permeates the field work to such an extent that the very best efforts of the insurance enthusiast is necessary to dispel the trouble caused by the lapsed policy.

Financially the remaining policyholders suffer; less profits are paid than could be paid if these policies were continued in force. For instance: a twenty payment life policy issued at age 35, on which a man had paid an annual premium of $35.50, is not renewed after the first premium, on this policy the company has paid the medical fee. the first year commission to the agent, and when the cost of carrying the risk and the policy's share of head office and general expenses is charged against the policy, the total cost is usually considerably more than the amount paid by the policyholder, and this deficiency can only be made up by future premiums.

Who Stands the Resultant Loss?

When this policy lapses who stands the resultant loss? The agents, the company, and the remaining policyholders. Outside of this financial loss there is the loss to the community at large, the loss of protection to wives and children, and even more than this is the loss due to the feeling of resentment against the company and against the agent by the lapsed policyholder.

These facts being conceded, raise the question, "Wherein lies the cure?" but to solve that we must first find the cause.

While employed by one of our large eastern companies I conducted an investigation into the ratio of lapses to business issued, according to occupation. We divided occupations into about 12 or 15 different headings.

Here is a slight synopsis of the work judging from the results we were then able to obtain. We divided the occupations into something like the following:—Medical men, professional men other than medical men, proprietors, bankers, store-keepers, clerks, farmers, (that is owners), farm laborers, laborers, tradesmen, agents, females, under age.

The lapses counted were only those that occurred in one year. We also sub-divided the applications received in the same year into the same headings, and formed ratios in the same manner as those quoted for the total business reported by the Canadian government. Unfortunately, we did not pursue the investigation for a sufficient length of time, as the lapses taken should have been for several years, in order to give some dependable ratio. One fact stood out quite plainly, and that was, that the lapsed ratio was highest amongst laborers, clerks, and those whose employment returned them a comparatively small wage. The lapse ratios varied from 30 per cent. to 60 per cent.

Some Agents Allow Their Own Policies to Lapse.

One point might be here noted, that under the heading "agents" we included the policies issued on life insurance agents. These made up a large percentage of the lapses in that class, and we found that there was a comparatively high lapse ratio when considered with the applications received from the same class of men. Now we will not follow this up to try to prove that the agent earns a comparatively small income, but what is more in accordance with the facts is the saying that, "Different causes will sometimes produce the same results."

In the case of the high lapse ratio amongst insurance agents I would submit that the cause of this extraordinary condition of affairs is the fact that the agent can issue himself a policy, and when the commission is deducted, have only a small first year premium to pay. When the second year comes round it is sometimes an easy matter to write himself a second policy and lapse the first one, and so on while he is in good health. This brings up the question—Is the high lapse ratio a question of rebate? Does the man who receives some consideration on his first premium lapse his policy more easily than the man who pays the regular premium? Is this man the prey of the next agent who comes along the following year with a new policy, and a new consideration as to why he should go with the second agent?

There are a hundred and one causes, one of these that is apparent to anyone who takes even a casual glance at the records, is the fact that a great percentage of the lapsed policies are those upon which very little, if anything, is paid on the first premium.

This leads us to believe that we should improve the quality of the business written. The agent should go after the man who can pay cash. If not cash then substantial security that will result in the premiums being paid. There

(Continued on Page 1642.)

MARITIME LIFE UNDERWRITERS'

Annual Convention at Halifax, N.S., a Success—Part Time Men and the Broker—Insurance and the Public—Were Some of the Subjects Discussed.

The fourth annual convention of the Maritime Life Underwriters' was recently held at Halifax, N.S., when there was a good attendance of delegates from the different associations.

Mr. C. C. Jordan, of St. John, N.B., was chairman.

Reports from the Sydney, St. John, and New Glasgow associations showed that progress in membership and interest was being made.

The president of the Dominion Life Underwriters' Association, Mr. A. Homer Vipond, said that a big effort should be put forth to make these meetings a success; also that the official work in the association movement meant a lot of self-sacrifice, and that members should give their loyal support, one way of which would be in the regular attendance, and interest in local association meetings.

Mr. J. T. Wilson spoke of the association movement, and of the support that should be given the Dominion Life Underwriters, of the good effect and friendly feeling it created between men. It meant less unfriendly competition, cleaner business, and a better condition of affairs, all around.

Part Time Men and the Broker.

"The Elimination of Part Time Men and the Broker" was the subject of an interesting paper submitted by Mr. J. Leslie McDuff, district manager of the Canada Life Assurance Company, New Glasgow, N.S.

It seems to be lowering to the dignity of our profession, said Mr. McDuff, to have so many people dabbling in it, who have nothing to lose but all to gain by any applications they may secure. For instance, take a man engaged in some other line of business: any insurance he may write is just so much clear profit to him, while we, who devote our time and energy to this important business, lose what otherwise we would secure.

Then again, it not unfrequently happens that these men, not understanding thoroughly what they are selling effect insurance unadapted to the requirements of the applicant and in some instances, misrepresent, wilfully or not, the conditions of the benefits of the policy. Under such circumstances it is difficult to convince the policyholder that he has not been tricked into taking that which he does not want. In this way we are brought, indirectly, it may be, into discredit by the public.

It also has a tendency towards rebating, because their reputation as insurance men is not at stake. He can rebate with more or less immunity for he has his other business to fall back on should he be caught, while one of us, should he do this, would be a marked man for life, having his name heralded from one association to another.

Part time men are a doubtful factor at any time, for we are liable to put too much dependence in them for securing or assisting to secure a fair amount of business. They are men whose time is taken up with other interests outside of life insurance and hence they are too busy attending to those interests to devote the necessary time required for writing insurance.

The benefits of life insurance are so widespread and far-reaching on the national welfare of our country that it is a pity that anyone should be deterred from taking insurance by the thoughtless and desultory manner of part time men, who displease the public by their want of knowledge of the subject.

Insurance and the Public.

Do you ever stop to ask, what does the man on the street and in the shop and in the office know about life insurance business? What is his attitude? Does he understand the principles underlying the business of life insurance? Has he any false ideas? Any misconceptions? asked Mr. R. V. Harris, K.C., of Halifax, N.S., in his paper "Insurance and the Public." Some people still exist whose opinion about the life insurance business is that a life insurance company is a sort of gambling concern, a Monte Carlo, an incorporated bookmaker, a clearing house for bets, continued Mr. Harris.

A man is persuaded to insure his life in say the North Pole Insurance Company. He regards his policy as a contract under which he must die to win. If he dies before the end of the first year he beats the company. If he lives 10 or 15 years he begins to feel that the company is getting the better of him.

It is a gamble, a speculation. More than that, he regards all life insurance companies as leagued together against him, a sort of life insurance trust, fixing their rates as competing railway companies sometimes do, or as fire insurance companies do. He regards a life insurance agent as a rapacious individual going about seeking whom he may devour, one who cannot be satisfied except by an application.

If you try to knock reason into his head and make him talk sense, he admits that he went into it with his eyes open and he says he was told he could get out of it any time, with a paid-up policy or with the cash surrender value. He was told that he should have protection for his family and that caught him, but he will still adhere to his first belief, that he is in a speculation and not a business proposition built on sound and scientific business principles.

What does he know about the principles underlying the contract? What does he know about the scientific basis, the mathematical foundation of the transaction? Has he ever heard of actuarial science, and would he run for a dictionary when you mentioned that?

Beginning of Life Insurance and Actuarial Science.

My friend is merely going through the experience that life insurance itself has gone through, as will be seen if one glances over the history of insurance, its origin and the origin of actuarial science, and in order the better to understand the point of view of the imaginary individual, and to explain the viewpoint of my friend, it will perhaps be of interest to briefly sketch the beginning of life insurance and actuarial science.

The earliest known policy of life insurance was made in the Royal Exchange, London, on June 18th, 1583, for £383 6s. 8d. for 12 months, on the life of William Gibbons. Sixteen underwriters signed it, each severally for his own share, and the premium was 8 per cent. From these details it is evident that these first underwriters regarded the transaction as a gamble. The age of the insured was not referred to nor was it even considered in fixing the premium. Gibbons died on May 29th, 1584, nearly a year later, and the underwriters refused to pay, alleging that twelve months meant twelve lunar months of 28 days each, and that the policy had expired, but the courts decided against them and the underwriters had to pay up and look happy.

That was the first life insurance transaction, and it was typical of all life insurance contracts for the next one hundred years. Every transaction was regarded as a mere wager, at least on the part of the insurer. It could not be otherwise until the principles of mathematical probability and the uniformity of large averages were understood and trusted. While the popular mind to-day is far beyond this conception of life insurance, there are some people who might say that the principles underlying this first life insurance policy are the same to-day as they were 325 years ago.

No Scientific Basis for Business.

At that time there was no scientific basis for the business. Premiums were fixed, not by computation from known facts or reasonable assumptions, but by guess and the higgling of the market. Only the competition of capital checked the extortionate demands of underwriters.

Guesses at the probable length of life for the purpose of valuing or commuting life estates or annuities were ridiculously unscientific and arbitrary. For instance, in 1540 the British parliament enacted that an estate for a single life should be valued as a lease of seven years, one for two lives as a lease of fourteen years, and for three lives as a lease of twenty-one years.

Later the social need for life insurance began to express itself. In 1699 "The Society of Assurance for Widows and Orphans" was founded in London, a crude form of what is now called an assessment company.

It was proposed that two thousand healthy men under 55 years of age should each pay 5 shillings entrance fee; 1 shilling quarterly for expenses, and 5 shillings at the death of another member, and that at his own death his estate should receive £500, less 3 per cent. On default in any payment his interest was forfeited. Although the society lasted only about 11 years, the economic significance of this society lies in its distinct recognition of the principle of association for the distribution of losses.

The fraternal and benefit societies and assessment organizations of to-day are the lineal descendants of this Society of Assurance for Widows and Orphans founded in 1699. The principles underlying such an organization are easily grasped, and in the popular mind there is no misunderstanding, yet the grasp of these principles alone is not by any means a complete understanding of the underlying principles of the modern old line company life insurance business.

About this time the first glimpse of scientific principles is obtained, although to appreciate that fact it is necessary to retrace our steps about fifty years. About 1650, the Cambridge tables had been proposed as a remedy for the inequity of the pure guesswork of the old rule of valuing life estates; another valuation, however, just as fanciful was proposed and a single life was estimated at ten years, two lives at nineteen years, and three lives as twenty-seven years. No distinction of ages was recognized, and the results were ridiculous and worthless. The foremost minds of the day had as yet no apprehension of the true method of reasoning on the subject.

The earliest crude suggestion of a table of mortality was made in 1661 by John Graunt, of London, a haberdasher and train-band captain, who recognized the principle of uniformity in large groups of vital and social facts, and actually prepared, from the mortality registers of London, what he called a table showing how many out of every hundred die within the first six years of life, how many the next decade, and so for every decade till 76.

From Halley's time the progress of the theory has been in three directions:—First.—In accumulating and analysing facts preparatory to the construction of trustworthy tables. Secondly.—In extending the inferences from such tables and multiplying their applications to the needs of practical life, and, thirdly—in facilitating the calculations which these applications require.

These results have been embodied in improved tables such as the French Tontine tables of 1746, the Northampton tables of 1780, and the Carlisle tables of a later date.

The Principle of Incorporation.

Before proceeding further we should note that the conception of a corporation as an artificial person, holding property and carrying out obligations notwithstanding the death of individuals, was gradually gaining recognition.

Experience had shown that the corporate form was the obvious remedy for the chief difficulties in the practice of insurance. Single risks were but speculative wagers; a great number must be taken together to obtain a trustworthy average. A larger capital than the average private fortune was demanded as a guaranty and this capital must not be exposed to the dangers of trade, but set aside for the special purpose. Individual underwriters may die or fail; only a permanent institution can be trusted in long contracts.

The principle of incorporation was first tried and approved in marine and fire insurance, and about 1725 it seemed to be the most natural step to take to incorporate a life insurance company.

The formation in 1762 of the Equitable Society of London, was the first attempt to do an insurance business in which the premiums were accommodated to the ages of the insured on a reasonably scientific basis.

Forms of policies, essential differences, special conditions and privileges, technical terms have multiplied, and many a policy is bewildering even to an insurance agent. In spite of the efforts of many companies to get away from legal verbiage, and to express the conditions of a policy in plain English, I think there is still room for improvement and simplification. There is still room for education respecting the scientific basis upon which life insurance is founded.

Must Educate the Public.

This matter of educating the public to a proper appreciation of insurance problems and matters is vitally important to the insurance business itself. Not only because it means more business, when people understand the underlying principles of the business, but it means their support and appreciation when insurance companies need that.

Take, for instance, the question of taxation of life insurance companies which is fast becoming a most important question and more prominent day by day. In connection with the taxation of policyholders or premium income, a former president of the Dominion Life Underwriters' Association, Mr. E. R. Machum, of St. John, N.B., said:—"The two functions of the government are to encourage among its subjects, that which is just and right, and to prohibit anything that it wrong and injurious; therefore, that which elevates intellectuality and morality and frugality should have its support and encouragement. If the man who assumes the responsibility of rearing a family can be induced to recognize the wisdom and duty of making provision for his own, he becomes a good citizen, an important factor in the up-building of a good government. The man who is indifferent to making such provision belongs to that class who graduate into our poorhouses, or occupy our police stations or fill our jails. Life insurance in Great Britain is much older than in this country. Economists, philanthropists, and statesmen have devoted much time to observing its effects upon the social order, and the conclusions reached may be inferred from several legislative acts. According to Section 54 of 16 and 17, Vict. Cap. 34, every policyholder in a life or accident company, who may be liable for an income-tax, is entitled to deduct, in his return of income to the government, the premium or premiums paid by him under any policy or policies of insurance on the life of himself or his wife, to the extent of not more than one-sixth of his whole income. Such deduction must be claimed in the usual schedule or returns of income furnished by him to the government assessors. The purpose of such exemption is obvious. It is to encourage persons through the institution of life insurance to make provision for their dependants, and to prevent them from becoming a public charge.

Indirect Taxation in Burdensome.

"The life insurance companies in Canada paid last year, in taxes, the sum of $267,721, or 1.2 per cent. of gross income. This would have brought at the average age of thirty $11,040,031 additional participating insurance, or the dividends of the companies to their policyholders would have been correspondingly greater. Nearly all life insurance is mutual and participating, and to tax it is to tax thrift and good citizenship. Laborers, producers and consumers pay nine-tenths of all taxes, and among these may be found the major portion of policyholders; therefore, when life insurance is taxed, their burden is doubled and trebled because such a tax is a tax imposed indirectly upon them. Each insured person who pays a premium to provide protection for his dependants, to prevent them from becoming a charge upon the state, is really paying a tax to the state, the same as uninsured persons do for the support of those who have become charges upon it, and it is therefore unjust to tax his life insurance, for that is imposing a tax upon a tax. If policyholders must be taxed, let it be directly, for indirect taxation is the most burdensome form, and has been condemned by economists and statesmen alike."

Legislators sometimes reflect the opinion of the public at large, and in levying taxes on insurance corporations they are doing what many a jury has done in accident cases in our courts, simply salting the company because it has a capital of several millions, plenty of assets, a surplus and a reserve. But while it is the shareholder who pays the verdict it is the policyholder who pays the tax on premium income, and it is iniquitous, inequitable and indenfensible.

To sum up. 1st.—The public at large do not properly appreciate this point about the taxation of policyholders.

2nd.—The public at large has not got the right or the complete conception of the scientific principles underlying life insurance business.

What is the remedy? Education. Articles on these subjects in your insurance papers and magazines will not bring about the desired change. For you are speaking only to the people who know. It's like the preacher who exhorts those who do go to church about those who remain away. You must get at altogether another class—the outside public.

◆

LUMBER MILLS TO BE CLOSED.

Far-reaching changes were decided on at the conference held in Calgary by the Coast Mountain Lumbermen's Association. It was decided that they should close down a large number of their mills this coming season.

Another important change agreed upon was that the lumber stock in the various mills will be sold through one office to be located in Calgary. Possibly the Mountain and Coast associations will have separate offices, but there will not be more than two selling agencies at the outside. As the business has been conducted for the past year there has been some cutting in prices. If a mill had a large stock of one particular line on hand it would tell its travellers to make a cut of $1 to $3 a thousand on this particular article. Under the present arrangement all competition is to be removed. The dealers can only buy from the head office in Calgary and only at one price. The effect of the new arrangement will also be to bring all the mills into the association.

The trade for the past year has been somewhat annoyed by the encroachment of the American mills. It was decided that the association would meet all cuts that the Americans might make. In the meantime an effort will be made to have the Government put a duty on American lumber that will give protection in the rough lines of lumber in which Canadians have to meet the keenest competition at present.

The vote to grant a franchise to the Electrical Power Company, Limited, a company which controls twenty or more power concerns in the Trent district, was carried at Lindsay, Ont., recently.

Owning an Interest in One of the Most Valuable Blocks of Real Estate in Montreal

An opportunity of owning such an interest is afforded the Bond Holders of the City Central Real Estate Company, Limited.

The property owned by the Company—the value of which is greatly in excess of the bond issue—is situated on two of the main thoroughfares (Notre Dame and St James), in the heart of the commercial district of Montreal.

The entire building is leased under favorable terms for a period of ten years. At the end of that time the Company will be in a position to benefit by the increased rentals that should then prevail.

The Board of Directors, composed of successful business men, were quick to appreciate the value of the Company's holdings, and who, personally, are large holders of the Company's securities.

The Board includes:—Mr. Rodolphe Forget, M.P., President, Banque Internationale du Canada; J. N. Greenshields, President, Director Banque Internationale du Canada, Quebec Railway, Light & Power Co., National Bridge Co.; J. W. Pyke, President Phoenix Bridge & Iron Works Co., Limited; H. A. Lovett, K.C., Director Montreal Street Ry. Co., and H. W. Beauclerk, Managing Director of Transportation Building Company, Limited, Director and Treasurer National Bridge Company.

Subject to prior sale we are offering a small block of the 5% bonds of the above Company with attractive bonus of Common Stock. The Bonds constitute a very attractive investment while the Common Stock received as a bonus will enable the holder to share in the full enhancement in the value of the property.

Price: 95 and interest with 25 per cent. bonus of Common Stock.

Special Circular giving full particulars mailed on request.

SPANISH RIVER PULP AND PAPER MILLS.

The property of the Spanish River Pulp and Paper Mills consists of practically 6,000 square miles on the Spanish River, well covered with the best grades of spruce, jack pine, balsam and poplar, which under agreement with the government can be cut and used for pulp and paper manufacturing at a cost of 40 cents per cord for spruce, and 20 cents per cord for the other woods named.

The company have made arrangements with the government that the jack pine timber on their limits was to be manufactured into timber at $2.50 per 1,000 feet b. m. The growth of the paper industry at Espanola, Ont., has not been rapid. Six years ago the first pulp was made, and last week a party representative of financial interests in Toronto and Montreal inspected the plant and particularly the paper mill in course of construction.

The plant as it is being planned at present, will have a capacity of one hundred tons of news print per day. Everything has been planned under expert guidance and promises unusual efficiency of operation.

All the buildings have been carefully designed in order to secure the minimum ratio of operating cost. While the nominal daily output of the paper mill is placed at 100 tons, provision has been made for the installation of two more paper machines and for the erection of a sixty-ton chemical plant. Similarly the plans of every building have been drawn with a view to economical expansion in the future. In the construction the results of expert technical advice are always in evidence. Many of the operations from the handling of the rough timber to the despatch of the finished product present labor and cost savings devices which are unique. Being a less technical process this is perhaps more clearly exemplified in the wood-handling arrangements, and especially in the slashing department which, with its simplicity of design, has reduced the cost of taking timber from the water, sawing it into two-foot lengths and storing, to fifteen cents per cord, including all machinery maintenance charges. Although less discernible because of their necessary complex character improved methods such as these seem to permeate the entire plant.

TENTH ANNUAL MEETING OF THE

OGILVIE FLOUR MILLS COMPANY, LIMITED

Company Submits Satisfactory Statement——Mr. Chas. Chaput and Mr. George E. Drummond Elected Directors

STATEMENT SHOWS COMPANY IN STRONG POSITION

Montreal, October 12th.—The tenth annual meeting of the shareholders of the Ogilvie Flour Mills Company, Limited, was held at the head office of the company here to-day, Mr. C. R. Hosmer, President, in the chair.

Among those present were: Mr. F. W. Thompson, Sir Edward Clouston, Bart.; Sir Montagu Allan, C.V.O.; Mr. H. S. Holt, Mr. Chas. Chaput, Mr. Shirley Ogilvie, Mr. W. H. Evans, Mr. Henry Joseph, Mr. C. R. Black, Mr. T. H. Christmas, Mr. H. R. Drummond, Mr. Guy Drummond; Mr. S. A. McMurtry, Treasurer; Mr. G. A. Morris, Secretary.

Mr. C. R. Hosmer, the President, submitted the following report, and moved its adoption:—

"A balance-sheet showing the assets and liabilities of the company, together with a statement of revenue and expenditure, is submitted.

"The company's accounts have been audited by Messrs. Creak, Cushing & Hodgson, chartered accountants, whose report is submitted herewith.

"The company's oatmeal plant at Winnipeg, which was being enlarged last year to meet the increasing demand for that feature of the business, has been completed.

"The company's various mills, elevators and other properties are being maintained at the highest state of efficiency, and are doing most effective work.

"The usual dividends have been paid during the year on the preferred and common stock.

"All of which is respectfully submitted."

Mr. F. W. Thompson, Vice-President and Managing Director, in seconding the report, said:—

"In view of the erratic fluctuations in the prices of wheat during the past season, I think we have every reason to feel gratified with the financial results for the year.

"Your management have considered it advisable to carry over a large supply of last year's high-grade wheat in order to secure the maintenance of the high standard of the company's various brands, as owing to the exceptionally late harvest in our Northwest there is much uncertainty as to the grading of the new crop. While it has been impossible up to the present time to arrive at any accurate estimate of the total yield it promises to be the largest on record, but unfortunately the percentage of high-grade wheat will be limited.

"Your company now own and operate one hundred and nineteen interior elevators in the Northwest, all of which are located to the best possible advantage. The enlargement of your oatmeal plant at Winnipeg referred to in our last annual report has been completed and is in successful operation.

"Following our usual policy of maintaining the highest possible degree of efficiency in your mills, extensive improvements have been carried on during the year, making the entire plants the most up-to-date and thoroughly equipped on the continent. While all ordinary repairs and the replacement of machinery necessary to maintain this standard have been paid for out of earnings your management and directors decided to transfer the sum of $75,000 from property reserve account to the credit of general plant account and also to apply the sum of $250,000 from the same source in reduction of good-will, trade marks, etc., notwithstanding the fact that the large holdings of real estate in connection with your company's properties at Montreal, Fort William and Winnipeg have very greatly appreciated in value since the organization of the company.

"I am pleased to inform you that this company was signally honored in December last by receiving the royal appointment of purveyors of flour to his Majesty King George the Fifth."

The following gentlemen were elected directors of the company for the ensuing year:—Mr. C. R. Hosmer, President; Mr. F. W. Thompson, Vice-President, and managing director; Sir Edward Clouston, Bart.; Sir H. Montagu Allan, C.V.O.; Mr. H. S. Holt, Mr. Charles Chaput, Mr. George Edward Drummond, Mr. Shirley Ogilvie, Mr. W. A. Black.

And the following officers were appointed:—Mr. W. A. Black, General Manager; Mr. S. A. McMurtry, Treasurer; Mr. G. Alfred Morris, Secretary; Mr. J. R. W. Papineau, Assistant Secretary; Mr. F. H. Anson, General Superintendent; Mr. F. H. Thompson, Assistant Superintendent; Mr. R. B. Dobell, Managing Director; Mr. George A. Coslett, Manager, Fort William; Mr. A. E. McCuaig, Sales Manager, Province of Quebec; Mr. Henri Morrill, Assistant Sales Manager, Province of Quebec; Mr. J. E. Weeks, Sales Manager, Province of Ontario.

Messrs. Creak, Cushing and Hodgson were appointed auditors for the coming year.

Auditors' Letter.

Montreal, Sept. 22, 1911.

To the President and Shareholders, The Ogilvie Flour Mills Company, Limited, Montreal:—

Gentlemen,—We beg to report that we have audited the books of the company in Montreal, Winnipeg and Fort William for the year ending 31st August, 1911, and that the balance statement of that date which we have signed is a correct exhibit of the company's affairs on that date. The inventories of stocks on hand are certified by the superintendents of the various plants and valued, as usual, on a safe and conservative basis.

Ample provision is made for all contingencies in respect of customers' accounts, and all expense for repairs and maintenance is charged against earnings.

Respectfully submitted,

(Signed), Creak, Cushing & Hodgson,

Auditors.

BIG BOND SALES AND ISSUES.

Boston Firm Interested in Montreal Tramways—New Bond Issue.

Messrs. Harris, Forbes & Company, together with N. W. Harris & Company, of Boston, and Harris Trust & Savings Bank, Chicago, have purchased $10,000,000 Montreal Tramways Company first and refunding mortgage 5 per cent. bonds. The proceeds will provide the company with funds in connection with the purchase of the property of the Montreal Street Railway Company and retirement of part of the latter company's bonds. Montreal Tramways Company will own all the street railway properties in Montreal. It is said that outside of issues of Canadian railroad bonds this is the largest block ever sold by a Canadian corporation, and is one of the largest pieces of Canadian financing placed in the United States. The bonds will be offered for sale in the near future.

Messrs. W. A. Mackenzie & Company purchased the $10,000 high school 5 per cent. 20-year debentures of Dunnville, Ont., at a private sale.

Demands for British Capital.

The London Economist's figures show detailed comparisons of demands upon British capital in the shape of new capital applications.

	1907.	1908.	1909.
First quarter	£49,428,600	£45,287,900	£64,238,400
Second quarter	40,304,600	64,385,600	56,835,200
Third quarter	15,631,400	31,541,800	27,694,400
Fourth quarter	18,265,400	50,988,400	33,588,800
Total	£123,630,000	£192,203,700	£182,356,800

	1910.	1911.
First quarter	£99,355,600	£61.245,000
Second quarter	88,721,400	56,238,800
Third quarter	28,111.600	14,914,000
Fourth quarter	51,250,500	....
Total	£267,439,100	£132,397.800

The more restricted demand for British capital, it may be recalled, is quite in consonance with conditions on this side. The September distribution of new securities amounted to only $37,520,000, which is the small record for recent years.

The authority granted to the council board of Springside Village, Saskatchewan, on September 7th, to borrow $2,500 for permanent improvements, has been cancelled.

New Bond Issue.

The Canada Securities Corporation is offering the balance of an issue of $320,000 of 6 per cent. collateral sinking fund gold bonds of the Mexican Mahogany Corporation, Limited. The price is par and accrued interest from September 1st, with a bonus of 50 per cent. common stock. The company attracts special attention because of the probability that it is the only concern in Canada owning and operating mahogany timber limits. These are known as the Schindler Limits and are situated at the junction of two of the largest navigable rivers in South Mexico. The grade of mahogany is said to be high and the shipping facilities good.

The company has a capital of $1,000,000, of which $750,000 is issued. The authorized bonds are $600,000, of which $520,000 are issued, $200,000 being in escrow.

The directors of the company are Messrs. Playfair, president; L. E. Read, vice-president; Rodolphe Forget, M.P., W. G. Morden, T. P. Birchell, C. J. Doherty, Edmund Bristol, C. J. Booth and Frank Carroll.

◆

A new firm of chartered accountants, Messrs. Marwick, Mitchell, Peat & Company, has been formed to consolidate the business of the firms of Marwick, Mitchell & Company, and W. B. Peat & Company. The latter firm conducts a world-wide business with head offices in London and the former firm has offices on this side of the Atlantic, as well as in Scotland, England and France. Mr. W. B. Peat, who thus becomes a member of the new firm, on two occasions was the president of the Institute of Chartered Accountants in England and Wales. Mr. David S. Kerr, C.A., is one of the partners of the firm and resides in Montreal. Such a combination should afford unusual means for reporting upon accounts, in cases where new securities have to be floated in Great Britain or elsewhere. The new firm will open offices in Vancouver and San Francisco, at an early date.

ALBERTA PROVINCE SUES BANK

For Delivery of Proceeds of a Six Million Dollar Bond Sale in Connection with the Proposed Alberta and Great Waterways Railway.

The hearing of the action brought by the Province of Alberta to compel the Royal Bank to deliver $6,000,000, the proceeds of the sale of Alberta & Great Waterways Railway bonds, opened before Mr. Justice Stuart at Edmonton this week. Judgment was reserved.

This action, it will be recalled, arose from the flotation in England in December, 1909, of $7,400,000 5 per cent. 50-year first mortgage bonds of the Alberta and Great Waterways Railway Company. The securities were guaranteed as to principal and interest by the Provincial Government of Alberta. The issue was made by the London branch of Messrs. J. S. Morgan and Company. Mr. W. R. Clarke, a banker of Kansas City, was understood to be chiefly interested. It was proposed to build the road from Edmonton, north-east of the Athabasca River, to Fort McMurray, a distance of about 350 miles. Of the total issue $400,000 covered Edmonton terminals, but the bulk of the loan was based on a guarantee of $20,000 per mile on the main line and branches. The bonds, issued at 110, were rapidly subscribed. Criticism was heard in London to the effect that the Alberta Government were ill-advised in their guarantee, which worked out at about 4½ per cent., when it might just as well and as satisfactorily have been done upon a 4⅛ basis.

Cabinet Crisis Precipitated.

A crisis in the Alberta Legislature occurred as a result of the provincial government's efforts to force the railroad agreement. The cabinet was dissolved and a royal commission appointed to investigate the deal. The commission's report was non-committal, and the commission failed to take the evidence of most important witnesses, including Mr. Clarke, of Kansas City, the chief promoter. The provincial government then decided to cancel the railroad agreement, alleging that the company had defaulted in its bond interest. The money raised by the sale of the railroad bonds in London was on deposit in three banks in Edmonton, the bulk being with the Royal Bank. The government now seeks this money, proposing to utilize it for general public improvements within the province.

Claim of the Province.

The Province rests its claim on the act of the Legislature of December, 1910, which, specifying defaults as to construction and payment of interest on the part of the company, declares that the bond receipts shall become part of the general revenue of the Province.

The defendants deny that there has been any default in any of these particulars, and claim that if there has been, it is due to the action of the Province itself. They further state that the defendant bank and railway company are not subject to the Legislative authority of Alberta, and that the fund of six million dollars was not, in fact or in law, situated in the Province.

Wants a Non-Suit.

Mr. Bennett, counsel, applied for a non-suit, on the grounds that the Act of 1910 was ultra vires of the Province, that it was ineffective to accomplish the purpose aimed at, and that there had been no compliance on the part of the plaintiff with the terms stated. The judge reserved decision on this motion.

Considerable time was occupied with the production of documents. The local managers gave evidence as to the drawing of the checks for the bond money, while ex-Premier Rutherford and several of the Government officials were also called for brief examination.

Mr. R. B. Bennett, for the Royal Bank, contended that the act of the Province was an interference with the banking business, just as much as one declaring accounts of private citizens to be part of Provincial general funds. The Dominion rights were fully protected in the lien which the bank had taken on the railway funds. If the bank had allowed the money to be taken, without protest, it would have been liable to action at the time limit.

Bank not Wilfully Holding Money.

The bank had not wilfully withheld the money, so that if judgment in this action should be for the Government interest at least should not be allowed on funds from the date of refusal of the Government check. The men who had loaned the money had done so for the purpose of building a railway line which was part of the security. This action purported to destroy the contract as established under Dominion law.

Arguments of the Province.

Mr. E. P. Davis for the Province, insisted that the Legislature was as powerful in its sphere as the Imperial Parliament. The Legislature dealt with property and civil rights clearly within the Province's jurisdiction. Whether the Legislature was right or wrong in confiscation of the railway funds to protect them from being squandered, was for the electors to say. If it wished it could also have repudiated the bonds. Whether the recital in this was true or not did not affect the validity of the stock, but it had not been shown that these recitals were false. There was no evidence of the commencement of construction that could be admitted by the court.

What the Company Says.

Mr. J. H. Moss, representing the railway company, claimed that an arrangement had been made with the full approval of the Government by which the company agreed with the bank to secure the deposit of the six million dollars with the latter in return for which the bank was to make advances to the company. Large advances had been made on the strength of this agreement. The only security that the Morgan firm has is an interim bond given by the company, for which the firm had paid the money in question. This had been deposited in the bank, whose creditor was the company, not the Province. The Provincial Treasurer was simply a trustee. Anyone else might have been appointed for the purpose. All the transactions had taken place outside the Province, and were therefore out of the reach of the Legislature.

◆

DEBENTURES AWARDED.

Hastings, Ont.—$6,000 5 per cent. 20 years, to Mr. R. Stalker.

Thamesville, Ont.—$3,500 5 per cent. 15 instalments, to Messrs. National Finance Company. Toronto.

Moose Jaw S.D.—$125,000 4½ per cent. 30 instalments, to Dominion Securities Corporation, Toronto.

Clinton. Ont.—$11,000 4½ per cent., due 1930 and 1941, to Messrs. National Finance Company, Toronto.

Indian Head, Sask.—$18,215 5 per cent., due 1926 and 1046. for public utilities extension and sidewalks. awarded to Messrs. Æmilius Jarvis & Company, Toronto. Indian Head is one of the oldest towns in Saskatchewan. and is situated on the main line of the Canadian Pacific Railway, about forty miles east of Regina. The town owns its own waterworks and electric light plants, and showed a net revenue over same last year of nearly $10,000. The net debt of Indian Head is but $15,100. The government and forestry farms are situated at Indian Head.

ONTARIO TOWN DEBENTURES

Details and prices on application.

Brent, Noxon & Co.
49-50 Canada Life Bldg., Toronto, Can.

The Canadian Pacific Railway has come into the market for 25,000 tons additional of rails for early shipment. As the Dominion rail mills are overflowing and the rails are wanted for early shipment, the probability is that the contract will again go to Chicago mills, which have recently rolled 30,000 tons for Canada.

In 1910 phosphorus matches cost Manitoba fire losses amounting to $275,000. Electric wiring is one of the recent causes of fires adding to the cost of our ash-heap, and so is the neglect of proper care of rubbish accumulating in basements and elsewhere. The increased use of gasoline and its careless handling is another factor to augment the loss ratio and increase the insurance rate.

Work on the pulp and paper plant of the Powell River Paper Company is about completed, and the initial run is expected to take place this month. Officials are: Messrs. D. F. Brooks, president; M. J. Scanlon, vice-president; P. R. Brooks, secretary; and N. R. Lang, general manager. These gentlemen are from Minneapolis, and made much money operating in lumber and pulp enterprises in the middle northern states.

DEBENTURES FOR SALE.

TOWN OF GRANUM.

Tenders will be received by the undersigned up to 6 o'clock p.m., October 31st, 1911, for the purchase of $2,500.00 debentures, repayable in 20 equal annual instalments, with interest at the rate of 5 per cent. per annum. The issue is for the purpose of grading and draining the streets of the said town. Also tenders will be received by the undersigned up to 6 o'clock p.m., October 31st, 1911, for the purchase of $1,500.00 debentures, repayable in 20 equal annual instalments with interest at the rate of 5 per cent. per annum. The issue is for the purpose of providing further fire protection for the said town of Granum. Tenders to be sealed and marked "Tenders for Debentures."

The highest or any tender need not necessarily be accepted.

Granum, Alta. C. E. Cameron,
Secretary-Treasurer Town of Granum.

British Columbia Mortgages

In placing any surplus funds your first thought should be—security. The careful investor is wary of mining and oil shares, because no security is usually given.

No safer form of investment exists to-day than first mortgages. Ours are placed on improved city properties in Vancouver and farms in Saskatchewan and Alberta. Our valuations are made by experts and are very conservative.

No loan is placed for more than 50% of appraised value. All loans are approved by board of directors. The company insists on the payment of a portion of principal at end of third year, interest payable half-yearly. Titles are searched and certified by our solicitors.

We guarantee to net you SIX PER CENT., making all collections and attending to minor details without charge. Let us tell you more about our Guaranteed First Mortgages.

SEPTEMBER FIRE LOSSES.

The fire losses in the United States and Canada during the month of September, as compiled by the New York Journal of Commerce and Commercial Bulletin, aggregate $11,333,250, as compared with $11,700,000 for the same month last year. The following table gives a comparison by months for this and the two preceding years:—

	1909.	1910.	1911.
January	$22,735,000	$15,175,400	$21,922,450
February	16,131,000	15,489,350	16,415,000
March	13,795,400	18,465,550	31,569,800
April	19,345,300	18,091,800	17,670,550
May	17,360,400	18,823,200	21,422,000
June	14,435,900	13,183,600	20,691,950
July	15,830,900	26,847,900	25,301,150
August	16,323,000	21,570,550	12,662,650
September	15,043,000	11,700,000	11,333,250
Total 9 months	$151,099,900	$159,347,350	$178,988,800

The Monetary Times estimate of Canada's fire losses during September amounted to $1,123,550, compared with $920,000 for August and $894,125 for the corresponding period last year.

◆

REAL ESTATE INVESTMENTS.

The formation of the Co-operative Investments, Limited, was with the object of affording the small investor a safe and easy means of reaping his share of the profits created by the increasing values of Winnipeg city and suburban property. This is stated in the company's prospectus. This corporation has a capital stock of $50,000, divided into 500 shares of $100 each. The directors are: Messrs. W. P. Dutton, A. H. Oakes, T. E. Moffatt, S. H. Green, and H. A. Argue, all of Winnipeg. In the formation of the company no bonus stock was allowed and no commission is paid by the company for the sale of stock. There should be success resulting from a scheme of this kind, the governing factors naturally being conservative and honest management and judicious selection of real estate.

WANTED

Advertisements under this heading will be accepted hereafter at the following rates: "Position Wanted" advs., one cent per word each insertion; "Men Wanted" advs., two cents per word each insertion; "Agencies Wanted" advs., two cents per word each insertion. A minimum charge of fifty cents per insertion will be made in every case.

A large and responsible Western Land and Investment Company has sold over a million dollars of First Mortgages to private investors, and has had no defaults either in principal or interest. It would undertake to guarantee to those having money to invest a net return of 6% on the best security the country affords, and the guarantee of company having a capital and surplus of over half a million dollars. Address Box 301, Monetary Times.

WANTED.—Immediately, two special agents; one for Saskatchewan and one for Manitoba, by a Canadian fire insurance company. Must have had previous experience in cultivating field. In replying give past experience, references and salary expected. Reply Box 431, Monetary Times Office.

WANTED:—Real estate and insurance agent opening office in Moose Jaw wants good board fire company and loan company. Five years' experience, and well acquainted in city. Good references. Apply Box 437, Monetary Times.

WANTED.—By up-to-date real estate loan and insurance firm, city agencies or provincial managership of well known board fire insurance company, and exclusive agency for good loan company. Good business guaranteed. Bankers' references. Write S. &. C., Box 541, Calgary, Alta.

PORT MANN.

The Pacific Terminal Port of the Canadian Northern Railway. Official announcement is made that the townsite lots will be on sale within sixty days. As was the case in Prince Rupert, record prices will reign, some say $15,000 to $20,000 per lot. The lots nearest to what will be the highest priced railway lots are those across the road belonging to us. They are big 50 feet by 164 feet lots, to a 20-foot lane, and are about 300 yards off the waterfront. Prices now asked are only from $1,500 up with 3-year terms. These show opportunities for greatest quick profits ever offered in the country. No private subdivision in this Terminal can ever be so close as ours. Remember the highest prices at the sale will set the value to our lots. We recommend speedy action as only about fifty lots remain unsold. Ask us for maps and prices. Sole agents, the Selwyn Investment Company, Limited, 311 Dominion Trust Building, Vancouver, B.C.

WANTED—Position as inspector by an up-to-date insurance man who desires to make a change. Large experience and A1 references. Address Box 439, Monetary Times.

MEXICO TRAMWAYS COMPANY.

Notice is hereby given that a dividend of one and three-quarters per cent. (1¾%), being at the rate of 7 per cent. per annum, has been declared on the Capital Stock of the Mexico Tramways Company for the quarter ending September 30th, 1911, payable on the 1st day of November to shareholders of record at the close of business on the 14th day of October, 1911, and that the transfer books of the Company will be closed from the 16th to the 31st day of October, 1911, both days inclusive.

Dividend cheques for shareholders will be payable at par at the Canadian Bank of Commerce, Toronto, Canada; New York City, N.Y.; Mexico City, Mexico; London, England, and its branches.

The holders of bearer share warrants, on detaching from their share warrant Coupon No. 10, and lodging such coupon or coupons at the Canadian Bank of Commerce, Toronto, Montreal, New York City, or London, England, on or after the 1st day of November, 1911, will receive in exchange for each coupon the sum of one dollar and seventy-five cents ($1.75), representing the amount of the dividend.

By order of the Board.
W. E. DAVIDSON,
Secretary.

Toronto, Canada, Sept. 23rd, 1911.

Helping the Investor

It is at all times the endeavor of the staff of our Statistical Department to be of direct service to the investor in selecting the right class of securities.

What might be an attractive investment for one man, might not always be the class of investment which should be recommended to trustees or even to people of more limited means. The larger the yield the greater oftentimes is the risk. What the investor must seek to know is just how much chance he can take in his endeavor to make money.

The services of our Statistical Department are at your service, whether you are buying or selling.

Copy of Weekly Circular, which is of particular interest to Market followers, mailed free on request.

LAPSES FROM A HEAD OFFICE STANDPOINT.

(Continued from Page 1622.)

is an old axiom that "The business that stays is the business that pays."

The cure for this deplorable state of affairs does not alone rest with the head office. The influence of the agent is much more effective than correspondence from a far away office. A personal interview is, without any question, the best method of reinstating the lapsed policy. There are many policyholders who cannot be interviewed by the agent and in cases of this kind the head office has an important duty to perform. There should be in each head office a well organized re-instatement department. This department should be headed by a thoroughly experienced fieldman; one who has worked for some years with success in the field. This department, when they receive notice of a past-due premium, should commence right away to canvass this man by correspondence as if he were an entirely new prospect.

They should preach the gospel of life insurance. They should show by illustrations the loss that comes to the wives and children by the death of the father. There are many cases on record. We have probably all had personal experiences of this fact, that in many cases a man has died and upon search being made through his papers one or two policies have turned up with premiums past due. In many cases the wife has been upheld in her time of trouble by the fact that she will at least have sufficient to keep the wolf from the door, and investigation shows that the neglect upon the part of the policyholder, and on the part of the agent, has resulted in the policy being void. These facts should be placed before the lapsed policyholder. He should also be informed of the loss he sustains should he endeavor to take out a new insurance at an advanced rate owing to his increased age.

The letters should be sent to the lapsed policyholder under some follow-up system so that he will receive a letter on the subject about every two weeks. The make-up of the letters is of the greatest importance. Each should contain some new point of interest, some argument in a few words to catch the attention of the lapsed policyholder. What will interest one man will not interest another, so that it is necessary to cover all the different arguments that are made when canvassing a prospect. Some points in the first letter will bring a response from one man; some point in the third letter will bring a response from another, and so on. As soon as a reply is received you are on the right road to reinstatement.

◆

THE AGENT AND THE MEDICAL DEPARTMENT.

"The growth of a company depends on the vigor of its agents," said Mr. F. L. B. Jenny, medical director of the Federal Life of Chicago, at the recent American Life Underwriters' Convention at Pittsburg, "but upon the medical officer rests the principal responsibility of a careful selection of the business secured. The agency force should be instructed in the selection of risks, and thus much time could be saved which would otherwise be wasted on uninsurable prospects. The medical department should always be ready and willing to listen to complaints and reopen rejected cases. No medical department should allow cases to go through that are not up to standard, and agents should learn that writing bad risks neither helps them nor the company, even if such risks be accepted." Dr. Jenny took up the question of delays fully and showed how often that these arise from the agent rather than from the home office. He urged the point that successful co-operation of medical and field departments can only be based upon mutual confidence and understanding, and suggested that as a step thereto agency directors, general agents, medical officers, actuaries and prominent field workers attend and participate in the meetings of the convention.

Assets	4,000,000
Reserve	520.000

MONEY TO LOAN ON IMPROVED CITY AND TOWN PROPERTY

4% allowed on deposits of $1 and upwards

5% allowed on debentures of $100 or over, issued for terms of from 3 to ten years

CAPITAL STOCK 7% INVESTMENT

The Company, having disposed of its Capital Stock some years ago, has, therefore, none for sale, but the stock may be purchased through the Toronto, Winnipeg and Vancouver Stock Exchanges, at prices ranging from $122 to $125 per share.

The last seven half-yearly dividends have been at the rate of **9 per cent. per annum**, so that, at the current prices, the **Investment** will **net 7 per cent.**

The Company will be pleased to furnish prospective purchasers with its Financial Statement or other information bearing on the Company, and, if so desired, the Company will purchase the Stock for the investor through the Stock Exchange, or privately, at the current prices.

Since its inception the Company has enjoyed uninterrupted prosperity, and has taken a very active part in the development of the West. With the rapid growth of Western Canada, the demand for money is so great that the present profitable rates of interest will be maintained for years to come; and with such a desirable field for loaning operations, combined with a progressive management, the price of the Company's Stock should continue to advance, and with the prevailing high dividends, the Stock of this Company will undoubtedly be in great demand by those who desire a safe and profitable investment.

BOARD OF DIRECTORS: W. T. Alexander, Esq., Managing Director The Canada National Fire Insurance Company, President and Manager; E. S. Popham, Esq., M.D., Director Standard Trusts Company, Vice-President; Nicholas Bawlf, Esq., President Bawlf Grain Company, Director Bank of Toronto, Director Standard Trusts Company, Second Vice-President; Sir Gilbert Parker, M.P., London, England; E. The Waterous
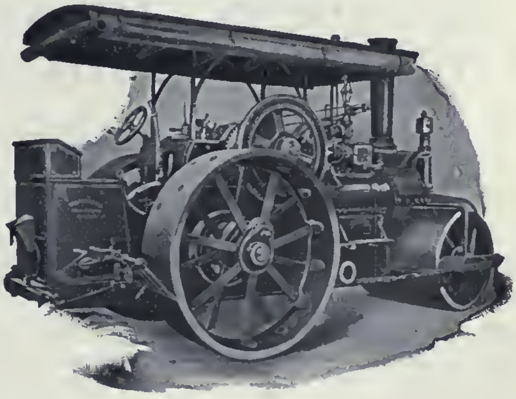
Double Cylinder
Steam Roller



Why we have sold more than thirty of these machines since January 1st.

The Waterous Roller is a road builder in every sense of the word. It can be used in every operation from driving the rock crusher, hauling road material, picking and plowing the old road, to the light, fast, finishing roll.

The twin-cylinder engine, with cranks set on the quarter, runs like a watch. No dead centres, no hanging up in a soft spot, no bucking on the reverse.

It is backed by a steady-steaming boiler, locomotive type, that produces more than enough steam for every working test. Throw off the governor and set it at a hill, and watch it take a 30% grade like an automobile.

Two speeds are supplied, which means fast and slow work under full steam pressure.

Outfit includes:—Rear draw bar, front clevis, driving pulley for rock crusher, full set of road picks, cylinder oil pump, and engine and boiler fittings second to none.

Ask the man on the machine.

The Waterous Engine Works Co., Ltd.
BRANTFORD, CANADA
